BACKGROUND INFORMATION							
Humanitarian context analysis Humanitarian context: Describe the current humanitarian situation in the specific locations where this project will be implemented	withstand the chronic and acu with an estimated number of 2 locations that are hard to reac	nsistently below global standar te crises that has affected the c ,500,000 IDPs increasing the p h. These vulnerable communiti ties remain vulnerable with limite	country since conflict be ressure on limited WAS es have had limited acc	egan in December 2013. His infrastructure and services to few basic WASH s	Displacement will colices. Many IDP popularios since before	ntinue to be significant in 20 ulations remain in remote re the crisis began. As conf	ural

Inadequate WASH services contribute not only to disease outbreaks, but also to increased malnutrition. Lack of improved sanitation and limited knowledge of hygiene practices specifically for those under 2 years of age contribute to stunting, with long-term, and frequently permanent, effects on children's long-term cognitive development. The lack of safe drinking water, inadequate excreta disposal and poor hygiene practices leave a large portion of the population at persistent risk of preventable water-related diseases. With a major cholera outbreak in 2014, there is an increased risk of a potential outbreak in 2015.

IDP sites require increased commitment from donors and partners to maintain WASH services. As displacement becomes protracted, coupled with increasing food insecurity; settlements where basic services are available are expected to receive an additional influx of people in 2015. The demand on current infrastructure will require partners to scale up to meet additional needs and maintain Sphere standards in these key locations

Conflict displacement into Melut area started in early January 2014, when IDPs fleeing Baliet, Pigi and Malakal counties settled in spontaneous settlements and collective centers within the municipality. Local authorities estimated that more than 50,000 people fleeing from Baliet and Pigi counties stopped at some point or settled in Melut and the surrounding area. Almost a year later, an IDP population of around 21,000 people has consolidated in Melut area in Dethoma 1, 2 and Hai

Oxfam GB has provided WASH assistance in Dethoma 1, Dethoma 2 and Hai Soma since April of 2014. In October Oxfam announced their plans to terminate their Melut WASH activities in of February of 2015. The water treatment plant will be handed over to the local authorities; however there will still be a need to provide support in consumables and assist the local authorities through training and capacity building interventions. For sanitation, Oxfam GB will leave a ration of 1:50 latrines in the three sites. The WASH Cluster has endorsed the continuation of these activities and gradual transfer of responsibilities to the community/local authorities. In the interim period following Oxfam's withdrawal and the government's assumption of responsibility, a full WASH intervention is critical for women, men girls and boys in Melut county.

2. Needs assessment. Explain the specific needs of the target group(s), explaining existing capacity and gaps State how the needs assessment was conducted, list any baseline data and explain how the number of beneficiaries has been developed.

Activity 1.1.5 Capacity Building sessions for water treatment operators	2015	Х	Х	X	Х				

M & R DETAILS

Monitoring & Reporting Plan:

Describe how you will monitor the implementation of each activity. Describe the tools you plan to use (checklist, photo, questionnaires, interviews, suggestion box etc.) in order to collect data and how you will store data. Explain the frequency type and protocol of reporting (how often do you report about what to whom?). State if, when and how you plan to evaluate your project.

In South Sudan, IOM has put in place internal monitoring structures to effectively monitor the progress of project activities. Through meetings with the Programme Managers where progress against deliverables are discussed, IOM is able to monitor progress against deliverables and mitigate the risks of poor performance. In addition, regular communication with donor counterparts ensures that should external factors outside of the control of IOM be encountered, project deliverables can be adjusted with the approval of the donor.

be adjusted with the approval of the donor.

The proposed activities implemented by IOM will be monitored directly by the IOM sub-offices, which operate under the overall management of IOM's Chief of Mission in Juba. The Mission office in Juba will provide overall financial management and oversight of the activities. Regular internal reporting will be provided by all field offices and will receive a supervisory review from the Juba level. Over the course of implementation, field visits will be conducted in order to monitor project activities against the targets stated within the proposal. Internal reporting, monitoring and evaluation will take note of all constraints or impediments to activities in order to undertake a regular evaluation of project goals and implementing strategies. Project updates will be reported in IOM publications that will be distributed to IOM Geneva, donors and any other concerned stakeholders. A final narrative and financial report will be produced at the end of the project, in compliance with the CHF standards and requirements.

