Total	\$3,269,312.00

Donors

As you can understand, one of the Goals of the MDG-F is to generate interest and attract funding from other donors. In order to be able to report on this goal in 2010, we would

require you to advise us if there has been any complementary financing provided for each programme as per following example:

Please use the same format as in the previous section (budget summary) to report figures (example 50,000.11) for fifty thousand US dollars and eleven cents

Type	Donor	Total	For 2010	For 2011	For 2012
------	-------	-------	----------	----------	----------

DEFINITIONS

1) PARALLEL FINANCING – refers to financing activities related to or complementary to the programme but whose funds are NOT channeled through Un agencies. Example: JAICA decides to finance 10 additional seminars to disseminate the objectives of the programme in additional communities.

2) COST SHARING – refers to financing that is channeled through one or more of the UN agencies executing a particular programme. Example: The Government of Italy gives UNESCO the equivalent of US \$ 200,000 to be spent on activities that expand the reach of planned activities and these funds are channeled through UNESCO.

3) COUNTERPART FUNDS - refers to funds provided by one or several government agencies (in kind or in cash) to expand the reach of the programme. These funds may or may not be channeled through a UN agency. Example: The Ministry of Water donates land to build a pilot 'village water treatment plant' The value of the contribution in kind or the amount of local currency contributed (if in cash) must be recalculated in US \$ and the resulting amount(s) is what is reported in the table above.

Beneficiaries

Beneficiary type	Targetted	Reached	Category of beneficiary	Type of service or goods delivered
men	297,172	148,086	Citizens/Men	Access to Health Services
All Women	320,853	160,426	Families	Access to Health Services
Children under five both mal and female	0	0	Children under 5/female	Interventions Targeting Population Living With HIV
Local NGOs and church organizations	0	0	Civil Society Organisations (number of organisations, not persons)	Behaviour Change Communication Initiatives (Hand Washing, Etc)
community leaders	0	0	Indigenous Organisations (number of organisation, not persons)	Behaviour Change Communication Initiatives (Hand Washing, Etc)

Section II: JP Progress

1 Narrative on progress, obstacles and contingency Measures

Please provide a brief overall assessment (1000 words) of the extent to which the joint programme components are progressing in relation to expected outcomes and outputs, as well as any measures taken for the sustainability of the joint programme during the reporting period. Please, provide examples if relevant. Try to describe facts avoiding interpretations or personal opinions

Plases describe three main achievements that the joint programme has had in this reporting period (max 100 words)

Major challenge in 2012 was drought in all three provinces in addition to seven more provinces of Angola. Since the beginning of the nutrition crisis and the kickoff of the response in June 2012, UNICEF continues its advocacy efforts to ensure that nutrition is higher on the political agenda and reflected in strategic national plans as well as response is scaled up in additional provinces. UNICEF support significantly contributed to expand coverage of IPF, OTP and CMAM in the 4 most at-risk provinces (Bie, Huambo, Kuanza Sul and Zaire) and promote the progressive expansion in other provinces. Major achievement of the program was timely support to Government for the rapid assessment of the situation and scaling up the food and nutrition security program in most vulnerable targeted municipalities. Ministry of health procured therapeutic products for the children under five to address severe acute malnutrition and UNICEF has supported provincial authorities in scaling up CMAM program and demonstrated scaling up of program in partnership with provincial and municipal authority, local and international NGOs, WHO at three levels that include hospital based treatment, outpatient therapeutic program and community based treatment. Ministry of agriculture distributed seeds to most vulnerable families and provided appropriate support to farmers like hand pumps etc

Progress in outcomes

To address the current nutrition crisis in 10 provinces including three focused provinces of joint MDG nutrition program an integrated management of acute malnutrition program scaled up and have covered 15,220 children with acute malnutrition. So far 48 IPF and 254 OTP are functional, and 70,000 children screened for acute malnutrition. In partnership with WHO, FAO and World Vision UNICEF has mobilized funds for nutrition crisis response. A capacity building plan prepared and implemented to build the capacity of health staff. In last six months in three provinces 54 staff trained on hospital based management of acute malnutrition, 315 nursing staff and 650 community health activists trained on community based management of acute malnutrition. Communication strategy developed and implemented in Bie for improving community awareness on prevention of under nutrition in children

