Primary Cluster	Sub Cluster	Percentage			
PROTECTION	Mine Action	100.00			
		100			
Project Title :	Urgent Assistance Gaps and Reduce ERW Casualties Among Conflict Displaced /Civilians in North , North East and East Regions of Afghanistan				
Allocation Type Category :	Field activities				
OPS Details					
Project Code :		Fund Project Code :	AFG-17/3481/1SA/APC/NGO/5020		
Cluster :		Project Budget in US\$:	527,889.85		
Planned project duration :	6 months	Priority:			
Planned Start Date :	01/05/2017	Planned End Date :	31/10/2017		
Actual Start Date:	01/05/2017	Actual End Date:	31/10/2017		
Project Summary :	<p>This project application is prepared in response to OCHA request for grant application to conduct humanitarian mine action (explosives ordinance disposal (EOD), Mine Risk Education (MRE), spot-clearance and survey of hazardous areas) in, Balkh, Faryab, Jowzjan, Samangan, Suri Pul, Badakhshan, Takhar, Kundoz, Baghlan, Nangarhar, Laghman, Kunar and Noristan provinces to assist recent war affected communities in urgent need.</p> <p>MDC used the information and data which was provided by OCHA, UNOPS and the result of MDC's initial assessment. Based on the above mentioned data and assessments, MDC found that the civilian in the above mentioned sites including (women, girls, men, and boys) face continuously to the risk of ERW when returning to their own communities. The lack of knowledge about the ERW causes continuous loss of live, obstacles and disruption to access to education, health and other socio-economic activities. So, to provide safe land for the civilian, MDC proposes to deploy 8 (MRE/EOD/Survey/ Spot-Clearance) cross trained teams, 16 MRE teams and 1 mobile project office for 6 months. These teams will conduct the MRE, survey and marking, ERW clearance/disposal of hazards where the civilians are at risk. This will make sure that the impacted communities are educated on mine/ERW risks, the hazardous areas are surveyed and marked, and all known ERWs are disposed. As a result the number of mine/ERW victims will be reduced significantly and the socio-economic activities will be started.</p> <p>Each (MRE/EOD/Survey/Spot-Clearance) team is consist of 5 person. 1 team leader/Paramedic with function of command/control, leading and medical first aid provision to related team. Two MRE trainers (couple) for conducting mine/ERW risk education in targeted communities, EOD/survey operator for spot clearance and survey and 1 guard for keeping care of base camp of the team.</p> <p>Based on our calculation and last 27 years experiences the mentioned resources will enable us to achieve the project's goals and objectives efficiently and effectively. All the above mentioned resources will be deployed in compliance to AMAS, IMAS and application of the MDC approved SOPs.</p> <p>MDC will conduct regular supervision, monitoring and quality control, of the project's activities. The project teams will be supported efficiently and effectively in the field. The project will be managed effectively and efficiently at micro and macro levels. And the project progress will be reported to the donor on time based on requirement.</p>				
Direct beneficiaries :					
	Men	Women	Boys	Girls	Total
	53,077	55,604	70,769	73,296	252,746
Other Beneficiaries :					
Beneficiary name	Men	Women	Boys	Girls	Total
Host Communities	24,982	26,171	33,309	34,498	118,960
Internally Displaced People	28,095	29,433	37,460	38,798	133,786
Indirect Beneficiaries :					

In addition to direct beneficiaries surrounding communities inhabitants (432,000) to the affected areas, aid workers, mobile local people, nomads, infrastructure workers will be benefited indirectly after the implementation of this project. As the direct training conducted to the direct beneficiaries or villagers, they will train and pass the messages to their family members, friends, classmates, students, villagers, or Mula Emam of Masjeds to the prayers and during their speech and preach or in any other events including male, female, youth and children. However, our trainers are from different communities of Afghanistan they also share the messages to others.

This information is based on MDC assignment.

Catchment Population:

Link with allocation strategy :

This project is designed in the line with the OCHA's first allocation 2017. It supports to achieve the envelope three, cluster protection "Address urgent assistance gaps & reduce ERW casualties among conflict displaced and civilians". Therefore, this project will focus mainly on reduction of ERW casualties in the project sites, which will included the mine risk education and survey of the hazardous areas, and spot clearance of the hazardous areas.

