

Common Humanitarian Fund for South Sudan

CHF Reserve Application Template

For further CHF information please visit <http://unocha.org/south-sudan/financing/common-humanitarian-fund> or contact the CHF Technical Secretariat CHFsouthsudan@un.org

Note:

This application shall be submitted to the cluster coordinator and co-coordinator for the relevant cluster with copy to the CHF Technical Secretariat.

If the project is not already in the CAP a project sheet must also be prepared and submitted into OPS.

CHF Reserve Grant Request Summary																			
Requesting Organisation:	Mercy Corps																		
Project Title:	Improved agricultural livelihoods and provision of safety nets for vulnerable at risk households in the Abyei Administrative Area (AAA), Unity, Warrap and Northern Bahr el Ghazal (NBeG)																		
Project Code (if CAP project):	SSD-14/F/60638																		
Cluster/Sector:	FSL																		
Geographic areas of implementation (list State, County and if possible Payam. If the project is covering more than one State please indicate percentage per state):	State %	County, Payam																	
	Warrap	100%	Twic (Ajakuac, Aweng and Tularie)																
Targeted population	IDPs (70%) and host (30%)																		
Total project budget:	400,000 USD																		
Amount requested from CHF Reserve:	400,000 USD																		
Are some activities in this project proposal co-funded?	Yes <input type="checkbox"/> (if yes, list the item and indicate the amount under column in of the budget sheet) No <input checked="" type="checkbox"/> (if no, indicate if additional funding will be sought to complement the CHF Reserve in section II/B)																		
Project Duration (indicate number of months, earliest starting date will be Allocation approval date):	5 months (1 st April – 31 st August 2014)																		
Total number of direct beneficiaries targeted by the CHF Reserve grant request (disaggregated by sex/age):	1,500 households (10,500 Individuals); at least 60% of the HHs will be female-headed																		
	<table border="1"> <thead> <tr> <th>ESTIMATE</th> <th>Male</th> <th>Female</th> <th>Total</th> </tr> </thead> <tbody> <tr> <td>Adult</td> <td>2,100</td> <td>3,150</td> <td>5,250</td> </tr> <tr> <td>Under 18</td> <td>2,625</td> <td>2,625</td> <td>5,250</td> </tr> <tr> <td>Total</td> <td>4,725</td> <td>5,775</td> <td>10,500</td> </tr> </tbody> </table>			ESTIMATE	Male	Female	Total	Adult	2,100	3,150	5,250	Under 18	2,625	2,625	5,250	Total	4,725	5,775	10,500
ESTIMATE	Male	Female	Total																
Adult	2,100	3,150	5,250																
Under 18	2,625	2,625	5,250

SECTION II

A. Humanitarian Context Analysis

- In approximately 500 words briefly describe the humanitarian situation in the specific region/area where CHF Reserve activities are planned for with reference to assessments and key data, including the number and type of the affected population¹.
- Also explain relation to the work of other partners in the area.

Fighting between government and opposition forces erupted on December 15, 2013, resulting in several thousand fatalities and internal displacement in Jonglei, Unity and Upper Nile states very rapidly. According to UN OCHA situation report, the number of people displaced due to this crisis is 708,900 while another 200,000 people fled the country. Needs among displaced people for food and non-food items are huge. In addition to the states directly impacted, neighbouring states hosting IDPs are equally impacted by shouldering the burden of assisting the displaced households (HHs). The host community in the states with relative “tranquillity” is forced to assist IDPs depleting its already scarce food and non-food resources – these areas of need must not be forgotten lest they descend into extreme food insecurity

Twic County in Warrap state is home to 13,100 IDPs mainly from Mayom and Abiemnom counties in Unity state. While some of the IDPs are sheltered by the host population others are staying in camps. The majority of these IDPs arrived in Twic County in desperate search for safety and protection and as such have left all their belongings behind. To worsen their situation, these displaced people were already experiencing chronic food insecurity prior to the December 2013 crisis. SMART surveys conducted by CARE in Unity state in June 2013 revealed GAM rates of 28.0% and SAM rates of 7.6% - well above WHO emergency thresholds. A nutrition screening conducted by ACF in February 2014 among IDP children (0-59 month) from Unity state after their arrival in Twic county further revealed a SAM rate of 5.8% (CI 4.6-8.1) and GAM rates of 28.1% - again above emergency thresholds, and showing the worsening food security situation among the IDPs from Unity state and the need for urgent intervention to avert the situation.

