

Project Proposal

Organization	WFP (World Food Programme)				
Project Title	PRRO 200447 - Assistance to Address Food Insecurity and Undernutrition				
Fund Code	AFG-14/SA2/N/UN/272				
Primary Cluster	NUTRITION	Secondary Cluster	None		
Allocation Type	2nd Round of Standard Allocation / Call for Proposals		Allocation Category Type		
Project Budget	4,505,680.57	Project Duration	12 months		
Planned Start Date	06/11/2014	Planned End Date	05/11/2015		
OPS Details	OPS Code	OPS Budget	0.00		
	OPS Project Ranking	OPS Gender Marker			
Project Beneficiaries		Men	Women	Boys	Girls
	Beneficiary Summary	0	0	50380	48405
					Total
					98,785
Indirect Beneficiaries	The 98,785 families, primarily the female caregivers, of OPD-MAM children (girls and boys), who will benefit from nutrition, health and hygiene education and communication activities, which will emphasise optimal maternal, infant and young child feeding and care practices.			Catchment Population	
Implementing Partners				Other funding Secured For the Same Project (to date)	
Organization primary focal point contact details	Name: Marcus Prior Title: Deputy Head of Programme

BACKGROUND INFORMATION

1. Project rationale. Humanitarian context: Give a specific description of the humanitarian situation in the target region based on newest data available (indicate source) (Maximum of 1500 characters)	Afghanistan has been severely affected by the repercussions of more than three decades of conflict. Already one of the poorest countries in the world, conditions of extreme poverty prevail and more than one-third of its population are too poor to access the few basic services, leading to serious nutrition risks experienced by the most vulnerable - women and children. The levels of hunger and undernutrition in Afghanistan remain persistently and unacceptably high. One of the ten countries in the world with the highest burden of undernourished children, many thousands of children die needlessly each year because they lack access to adequate food and nutrition. According to the National Risk and Vulnerability Assessment 2011-12, 36% of the population live in absolute poverty and cannot meet their basic needs. Food insecurity affects large numbers of vulnerable Afghan households. Around 7.6 million people (30.1%) are food insecure, with an estimated 2.2 million (8.5%) very severely, 2.4 million (9.5%) severely, and 3.1 million (12.2%) moderately food insecure. The context of maternal and child nutrition status in Afghanistan is characterised by a high prevalence of malnutrition that also includes micronutrient deficiencies due to inadequate dietary intake, frequent infections and poor maternal outcomes. The National Nutrition Survey 2013 showed that some two-fifths (40.1%) of the country's children under five-years of age were chronically malnourished (stunted), 9.5% were acutely malnourished (wasted) and 24.6% underweight. Maternal undernutrition was equally concerning with 14.1% of Afghan women of reproductive age undernourished with a mean body mass index (BMI) <18.5. Underweight women are more likely to give birth to low birth weight babies at higher risk of neonatal and infant death and stunted growth. Worryingly, an estimated one-half (52.3%) of adolescent girls aged ten to 19 years were also found to be underweight by BMI. Approximately thirty-eight percent (37.9%) of children 6-59 months of age and two-fifths (40.4%) of women aged 15 to 49 years are anaemic, of which more than one-fifth (26.1%) of children and one-quarter of women (24%) are also iron deficient. Iron-deficiency anaemia in children under two years is strongly associated with irreparable brain and physical development. Vitamin A deficiency is exceedingly high amongst children under-five years (50.4%), as is vitamin D (81%).
2. Needs assessment. Describe the capacities in place, then identify the gaps (previous and new). Explain the specific needs of your target group(s) in detail. State how the needs assessment was conducted (who consulted whom, how and when?). List any baseline data	Under its PRRO 2014-16 (see, attached PRRO 200447), WFP will assist up to 3.7 million people in 184 of Afghanistan's districts where food insecurity prevalence is greater than 30 percent and in districts where GAM rates exceed 10 percent. The findings of the National Nutrition Survey 2013 (NNS 2013), and the National Risk and Vulnerability Analysis 2011-12 (NRVA 2011-12) will be the primary basis for geographic and beneficiary targeting. An Integrated Context Analysis (see attached ICA), which triangulated food insecurity prevalence between 2007-08 and 2011-12, frequency and severity of natural disasters and environmental degradation from 1951 to 2010, and the probability of occurrence of droughts and floods from 2011 to 2015 will, as appropriate, be an additional targeting reference. Results of current and future nutrition and food security surveys and assessments by WFP and other agencies, and consultations with affected communities, will be used to refine both geographical targeting and beneficiary numbers. Beneficiary caseloads for WFP's TSFP interventions (OPD-MAM) are estimated using provincial-level GAM and MAM rates (NNS 2013) and any other relevant district-level nutrition surveys, as well as operational reach determined in consultation with the MoPH and WFP partners. The Nutrition Cluster's prioritisation of very highly vulnerable districts strongly informs this funding request (see, attached CHF_WFP Planning Figures_MAM+PLW_20140901.xml).