Progress in outputs

Training material, job Aids, posters, and registers developed and printed for CMAM program in partnership with WHO and world vision, and now in use. A second round of advocacy workshops has been organized in the 4 Provinces in mid-January, with the participation of churches and traditional leaders (Sobas) of the most vulnerable areas where CMAM is being implemented. Churches and Sobas, who have been informed about the program progress, have committed to closely support the network of community activists, promoting and legitimizing their activity amongst families and mothers. Follow up meetings will be organized every 2-3 months in the affected municipalities, in collaboration with provincial and municipal administration authorities.

Communication for development (C4D), training tools and advocacy materials have been printed and distributed by end of December to health activists (CHAs) supervisors, NGOs, Provincial Public Health staff, churches and traditional leaders.

Measures taken for the sustainability of the joint programme

Consultative meetings with government, also integrating the critical interventions of the joint program under National health plan and with National plan of agriculture.

Are there difficulties in the implementation?

Coordination with Government

Administrative / Financial

Management: 1. Activity and output management. 2. Governance/Decision Making 4.Accountability

What are the causes of these difficulties?

External to the Joint Programme

MINARS reported that the main difficulties encountered during the implementation were the access to the target communities, due to poor road conditions, rains and lack of means of transport. The August election in Angola caused vacuum in provincial administration and caused implementation delays and difficulties in the implementation. We also encountered difficulties in obtaining satisfactory, verifiable, quality reports in a timely manner, particularly from Moxico and Cunene province.

Briefly describe the current difficulties the Joint Programme is facing

- Delayed meetings with Government officials lead to delays in decision making thus affecting time schedules for project implementation
- Timely response from government
- Staff working for MDG is in charge of other tasks and calendar conflict of the UN agencies make joint mission difficult
- lack of ownership , commitment and proactive action from the joint program implementing team at provincial level

Briefly describe the current external difficulties that delay implementation

Election period in second trimester has badly affected the program implementation.

At provincial level the coordination is very weak thus delaying operationalization of some activities

Explain the actions that are or will be taken to eliminate or mitigate the difficulties

- Continue follow up of the program
- partnership with local NGOs
- sharing program difficulties with key authorities to take action
- Throughout the implementation efforts were made as to bridge the constraints but some of hindrances are of political nature and UN system cannot get itself involved in those issues
- continue efforts by all agencies to strengthen coordination at provincial level.

2 Inter-Agency Coordination and Delivering as One

Is the joint programme still in line with the UNDAF?

Yes true

No false

If not, does the joint programme fit the national strategies?

Yes
No

What types of coordination mechanisms

Intersectoral coordination meeting meets regularly, specially in the current situation of nutrition crisis for weekly followup, review the progress of the program activities. UNICEF is the lead technical agency providing technical guidance and program coordination.

There is one internal coordination mechanism within UN.

Another one is joint coordination mechanism of both all partners and UN agencies and they meet when chair convene the meeting.

Please provide the values for each category of the indicator table below

Indicators	Baseline	Current Value	Means of verification	Collection methods
Number of managerial practices (financial, procurement, etc) implemented jointly by the UN implementing agencies for MDG-F JPs				
Number of joint analytical work (studies, diagnostic) undertaken jointly by UN implementing agencies for MDG-F JPs				
Number of joint missions undertaken jointly by UN implementing agencies for MDG-F JPs		25	Field trip reports of joint field mission	Mission planned with MOH, MINAGRI, WHO, FAO, UNICEF

3 Development Effectiveness: Paris Declaration and Accra Agenda for Action

Are Government and other national implementation partners involved in the implementation of activities and the delivery of outputs?

Not involved false
Slightly involved false
Fairly involved true
Fully involved false

In what kind of decisions and activities is the government involved?

Policy/decision making

Management: budget

Management: procurement

Management: service provision

Who leads and/or chair the PMC?

