## BACKGROUND INFORMATION

1. Humanitarian context analysis.. Humanitarian context: Describe the current humanitarian situation in the specific locations where this project will be implemented The conflict in South Sudan that erupted on December 15th 2013 and quickly spread to Unity State caused massive displacement of populations, both human and livestock, disruption of livelihood sources and market functions and massive looting and destruction of vital community assets and infrastructure that support critical basic services, including animal health services delivery (FAO News, 22nd May 2014). Recent UN OCHA South Sudan Crisis Situation Report (October, 2014) indicated that 1.4 million people are internally displaced. 289, 300 of the IDPs (20.6%) are in Unity State, the majority among them being women and children, about 50,000 of whom are in the Bentiu POCs. While Panyinjar and Pariang counties were spared the scale of violence and destruction witnessed in other counties. Panyinjar county received and hosts large numbers of IDPs from neighboring Mayiendit and Leer counties. Leer is also home to IDPs displaced from parts of Mayiendit, Koch and Bentiu town. UN OCHA IRNA reports of assessments conducted in in Unity State counties between January and August 2014, some of which VSF-Suisse field team members participated in consistently found among other findings, deteriorating food security situation, poor livestock and fisheries resources for food (milk, meat and fish). Whereas the IPC report (September 2014) and WFP FSMS Round 13 report (July/August, 2014) indicate that the food security situation in the country has improved since August and will remain so till December 2014, the food security outlook for 2015 is of great concern, with 1.5 million people projected to be in crisis or emergency phase by March 2015. The IPC report indicates that nearly half of the population of Unity state (51.9%) will be in crisis or emergency phase between January and March 2015. All the targete counties of Panyinjar, Leer, Mayiendit, Koch, Guit and Rubkona are in IPC 3 with the exception of Pariang that is IPC stressed for the period between October and December. Between January and March 2015, all the targete countie

projected to still play a very key role in securing household food and nutrition security in 2015. In the last two months, reports from field teams in Unity State, IRNA and UNMISS patrol update reports have shown an upsurge in livestock diseases in Leer, Koch, Mayiendit, Guit and Rubkona counties. Suspected rabies outbreaks have also been reported in Rubkona due to increased populations of stray dogs around the POCs. These diseases if not controlled threaten to decimate livestock assets and pose public health risks. Livestock and or production losses due to endemic diseases present a critical threat to livelihood systems hence great need for livestock interventions.

2. Needs assessment. Explain the specific needs of the target group(s), explaining existing capacity and gaps. State how the needs assessment was conducted, list any baseline data and explain how the number of beneficiaries has been developed. Indicates references to assessments such as Multi-cluster/sector Initial Rapid Assessments (MIRA)

The needs being addressed have been assessed over the last year using a number of strategies. IRNA-Inter-Agency Rapid Needs Assessments were carried out through coordinated assessment missions in the target counties between February and September 2014 with reports indicating acute needs for animal health services and livelihood support. VSF Suisse field teams for instance participated in the Leer IRNA. CFSAM - Crop and Food Security Assessment Missions were carried out to estimate cereal production and assess the overall food security situation. Reports indicated severe cereal deficits and negative coping mechanisms including asset stripping e.g. slaughter of livestock for food. VS-Suisse participated in the assessment with particular regard to Livestock livelihoods and human protection in Koch, Leer, Pariang and Rubkona. FSMS - Food Security Monitoring System was led by WFP and FAO. VS-Suisse participated in the assessment with particular regard to Livestock livelihoods and human protection in Panyinjar and Pariang. All these assessments revealed Needs for livestock and livelihood assistance. Due to inadequate veterinary services, livestock diseases threaten to erode livestock contribution to food security and coping strategies for agro-pastoralists. The threats of livestock diseases require a robust and sustained response in 2015 to enhance protection of livestock assets, access to livestock derived food and rehabilitation and early recovery of livestock based livelihoods. Cattle keepers and other vulnerable groups, including IDP and resident womenheaded HHs, boys and girls that usually own small ruminants and poultry suffer immensely when diseases affect their herds and flocks. The elderly, disabled persons, pregnant and or lactating women and children that depend on livestock derived proteins (milk and meat) remain at risk of suffering from malnutrition if livestock herds are diseased and productivity reduced. Although ongoing projects have partially addressed some of the animal health needs, there still ex