ERW (mine and UXO) is identified as a major problem in the above mentioned project sites; it has affected and endangered the normal life of civilians, IDPs and returnees of the communities.

BACKGROUND

1. Humanitarian context analysis

The security situation across Balkh, Faryab, Jowzjan, Samangan, Suri Pul, Badakhshan, Takhar, Kundoz, Baghlan, Nangarhar, Laghman, Kunar and Noristan provinces of Afghanistan has continued to worsen in 2016 and 2017, with the total figure of focused communities reaching almost 252,746 people.

The above mentioned long lasting conflicts have left the population with lots of ERW, internal displacement, returnees, socio-economic and security problems. These populations are most vulnerable to multiple life threatening and socio-economic problems. All the above life threatening condition requires urgent action.

As result of increased conflict different types of arms and ammunitions were used in the first half and end of 2016, there has been a significant increase in the mentioned locations and huge area (villages and agriculture land) was contaminated.

Existence of ERW and lack of mine action or life-saving activities has caused the population to face the danger of mine and ERW. According to UNAMA, alongside ground engagements, improvised explosive devices (IEDs) and explosive remnants of war (ERW) continue to be leading causes of civilian, IDPs and returnees casualties – the latter disproportionately impacting children, who comprised 85% of the casualties caused by ERW in the first half of the year. UNAMA documented 510 civilian casualties (160 deaths and 350 injured), a 67 per cent increase from the same period in 2015. With the continued trend towards large-scale and prolonged armed clashes within populated areas including district administrative centers, involving the increased use of artillery, mortars and aerial bombardments, the risk of further ERW contamination in civilian, IDPs and returnees inhabited areas remains substantial, as do the associated risks to the physical safety of returning displaced populations and civilians, especially children who end up killed or disabled while playing with such objects.

Of particular concern, are more than 252,746 civilians, IDPs and returnees in Balkh, Faryab, Jowzjan, Samangan, Suri Pul, Badakhshan, Takhar, Kundoz, Baghlan, Nangarhar, Laghman, Kunar and Noristan provinces . Given the continued spread and intensification of the conflict in these areas. CHF funding which would enable MDC to implement the outreach community-based mine risk education, mobile survey and demarcation of ERW, as well as conduct spot-ERW clearance.

2. Needs assessment

Based on the information collected by our assessment teams and the data received from UNMAS we found that, the recent conflicts in the mentioned provinces has caused multiple problems to the residents, returnees and IDPs of the conflicted areas; blockages of the access roads, shelled, bombed, mined and continued displacements are problems that the communities facing. All of the mentioned problems preventing residents of the affected communities to have access to their agriculture lands and to cultivate them in order to produce food staff. Also they cannot use the canals and streams for the irrigation of their agriculture land. Furthermore, the existence of ERW is the biggest barriers for IDPs to return to their villages Mines/ERW affected them. The boys and girls are exposed to the danger of Mine/ERW when they go to school, Masjeds, universities, water sources, firewood collecting areas, health centers, play grounds , animal herding which is very common in rural communities and many other social needs so, according to UNAMA, alongside ground engagements, improvised explosive devices (IEDs) and explosive remnants of war (ERW) continue to be leading causes of civilian casualties – the later disproportionately impacting children, who comprised 85% of the casualties caused by ERW in the first half of the year. The men are exposed to min/ERW risks when they return back to their homes or go out for farming and other socio-economic activities, the mine/ERW contamination has caused 16% casualties among the men in the above mentioned project sites. The women mainly support their men in forming and construction of their houses in the project sites so, they are also exposed to the risk of mine/ERW. Therefore, in order to reduce the mine/ERW impact on the above mentioned different genders; its required to conduct spot-ERW clearance (EOD), survey in order to specify the total area for next planning of clearance and decontamination. Also, the data of such areas should be provided for reporting and information in order to prevent accidents among population. The project planned teams are needed to conduct mine risk education (MRE) sessions to the population of the targeted areas which are segregated as bellow:

Takhar Badakhshan Suri Pul Samangan Jawzjan Faryab Balkh
 HC IDP Ret
 3181 2163 0 726 4720 0 2894 2740 0 5560 1788 0 0 3190 0 0 17715 0 5810 9663 0

Noristan Kunar Laghman Nangarhar Baghlan Kundoz
 HC IDP Ret
 3952 0 0 8162 0 86 6274 0 178 65363 0 21888 14002 21221 0 3036 48434 0

Therefore, MDC planned 8 MRE cross trained teams and 16 MRE teams in order to survey and clear the spots. Also, at the same time they should conduct village to village mine risk education (MRE session) to the members of the mentioned communities, IDPs and returnees. Therefore, a mine/ERW action is one of the most important needs.