National Director of health , Ministry of Health, Angola
Co chaired by UN Resident Coordinator

Number of meetings with PMC chair

Three

Is civil society involved in the implementation of activities and the delivery of outputs?

Not involved false
Slightly involved false
Fairly involved true
Fully involved false

In what kind of decisions and activities is the civil society involved?

Management: budget
Management: service provision

Are the citizens involved in the implementation of activities and the delivery of outputs?

Not involved false
Slightly involved false
Fairly involved true
Fully involved false

In what kind of decisions and activities are the citizens involved?

Management: service provision

Where is the joint programme management unit seated?

National Government
Local Government

Current situation

Due to drought situation in all three provinces developed in 2012, implementation of the program activities has increased both related to MOH and MINAGRI. Since the beginning of the nutrition crisis and the kickoff of the response in June 2012, UNICEF continues its advocacy efforts to ensure that nutrition is higher on the political agenda and reflected in strategic national plans as well as response is scaled up in additional provinces. UNICEF support significantly contributed to expand coverage of IFC, OPT and CMAM in the 4 most at-risk provinces (Bie, Huambo, Kuanza Sul and Zaire) and promote the progressive expansion in other provinces. So far 48 IPF, 254 OTP and 2016 CHAs implementing CMAM are operational and have contributed to the treatment of 1382 children under-5 with SAM, 4891 children under-5 with MAM and the screening of other 56,471 children under-5. Steps have been taken to expand coverage, mainly through facility based treatment, in Huila and Benguela provinces also. However, serious concerns remain on the quality of treatment of malnutrition, with average 18 % case fatality rates in IPFs of 10 provinces.

4 Communication and Advocacy

Has the JP articulated an advocacy & communication strategy that helps advance its policy objectives and development outcomes?

Yes true
No false

Please provide a brief explanation of the objectives, key elements and target audience of this strategy

UNICEF CO will endeavor more effort for high level advocacy at national level but most importantly at provincial level where increasingly there are windows of opportunities for government's funds leverage, for partnerships with the GoA and Civil Society Organizations (Church alliances, Red Cross, NGOs, etc.). Because external resources (cash, in kind, technical) are unlikely to expand, UNICEF intends to work more closely with exiting partners (international and national). In addition, there exist real opportunities and possibilities for UNICEF to provide technical assistance and support that make quick difference.

The communication strategy will represent a conceptual framework and an operation tool to help mothers to adhere to the CMAM (Community Based Approach) treatment protocol and adopt lifesaving feeding practices. Advocacy is directed at different levels of decision makers - people who have the power to create policies, programmes and structures and to allocate resources. By persuading decision makers to decide in favor of a cause, advocacy seeks to develop, change or modify an existing law, policy and/or administrative practice that would enhance the emergency response. It is a continuous and adaptive process of gathering, organising and transforming information into arguments. These arguments are then communicated to decision makers, to influence their choices to raising resources (human and financial), or demonstrate political or social leadership and commitment to an emergency response. A goal of advocacy is to influence leaders and decision makers at different levels to make it easier for affected communities, families and individuals to make healthy choices for their own physical and social well-being, and ultimately to protect the rights of children. The purpose of social mobilisation is to bring together relevant inter-sectorial partners to determine needs and raise awareness for a particular objective. It involves the identification of organisations, institutions, groups, networks and communities who can contribute their efforts and resources in the current food and nutrition insecurity. BCC will be implemented mainly focusing on inter-personal and local mass media communication, which are meant to produce a higher and more direct impact on families and mothers living in the affected provinces.

What concrete gains are the advocacy and communication efforts outlined in the JP and/or national strategy contributing towards achieving?

Increased awareness on MDG related issues amongst citizens and governments
Increased dialogue among citizens, civil society, local national government in relation to development policy and practice
New/adopted policy and legislation that advance MDGs and related goals
Establishment and/or liaison with social networks to advance MDGs and related goals
Key moments/events of social mobilization that highlight issues
Media outreach and advocacy

What is the number and type of partnerships that have been established amongst different sectors of society to promote the achievement of the MDGs and related goals?