#### 3. Description Of Beneficiaries

Targeted beneficiaries are host and IDP agro-pastoral communities in Panyinjar, Leer, Mayiendit, Koch, Guit and Rubkona counties that have borne the brunt of the current crisis since the outbreak of violence in December 2013. Aiready vulnerable prior to the outbreak of violence due to a combination of natural (floods, pests and diseases) and man-made (chronic conflicts) induced disasters, the current crisis has exacerbated the situation and increased vulnerabilities and shocks. Hosts and IDP families alike suffer from food insecurity and lack reliable and sustainable livelihoods and income generating options due to the conflict. Resource endowed households with livestock and agricultural assets are exposed to vulnerabilities of unpredictable weather, pests, diseases, volatile and fragile markets, inflation, natural disasters and environmental degradation. These shocks undermine local productive capacities for sustainable livelihoods, self-reliance on own food production and wealth creation and accumulation from the natural capital. Resource poor beneficiary households that do not own any livestock and agricultural assets and inputs are heavily reliant on sale of forest products such as grass and poles, burning of charcoal and brewing of alcohold as major sources of income source. Dependence of the poorer and vulnerable households on kinship ties for livestock derived support (milk, meat, sales for food, dowry, fines, feuds) and cyclic hunger gaps due to perpetual food deficits constitutes a burden that contributes to asset stripping that maintain the chronic food insecurity situation in the area. The beneficiaries are selected through community level. IDPs are identified through registration lists maintained by local administration and other NGO actors while beneficiary groups representatives perform verification, checks and balances. In Rubkona, IDPs are all located at the POCs and have now undergone biometric registration for identification purposes. Vulnerable groups at risk of exclusion from assistance such

#### 4. Grant Request Justification

Due to inadequate veterinary services, livestock diseases threaten to erode livestock's contribution to food security and coping strategies for agro-pastoralists. The threats of livestock diseases require a robust and sustained response in 2015 to enhance protection of livestock assets, access to livestock derived food and rehabilitation and early recovery of livestock based livelihoods. Vulnerable groups, including IDP and resident women-headed HHs, boys and girls that usually own small ruminants and poultry suffer immensely when diseases affect their herds and flocks. The elderly, disabled persons, pregnant and or lactating women and children that depend on livestock derived proteins (milk and meat) remain at risk of suffering from malnutrition if livestock herds are diseased and productivity reduced. Youths whose livelihood opportunities were disrupted remain idle and frustrated with the risk of relapsing to despondency and crime. Suspected outbreak of rabies reported earlier in Panyinjar and Leer and most recently in Rubkona Counties and other endemic zoonoses that are life threatening will require aggressive public health awareness campaigns and control strategies. Support to fisher folks mainly for men and male youths displaced in the islands in Panyinjar County and in Bentiu PoCS will require fishing gears for fishing activities in the extensive flood plans in Unity State that will enable safe and access to fish for food and incomes. VSF-Suisse has long standing experience in the state, implementing livelihood programmes in partnerships with FAO and UNDP. FAO partnership will be pursued under this project to facilitate access to is in-kind inputs (vaccines and livelihood kits). VSF Suisse has a huge network of community animal health workers that will be rapidly mobilized and deployed to scale up the services.

**5. Complementarity**. Explain how the project will complement previous or ongoing projects/activities implemented by your organization.

Till the end of 2014, VSF Suisse is implementing CHF-UNDP and FAO funded emergency, livelihood interventions, including animal health and child protection services in the targeted locations. VSF Suisse has used these projects to address acute needs arising from the crisis and gained a foothold on the ground. For instance, contacts have been re-established with existing CAHW networks, some of whom are deployed and providing frontline services. Critical veterinary services equipment, including cold chain and vaccination equipment have been provided to partially fill the gaps in needs in some of the counties and competent local capacities have been identified and deployed. Important lessons and best practices in delivering services in emergency situations have been learnt. This project will leverage on the gains from the ongoing but ending projects to maintain, sustain and scale up the services much more rapidly and efficiently. The project through the proposed distribution of emergency livelihood kits from the Food Security and Livelihoods Cluster core pipeline will complement the FAO Emergency Response Program through partnership agreements to support frontline distribution of emergency kits to the beneficiaries. Complimentarity will also be achieved by optimizing and maximizing on the operational support in 2015.

# LOGICAL FRAMEWORK

## Overall project objective

This project aims to enhance access to food and sustainable livestock based livelihood opportunities through protection of livestock assets and support to productive livelihoods for 2,465 HHs (14, 790 individuals) in Unity State in 2015. The targeted households shall include host communities and IDPs (including those in POCs in Bentiu), among them, the most vulnerable groups comprising of men, women, the elderly, the disabled and adolescents.