3. Description Of Beneficiaries

The total immediate direct beneficiary of this project is approximately 252,746 people. But, as we know that Mine/ERW existence is possible in other locations of the community and surrounding area of the conflict and fighting, so the beneficiary may increase and indirectly more people will benefit from the project, as indirect messages which mentioned under the topic of indirect beneficiaries.

Also, MDC will consider more vulnerable groups as first priority like children who moves a lot; going to schools, courses, collecting firewood, playing, walking and etc. The teams will try to convey the messages and train different groups and genders with good and motivational methods, in order to make it effective.

The civilians of the communities, IDPs and returnees affected by ERW who are around 252,746 people (57 % female and 43 % male).

4. Grant Request Justification

MDC has worked to eliminate mine/ERW and has huge experiences in the mentioned areas and other province of the country. MDC has implemented many mine clearance, EOD, MRE, and Survey projects nationally and internationally. In brief MDC has cleared almost 55% of the mined areas and support the survey operations of 350 sqkm of hazardous areas in Afghanistan. And has completed big national demining projects such as ring roads, copper mine project, power line and many other national and international projects.

In addition to government, donors, and international reputation, MDC has excellent record of transparency and neutrality which gives MDC a respected position. It means MDC is able to work in all areas, doesn't matter who controls the area.

It's worth to mention that MDC has sufficient working experiences in the planned project sites; it has cleared 5,881,044 sqm hazardous areas in Balkh, 3,921,306 sqm hazardous areas in Faryab, 242,847 sqm hazardous areas in Jawzjan, 2,617,777 sqm hazardous areas in Samangan, 240,966 sqm hazardous areas in Suri Pul, 205,069 sqm hazardous areas in Badakhshan, 8,223,801 sqm hazardous areas in Takhar, 4,220,551 sqm hazardous areas Kundoz, 9,195,670 sqm hazardous areas in Baghlan, 34,493,421 sqm Nangarhar, 3,136,651 sqm hazardous areas Laghman, 598,043 sqm hazardous areas in Kunar and no operation in Noristan province. Also, MDC supported the survey operations of over 350 sqkm of hazardous areas and conducted the Mine Risk Education (MRE) for more than 1,000,000 populations in the above mentioned locations of Afghanistan.

Currently MDC has operations in some of the above mentioned provinces (Baghlan, Kundoz, Takhar and Badakhshan). Therefore, MDC is the best organization to implement the proposed project because it has very qualified and experienced staff and excellent technical and social background in the planned locations. Also MDC has all of the required equipment for the operations and does not need to procure any technical item under this project which will make the project implementation very effective.

5. Complementarity

Implementation of this project will be as part of the continuation of the MDC's projects in the areas where previously has operated and will continue as reliable mine action organization in mine/ERW operations in the planned sites.

As we mentioned above MDC has implemented many projects in mentioned planned areas and still the mine and ERW problems exists in those areas, implementation of these new projects in the planned areas will prevent accidents and reduce casualties, and huge newly affected areas will be released and to some extent prevents the increase in number of new mine/ERW areas in national data base (IMSMA).

LOGICAL FRAMEWORK

Overall project objective

To contribute towards CHF First Allocation Strategy 2017 (Envelope three: Response to neglected needs exacerbated in a deteriorating humanitarian and protection environment). But, specifically MDC will focus on the following points under this project:

- Mine/ERW casualties reduction in the project sites, and release of clear land.
- IDPs will be able to return to their villages.
- Returnees and IDPs will resume their normal life and aid worker will resume activities in a safe environment.
- The number of displaced women, girls, boys and men at risk of ERW casualty and death will be reduced, during displacement and return.

