MONITORING AND EVALUATION (to be completed by organization)

(A) Describe how you will monitor, evaluate and report on your project activities and achievements, including the frequency of monitoring. methodology (site visits, observations, remote monitoring external evaluation, etc.), and monitoring tools (reports, statistics, photographs, etc.). Als describe how findings will be used to adapt the project implementation strategy. (maximum 1500 characters) *

APD will place a strong focus on monitoring and evaluating the proposed activities. This will fall under the direct responsibility of the Project Manager based in Afmadow District, Lower Juba region. The Project Manager will be responsible for general project management, ensuring that any relevant data is collated and shared with the relevant stakeholder/jouality assurance of services delivered will be assessed through internal project reviews, including site visits, record review and beneficiaries' interviews. Special attention will be paid to address any bottlenecks in implementation and to ensure the continuous participation of the intended peneficiaries. In addition, quarterly reviews will be sent to donors. APD headquarters will review the implementation and financial status of the project, problems encountered and measures taken to solve them, as well any lessons learnt that might assist the project as a whole. The Project Manager will work closely with other project team in the district and record progress on the implementation of the project. Baseline surveys carried out before project implementation will be utilized in order to track progress made towards achieving the objectives. The project will be monitored throughout the project cycle by the project team while applying a participatory approach where all other stakeholders will be involved. The Project Manager will visit the sites on regular basis to oversee the activities and note their progress. The Project Officers will provide weekly, bi-weekly and monthly progress reports on the status of the project and the activities undertaken APD will share with OCHA the list of beneficiaries and contracts as reports on the satisfact on the project and the activities directance in a few and the project is the project which are the project activities will be assessed through monthly post distribution monitoring ,where the situation allows, and this noted in the monitoring the project activities will be assessed through monthly post distribution monitoring ,where the situation allows, and this noted in the monitoring the project is activities will be assessed through monthly post distribution monitoring and the project is activities will be assessed through monthly post distribution monitoring the project is activities will be assessed through monthly post distribution monitoring the project is activities will be assessed through monthly post distribution monitoring the project is activities will be assessed through monthly post distribution monitoring the project activities will be assessed through monthly post distribution monitoring the project activities will be assessed through monthly post distribution monitoring the project activities will be assessed through monthly post distribution monitoring the project activities will be assessed through monthly post distribution monitoring the project activities will be assessed through monthly post distribution monitoring the project activities will be assessed through monthly post distribution monitoring the project activities will be assessed through the project activities and the project activities are project activities are project activities and the project activities are project activities and the project activities are project activities and the project activities are project activities are project activities and the project activities are project activities and the project activities are project activities are project activities and the project activities are project reports.Among the things to be monitored shall include, but not limited to,number of people receiving cash, the amount of cash distributed to each household(whether is the right amount), what the people are spending the cash on, where they are buying the goods from, and the impact of the distribution on the local market. In addition, APD intends to hire an independent consultant to carry out an end-project evaluation to assess the efficiency, effectiveness, coverage, coherence, coordination, rationale/appropriateness, impact and sustainability of the project in an impartial and independent manner while documenting lessons learnt for future program/project improvement. All stakeholders (target beneficiaries, APD project staffs, community e and local administration representatives) will review the project progress to ensure the set project objectives are achieved. All project activities will be documented to ensure effective implementation, progress reports recorded on monthly basis and project activities with the documentation as well as lessons learnt will be compiled for success stories. The quarterly report as well as final evaluation report will be shared with CHF/CAP while conforming to their standards/format. The project finance officer will be responsible for project financial recordings & assisting the project manager in ensuring that financial reports are incorporated into the interim/final project reports.