### Logical Framework details for FOOD SECURITY AND LIVELIHOODS

Cluster objectives	Strategic Response Plan (SRP) objectives	Percentage of activities
2015 SSO 2: Protect and rehabilitate livelihoods for the vulnerable population at risk of hunger and malnutrition	SO 3: Improve self-reliance and coping capacities of people in need by protecting, restoring and promoting their livelihoods	100

# Outcome 1: Emergency Animal Health Services are Provided to Vulnerable Agro-Pastoralist/Pastoralist Communities in Unity State in 2015. Indicators:

- % reduction in livestock disease morbidity and mortality rates
   % of livestock keepers accessing apimal health services.
- % of livestock keepers accessing animal health services

Code	Description	Assumptions & Risks
Output 1.1	Output 1:

Activity 2.1.1	Distribute 1800 fisheries kits to 1800 HHs targeting 1200 men and 600 boys as in-kind inputs from FAO -Panyinjar: 300, Leer: 300, Mayiendit: 300, Koch: 300: Rubkona: 300, Pariang: 300)
Activity 2.1.2	Distribute 1800 crop kits (seeds and tools ) to 1800 vulnerable HHs (1000 women, 400 men, 200 boys, 200 girls) as in-kind inputs from FAO- Panyinjar: 300, Leer: 300, Mayiendit: 300, Koch: 300: Rubkona: 300, Pariang: 300)
Activity 2.1.3	Distribute 1800 vegetable kits to 1800 vulnerable HHs (1200 women, 200 girls, 200 boys, 200 men) as in-kind inputs from FAO- Panyinjar: 300, Leer: 300, Mayiendit: 300, Koch: 300: Rubkona: 300, Pariang: 300)
Activity 2.1.4	Conduct 6 sessions of PDM of livelihood kits in all target counties in : (Panyinjar: 1, Leer: 1, Mayiendit: 1, Koch: 1: Rubkona: 1, Pariang 1)

# WORK PLAN

Project workplan for activities defined in the Logical framework

Activity Description (Month)	Year	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Activity 1.1.1 Refresh training for 140 CAHWs (35 female, 105 % male) n Panyinjar: 40, Leer: 20, Mayiendit: 20, Koch: 20: Rubkona: 20, Pariang: 20).	2015	Х	X	Х	Х								
Activity 1.1.2 Refresh 15 existing SP/AHAs (all male) : (Panyinjar: 4, Leer: 3, Mayiendit: 2, Koch: 2: Rubkona: 2, Pariang: 2).	2015	Х	Х	Х	Х								
activity 1.1.3 Constitute and brief 6 County-based CAHW teams to arryout vaccination and treatment campaigns (one team / county omprising (5 women, 15 men)	2015	Х	Х	Х	Х								
activity 1.1.4 Vaccinate 300,000 livestock heads in cooperation with MARF and FAO Panyinjar: 40, 000, Leer: 50,000, Mayiendit: 50,000, Koch: 50,000, Rubkona: 60,000: 50,000)	2015	Х	X	X	X	X	Х						
Activity 1.1.5 Treat 60,000 livestock heads in cooperation with MARF/FAO (Panyinjar: 10,000, Leer: 10,000, Mayiendit: 10,000, Koch: 10,000: Rubkona: 10,000, Pariang: 10,000	2015	Х	X	Х	X	Х	Х	Х	X	X			
activity 1.1.6 Procure, install and maintain 2 solar powered fridges Mayiendit: 1, Koch: 1)	2015		Х	Х									
Activity 1.1.7 Coordinate vaccines and vet equipment procurement in cooperation with MARF and FAO	2015		Х	Х	Х	Х							
activity 1.1.8 Procure and distribute 140 CAHW kits	2015			Х	Х	Х							
Activity 1.1.9 Conduct 6 sessions of CPE involving 200 men, 200 vomen, 100 boys and 100 girls – one session / county	2015			Х	Х	Х							
Activity 1.2.1 Conduct 12 community dialogue on zoonoses targeting 200 men, 200 women, 200 boys and 200 girls in (Panyinjar: 2, Leer: 2, Mayiendit: 2, Koch: 2: Rubkona: 2, Pariang:2	2015	Х	X	Х	X	Х				X			
Activity 1.2.2 Vaccinate up to 2,000 dogs in Panyinajr (500), Rubkona 1000) and Leer (500) Counties	2015		Х	Х	Х								
Activity 1.2.3 Conduct milk hygiene training for 300 women and 300 girls rendors (Panyinjar: 100, Leer 100, Mayiendit: 100, Koch:100, Rubkona: 00, Pariang: 100)	2015		X	Х	X	Х	Х						
Activity 1.2.4 Conduct meat hygiene training for 40 men and 20 boys rendors (Panyinjar: 10, Leer 10, Mayiendit: 10, Koch:10, Rubkona: 10, Pariang: 10)	2015		Х	Х	Х	Х							
Activity 2.1.1 Distribute 1800 fisheries kits to 1800 HHs targeting 1200 men and 600 boys as in-kind inputs from FAO -Panyinjar: 300, Leer:	2015			Х	Х	Х	Х			Х			

