

Project Proposal

Organization	ACF (Action Contre la Faim)					
Project Title	Prevention and treatment of Severe Acute Malnutrition in Children Under 5 Years in Hudur District, Bakool region of Somalia.					
CHF Code	CHF-DDA-3485-716					
Primary Cluster	Nutrition	Secondary Cluster				
CHF Allocation	Standard Allocation 1 (Feb 2015)	Project Duration	9 months			
Project Budget	292,632.12					
HRP Details	HRP Code	SOM-15/H/72073	HRP Budget	1,540,800.00		
	HRP Project Ranking	A - HIGH	HRP Gender			
Project Beneficiaries	Marker			Men	Women	Total
	Beneficiary Summary			10	10	20
				Boys	Girls	Total
				484	546	1,030
				Total		1,050
	Total beneficiaries include the following:					
	Children under 5			484	546	1,030
Trainers, Promoters, Caretakers, committee members, etc.			10	10	20	
Implementing Partners	Partner	Budget				
	MARDO	37,890.00				
		37,890.00				
Organization focal point contact details	Name: Amanda J. Koech Title: Grants and Communications Manager					
	Telephone: +254 738370362 E-mail: gcm@so.missions-acf.org					
BACKGROUND INFORMATION						
1. Project rationale. Humanitarian context: Give a specific description of the humanitarian situation in the target region based on newest data available (indicate source) (Maximum of 1500 characters)	The failed Gu rains and the AMISOM offensive against AS in 2014 led to a further deterioration of the already critical humanitarian situation in Bakool Region, and especially in its capital Xudur. The conflict related blockade of major supply routes leaves the local market basically empty and prices for the few available items have almost doubled, as everything is brought in small amounts and often under the risk of life. Only few food trucks (ACF, WFP) have reached Xudur after weeks of seeking their way through the siege. This caused a serious disruption of local livelihoods and a renewed nutritional crisis with high levels of acute malnutrition is observed by MARDO and ACF teams. No official FSNAU nutrition data is available for Xudur (insecurity, lack of access for FSNAU teams, focus on IDP only). Thus we can only conclude roughly from ACF's and MARDO's own nutrition admission data and a rapid nutrition assessment done in May 2014 that the nutritional situation in Xudur remains critical (> 15% GAM) to very critical (> 5.6% SAM). Additionally in Sep-14 an AWD outbreak brought more than 140 children to the ACF supported MCH. Access for humanitarian teams and aid remains a major challenge. During the floods in October ACF teams had almost no shelter and NFI kits to distribute to the more than 300 affected families. On more than one occasion ACF had to use very expensive private charter planes or the few UNHAS cargo planes to bring in live-saving drugs and therapeutic food					
2. Needs assessment. Describe the capacities in place, then identify the gaps (previous and new). Explain the specific needs of your target group(s) in detail. State how the needs assessment was conducted (who consulted whom, how and when?). List any baseline data	As reported in the ACF Nutrition Rapid Assessment May 2014, the estimated prevalence of acute malnutrition is 18.7% GAM and 5.8% SAM in Xudur. The results indicated that more girls were undernourished (7.2%) as compared to boys (3.9%). This means 65 % (669) of targeted cases will be girls and 35 % (361) boys. Whilst the results of ACF's mentioned Rapid Nutrition Assessment indicated that significant more girls were undernourished (7.2%) as compared to boys (3.9%) the admission figures of our last 6 months of nutrition intervention in Xudur suggest that the % of admitted girls vs boys is actually 53% v 47%. Access to adequate health and nutrition services remains an issue of concern in Xudur. Despite ACF supporting the local NGO MARDO in running the OTP by providing drugs, equipment and training, challenges are foreseen in maintaining the nutrition staff at the TSPF/OTP sites should the UNICEF PCA for MARDO remain unsigned in the expected period. ACF and MARDO reports also indicate an increase of SC admissions from 22 in August 2014 to 35 in December 2014. This is due to recent improved security therefore better access of Xudur town for surrounding villages					
3. Activities. List and describe the activities that your organization is currently implementing to address these needs	Currently ACF is running 1 stabilization center under the CHF Nutrition project. As at December 2014, 392 boys and girls were referred and treated at the outpatient therapeutic program while 157 boys and girls were referred to the stabilisation centre to treat the complications. At the Stabilisation centre SAM cases with medical complications receive treatment while their caretakers receive health education and care practice sessions. ACF also strengthens local capacities (MARDO in Xudur) through a supportive training/coaching approach. Additionally ACF provides direct training, supply of drugs, equipment and therapeutic feeds, running costs (generator costs), and reimbursement of staff costs. 100 community members were sensitized on health and nutrition. In addition to continuous screening and treatment of SAM children with complications, educating caretakers, and training activities, rehabilitation of the Stabilization Center and replacement of fixtures, expansion to accommodate more patients and furniture is planned. ACF will implement a food security project primarily targeting households with SAM children. The WASH project will increase access to clean drinking water and sanitation to communities who will be benefiting from the nutrition intervention, especially WASH facilities rehabilitated at the MCH/SC. Access to safe drinking water and better sanitation and hygiene practices will greatly contribute to reduction of diseases and subsequent under nutrition					
LOGICAL FRAMEWORK						
Objective 1	Contribute to the reduction of malnutrition related morbidity and mortality in under five years girls and boys in Xudur District, Bakool region					
Outcome 1	Effective detection, referral, and quality treatment of severe acute malnutrition (SAM) among under 5 years girls and boys in Xudur Bakool Region					
Activity 1.1	Continuous active SAM case finding in the community by community health workers and effective referrals to a rehabilitated Stabilization Center (SC) and Outpatient treatment program (OTP).					
Activity 1.2	Systematic treatment of severe acute malnutrition (SAM) 410 girls and 363 boys with medical complications admitted in the Stabilization centre(SC)					
Activity 1.3						