PROTECTION							
Cluster objectives		Strategic Response Plan (SRP) objectives	Percentage of activities				
Objective 3: Support the creation of a protection-conducive environment to prevent and mitigate protection risks, as well as facilitate an effective response to protection violations		SO1: Immediate humanitarian needs of shock affected populations are met - including conflict and natural disaster affected and IDPs, refugees and returning Afghans from armed conflict	100				
Contribution to Cluster/Sector Objectives : Objective 3: Create a protection-conducive environment to prevent and mitigate protection risks, as well as facilitate an effective response to protection violations, affecting 252,746 (51,604 men - 60,472 women – 66,099 boys and 74,571 girls).							
Outcome 1							
Reduced number of mine/ERW casualties in the project sites, - Released land after clearance and response, - IDPs returned to their village, - Resumptions of normal live and aid worker activities - The number of displaced women, girls, boys and men at risk of ERW casualty and death is reduced, during displacement and upon return'.							
Output 1.1							
Description							
198,258 (41634 men , 43617 women , 55512 Boys and 57495 Girls) Host community ,IDPs and returnees will benefit from Mine risk education and mobile, prioritized and responsive surveillance and demarcation of ERW in conflict impacted communities and spot-ERW clearance which provides by 8 crossed trained teams and 16 MRE teams.							
Assumptions & Risks							
There are several key assumptions as:							
<ul style="list-style-type: none"> • Security situation will be improved in the project sites. • Community and authority support remains stable in the project sites. • Government in our project sites will remain in control, thus ensuring a relatively smooth infrastructure that will support rather than disrupt our activities. • We also assume that there will be no major change in policies when some changes coming in provincial administrations, thereby ensuring that all the activities listed in this proposal will be carried out smoothly and according to the plan. • We also assume that the areas will be comparatively free of insurgencies, security threats, and violence during the project period. Stability and security in the areas will ensure that there are no delays in carrying out project activities such as, pause of activity or some other disruptions. 							
Indicators

Indicator 1.1.1	PROTECTION	SA1-Envelope Three: Number of prioritised mine/ERW impacted individuals provided with Mine Risk Education	41,634	43,617	55,512	57,495	198,258
Means of Verification :							
Indicator 1.1.2	PROTECTION	SA1-Envelope Three: Number of prioritised mine/ERW impacted individuals provided with Mine Risk Education	22,085	22,672	28,800	29,000	102,557
Means of Verification :							
Indicator 1.1.3	PROTECTION	SA1-Envelope Three: Number of individuals in prioritised mine/ERW impacted communities visited by EOD teams conducting surveyance, demarcation, and spot-clearance	19,549	20,945	26,712	28,495	95,701
Means of Verification :							
Indicator 1.1.4	PROTECTION	SA1-Envelope Three: Number of individuals in prioritised mine/ERW impacted communities visited by EOD teams conducting surveyance, demarcation, and spot-clearance	41,634	43,617	55,512	57,495	198,258
Means of Verification :							
Indicator 1.1.5	PROTECTION	SA1-Envelope Three: Number of prioritised mine/ERW impacted individuals provided with Mine Risk Education	53,077	55,604	70,769	73,296	252,746
Means of Verification :							
Indicator 1.1.6	PROTECTION	SA1-Envelope Three: Number of individuals in prioritised mine/ERW impacted communities visited by EOD teams conducting surveyance, demarcation, and spot-clearance	0	0	0	0	0

Means of Verification : Number of focused and surveyed communities:

- 128 communities planned for cross trained teams.
- 159 communities planned for mine/ERW risk education teams.
- In addition 25 districts planned as well.
- It means that totally 287 communities and 25 districts are planned for this projects.

Activities

Activity 1.1.1

Standard Activity : Mine risk education and mobile, prioritised and responsive surveillance and demarcation of ERW in conflict impacted communities and spot-ERW clearance;

Conducting Mine Risk Education sessions in the project targeted communities
8 cross trained teams for North, Northeast and East (4 cross trained for North, 2 cross trained for Northeast, 2 cross trained for East) will train targeted population about mine/ERWs risks and transfer safety messages to the communities and this is the first activity in sequence.

Activity 1.1.2

Standard Activity : Mine risk education and mobile, prioritised and responsive surveillance and demarcation of ERW in conflict impacted communities and spot-ERW clearance;

Conducting mobile, prioritized and responsive surveillance and demarcation of ERW in conflict impacted communities.
8 cross trained teams for North, Northeast and East (4 cross trained for North, 2 cross trained for Northeast, 2 cross trained for East) will do survey and demarcation of the targeted communities, this is the second activity in sequence.