300, Mayiendit: 300, Koch: 300: Rubkona: 300, Pariang :300)											
Activity 2.1.2 Distribute 1800 crop kits (seeds and tools ) to 1800 vulnerable HHs (1000 women, 400 men, 200 boys, 200 girls) as in-kind inputs from FAO- Panyinjar: 300, Leer: 300, Mayiendit: 300, Koch: 300: Rubkona: 300, Pariang: 300)	2015			X	Х	X					
Activity 2.1.3 Distribute 1800 vegetable kits to 1800 vulnerable HHs (1200 women, 200 girls, 200 boys, 200 men) as in-kind inputs from FAO- Panyinjar: 300, Leer: 300, Mayiendit: 300, Koch: 300: Rubkona: 300, Pariang: 300)	2015			X	X	X					
Activity 1.2.5 Conduct 8 field monitoring sessions of activities and produce thematic reports : (Panyinjar: 2, Leer: 2, Mayiendit: 1, Koch: 1: Rubkona: 1, Pariang:1)	2015		Х	Х	Х	Х			Х		
Activity 2.1.4 Conduct 6 sessions of PDM of livelihood kits in all target counties in : (Panyinjar: 1, Leer: 1, Mayiendit: 1, Koch: 1: Rubkona: 1, Pariang 1)	2015					X	Х		Х		
Activity 1.1.10 Conduct 12 field monitoring sessions on progress of activities and produce monitoring reports in (Panyinjar: 2, Leer: 2, Mayiendit: 2, Koch: 2: Rubkona:2: 2, Pariang:2)	2015	Х	X	X	X	Х	Х				

#### M & R DETAILS

#### Monitoring & Reporting Plan:

Describe how you will monitor the implementation of each activity. Describe the tools you plan to use (checklist, photo, questionnaires, interviews, suggestion box etc.) in order to collect data and how you will store data. Explain the frequency type and protocol of reporting (how often do you report about what to whom?). State if, when and how you plan to evaluate your project.

Under this project, VSF Suisse will apply its internal monitoring and reporting system under the responsibility of a dedicated Monitoring, Evaluation and Reporting Officer. Project activities and monitoring and reporting plan will be elaborated, including corresponding indicators, appropriate monitoring tools developed or where applicable existing tools used for data collection. Field work plans with detailed activity and monitoring schedules (time frame and corresponding budgets) and responsibilities for designated staff will be prepared and approved by the program management. Progress in terms of activities and expenditure will be measured continuously through monthly project activity, financial and monitoring reports. Quantitative project activity data will be collected by designated field officers using prescribed forms and submitted to M&E Officer for collation, analysis and reporting. During monitoring, beneficiaries will be consulted for their feedback as respondents through community participatory approaches. Focus Group Discussions and interviews with relevant stakeholder and informants in community dialogues to gather and analyze qualitative data for reporting will be used as methods of choice. Pictures taken during field activities will be included in project reports. Senior management staff will also visit the field regularly to consult with staff and beneficiaries on progress on activities and make observations as part of the monitoring process. Monthly reports will be used to compile a quarterly report (including specific monitoring data and pictures) to evaluate achievement against the targets for the period. This will provide opportunity for the field and headquarters support staff to reflect on and address implementation challenges. Monthly and quarterly reports will be shared with county authorities for their records as part of beneficiary accountability process. Field and Juba based project management and review meetings will be held between the field staff and the project managers to assess