Faith-based organizations	75 churches
Social networks/coalitions	4
Local citizen groups	0
Private sector	1

Academic institutions 1
Media groups and journalist 6
Other

What outreach activities do the programme implement to ensure that local citizens have adequate access to information on the programme and opportunities to actively participate?

- Focus groups discussions
- Use of local communication mediums such radio, theatre groups, newspapers
- Open forum meetings
- Capacity building/trainings

Section III: Millenium Development Goals

Millenium Development Goals

Target 1.A: Halve, between 1990 and 2015, the proportion of people whose income is less than one dollar a day

JP Outcome	Beneficiaries	JP Indicator	Value
Strengthening community resilience and municipal and community management capacities to alleviate child hunger and under-nutrition	617025	Approved and enforced national policies and strategies in the areas of nutrition (YCF national strategy), food security and social protection. Improvement of local food production. Number of provinces with local FFS programs on extension policies. Data resulting from routine local / national information systems, national surveys and surveillance mechanisms effectively processed and used for planning and decision-making.	

Target 1.A: Halve, between 1990 and 2015, the proportion of people whose income is less than one dollar a day

JP Outcome	Beneficiaries	JP Indicator	Value
Improved advocacy for child protection from adverse effects of rising food prices – aiming to increase the commitment of the GoA in reforming policies and strategies to protect the most vulnerable children and pregnant women	617025	Vulnerability Assessment and Mapping (VAM) strengthened in the selected provinces . At least 60% of vulnerable households assisted in Bié and Moxico	

Target 4.A: Reduce by two-thirds, between 1990 and 2015, the under-five mortality rate

JP Outcome	Beneficiaries	JP Indicator	Value

Strengthening community resilience and municipal and community management capacities to alleviate child hunger and under-nutrition

865908

% of U5 reached twice a year with vitamin A & Albendazole during each year.
 High-impact coverage achievements (EPI, ANC, VAS / deworming, ITN, IPT, IFA, key family practices (EBF, CF, hygiene and sanitation...)
 N° of severely malnourished children reached.
 % of households consuming adequately iodized salt.
 % improve in local foods production.
 % of families applying appropriate diet diversification from local produced foods.

Additional Narrative Comments

Please provide any relevant information and contributions of the programme to de MDGs, whether at national or local level

Although the Ministry of Social Welfare and reintegration – MINARS - informed UNICEF that food purchased by the government have been distributed to the provinces there continues to be very little information made available by the Government in relation to the provision of food aid to affected populations. In November 2012, UNICEF produced for MINARS a guidance note on how to target food aid to the most vulnerable population. However, there appears to be limited eagerness from MINARS side to have partners involved in the government food distribution process.

Strong advocacy and consultative discussions are on-going with the Government and stakeholders to strengthen the interventions and expand coverage to other affected areas, beyond the four high risk provinces.

The inter-ministerial coordination mechanism continues to function and involve the main stakeholders from both GoA and partners (social affairs, Agriculture, Health, Water, and Civil Protection). Though UN agencies, NGOs and donors are regularly invited to participate, however, there are some concerns regarding the lack of involvement of the Ministry of Agriculture and the decrease on the motivation and engagement of MINARS to call the meetings. Coordination between UN and MOH is on a daily basis and continues to be very good.

Please provide other comments you would like to communicate to the MDG-F Secretariat

Section IV: General Thematic Indicators

1 Integrated approaches for reducing child hunger and under-nutrition promoted

1.1 Number of individuals suffering from under-nutrition and/or food insecurity in the areas of intervention

Comments

Reports from the in-patients facilities monthly activities as well as observations from field supervision visits show that a significant number of children (40%) continue to be found with edema (table below), underscoring the inadequate quality of food intake by these children. The nutrition situation in the country has not much improved yet; in spite of a regular rainy season there is not much improved access or availability of food at household level. The main affected provinces are Bie, Huambo, Huila, Benguela and Kwanza Sul:

Joint Programme Monitoring Report: Children, Food Security and Nutrition

b. Joint Programme M&E framework – July to December 2012

This template is the same as the one you will find in the JP documents. We have added 3 columns to provide spaces for baselines of the indicators as well as targets. All the values for indicators in this template are cumulative. This means the past values obtained accumulate (add up over time) as the joint programme gets implemented. We are expecting you to include not only the indicators but the value of these indicators. If you do not provide them, please explain the reason and how you are going to obtain this information for the next reporting period.