3. Activities. List and describe the activities that your organization is currently implementing to address these needs	- WFP TSFP (OPD-MAM) activities will focus on districts within provinces covered by WFP's operational reach (PRRO 200447) through its six Area/Sub-Offices in Faizabad, Herat, Jalalabad, Mazar-e-Sharif, Kabul and Kandahar, and identified by the Nutrition Cluster as very high priority. - WFP's individual TSFP (OPD-MAM) beneficiaries will be identified through screening in communities and health care facilities using mid-upper arm circumference (MUAC) measurements. MAM children will be admitted into the TSFP (OPD-MAM) with MUAC >115 mm to 125 mm per national guidance. MAM children may also be admitted based on weight-for-height of > -3 z-scores to < -2 z-scores. - WFP's TSFPs (OPD-MAM) will provide each moderately acutely malnourished child with (on average) 8.2 kg of specialized nutritious foods, for approximately 3 months of treatment, until discharged as cured. In-line global and national standards, MAM children will be discharged from the programme once they reach a MUAC of >125 mm for two consecutive visits, or three months in the TSFP (OPD-MAM). - Although not included in this funding proposal but integral to the treatment of maternal and child undernutrition, and aligned with national guidance, a parallel WFP activity within the TSFPs (OPD-MAM) are to treat acutely malnourished PLW (MUAC <230 mm), and promote their uptake of ante/post-natal care. From the second trimester of pregnancy and until infants of breastfeeding women reach six months of age, each acutely malnourished pregnant or lactating woman (PLW) is treated with a monthly ration of fortified wheat flour, fortified vegetable oil, pulses, iodized salt, and daily multiple micronutrient supplements. - Through WFP's TSFPs (OPD-MAM), evidence-based nutrition and health education and communication activities will be provided to caregivers and pregnant and lactating women to support optimal infant and young child feeding practices, reduction of micronutrient deficiencies and healthy growth and development. These activities will promote the participation of fathers and male members of households in the feeding and nutritional care of children - WFP, in collaboration with the Ministry of Public Health, Basic Package of Health Services implementers (who are WFP's Cooperating Partners), UNICEF, WHO and the Nutrition Cluster, will aim to enhance the capacity of its partners to deliver quality TSFP (OPD-MAM) activities through the IMAM approach, and by providing technical and financial support to training in nutritional response, programming, surveillance and monitoring and evaluation. - WFP will continue its advocacy for integrated responses to nutritionally vulnerable populations across sectors, particularly those affected by conflict and natural disaster. WFP will consistently link its nutrition response with other activities/services such as food security; health; hygiene; water and sanitation; agriculture; and livelihoods; and will participate proactively in protection and gender network meetings.

LOGICAL FRAMEWORK

Overall project objective	To treat moderate acute malnutrition, and prevent severe acute malnutrition, in children aged 6-59 months in areas identified as having a high prevalence of acute malnutrition and high food insecurity.
----------------------------------	---

Logical Framework details for NUTRITION

Cluster objectives	Strategic Response Plan (SRP) objectives	Percentage of activities
---------------------------	---	---------------------------------

Objective 1. Prevalence of acute malnutrition in U5 and PLW is reduced in most at risk communities.	Providing emergency health care and prioritizing access to critical services	100
---	--	-----

Outcome 1	Stabilized or reduced undernutrition among children aged six to 59 months	
Code	Description	Assumptions & Risks
Output 1.1	RUSF distributed in sufficient quantity in a timely manner to targeted beneficiaries	No deterioration in regional/national stability; availability and sufficient capacity of cooperating partners; adequate access to target communities.