#### OTHER INFORMATION

Accountability to Affected Populations

Accountability to affected population is a key priority for VSF Suisse. In community dialogues on project planning, implementation and monitoring, men, women, girls, boys, the elderly and the disabled are invited by representation to attend and participate by right, on merit and by affirmative action if necessary.. to express their opinions and have their voices heard on their needs, implementation process and outcomes of the interventions. The project manager contact details (telephone numbers and e-mail address) are publicly shared to ensure any concerns from the beneficiaries can be channeled for review and consideration. Information received is treated confidentially to ensure informants remain anonymous. VSF Suisse field teams also conduct weekly project management meetings to review and consider any issues emerging that may impact on the project implementation. Minutes of these meetings are shared weekly by the program management at the country office for review and guidance on how to address concerns. For activities involving distribution of inputs, serialized tokens are designed, printed and issued with full details of the specific beneficiaries during registration process. Register of beneficiaries are compiled according to beneficiary token serial numbers and beneficiaries appear in person and sign list of beneficiaries when receiving inputs to enhance accountability. Distributions are conducted in presence of beneficiary trustees such as community leaders and representatives and filed for records / references. Men, women, boys and girls are consulted jointly and separately during project review meetings and post distribution monitoring exercises. Men, women, boys and girls are provided with information on how to lodge complains / feedback mechanism- usually through dedicated monitoring staff help desk manned by enumerator during distribution and counterpart focal persons for the specific project activities.

Implementation Plan: Describe for each activity how you plan to implement it and who is carrying out what.

VSF Suisse will implement the project directly in close collaboration with beneficiary communities and counterparts and in partnership with key relevant partners that include FAO and MARF. Internal planning meetings will be held with project staff both at Juba and at field level to ensure that all staff working on the project understand its objectives, targets, M & E and reporting requirements. Stakeholder dialogues and consultations, comprising local administration and sectorial coordinators at the county level will be conducted in order to ensure a common understanding, local ownership and support for the project and to define and agree on the roles and responsibilities of various stakeholders. National veterinary services (MARF) through their local representation at the counties and FAO will be engaged as key collaboration partner for technical support to the project in line with Livestock Emergency Guidelines and Standards (LEGS). As a principle, participation of men, women, and youths will be encouraged to ensure that interests of various beneficiary groups are taken into account during planning and project implementation and monitoring. Emergency protection of livestock assets will address livestock disease challenges by providing emergency preventive and curative animal health services, targeting both vector-borne and contagious diseases through county based CAHW teams. Existing CAHWs will be mobilized, refreshed, equipped and deployed to carryout livestock freatment and vaccination campaigns on performance based incentive. Each team of CAHWs in the counties is supervised by at least two Stock Persons or Animal Health Auxiliaries (AHAs/SPs) who are in turn monitored and supervised by the field veterinarians to ensure quality in service delivery. The incentives for CAHWs is based on daily average local wage to enable the CAHWs meet their basic needs (water, food) while conducting the campaigns. Selected active CAHWs will be refreshed on priority diseases and the prevention and control of zoonoses. Refresh

Coordination with other Organizations in project area

Name of the organization	Areas/activities of collaboration and rationale
1. UN FAO	UN FAO as a technical organization is a lead partner in the food security and livelihoods cluster and manages the core pipeline that provides critical emergency livelihood kits (fisheries, crop and vegetable kits) and livestock inputs (drugs, vaccines and equipment, including cold chain and technical support with installation, repairs and parts. VSF Suisse will partner with FAO through Letter of Agreement to access the kits, inputs and technical support required for this intervention. As chair of the Livestock and Fisheries Working Group, VSF Suisse as the co-chair will work with FAO to develop standards and tools that partners require to deliver quality animal health services.
2. ICRC	ICRC is currently implementing food assistance and livelihood program in Leer that includes livestock vaccination campaigns and distribution of livelihood kits. VSF Suisse will liaise and coordinate with ICRC to ensure that field level activities are coordinated to avoid overlaps and duplications. For instance, while ICRC conducts vaccination mainly against cattle, VSF Suisse will focus the campaigns on small stock and mass deworming which is not being carried out by ICRC in Leer.
3. AECOM VISTAS PROGRAM	VSF Suisse has entered agreement with AECOM VISTAS USAID funded program to receive in-kind operational and logistical support to enable VSF Suisse scale up the its veterinary interventions in Unity State. This collaboration will complement the