The compound effect of the pre-crisis distress level food insecurity and the lack of viable food & income source at their current destination further deteriorates the food & nutrition situation among the displaced population and calls for an urgent food security intervention. The population hosting the displaced people from Unity State in Twic County was extensively affected by floods in 2013 which resulted in loss of up to 50% of the crop harvest and displaced close to 10,000 people (SRRRC Twic County). Focus Group Discussions (FGDs) conducted by Mercy Corps (during the Food for Assets project consultation) with the host community in Twic indicated that the community was already resorting into negative coping strategies like eating seed stocks even before the crisis. The critical food security situation in Twic county is further strengthened by the findings of ACF’s nutrition assessment in September 2013 which indicates a SAM rate of 5.8% and GAM rate of 32%, both of which are alarmingly high.

Markets in Twic and surrounding counties in Warrap state have recovered moderately well from the crisis and are stocked up with adequate food supplies although prices have significantly increased making the most basic food items unaffordable for the most vulnerable HHs. Market assessments conducted by Mercy Corps (Rapid Assessment of Markets (RAM), in January 2014 & Emergency Market Mapping and Analysis (EMMA) in March 2014) in Warrap state indicated that food prices have increased by at least 25%. The price of a malwa of sorghum has since increased to 15 SSP compared to 12 SSP around this time last year. Although market purchases would provide immediate relief to the current food shortage among the displaced population, IDPs need to be assisted by improving their purchasing power through cash based assistance to be able to afford food & non-food commodities. Similarly the host community, who have access to farm land, need to be assisted to regain its production potential to plant staple crops in the upcoming rainy season (from May).

B. Grant Request Justification

- In approximately 300 words describe why CHF Reserve funding is sought for this project, and why this particular activity is important. Explain why the activity is time critical and need rapid funding through the CHF Reserve.
- Confirm that your organization’s internal reserves or other donor funds are not immediately available and/or appropriate to fund the proposed activities. Please provide information on which donors or what other funding sources have been approached.
- Briefly describe the value added by your organization
- Describe why this activity was not funded through the CHF standard allocation process, and what has changed since that process was completed to make this project emerge as a priority.

Given the critical food security situation in Twic county, especially among the IDPs population, there is need for an immediate action to combat a worsening situation. As the displaced population is currently enduring the peak hunger season, urgent intervention is required to avert a spike in food insecurity, malnutrition and disease. Hence, this action is time-critical and needs rapid funding through the CHF reserve. Although food commodities are currently available in the market, prices are unaffordable for the IDPs. The proposed intervention provides immediate access to cash for the displaced population through both conditional and unconditional cash transfers, and boosts the purchasing power of the IDP population to be able afforded basic food and non-food commodities in market. An immediate intervention at the peak of the lean season prevents further consequences triggered by lingering food

¹ To the extent possible reference needs assessment findings and include key data such as mortality and morbidity rates and nutritional status, and how the data differs among specific groups and/or geographic regions. Refer situation/data/indicators to national and/or global standards.

insecurity including malnutrition among children.

Similar efforts need to be made to improve the food security situation among the vulnerable host population. Residents of Twic county have experienced devastating flood and displacement prior to the December 2013 crisis. The floods caused extensive damage to crop fields and reduced harvest from previous season by almost 50%. In addition, the host community was forced to shoulder the burden of assisting IDPs, further depleting its scarce food resources. Consequently, the host community was forced to adopt negative coping mechanism including consuming seed stocks. Therefore, timely assistance needs to be provided to the vulnerable host population to enable them re-enter the production cycle. As the next standard CHF allocation will only be launched after the CAP midyear review in June/July, the CHF reserve remains the appropriate funding stream to provide agriculture inputs to the community in time to plant before the rain starts May/June. Through the proposed action, Mercy Corps will provide seeds and tools to the host community to enable them grow stable crops in the main planting season. This action will help to avert a devastating food shortage and an anticipated famine in 2015.