Indicators							
Code	Cluster	Indicator	End Cycle Beneficiaries				End-Cycle Target
			Men	Women	Boys	Girls	
Indicator 1.1.1	NUTRITION	Proportion cured in line with SPHERE standards					75
Means of Verification:		Cooperating partner reports and WFP M&E reports					
Indicator 1.1.2	NUTRITION	% of MAM children aged 6-59 months (girls & boys) receiving specialised nutritious food assistance against the plan					100
Means of Verification:		Cooperating partner reports and WFP M&E reports					
Indicator 1.1.3	NUTRITION	% of quantity of specialised nutritious food distributed against the plan					100
Means of Verification:		Cooperating partner reports and WFP M&E reports					
Indicator 1.1.4	NUTRITION	Death rate in line with SPHERE standards					3
Means of Verification:		Cooperating partner reports and WFP M&E reports					
Indicator 1.1.5	NUTRITION	% of specialised nutritious foods supplied to CHF1 partners against the plan					100
Means of Verification:		CHF NGO partner reports to OCHA					

Activities	
Activity 1.1.1	Ongoing procurement and delivery of specialised nutritious food (RUSF) to TSFP partners
Activity 1.1.2	Identify TSFP beneficiaries (girls & boys) through MUAC screening in communities and health care facilities
Activity 1.1.3	Provide specialized nutritious food (RUSF) to each admitted MAM child (girls & boys) until discharged as cured
Activity 1.1.4	Deliver nutrition and health education and communication activities, primarily to female caregivers, in support of optimal IYCF and care practices, and healthy growth and development
Activity 1.1.5	Collect monthly TSFP programme performance reports, disaggregated by sex/gender & age, for analysis and timely response
Activity 1.1.6	Carry out regular M&E of TSFPs and, wherever possible, joint missions by WFP and partners, including MOPH and UNICEF
Activity 1.1.7	Provide technical support to strengthen capacity of TSFP implementers (female & male) in collaboration with MOPH, UNICEF and the Nutrition Cluster
Activity 1.1.8	Coordinate with MOPH, UNICEF and the Nutrition Cluster to ensure coherent coverage of supplementary and therapeutic needs for the treatment of MAM and SAM
Activity 1.1.9	At the request of OCHA, WFP to be the service provider for procurement, transportation and delivery of RUSF to NGOs in districts not covered under WFP main proposal

WORK PLAN

Project workplan for activities defined in the Logical framework	Activity Description (Month)	Year	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec

		2015	X	X	X	X	X	X	X	X	X	X	X	

M & E DETAILS

Implementation: Describe for each activity how you plan to implement it and who is carrying out what.	The WFP TSFPs (OPD-MAM) are implemented in partnership with the MOPH Public Nutrition Department, up to 23 international and national BPHS-implementing NGOs, who are also Nutrition Cluster members, and in collaboration with UNICEF and WHO. The on-the-ground TSFP (OPD-MAM) activities will be delivered by WFP's Cooperating Partners through BPHS clinic sites. The specialised nutritious food (RUSF) will be transported and delivered to each WFP partner at an agreed warehouse site, either provincially or at district-level, according to signed Field Level Agreements. Children will be screened for malnutrition - in the community by
--	---

Community Health Workers and at health clinics by BPHS staff - and referred to the appropriate treatment programme (OPD-MAM or OPD/IPD-SAM), as needed. Through WFP's Cooperating Partners, MAM children will be treated with bi-monthly rations of RUSF (approximately 2.76 kg/child/month), along with receiving routine check-ups and appropriate medical care. Caregivers will receive nutrition, health and hygiene education and communication activities, which emphasize optimal infant and young child feeding practices and care. WFP will provide the necessary technical support and capacity enhancement of the BPHS government staff and NGOs, facilitating both training & supportive supervision, and will continue to provide technical backstopping to its partners to strengthen monitoring through an established field presence of programme monitors. The OPD-MAM and OPD/IPD SAM services will complement each other, and provide a comprehensive response for acute malnutrition in under 5 children in CHF-targeted districts.