IOM thematic units coordinate activities in South Sudan with their respective Cluster Bodies. This ensures that there is no duplication, and that projects remain relevant, accountable, and that beneficiaries always play a key role in needs assessments and decision making for effective project development.

OTHER INFORMATION

Accountability to Affected Populations

In line with cluster strategy, IOM will maintain its commitment to engaging with affected communities at all phases of the program cycle through engagement with women, men and youth on issues concerning their health.. IOM's M&E framework ensures that each project implemented is carried out effectively and continually reviewed in line with community needs and humanitarian frameworks.

Implementation Plan: Describe for each activity how you plan to implement it and who is carrying out what.

All components of this project will be carried out by IOM staff through IOM procedures.

Successful implementation in terms of management, coordination, and finance will be overseen by an experienced project manager. Project finances will be coordinated by the project manager and overseen by IOM's resource management unit. Financial oversight will be monitored at regional level also to ensure that accountability and effective use of resources, in line with project contracts, is maintained. Project coordination will be overseen by the project manager, in partnership with IOM South Sudan's Programme Support Unit. The programme support unit assist with project administration, technical oversight, and project M+E. Reporting lines and distribution of labor will be overseen by the resource management unit, and the project manager will be charged with direct supervision.

To maximize efficiency, this project will be carried out in consultation with the South Sudan Cluster. This will ensure solid impact, avoid duplication, and promote sustainability where possible

Coordination with other Organizations in project area

Environmental Marker Code B+: Medium environmental impact with mitigation(sector guidance)

Gender Marker Code

2a-The project is designed to contribute significantly to gender equality

Justify Chosen Gender Marker Code

IOM ensures that all WASH activities take into consideration the gender-specific needs of project beneficiaries. All WASH activities are implemented after initial community assessments and cluster analysis is taken into consideration.

Specifically through this project IOM plans to procure varying colors of plastic sheets to provide a distinction between male and female latrines. Communal latrines and bathing areas will be segregated by sex to mitigate against the risk of GBV. As women and girls are traditionally responsible for collecting and carrying water for household use, emphasis will be placed on securing adequate representation of women in water committees to ensure that the needs of all community members(women, men, girls and boys) are considered.

The project also supports school latrines, recognizing that the lack of sanitation in educational facilities is linked to the lack of participation of female students. Additionally, the project will actively recruit female staff members and community promoters. The hygiene promotion campaigning messages will be tailored to target specific needs of women and girls, such as menstrual hygiene issues. All activities related to this project will equally benefit women and men, girls and boys.

Protection Mainstreaming

Safety and Security

Violent conflict remains a concern for project implementation in South Sudan, including fighting between non-state actors and SPLA as well as inter-communal violence. These factors present a constant threat to the security of staff, particularly in staff heavy projects such as emergency health responses.

The situation in Upper Nile State for IOM's semi-static and mobile clinics as well as those hard to reach areas targeted by the Rapid Response Mechanism are anticipated to remain highly volatile during the first quarter of 2015 in which this project is planned.

To mitigate these risks, IOM is a member of the UN Department of Safety and Security (UNDSS) which includes local field structures as well as tailored protocols for South Sudan, and oversight at the country level by the Security Management Team. IOM is a permanent member of the SMT which provides recommendations and consultation on security policy and criteria in coordination with the designated security representative of the SRSG, and the UN in New York. Furthermore, staff in the field undergo a series of security trainings and are properly equipped with personal protective equipment and communication devices. While our operations require staff to often enter into insecure areas, IOM does its best to ensure that all staff have the proper knowledge, training and equipment to ensure their safety. Lastly, IOM follows UNDSS protocols for including security clearance and convoy trayl for vehicles.

Access

Humanitarian access is currently possible to all areas targeted by this project. In order to address sporadic incidents of insecurity, a comprehensive and flexible security strategy is in place and provides for a tailored response to insecure conditions

BUDGET