Expected Results (Outcomes & outputs) From Results Framework (Table 1)	Indicators From Results Framework (Table 1)	Baseline Baselines are a measure of the indicator at the start of the joint programme	Overall JP Expected target The desired level of improvement to be reached at the end of the joint programme	Achievement of Target to date The actual level of performance reached at the end of the reporting period	Means of verification From identified data and information sources	Collection methods (with indicative time frame & frequency) How is it to be obtained? Joint Programme Results Framework with financial information July to December 2012

This table refers to the cumulative financial progress of the joint programme implementation at the end of the semester. The financial figures from the inception of the programme to date accumulated (including all cumulative yearly disbursements). It is meant to be an update of your Results Framework included in your original programme document. You should provide a table for each output.

Definitions on financial categories

- **Total amount planned for the JP:** Complete allocated budget for the entire duration of the JP.
- **Estimated total amount committed:** This category includes all amount committed and disbursed to date.
- **Estimated total amount disbursed:** this category includes only funds disbursed, that have been spent to date.
- **Estimated % delivery rate:** Funds disbursed over funds transferred to date

Joint Program outcome 1: -Strengthening community resilience and municipal and community management capacities to alleviate child hunger and under-nutrition										
Joint Programme Outputs	Activity	YEAR			UN AGENCY	RESPONSIBLE PARTY	Estimated Implementation Progress			
		Y1	Y2	Y3			NATIONAL/ LOCAL	Total amount Planned for the JP	Estimated Total amount Committed	Estimated Total Amount Disbursed
Output 1.1: Approved and enforced national policies and strategies in the areas of nutrition IYCF national strategy), food security and social protection	Support the design and approval of the IYFC national strategy and dissemination		X		UNICEF	National/local	25,000	25,000	25,000	100%
	Organization of dissemination meetings at the national and provincial levels through the decentralized CNAC committees		X		UNICEF	National/local	40,000	40,000	15,000	37%
Output 1.2: Children U5 reached twice a year with Vitamin A and albendazol	Decentralized micro planning up to the municipality level for the multiple intervention mass campaigns twice a year in the selected provinces (24 municipal planning workshop)		X		UNICEF	National/local	120,000	120,000	70,000	58%

	Operational cost of the multiple intervention mass campaigns (implementation, supervision, monitoring, reporting) in selected provinces		X		UNICEF	National/local	480,000	480,000	320,000	76%
	Advocacy & social mobilization activities in selected provinces		X		UNICEF	National/local	270,000	270,000	160,000	59%
Output 1.3: Additional 700,000 population have access to full high-impact interventions in Bié, Moxico & Cunene	Introduction meetings for the revitalization of the municipal health services in selected province		X		UNICEF	National/local	9,000	9,000	9,000	100%
	Health mapping & negotiation to define geographical areas of responsibilities of each health units		X		UNICEF	National/local	27,500	27,500	27,400	99.6%
Output 1.4: Additional 12,000 severely malnourished children treated in the selected provinces (in-patient & out-patient)	Training of health staff to micro plan health & nutrition activities (including the community-based treatment of severe malnutrition) to ensure better availability and access to high-impact interventions in mapped health areas		X		UNICEF	National/local	150,000	150,000	100,000	67%
	Create / strengthen therapeutic feeding units (TFU) at each municipal health unit for in-patient treatment of severe complicated cases of malnutrition		X		UNICEF	National/local	45,000	45,000	45,000	100%
	Introduce the c-IMCI approach to promote key family practices		X		UNICEF	National/local	30,000	30,000	15,000	50%
	Provincial awareness campaigns on infant feeding practices, hygiene and sanitation practices		X		UNICEF	National/local	120,000	120,000	88,827	74%
	Output 1.5: At least 90% of household at the national level consuming iodized	Support the enforcement of the salt legislation (Quality control of salt in local markets)		X		UNICEF	National/local	50,000	50,000	27,000