Monitoring: Describe how you will monitor the implementation of each activity. Describe the tools you plan to use (checklist, photo, questionnaires, interviews, suggestion box etc.) in order to collect data and how you will store data. Explain the frequency type and protocol of reporting (how often do you report about what to whom?). State if, when and how you plan to evaluate your project.

All WFP activities are subject to the agency's robust reporting requirements. WFP's M&E toolkits will be used for regular TSFP (OPD-MAM) monitoring, ongoing evaluation and data collection. Trained WFP monitors (female and male) and WFP Programme Assistance Teams (PATs) will carry out the monitoring and data collection. The PATs are NGOs contracted by WFP to provide monitoring coverage, i.e. for food distribution and to collect data from activity sites where UN staff cannot go. Despite the insecurity, WFP's long-term partnerships with national NGOs and the provincial DOPH enables access to remote and insecure districts. WFP provides intensive training for all monitoring staff, ensuring high data quality and compliance to survey design/data collection methods. Wherever possible, joint monitoring will be undertaken by WFP and its partners, as well as MOPH/UNICEF. Using standard and MOPH-endorsed reporting formats, monthly statistical programme performance reports will be submitted by partners to WFP, Nutrition Cluster and Public Nutrition department of MoPH. TSFP data will be validated/vetted by WFP nutrition focal points and entered into WFP database systems by the data-entry staff, and at the same time NC/PND will enter the data to the national nutrition database. Data analysis is automated in these systems to produce global summary results, detailed in the Logframe; this will be supplemented with any relevant calculations. WFP and NC/PND will prepare reports for the period of TSFP (OPD-MAM) activities. It is expected the TSFPs (OPD-MAM) will be effectively managed and >90% of sites will meet or exceed Sphere standards (>75% cured; <3% died; <15% defaulters) on a monthly basis.

OTHER INFORMATION

Coordination with other Organizations in project area

Organization	Activity
1. Ministry of Public Health - Nutrition	Line Ministry and oversight of BPHS
2. AADA	IMAM / BPHS NGO partner
3. ACTD	IMAM / BPHS NGO partner
4. AHDS	IMAM / BPHS NGO partner
5. HADAAF	IMAM / BPHS NGO partner
6. HHAAWC	IMAM / BPHS NGO partner
7. HN-TPO	IMAM / BPHS NGO partner
8. IMC	IMAM / BPHS NGO partner
9. PU-AMI	IMAM / BPHS NGO partner
10. Save the Children	IMAM / BPHS NGO partner
11. SCA	IMAM / BPHS NGO partner
12. UNICEF	UN Agency / Nutrition Lead Agency
13. WHO	UN Agency / Nationally assigned IPD-SAM Agency
14. Medair	IMAM NGO partner of CHF

Outline how the project supports the gender theme

The WFP Afghanistan Gender and Protection Strategy 2013 (attached) details how gender and protection actions are mainstreamed into PRRO activities; this is further detailed in a [draft] action plan that advocates regular, field-level, 'do no harm' analyses to identify and address protection issues and ensure the use of gender and protection-based indicators to evaluate implementation of WFP's Gender Policy 2009 (attached), Corporate Action Plan 2010-2011 (attached), and Humanitarian Protection Policy 2012 (attached).

Select (tick) activities that supports the gender theme

<input type="checkbox"/>	Activity 1.1.9: At the request of OCHA, WFP to be the service provider for procurement, transportation and delivery of RUSF to NGOs in districts not covered under WFP main proposal

Cross Cutting Issues

WFP's Gender and Protection Strategy 2013 details how gender and protection actions are mainstreamed into PRRO activities; this is further detailed in a draft action plan that advocates regular, field-level, 'do no harm' analyses to identify and address protection issues and ensure the use of gender- and protection-based indicators to evaluate implementation of WFP's Gender Policy (2009), Corporate Action Plan (2010-2011), and Humanitarian Protection Policy (2012). There is no discernible gender difference in TSFP admissions of MAM prevalence rates; however, by targeting girls and boys for direct assistance, even if as a result of physiological factors, WFP's nutrition programmes contribute to the advancement of gender equality.

