# BACKGROUND INFORMATION South Sudan has remained engulfed in a crisis pitting SPLA and SPLA-IO forces led by President and former Vice-President respectively since political violence 1. Humanitarian context analysis. erupted on December 15, 2013. Both sides are preparing for major offensives as the dry season sets in at the beginning of December 2014. Renewed conflict is likely to be accompanied by widespread displacement, atrocities/crimes coupled with increasing food insecurity. Settlements where basic services are available are Humanitarian context: Describe the current humanitarian situation in the expected to receive an additional influx of people in 2015. As per UNOCHA report about 1.8 million people have fled their homes. This includes the more than 1.35 million people who have been displaced inside South Sudan and the 453,000 who have fled to neighboring countries. Majority of the people have displaced in major 3 states of Jonglei, Unity and Upper Nile and are living with host communities, within POCs and IDPs settlements and have seen the most active hostilities and sisplacement throughout the crisis. The south Sudan crisis has extensively disrupted essential primary health care and health care access remains challenging especially in hard to reach areas Guit, Mayom, and Pariang Counties in Unity State. All these counties were ranked as high severity score and class by CERF heat map county severity score from various assessments done. Other baseline surveys by IRNA in most areas of our projects were conducted to evaluate the needs specific locations where this project will be implemented for health services as we progress into 2015. Access to essential primary health care to vulnerable and host community needs will remain high or it may be expected to deteriorate if intensification of violence and displacement continue particularly during the dry season. Inadequate food and livelihood is likely to lead disease outbreaks such as Kala-azar which will increase due to poor malnutrition. Due to this there is need to preposition medical supplies 2. Needs assessment. Explain the specific needs of the target group(s), explaining existing capacity and gaps. State how the needs assessment was conducted, list any baseline data and explain how the number of beneficiaries has been developed. Indicates references to assessments such as Multi-cluster/sector Initial Rapid Assessments (MIRA) 3. Description Of Beneficiaries A total of 38,661 direct beneficiaries will be targeted by this project which of which are as follows a total of 7903 children under five years will be targeted (3871 boys 4032 girls) 7676 will be men while women are 19390 out of these 3689 are pregnant women A total 20 (health workers) will benefit from training from this project. As well community training such as Boma health training will be undertaken and will target (60) team members in the three counties both from host community and IDPs. Health education messages will also be targeted and the community as a whole will benefit through out the project cycle. CARE will seek to provide essential primary health care services in all the proposed areas, providing essential basic curative care, essential preventive care, and basic emergency obstetric care at community/ out-reach level and strengthening of emergency obstetric care at PHCC level as well as providing micronutrient for pregnant mother and providing preventive services such as (IPT, VCT, and PMTCT). CARE will work closely with different partners in coordinated manner to ensure in all counties where CARE is providing basic package for health care services will be done in a consultative manner thus consolidating the gains and 4. Grant Request Justification achievement realized by all on health services and other related intervention such as nutrition and WASH. All the proposed counties have been prioritized by health cluster for all thematic areas of conflict affected. Disease outbreak, malnutrition in most of these counties are at emergency level and as well in food insecurity (IPC 3, 4, 5). Populations that are still displaced in 2014/15 and could still experience additional displacement as the insecurity and threats increase and the desire for groups to seek further safety and security away from current location. Should the crisis become more protracted, displaced populations and vulnerable host communities will continue to need sustained basic emergency essential health care services to support on the increased demand on limited infrastructure available. 5. Complementarity. Explain how the project will complement previous or ongoing projects/activities implemented by your organization. LOGICAL FRAMEWORK Overall project objective To improve access to and responsiveness of essential emergency primary health care including emergency obstetric care, access and demand for gender base and psychological services targeting vulnerable population in 2 counties in Unity state namely (Guit and Mayom). Logical Framework details for HEALTH Cluster objectives Strategic Response Plan (SRP) objectives Percentage of activities 50 2015 SSO 1: Improve access to, and responsiveness of, essential including emergency health care, and emergency SO 1: Save lives and alleviate suffering by providing multisector assistance to people in need 2015 SSO 2: Enhance existing systems to prevent, detect and respond to disease outbreaks SO 1: Save lives and alleviate suffering by providing multi-40 sector assistance to people in need 2015 SSO 3: Improve availability, access and demand for Gender Based Violence and Mental Health and Psycho-SO 2: Protect the rights of the most vulnerable people, including 10 Social Support services targeting highly vulnerable people their freedom of movement Outcome 1 Improved access to and responsiveness to essential including emergency health and emergency obstetric care and provide access and demand of gender and psychological services targeting the vulnerable population in 2 counties of Unity state. Code Description Assumptions & Risks Access and demand for emergency and responsive health care including psycosocial is provided at facility and out-reach level is enhanced Output 1.1 Access and ecurity will allow health care operation to continue, and availability of primary health care staff to provide the service Indicators

Activity 3.1.1 Conduct community awareness of GBV service available at the health facilities	2015								Х	Х	Х	Х	Х
Activity 3.1.2 Train at least two clinic staff on clinical management of rape using WHO and UNFPA guidelines	2015								Х	Х			
Activity 3.1.3 Request and distribute dignity kits from UNFPA to affected persons	2015								х	х	Х	х	Х

Monitoring & Reporting Plan:
Describe how you will monitor the
implementation of each activity.
Describe the tools you plan to use
(checklist, photo, questionnaires,
interviews, suggestion box etc.) in
order to collect data and how you will
store data. Explain the frequency type
and protocol of reporting (how often do
you report about what to whom?).
State if, when and how you plan to
evaluate your project.

The emergency health project will be monitored on weekly and Monthly basis through the MOH health information management system(HMIS) at the same time quarterly support supervision will be undertaken using a supervisory checklist to monitor the project. Community will be trained and feedback mechanism will be deployed to ensures accountability of the affected population. Monthly narrative reports will also be generated and shared with CHF and other donors supporting the project. Monitoring tools from the ministry of health will be used to collect health data

### OTHER INFORMATION

Accountability to Affected Populations Implementation Plan: Describe for each activity how you plan to implement it and who is carrying out what. The affected population have the right to information on the project implemented and will be given a chance to participate at all levels

The following activities will be undertaken during implementation, community mobilization, recruitment of project staff, procurement of project supplies and distribution, set of mobile team and drawing of activity plans, conducting OPD consultation at out reach sites, providing health education, facilitating emergency referrals during an emergency, training community and health staff on disease surveillance and provision of skilled delivery and documentation.

Coordination with other Organizations Name of the organization Areas/activities of collaboration and rationale in project area 1. International Rescue Mobile health services within Mayom county Committee (IRC) 2. MSF-SWISS Primary Health care activities at Mayom PHCC in mayom County and provision of emergency Obstertric care referal services to their Hospital at Agok Environmental Marker Code A: Neutral Impact on environment with No mitigation 2a-The project is designed to contribute significantly to gender equality Gender Marker Code CARE plans the following on gender consideration: • During recruitment CARE will give equal opportunities to male and female • During focus group discussions women will be encouraged to participate • In activities such as IYCF, and RH sensitization men will be encouraged to participate • CARE has a gender action plan to Justify Chosen Gender Marker Code ensure the recommendations provided in the blue print are taken into consideration • CARE has a code of conduct that protects both staff and beneficiaries male and female Protection Mainstreaming