C. Project Description (For CHF Component only)

i) Contribution to Cluster Objectives

Briefly describe how CHF funding will be used to contribute to the achievement of the cluster priority activities identified for this allocation.

Through the proposed project, Mercy Corps seeks to improve food security among recently displaced HHs and extremely vulnerable host communities in Twic county. Through cash assistance, IDPs will be able to have immediate access to food commodities. The action will improve the purchasing power of HHs, thereby improving food security and nutrition at the HH level. The intervention directly contributes to the food security cluster objective which is *to increase access to food for people affected by displacement and food insecure HHs*. In the same manner the proposed project aims at providing critical agriculture inputs to the vulnerable host community in Twic county to enable them engage in subsistence farming in the main planting season. The project provides seeds and tools to farmers to assist cultivation of stable crops in the upcoming rainy season. This project is in line with the cluster priority which is *to deliver critical productive inputs to protect livelihoods (agricultural production/Fishing gears)*.

ii) Project Objective

State the objective/s of this CHF project. Objective/s should be Specific, Measurable, Achievable, Relevant and Time-bound (SMART)

Improve the food security situation of 1,500 HHs in areas affected by conflict in Twic county.

iii) Proposed Activities

Present the project strategy (**what the project intends to do, and how it intends to do it**). There should be a logical flow to the strategy: activities should lead to the outputs, which should contribute towards the outcomes, which should ultimately lead to the project objective.

List the main activities and results to be implemented with CHF funding. As much as possible link activities to the exact location of the operation and the corresponding number of direct beneficiaries (broken down by age and gender to the extent possible).

1. Beneficiary Selection

Working through village committees, IDP leadership, payam administrators and local chiefs, SSRRC and FSL cluster partners, Mercy Corps will identify locations that have high concentrations of IDPs, and vulnerable host communities hosting IDPs, to will be targeted by this project. Through this participatory process. Mercy Corps will identify and register 1,500 beneficiary HHs. 1,000 beneficiaries will be purely IDPs while 500 will be vulnerable host community HHs supporting the IDPs. Vulnerability criteria (including HH size, presence of PWD or PLW-HIV in the HH, female-headed and child-headed HHs) will be used to select the beneficiaries. Once beneficiaries are registered, Mercy Corps will conduct rapid verification of sample HHs to ascertain that the beneficiaries prioritized for assistance meet the vulnerability parameters. As discussed above, female-headed HHs will be prioritized and will constitute at least 60% of the total beneficiary target.

2. Cash for Work (CfW) projects

This intervention will target 500 IDP HHs for CfW activities. IDP HHs will access temporary employment for three months to earn income and improve their purchasing power. The emphasis of the CfW project will be on labour intensive projects that can employ the maximum number of beneficiaries. Women who primarily shoulder the burden of securing HH food will be given special consideration to participate in this project. Through the CfW projects community assets such as waste disposal pits and landfills, flood mitigating channels and dikes diverting water from the camps & market access roads etc. will be constructed. A total of 500 HHs will participate in the CfW activities and benefit from new employment schemes during the project duration. Mercy Corps will set the daily wage below market rates to ensure those most vulnerable are targeted and the CfW intervention doesn't compete with local enterprises for manpower.

3. Unconditional cash transfers

To cater for the needs of labour-poor HHs who cannot participate in labour-intensive CfW activities, unconditional cash transfer will be provided to as part of this project. Mercy Corps will target 500 labour-poor yet at risk HHs for monthly cash transfer for four months. A cash transfer committee (CTC) will be selected from within the IDP community to ensure transparency and proper targeting. The SRRC & payam administrators will help in locating safe and secure locations for conducting the cash transfers.