Activity 1.1.3

Standard Activity : Mine risk education and mobile, prioritised and responsive surveillance and demarcation of ERW in conflict impacted communities and spot-ERW clearance;

Conducting Spot-ERW clearance in conflict impacted communities.
8 cross trained teams for North, Northeast and East (4 cross trained for North, 2 cross trained for Northeast, 2 cross trained for East) will identify and destroy the ERW, which is the third activity.

Activity 1.1.4

Standard Activity : Mine risk education and mobile, prioritised and responsive surveillance and demarcation of ERW in conflict impacted communities and spot-ERW clearance;

Monitoring and Evaluation

MDC has a monitoring and evaluation cell under the operations department at MDC HQ who will regularly conduct the monitoring and evaluation of the project's activities in the field and reports on monthly basis to the operations senior manager and on weekly basis to the project's officer. During this project, MDC monitoring and evaluation cell will conduct totally 150 internal monitoring missions and visits of teams in the field. The project officer will conduct the monitoring mission of their teams on weekly basis. In order to avoid the requirement for mid-course correction, MDC continuously monitors all of the productivity of its operations through direct visits, checking of monthly, quarterly and mid-term activity and monitoring reports. The results of these monitoring will be shared with MDC top management and on time preventive actions will be taken. If MDC faces any problem regarding the achievement of the planned target, it will be shared with DMAC, UNOPS and the donor to find proper solution. The performance of the project activities will be tracked through checking the progress reports of the project as well as the quality management and monitoring reports. MDC expects that correction and adjustment of the design and plans will be facilitated on the basis of the above-mentioned monitoring and evaluation feedbacks.

Recruitment

MDC will deploy existing stand by trained MRE instructors and support staff for this project according to plan which is making as an separate annex, but in some provinces where the security is not so good, MRE instructors will be hired from the community, for whom MRE training of trainers training will be conducted for three days in order to motivate local communities to assist our project and they know better the language, culture and situation of their own communities.

Supervision and Quality Management

The supervision of the teams will be conducted by the teams' leaders at team level on daily basis; in addition to that the project office and HQ technical staff conduct regularly the monitoring and supervision of the project teams. The team leaders have the responsibilities of the overall team's leading, supervision and control. So, in this way every working lane of the teams are supervised and controlled continuously during the operations.

The project officer will conduct the supervision and monitoring mission of their teams on weekly basis. And at head quarter level each team is supervised and monitored every other month by MDC's operations department's monitoring and supervision staff.

- Quality Management

MDC makes sure that the planned resources under this project operate in accordance to the IMAS, AMAS and MDC approved SOPs during the project period. MDC hires 3 qualified quality inspectors from its core capacity under this project who will be stationed in the project office to conduct regularly the internal QA inspections of the teams. The quality assurance inspection of each team is conducted by the project quality inspectors at least twice a month. The activities of the above mentioned personnel are over sighted by MDC HQ quality management manager. Furthermore, the project activities will externally be inspected by DMAC, OCHA and UNMAS. All of these inspections are documented and recorded properly and the required corrective preventive actions will be taken on each of the non-conformity reports.

- Corrective and Preventive Actions Process

- Identification of the problem through supervision and quality management missions;
- Clearly definition of the problem;
- Assign the extent and impact of the problem;
- Perform a thorough analysis of the problem;
- Creating a list of required actions;
- Execution of the plan;
- Verification and assessment of the effectiveness.

Activity 1.1.5

Standard Activity : Mine risk education and mobile, prioritised and responsive surveillance and demarcation of ERW in conflict impacted communities and spot-ERW clearance;

Feedback Mechanism:

MDC teams collect feedbacks during classroom/sessions planning and at the end of sessions in a specific forms as well. Both literate and illiterate trainees are asking randomly some questions and their viewpoints about de-mining/MRE activities.

Output 1.2

Description

54,488 (11442 men, 11987 women,15257 boys and 15802 girls) host communities ,IDPs and returnees will benefit from mine/ERW Education which provides by 16 stand alone MRE teams.

Assumptions & Risks

There are several key assumptions as:

- Security situation will be improved in the project sites.
- Community and authority support remains stable in the project sites.
- Government in our project sites will remain in control, thus ensuring a relatively smooth infrastructure that will support rather than disrupt our activities.
- We also assume that there will be no major change in policies when some changes coming in provincial administrations, thereby ensuring that all the activities listed in this proposal will be carried out smoothly and according to the plan.
- We also assume that the areas will be comparatively free of insurgencies, security threats, and violence during the project period. Stability and security in the areas will ensure that there are no delays in carrying out project activities such as, pause of activity or some other disruptions.