2015		SSD-15/SA1/FSDINGO/396-396-Proposal
		project positively and maximize on the benefits to the beneficiaries.
	4. Ministry of Animal Resources and Fisheries (MARF)	MARF is the competent national veterinary authority through the national veterinary services. During the crisis, the competence of MARF in Unity State has been severely eroded although structures at the county levels still exist. VSF Suisse will leverage on the existing structures to coordinate services with the national MARF and ensure compliance with the national disease surveillance system and reporting requirements.
Environmental Marker Code		
Gender Marker Code	2a-The project is designed to d	contribute significantly to gender equality
Justify Chosen Gender Marker Code	integrate and incorporate gend livestock herds upon which the mainly own, control and manag gender as milk and meat is cor interventions through veterinar CAHWs will particularly target tapproach and don't risk violenc include men, women and some kits. Children at school, boys a During field assessments, proj field assessments, proj	appropriate as the project has been designed to address gender needs identified in the needs analysis. Intervention strategies ler in the activities and outcomes. For instance, men, women, boys and girls are equally affected when livestock diseases decimate ey all depend for their food needs (milk and meat). Women, boys and girls, especially women headed households (widows) who go small stock are particularly affected and become more vulnerable when disease outbreaks occur. Risks of zoonoses affect all nsumed at the household level by all gender. The intervention strategies to address needs incorporate gender dimensions. Livestock y teams are designed to include the use of veterinary teams that are composed of both male and female CAHWs. The female the small ruminants that stay around the households to enable female CAHWs double up in routine domestic chores in a "do no harm ce by travelling in far distant cattle camps to ensure their protection. Refresher training sessions and new training for CAHWs will e youths (boys and girls). Men and boys, mainly socialized to fishing activities as their role will benefit from the distribution of fisheries and girls and men and women will also benefit from awareness campaigns on zoonoses in the cattle camps, churches and schools ect planning sessions and monitoring, all gender are planned to be represented in the sessions for equity. The beneficiaries of the 2d and disaggregated by gender. The overall outcomes of the project will reflect all gender with specific monitoring indicators
Protection Mainstreaming	primary beneficiaries for this pr who are in need, and to ensure planned to be delivered in the c potential to harm their productive veterinary interventions to ens sexual and gender based viole domestic chores and to ensure harm' approach. Household he identified as primary beneficiar beneficiaries on specific suppo	It sensitive approach and other relevant protection mechanisms have been effectively incorporated in this project. For instance, the roject are identified as host and IDP communities. This is designed to deliver services in a none discriminatory manner for all those e any tensions between host communities and IDPs over access to services is avoided. The bulk of the program activities are try season, before and after the critical farming season to ensure communities are not distracted from the core farming activities with ve livelihood engagements. Women headed households; boys and girls that own and control small stock are specifically targeted with ure they are not excluded from the services benefiting only the "rich" cattle owners. Female CAHW teams who may be vulnerable to more will particularly target the small ruminants that stay around the households to enable female CAHWs double up in routine a their protection from risk of sexual and gender based violence when travelling to and operating in far distant cattle camps in a "do neads providing care to children <5 years, and hosting pregnant and lactating mothers, the disabled and the elderly will specifically be less of livelihood kits and veterinary interventions to ensure their dignity and safety is guaranteed. Information will be provided to are provided to the pr
Safety and Security	dry season that may cause de safe haven from where field tea and member of the NGO Forui	outhern counties of Panyinjar, Leer, Mayiendit and Koch is currently stable although there are fears of escalation of hostilities in the eterioration in the security situation and affect team deployment in the area. Rubkona remains volatile although Bentiu Hub provides ams deploy and coordinate outreach activities. Pariang is safe and accessible. VSF Suisse is a partner and user of UNHAS services m that provide coordination and support service for staff relocation and evacuation services in case of insecurity. At the Bentiu Hub, ed with the UNDSS for purposes of evacuation or relocation.
Access	Other project sites in the count and implement activities. VSF \$	eer and team presence in Nyal and Ganyiel in Panyinjar County and at the Bentiu UN Hub from where activities will be coordinated. ties will be accessed through dedicated UNHAS services on a "hit and run" basis by the rapid deployment team to deliver supplies Suisse liaises very closely with UNMISS regular patrols to hard to reach areas and will be in apposition to secure space for pax to livered, especially in the dry season. VSF Suisse has also tried successfully the use of human porters and public transport to deliver ne risks.

## BUDGET

1 Staff and Other Personnel Costs (please itemize costs of staff, consultants and other personnel to be recruited directly by the implementing partner for project implementation,