Across both cash assistance modalities, Mercy Corps will conduct post distribution monitoring to assess the utilization of cash received through this project

4. Provision of Seeds and Tools

Mercy Corps will provide seeds and tools for 500 vulnerable host community HHs. Mercy Corps will organize seed fairs and encourage local vendors to provide seeds for staple crops. This intervention targets vulnerable host community members. HHs with access to land and labour but that have no access to production inputs will be assisted through the agriculture fair. Seeds will be tested by the Ministry of Agriculture to ensure germination thresholds are adhered to.

iv). Cross Cutting Issues

Briefly describe how cross-cutting issues (e.g. gender, environment, HIV/AIDS) are addressed in the project implementation.

Environment

The proposed project will help meet the food needs of vulnerable HHs and enable them to minimize their reliance on negative coping strategies such as sales of charcoal and fire wood, which have adverse environmental impacts. CfW activities will also focus on projects that contribute to environmental rehabilitation, for instance environmental sanitation such as digging solid water disposal pits and landfills around IDP settlements.

HIV

Mercy Corps will ensure that during beneficiary selection, vulnerable HHs with HIV positive HH heads are prioritized. Particularly, these beneficiaries will be eligible to participate in CfW and Cash Transfer projects. Furthermore, working with village committees and other partners, HHs with orphans and vulnerable children (OVC) or supporting OVCs will be prioritized for assistance through cash for work and input assistance project.

Gender

The project will ensure equitable involvement of both men and women during the implementation. Selection of project beneficiaries will give equal opportunities to men and women. Identification of the CfW projects also takes the priority needs of both men and women into consideration. This will be ensured through nominating equal numbers of male and female participants both to the beneficiary selection and project identification committees. Special emphasis will be given to include female headed HHs and ensure they benefit from this action.

v) Expected Result/s

Briefly describe (in no more than 100 words) the results you expect to achieve at the end of the CHF grant period.

1. Improved and immediate access to food for 1000 vulnerable IDP HHs, through participation in CfW and Cash transfer activities. 500 HHs will participate in CfW projects; another 500 will receive unconditional cash increasing purchasing power and enabling vulnerable families to meet their immediate food needs.
2. 500 beneficiary HHs have access to inputs to cultivate stable food crops in the rainy season. Mercy Corps will provide seeds and tools to 500 host HHs to promote food production, improving their productive capacity. This intervention will improve food security among the host community and avert an anticipated famine in 2015.

List below the output indicators you will use to measure the progress and achievement of your project results. At least three of the indicators should be taken from the cluster defined Standard Output Indicators (SOI) (annexed). Put a cross (x) in the first column to identify the cluster defined SOI. Indicate as well the total number of direct beneficiaries disaggregated by gender and age. Add as many indicators as relevant to measure your project results. Ensure these indicators will be measurable during the project implementation.

SOI (X)	#	Output Indicators <small>(Ensure the output indicators are consistent with the output indicators that will be used in the results framework section III of this project proposal).</small>	Target (indicate numbers or percentages) <small>(Targets should be disaggregated by age and sex as per the standard output indicators list and add-up to the number of direct beneficiaries identified page 1)</small>
	1.	Number of HHs employed under CFW / Number of HH who receive cash for work transfers	500 (at least 60% female-headed)
	2.	Number of CFW projects	5
	3.	Number of HHs under unconditional/direct cash transfer	500
	4.	Number of HHs receiving seeds and tools	500 – According with the CHF Standard Output Indicators – This indicator will be broken down by number of people and type of inputs provided at the reporting stage (target and results achieved)

vi) Implementation Mechanism

Describe planned mechanisms for implementation of the project. Explain if it is implemented through implementing partners such as NGOs, government actors, or other outside contractors.