Gender Marker of the Project

The project is designed to contribute in some limited way to gender equality

Environment Marker of the Project

A+: Neutral Impact on environment with mitigation or enhancement

Safety and Security

The UNSMS SRM policy in Afghanistan identifies threats and enables operational continuity through protocols providing for staff movements, defensive measures and adherence to directives. Ninety-five percent of staff has completed mandatory security training; deep-field staff receives additional training. WFP participates in the United Nations security management team and implements all its recommendations. Coordination of food movements will be improved to mitigate reduced access to targeted beneficiaries. Travel to 'no go' areas will be undertaken only with approval of the United Nations designated official and/or the Under Secretary General of the United Nations Department of Safety and Security (UNDSS). Standard operating procedures for safe distributions by CPs are in place and a safe distribution module is part of their training. All WFP facilities comply with Minimum Operating Security Standard (MOSS) and will continue to be staffed by international armed security guards subject to any restrictions placed by the designated official and/or the Under Secretary General, UNDSS. Security-related compliance and access assurance will increase the direct support costs of the operation beyond normal levels.

Access

WFP will oversee third-party monitoring of assistance in areas where access by United Nations staff is restricted to complement those areas where WFP has staff. WFP will implement its access strategy (see, attached) and continue to ensure strict adherence to security directives. Access to beneficiaries remains a major challenge that can affect the ability of WFP and its partners to monitor assistance effectively. The lack of female monitors to access female beneficiaries also is a constraint. To circumvent these problems, WFP will work with partners to ensure access to monitor operations and contractually oblige third party monitoring teams to recruit female monitors. Third party monitors (Programme Assistance Teams) operate through a scope of work, an integral part of WFP's contractual agreement, which ensures accountability and adherence to other standards.

BUDGET

1 Staff and Other Personnel Costs (please itemize costs of staff, consultants and other personnel to be recruited directly by the implementing partner for project implementation)

Code	Budget Line Description	D / S	Unit Quantity	Unit Cost	Duration	Percent Charged to CHF / ERF	Total Cost
1.1	Programme Officer (Nutrition) - NOC @25%	S	1	7444.75	12	25.00%	22,334.25
	Percentage of salary by staff working directly on implementation of nutrition programmes in CHF districts under this grant, as per standard WFP implementation of nutrition projects in Afghanistan						
1.2	Sr. Programme Assistant (Nutrition) - GS7 @50%	S	1	4805.83	12	50.00%	28,834.98
	Percentage of salary by staff working directly on implementation of nutrition programmes in CHF districts under this grant, as per standard WFP implementation of nutrition projects in Afghanistan						
1.3	Programme Assistant (Nutrition) - GS5 @50%	S	1	3512.72	12	50.00%	21,076.32
	Percentage of salary by staff working directly on implementation of nutrition programmes in CHF districts under this grant, as per standard WFP implementation of nutrition projects in Afghanistan						
1.4	Logistic Assistant *6 for 6 WHS - GS6 @25%	S	6	3865.42	12	25.00%	69,577.56
	Percentage of salary by staff working directly on implementation of nutrition programmes in CHF districts under this grant, as per standard WFP implementation of nutrition projects in Afghanistan						
1.5	Food Aid Monitors Monitor*15 - GS5 @25%	S	15	3512.72	12	25.00%	158,072.40
	Percentage of salary by staff working directly on implementation of nutrition programmes in CHF districts under this grant, as per standard WFP implementation of nutrition projects in Afghanistan. This is based on 6 for Kabul Area Office, 3 for Jalalabad, 3 for Mazar and 3 for Kandahar. WFP monitors will be deployed in districts where access is possible - this fluctuates considerably according to the prevailing security situation.						
1.6	Admin. Assistant - GS4 @25%	S	1	2956	12	25.00%	8,868.00
	Percentage of salary by staff working directly on implementation of nutrition programmes in CHF districts under this grant, as per standard WFP implementation of nutrition projects in Afghanistan						
1.7	ICT Assistant - GS4 @25%	S	1	2956	12	25.00%	8,868.00
	Percentage of salary by staff working directly on implementation of nutrition programmes in CHF districts under this grant, as per standard WFP implementation of nutrition projects in Afghanistan						
1.8	Pipeline Assistant - GS6 @25%	S	1	3865.42	12	25.00%	11,596.26
	Percentage of salary by staff working directly on implementation of nutrition programmes in CHF districts under this grant, as per standard WFP implementation of nutrition projects in Afghanistan						
1.9	Drivers for Project Implementation Area *6 @50%	S	6	2278.72	12	50.00%	82,033.92
	Percentage of salary by staff working directly on implementation of nutrition programmes in CHF districts under this grant, as per standard WFP implementation of nutrition projects in Afghanistan						
	Section Total						411,261.70

