3. BACKGROUND AND NEEDS	SANAL	YSIS (plea	se adjust	row size as	needed	d)				
situation in the area, and list groups consulted, (maximum 1500 characters) * (2500 HHs) in Mudug region are in emergency or crises (FSNAU and FSC reports). 29% population in middle Juba region crises, total population of the region being 238877 out of which 59489 people live in Buale (UNDP), The enhanced rains river levels (October -December 2012) are likely to lead flooding utilimately destroying major livelihood assets. Humanita access remained limited, aggravating the fragile food security and nutrition situation in the Middle Juba region (FSNAU), pastoral areas of mudug, men are less affected than women due to limited movements of women. In the riverine liveliho middle juba boys are reported to be at higher risk than girls with 20.6% of boys compared to 17.1% of girls being stunted 23.6% of boys as compared to 18.2% of girls were underweight. A higher proportion of girls than boys were reportedly all prior to the assessment in the pastoral, agro-pastoral and riverine populations (FSNAU), FSNAU further indicated GAM for oedema rate of 21.11(17.7-24.8) very critical where gender result was found to be boys 27.8 (22.6-33.7) and Girls 15.1 18.8) and very critical. SAM rate (WH22-3-3 oedema) 6.6 (5.0-8.7) very critical as also shown in gender of boys 8.9 (6.2-girls 4.6 (2.8-7.4) very critical. Results on oedema cases revealed to be 0.7 very critical. Pregnant and lactating women (<23cm) showed 26.3 (18.8-34.2) very critical while non-pregnant and lactating women results in the MUAC <15.5 cm sh							ced rains and high tumanitarian 'SNAU). In the e livelihood of g stunted; and ortedly ill two weeks ad GAM (WHZ-c-2 Girls 15.1(12.1- 8.9 (6.2-12.7) and women (MUAC .5 cm showed 0.7			
capacities and needs in the proposed project locations. List any baseline data. If necessary, attach a table with information for each location. (maximum 1500 characters) *	Decreased herd size per household in xarardheere resulted in reduction of food intake and thus caused malnutrition in women, boys and girls. RAWA baseline survey indicated that Women are not able to get enough food for their family members, forcing them to skip meals for the children, over 70% men of the target households do not live with the family. Boys and girls are not able to go school and hardly get adequate meals thus exacerbating malnutrition. Food insecurity has led displacement of many sespecially men leaving their families while many more have gone as far as Punt-land and Yemen as retugees. Many young boys and girls have resorted to either join the fighting groups or piracy for survival too. The riverine people, most vulnerable livelihood have resorted to displace themselves to other parts of Somalia as IDPs. Mothers, boys and girls are always left behind helpless and unproductive thus exacerbating malnutrition, many girls and boys are leaving their homes to townish to do hard labor for survival. Young Boys are found attracted by warring factions for food as their parents are not able to provide basic needs of food, education and medicine while girls are commonly observed exposed to early marriage as a means living. RAWA organization in consultation with the community proposes to initiate cash for work and cash voucher interventions through DAHABSHIIL Money Transfer BANK, 450 households in emergency in Xarardheere will receive 100\$ per months for 4 months in lean period (January to April 2013) to enable them access food. RAWA proposes 1630 riverine people in Bushe in cash set assisted with employment creation scheme during the lean period from April to June in rehabilitation of flood broken/weakened river embankments and canals and provide to boats to the affected villages. The Selected mode of cash transfer through Dahabshili is more safe than other modes because, commended it and further said it will be seen as the normal economic way of remittance as the same can easily be monitored and verified,									
that your organization is currently implementing to address these needs.(maximum 1500 characters)	RAWA has implemented 1). Food security programs with CARE international in Xarardheere from 2000 to 2008. 2). Worked in partnership with WFP in Xarardheere for 2 years, 3). Worked in partnership of CARE international through construction/rehabilitation of shallow wells in Xarardheere, 4). Rehabilitated berkeds in partnership of FAO in 2007 famine in Xarardheere. 5) De stocking project in partnership of FAO in Xarardheere, 6). Fodder distribution with FAO, 7). Water voucher project funded by OCHA WASH cluster in Xarardheere, 8). Food voucher project in Buale in partnership of OCHAFAC and 9). WASH project in Buale in partnership of OCHAFAC and 94. WASH project in Buale in partnership of OCHAFAC and 94. WASH project in Buale in partnership of OCHAFAC and 95. WASH project in Buale in partnership of OCHAFAC and 96. WASH project in WFP (TSFP, Sanitation), and UNICEF (OTP) which will continue contractually until 2013. RAWA has planned cash for work project with FAO in Hobyo district to be signed anytime from now. Also, there is another planned project including WASH program in the CHF 2012 with WASH cluster which will as intended complement eventually with this CHF proposal in FSC. This proposed intervention addresses the food needs as it provides cash to those in emergency through cash voucher for 4 months as per the cluster guideline and cash for work, this assists the livelihood building of the same people in emergency and the others in crises. The riverine people in crises are intended to be assisted with employment creation for 3 months as they will be rehabilitating infrastructure that will build up their livelihoods and resilience. The recent audit recommendations of RAWAs past projects are considered for this proposal.

## 5. MONITORING AND EVALUATION (to be completed by organization)

(A) Describe how you will monitor, evaluate and report on your project activities and achievements, including the frequency of monitoring, methodology (site visits, observations, remote monitoring, external evaluation, etc.), and monitoring tools (reports, statistics, photographs, etc.). Also describe how findings will be used to adapt the project implementation strategy. (maximum 1500 characters) \*

RAWA has already and will continue collecting market prices of key food and non food items in Xarardheere and Buale districts. Observed prices of rice preferred food such as; 50Kgs is 33 USD\$, Maize 50Kgs is 14.5 USD\$, V.oii 5Kgs USD\$ 5, Sugar (50Kgs) USD\$ 40.4 while Shoat costs to USD\$ 46.The project is planned to be monitored daily/weekly/monthly by different officers from RAWA, besides the monitoring of RAWA staff (monitoring officer, community liaison officer, and supervisors) community elders, women group and project implementation committee (PIC) will also continually monitor along the RAWA officers and will conduct their own monitoring of the project. The monitoring tools those will be applied include individual and group interview, collection of market food prices, market fluctuation in dollar exchange rate, household use of the cash, focus group discussion, measurement, document review, photos, payment checklists and site visitation. RAWA will conduct post distribution monitoring on monnthly basis, also RAWA will monitor A). Amount of cash seach household has received 2). Number of people received cash 3). What people are spending cash on 4). Where people are buying key goods 5). Do people receive right amount 6). What is happening to the prices of the local market.RAWA will submit monthly reports of the project progress. and distribution of cash wouchers. Conducting post distribution monitoring on monthly basis where the situation permits. At a minimum, RAWA will monitor the following; number of people receiving cash, how much money is being distributed to each household, what are people spending cash on, where are people buying key goods, what is happening to prices in local markets and whether people received the amount of cash as planned. Planned to 0.6 M3 soil moved per day in canals/river embankment excavated per day per worker and 15m2 to 24M2 in roads rehabilitation. RAWA and committee have chosen by the project will be measured against the indicators of the project such as number of beneficiar

(B) Work Plan
Must be in line with the log fram
Mark "X" to indicate the period
activity will be carried out