Mercy Corps will directly implement all of the proposed activities. To ensure sustainability and proper targeting, local community, traditional leaders and government counterparts will be involved in beneficiary identification and selection. Mercy Corps will coordinate with the Food Security and Livelihoods cluster at state and national levels, sharing information on implementation challenges and lessons learned from the project.

Mercy Corps' Project Manager in Wunrok will oversee the implementation of the proposed project. Project Officers will be deployed to coordinate the day-to-day activities for Aweng, Ajacuac and Tularie. Further operational support for the project implementation will be provided through Mercy Corps field offices located in Agok. The country office in Juba will provide overall guidance and direction for project implementation and assist with logistical support as required. The Juba office also serves as a link to the National Food Security and Livelihoods Cluster and provides a platform for information exchange between the field team and stakeholders at the national level.

Mercy Corps will collaborate with other humanitarian actors, and participate within the food security and livelihoods cluster at national and state levels. Furthermore, Mercy Corps will work closely with the Chamber of Commerce and food security and livelihoods partners to create synergy with existing projects. Mercy Corps will draw from experience obtained in implementing similar project globally and utilize best practices to ensure the success of the proposed project.

viii) Monitoring and Reporting Plan

Describe how you will monitor and report on the progress and achievements of the project. Notably:

1. Explain how will you measure whether a) Activities have been conducted, b) Results have been achieved, c) Cross-cutting issues have been addressed, and d) Project objectives have been met.
2. Indicate what are the monitoring institutional arrangements (e.g. monitoring team, monitoring schedule, updates to management etc.) and monitoring tools and technics will be used to collect data on the indicators to monitor the progress towards the results achieved. Please provide an indication of the frequency data will be collected and if there is already a baseline for the indicators or if a baseline will be collected.
3. Describe how you will analyze the data collected and report on the project achievements in comparison with the project strategy.

4. Ensure key monitoring and reporting activities are included in the project workplan (Section III)².

The project will be monitored on a daily, weekly and monthly basis by the project staff, with the participation of stakeholders involved in the implementation – such as community leaders, SSRRC, the ministry of agriculture, and other food security partners. Routine monitoring will focus on assessing project achievements/accomplishments versus targets, identifying issues and concerns affecting project implementation, and designing courses of action necessary to address those issues. A regular staff feedback session will be conducted monthly to analyse monitoring results and prepare action plans. This will help ensure that activities are implemented and results are achieved. Beneficiary registration, attendance forms, cash-for-work completion registers, daily attendance and pay sheets, field visit reports and photos will be important tools to measure performance. In addition field weekly reports will be used to monitor progress on weekly basis.

A quarterly report and review workshop will further ensure the project is on course. Standard Monitoring tools and data collection forms have been developed for previous projects and Mercy Corps' Monitoring, Evaluation and Learning (MEL) Unit maintains a rich collection in the archives stored in Mercy Corps' digital library. These tools have been customized to suit the M&E and data collection needs for the proposed project. Data will be analysed by M&E staff earmarked for the project and the results will help in making decisions on the implementation approaches of the project. Progress reports will be submitted to the FSL cluster on a quarterly basis. In addition, M&E findings such as lessons learnt and challenges encountered/solutions given will be shared with Ministry of Agriculture and other stakeholders involved in food security sector.

E. Total funding secured for the CAP project

Please add details of secured funds from other sources for the project in the CAP.

Source/donor and date (month, year)	Amount (USD)

² CHF minimum narrative reporting requirements will include the submission of a final narrative report and where applicable a narrative mid-term report. Narrative reports will include a progress on the project achievements using the outputs indicators listed in this project proposal.

SECTION III:

The logical framework is a tool to present how the implementation of CHF funded activities and their results (outputs and outcomes) will contribute to achieving higher level humanitarian results (project and cluster objectives) and how these results will be measured.

Fill in the logical framework below for this project proposal ensuring the information provided is in accordance with the strategies and activities described in the narrative section of this proposal, in particular section C. Follow the guidance and the structure (Goal, objective, outcome, outputs and activities) and the numbering. Add/remove lines according to the project strategy.