2 Supplies, Commodities, Materials (please itemize direct and indirect costs of consumables to be purchased under the project, including associated transportation, freight, storage and distribution costs)

Code	Budget Line Description	D / S	Unit Quantity	Unit Cost	Duration	Percent Charged to CHF / ERF	Total Cost
2.1	Food cost: RUSF per metric ton	D	490	3377	1	100.00%	1,654,730.00
	Project document budgeted cost for international purchase and delivery to port in France						
2.2	External transport cost	D	490	134	1	100.00%	65,660.00
	Project document budgeted rate for international transport from France						
2.3	Inland transportation, storage and handling	D	490	255	1	100.00%	124,950.00
	Project document budgeted rate for inland transportation, storage and handling						
2.4	Bilateral RUSF agreement: Food cost: 1 metric tons	D	328	3377	1	100.00%	1,107,656.00
	Project document budget cost for international purchase (FOB)						
2.5	Bilateral RUSF agreement: External transport cost	D	328	134	1	100.00%	43,952.00
	Project document budgeted rate for international transport from France						
2.6	Bilateral RUSF agreement: Inland transportation, storage and handling	D	328	255	1	100.00%	83,640.00
	Project document budgeted rate for inland transportation, storage and handling						
	Section Total						3,080,588.00

3 Equipment (please itemize costs of non-consumables to be purchased under the project)

Code	Budget Line Description	D / S	Unit Quantity	Unit Cost	Duration	Percent Charged to CHF / ERF	Total Cost
	Section Total						0.00

4 Contractual Services (please list works and services to be contracted under the project)

Code	Budget Line Description	D / S	Unit Quantity	Unit Cost	Duration	Percent Charged to CHF / ERF	Total Cost
4.1	PAT monitors - All Area Offices. For around 38 monitors	S	38	370	12	100.00%	168,720.00
	Essential third party contractors for monitoring areas inaccessible to WFP staff.						
	Section Total						168,720.00

5 Travel (please itemize travel costs of staff, consultants and other personnel for project implementation)

Code	Budget Line Description	D / S	Unit Quantity	Unit Cost	Duration	Percent Charged to CHF / ERF	Total Cost
5.1	Staff Travel Cost (Field missions, Monitoring, 22 staff for 24 days)	S	22	98	24	100.00%	51,744.00
	Essential field visits by WFP staff to monitor operations where access possible over project duration - costing based on current UN DSA rates for outside Kabul						
	Section Total						51,744.00

6 Transfers and Grants to Counterparts (please list transfers and sub-grants to project implementing partners)

Code	Budget Line Description	D / S	Unit Quantity	Unit Cost	Duration	Percent Charged to CHF / ERF	Total Cost
6.1	Staff (programme, administrative, warehouse staff, casual labor)	D	1	14443.57	12	100.00%	173,322.84
	Estimation based on current FLA costs for implementation of WFP nutrition projects in Afghanistan						
6.2	Travel	D	1	2456.14	12	100.00%	29,473.68
	Estimation based on current FLA costs for implementation of WFP nutrition projects in Afghanistan						
6.3	Training	S	1	993.6842	12	100.00%	11,924.21
	Estimation based on current FLA costs for implementation of WFP nutrition projects in Afghanistan						
6.4	Rental of facility	S	1	561.4035	12	100.00%	6,736.84
	Estimation based on current FLA costs for implementation of WFP nutrition projects in Afghanistan						
6.5	Office (utilities, communication, computer equipment, supplies, furnishing, security)	S	1	2545.602	12	100.00%	30,547.22
	Estimation based on current FLA costs for implementation of WFP nutrition projects in Afghanistan						
6.6	Warehouse (rental, pallets)	D	1	1824.56	12	100.00%	21,894.72
	Estimation based on current FLA costs for implementation of WFP nutrition projects in Afghanistan