Conducting Mine Risk Education sessions to 54488 conflict affected population

Output 1.3

Description

Record and report the projects' progress.

Assumptions & Risks

Security

Indicators

Code	Cluster	Indicator	End cycle beneficiaries				End cycle
			Men	Women	Boys	Girls	Target
Indicator 1.3.1	PROTECTION	SA1-Envelope Three: Number of individuals in prioritised mine/ERW impacted communities visited by EOD teams conducting surveyance, demarcation, and spot-clearance	53,077	55,604	70,769	73,296	252,746

Means of Verification : Project's weekly, monthly ,quarterly and final reports
-Project quality management reports

Activities

Activity 1.3.1

Standard Activity : Mine risk education and mobile, prioritised and responsive surveillance and demarcation of ERW in conflict impacted communities and spot-ERW clearance;

Record, analyze and report the project progress , financial and quality management reports to the UNMAS/DMAC and OCHA regional offices monthly , quarterly final reports.

Additional Targets : Technically conduct of activities and sequence:

- Liaison with community.
- Specific planning for a community.
- Gathering people for MRE sessions.
- Teaching the classes and sharing of safety messages.
- Asking trainees about ERWs existence in the village.
- If there was some ERWs, EOD will start their operations.
- Filling of survey/ feedback forms with the help of trainees.

Monitoring & Reporting plan

Operations Management

- a) The core operations activities of the project at macro level such as operational planning, implementing, leading, provision of OPS SOPs and technical standards, and supervision of the operations' activities are done by MDC HQ senior operations Manager, project officer, and monitoring officer, directed by MDC director.
- b) The project's officer will directly be responsible for the project's day to day field operations management over sighted by MDC HQ OPS department's senior operations manager. These includes the management of all of the site operations plans (the team leaders are also directly involved in the preparation of the site operation plans), base camp preparations, technical support to teams, teams' mission/mission leaves arrangements and any other related tasks.
- c) At the team level the leader of the teams, are responsible for the daily mine/ERW clearance operations' management, they are to manage the use of right tools in right places, human resources, lead and control the teams members during the operations, record and report the activities of the teams and any other related thing. The team leaders report to the project officer.

- Supervision

The supervision of the teams will be conducted by the teams' leaders at team level on daily basis; in addition to that the project office and HQ technical staff conduct regularly the monitoring and supervision of the project teams. The team leaders have the responsibilities of the overall team's leading, supervision and control. So, in this way every working lane of the teams are supervised and controlled continuously during the operations.

The project officer will conduct the supervision and monitoring mission of their teams on weekly basis. And at head quarter level each team is supervised and monitored every other month by MDC's operations department's monitoring and supervision staff.

- Quality Management

MDC makes sure that the planned resources under this project operate in accordance to the IMAS, AMAS and MDC approved SOPs during the project period. MDC hires 3 qualified quality inspectors from its core capacity under this project who will be stationed in the project office to conduct regularly the internal QA inspections of the teams. The quality assurance inspection of each team is conducted by the project quality inspectors at least twice a month. The activities of the above mentioned personnel are over sighted by MDC HQ quality management manager. Furthermore, the project activities will externally be inspected by DMAC, OCHA and UNMAS. All of these inspections are documented and recorded properly and the required corrective preventive actions will be taken on each of the non-conformity reports.

- Corrective and Preventive Actions Process

- Identification of the problem through supervision and quality management missions;
- Clearly definition of the problem;
- Assign the extent and impact of the problem;
- Perform a thorough analysis of the problem;
- Creating a list of required actions;
- Execution of the plan;
- Verification and assessment of the effectiveness.

Recruitment

MDC will deploy existing stand by trained MRE instructors and support staff for this project according to plan which is making as an separate annex, but in some provinces where the security is not so good, MRE instructors will be hired from the community, for whom MRE training of trainers training will be conducted for three days in order to motivate local communities to assist our project and they know better the language, culture and situation of their own communities.