salt	Design & implementation of a social marketing campaign for iodized salt consumption at the national level		X		UNICEF	National/local	100,000	100,000	29,870	29.87%
	Contribute to the national urinary iodine survey to assess the exposure of the population to the IDD risk		X		UNICEF	National/local	50,000	50,000	20,000	40%
Output 1.6: Vulnerability Assessment and Mapping (VAM) strengthened in the selected provinces	Training and mentoring on VAM		X		FAO	National/local	67,288	67,288	67,288	100%
Output 1.7: At least 60% of vulnerable households assisted in Bié and Moxico	Training of 600 social workers / community assistants (MINARS) on understanding of food and nutrition, and awareness / prevention of HIV/AIDS (Moxico & Bie)		X		IOM	National/local	342,193	355,194	355,194	100%
	Capacity-building and provision of basic knowledge to 1,200 community health workers in Bié & Moxico to promote and support key family practices within the communities beneficiaries of high-impact child survival packages (complementing the UNICEF package of health and nutrition)		X		IOM	National/local	147,000	121,554	112,060	94%
	Distribution of seed kits to 400 food-unsecured vulnerable families, through the PVM system supported by FAO in Bié and Moxico.		X		IOM	National/local	90,258	102,703	102,703	100%

Output 1.8: Improvement of local food production	Farmer fields schools. <ul style="list-style-type: none"> Capacity-building of extension workers and a local population on food security issues Training on agricultural techniques to diversify the production (increase cultivated land occupied, promotion of urban and peri-urban agriculture, production of honey, vegetables and aquaculture) 		X		FAO	National/local	347,416	347,416	291,816	84. %
Output 1.9: Family diet diversified from the increase in local foods production	Awareness activities to promote diet diversification using local foods available		X		UNICEF	National/local	239,580	239,580	175,657	73%
	Development of home and school gardens combined with participatory nutrition education sessions and cooking demonstrations at household and community level. Support to the implementation of School Feeding Program with local food production		X		FAO	National/local	260,000	260,000	210,027	81 %
Output 2.1: Improved advocacy for child protection from adverse effects of rising food prices – aiming to increase the commitment of the GoA in reforming policies and strategies to protect the most	Design advocacy tools for nutrition (national and provincial nutrition profiles based on the most recent nutrition survey data)		X		UNICEF	All UN and implementing partners	10,000	10,000	10,000	100%
	Organize advocacy events to dissemination of policies and legislation supporting the high-impact interventions in each selected provinces		X		UNICEF	All UN and implementing partners	45,000	45,000	30,000	67%

vulnerable children and pregnant women	Disseminate the approved national food and nutrition strategy, ensure effective application and work with existing committees dedicated to child nutrition and food security (national, provincial and municipal level) in line with the national food and nutrition security strategy.		X		FAO	All UN and implementing partners	91,301	91,301	83,179	91 %
Output 3.1: Data resulting from routine local / national information systems, national surveys and surveillance mechanisms effectively processed and used for planning and decision-making	Compilation and processing of existing data to provide insight to the situation analysis in the selected provinces		X		WHO	All UN and implementing partners	48,000	48,000	48,000	100%
	Revision of the existing Health Information System (HIS) to provide regular and timely and quality report		X		WHO	All UN and implementing partners	43,124	43,124	43,124	100%
	Assessment and reorganization of existing local information systems (health, agriculture, social) for better performance		X		WHO	All UN and implementing partners	45,000	45,000	45,000	100%
	Training of users of local information systems		X		WHO	All UN and implementing partners	240,000	240,000	240,000	100%
	Launch the nutrition surveillance system in each of the selected provinces		X		WHO	All UN and implementing partners	60,000	60,000	60,000	100%
	Coordination, launching workshop, communication and advocacy – BASELINE SURVEY		X		UNDP	All UN and implementing partners	237,000	237,000	109,440	46%

	Steering committee for food security within the National Food Security Unit is functional – effective coordination of food security interventions at the central level		X		FAO	All UN and implementing partners	37,779	37,779	34,867	92%