Indicators for outcome 1		Cluster	Indicator description	Target
	Indicator 1.1	Nutrition	Number of children (6-59months) and pregnant and lactating women admitted in treatment programmes	1030
	Indicator 1.2	Nutrition	No. of children treated on SAM and referred to SC	773
	Indicator 1.3			0
Outcome 2	1030 male and female caretakers of severely malnourished boys and girls are trained in Infant and Young Child Feeding and other care practices.			
Activity 2.1	Promoting IYCF through formation of 4 Mother to Mother Support Groups (MTMSGs)			
Activity 2.2	Training of 20 community members (TBAs, elders, Imams, community health workers) on infant and child feeding practices and other care practices.			
Activity 2.3	Health nutrition promotion focusing on Infant and Young Child Feeding Practices (IYCF) for 1030 caretakers of SAM children.			
Indicators for outcome 2		Cluster	Indicator description	Target
	Indicator 2.1	Nutrition	Number of IYCF promotion sessions held	20
	Indicator 2.2	Nutrition	Number of active mother to mother support care groups	4
	Indicator 2.3	Nutrition	Number of participants attending nutrition promotion sessions.	1030
Outcome 3	To strengthen the capacity of community and local partners (MARDO) in IMAM management and contribute to surveillance through employment of standard assessment methodologies and data sharing to improve community participation in detection and referral of SAM cases.			
Activity 3.1	Conduct theoretical and refresher trainings on IMAM for 20 MARDO staff, community health workers and community mobilizers, and 12 months on the job training for MARDO staff.			
Activity 3.2	Training of 20 key community members to effectively conduct active case finding, defaulter tracing, house to house visits and referral.			
Activity 3.3	Assess nutrition status in the region			
Indicators for outcome 3		Cluster	Indicator description	Target
	Indicator 3.1	Nutrition	Number of male and female Staff/Community Health Workers/outreach workers trained on the management of acute malnutrition	20
	Indicator 3.2	Nutrition	Number of community key members trained on screening and referrals.	20
	Indicator 3.3	Nutrition	Number of nutrition assessments conducted	3

WORK PLAN

Implementation: Describe for each activity how you plan to implement it and who is carrying out what

1.1: Screening will be done at the community level by ACF staff together with Community workers interacting with children during their routine house to house visit. This will encourage ownership and sustainability of good nutrition practices. 1.2 : All children will be screened at the OTP and those found to be acutely malnourished will be admitted or referred. Complicated cases will be referred to the stabilization center. 2.1: MTMSGs will be established within the existing stabilization centre, focusing on exclusive breastfeeding, breastfeeding support and IYCF and follow up. Since most of the deliveries are conducted at home by TBAs it will be very crucial to include them in the support group. 2.3: Together with the local leadership community health workers, (both male and female) will be identified and trained on IYCF and other care practices as per the Somalia IYCF training package. 3.1: ACF technical staff (clinical officer, Nurses, Midwife, health educator) will support MARDO staff by training them on the job at the OTP sites and at the Stabilization centers. 3.2: Community mobilizers will be trained and in turn support the training of community workers to actively screen and detect malnutrition cases at the community level. The data will be shared to improve community participation in making programming decisions. The project will integrate with WASH and Health funded projects in the area.

Project workplan for activities defined in the Logical framework

Activity Description	Month 1-2	Month 3-4	Month 5-6	Month 7-8	Month 9-10	Month 11-12

3. National and regional clusters	Coordination										
4. WHO	Health cluster coordinnation										
Gender theme support	Yes										
Outline how the project supports the gender theme	Throughout the project cycle, the project involves both males and females in all activities on equally basis where possible . Children beneficiaries are targeted from both genders while male and female staff are given equal chances of recruitment and on the job training. While pregnant and lactating women are female, male members of the family and community are involved in relevant activities and decision making to support this group. Participation of both male and female in all decision making processes is also encouraged, especially in training of key community members (including imams, elders- who are traditionally male in the Somali society) CHWs on infant and young child feeding practices; these members ultimately help in making positive IYCF decisions.										
Select (tick) activities that supports the gender theme	<input checked="" type="checkbox"/> Activity 1.1: Continuous active SAM case finding in the community by community health workers and effective referrals to a rehabilitated Stabilization Center (SC) and Outpatient treatment program (OTP). <input checked="" type="checkbox"/> Activity 1.2: Systematic treatment of severe acute malnutrition (SAM) 410 girls and 363 boys with medical complications admitted in the Stabilization centre(SC) <input checked="" type="checkbox"/> Activity 1.3: <input checked="" type="checkbox"/> Activity 2.1: Promoting IYCF through formation of 4 Mother to Mother Support Groups (MTMSGs) <input checked="" type="checkbox"/> Activity 2.2: Training of 20 community members (TBAs, elders, Imams, community health workers) on infant and child feeding practices and other care practices. <input checked="" type="checkbox"/> Activity 2.3: Health nutrition promotion focusing on Infant and Young Child Feeding Practices (IYCF) for 1030 caretakers of SAM children. <input checked="" type="checkbox"/> Activity 3.1: Conduct theoretical and refresher trainings on IMAM for 20 MARDO staff, community health workers and community mobilizers, and 12 months on the job training for MARDO staff. <input checked="" type="checkbox"/> Activity 3.2: Training of 20 key community members to effectively conduct active case finding, defaulter tracing, house to house visits and referral. <input checked="" type="checkbox"/> Activity 3.3: Assess nutrition status in the region
