

2016 FIRST STANDARD ALLOCATION KICK-STARTS LIFE-SAVING ASSISTANCE

In January 2016, the South Sudan Common Humanitarian Fund (CHF) Advisory Board identified US\$38 million top priority projects for funding through the first standard allocation to kick-start implementation of the 2016 Humanitarian Response Plan (HRP). Given that the fund had limited resources available, the Advisory Board agreed to immediately allocate US\$20 million for 57 top priority projects, taking advantage of the dry season to reach people in dire need and preposition supplies for the rainy season. The Advisory Board further agreed to fund the remaining \$18 million priority projects as soon as additional contributions were received.

Additional funding urgently required

In the first quarter of 2016, \$11.1 million was received by the CHF from Denmark, Ireland, Sweden and Luxembourg. This funding has been allocated to 31 additional projects from the first standard allocation. However, a further \$7.7 million is urgently required to complete the first standard allocation. Without this funding, vital health, non-food items and emergency shelter, logistics, emergency telecommunications, camp coordination and camp management projects will be unable to be implemented in the first half of 2016.

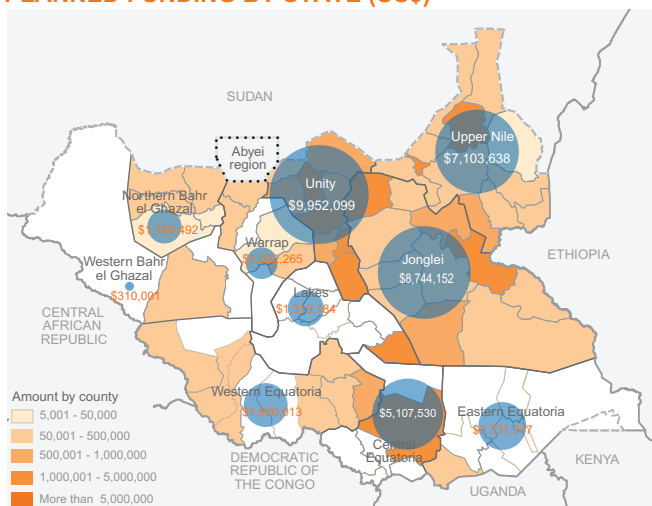

PEOPLE TO BE TARGETED WITH CHF SA1 FUNDED PROJECTS IN 2016

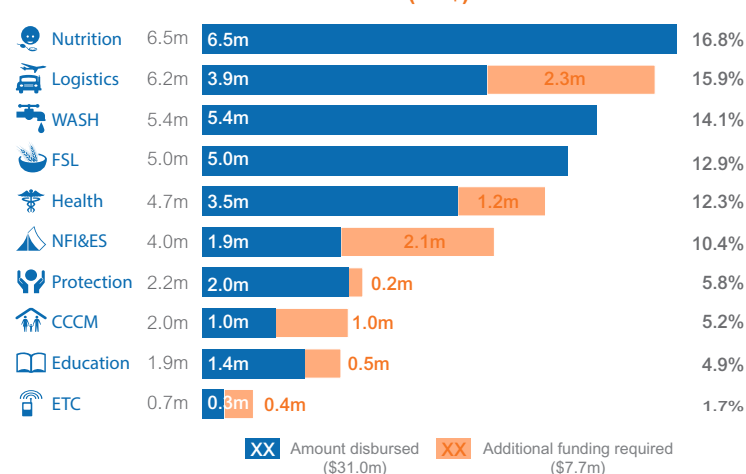

Note: The number of people to be targeted in the first quarter of 2016 under each cluster is estimated through quarterly aggregation of proposals submitted by partners. Figures shown above represent the number of people to be targeted. To avoid double counting, beneficiaries for pipeline projects are excluded.