If MDC faces any problem regarding the achievement of the planned target, it will be shared with DMAC, UNOPS and the donor to find proper solution. The performance of the project activities will be tracked through checking the progress reports of the project as well as the quality management and monitoring reports. MDC expects that correction and adjustment of the design and plans will be facilitated on the basis of the above-mentioned monitoring and evaluation feedbacks.</p> <p>Recruitment</p> <p>MDC will deploy existing stand by trained MRE instructors and support staff for this project according to plan which is making as an separate annex, but in some provinces where the security is not so good, MRE instructors will be hired from the community, for whom MRE training of trainers training will be conducted for three days in order to motivate local communities to assist our project and they know better the language, culture and situation of their own communities.</p> <p>Supervision and Quality Management</p> <p>The supervision of the teams will be conducted by the teams' leaders at team level on daily basis; in addition to that the project office and HQ technical staff conduct regularly the monitoring and supervision of the project teams. The team leaders have the responsibilities of the overall team's leading, supervision and control. So, in this way every working lane of the teams are supervised and controlled continuously during the operations.</p> <p>The project officer will conduct the supervision and monitoring mission of their teams on weekly basis. And at head quarter level each team is supervised and monitored every other month by MDC's operations department's monitoring and supervision staff.</p> <p>- Quality Management</p> <p>MDC makes sure that the planned resources under this project operate in accordance to the IMAS, AMAS and MDC approved SOPs during the project period. MDC hires 3 qualified quality inspectors from its core capacity under this project who will be stationed in the project office to conduct regularly the internal QA inspections of the teams. The quality assurance inspection of each team is conducted by the project quality inspectors at least twice a month. The activities of the above mentioned personnel are over sighted by MDC HQ quality management manager. Furthermore, the project activities will externally be inspected by DMAC, OCHA and UNMAS. All of these inspections are documented and recorded properly and the required corrective preventive actions will be taken on each of the non-conformity reports.</p> <p>- Corrective and Preventive Actions Process</p> <p>- Identification of the problem through supervision and quality management missions;</p> <p>- Clearly definition of the problem;</p> <p>- Assign the extent and impact of the problem;</p> <p>- Perform a thorough analysis of the problem;</p> <p>- Creating a list of required actions;</p> <p>- Execution of the plan;</p> <p>- Verification and assessment of the effectiveness.</p>	2017				X	X	X	X	X	X		
<p>Activity 1.1.5: Feedback Mechanism:</p> <p>MDC teams collects feedbacks during classroom/sessions planning and at the end of sessions in a specific forms as well. Both literate and illiterate trainees are asking randomly some questions and their viewpoints about de-mining/MRE activities.</p>	2017				X	X	X	X	X	X

OTHER INFO

Accountability to Affected Populations

First of all it's worth mentioning that security in the area, opposition operations, Government support and community supports, on time fund delivery, weather condition are the cross cutting issues that somehow director will have impact (positive and negative) on the implementation of the project.

MDC considers community liaison and coordination with different stakeholders (Afghan government, communities (state and local authorities), UNMAS, DMAC, the donors, etc.) as important factors for the implementation of the project's different phases. During the initial assessment, the man and women, girls and boys are interviewed and the information is gathered from them. During the mobilization/preparation phases, MDC keeps continuous contacts with the community leaders to strengthen the relation with them, MDC project officer and team leaders will spent time with the community members (male and female focal points) to explain the history of MDC, the aim of MDC work, the project's donor, the time frame for mine action, discuss the security issues, confirm the locations of the team's base camps, discuss the priority of the hazardous areas, collect information about the targeted hazardous areas, share the clearance and MRE plan with them and address any concern or questions the communities may have about MDC or planned works. As well as all of the project's activities will fully be coordinated with the local authorities, OCHA as well as UNMAS and DMAC through direct meetings, emails and other means of official correspondences so, the above mentioned liaison and coordination mechanism avoids the duplication of efforts and makes sure the effective and efficient implementation of the project.

The impacted communities (man, woman, girls and boys) will be involved in the monitoring and evaluation processes, they will be asked time to time to visit the operations sites along with the MDC monitoring and supervision personnel. They will be clearly briefed on MDC working procedures, clearance operations, the safety rules, the project plan and etc. If there was any written compliant or feedback from related community members or other stakeholder regarding MDC activities, it will be reported by monitoring/QMI teams to project officer and will consider in next operation or MRE sessions. Also, MDC will consider verbal compliant and feedbacks of illiterate community members and will note it for further corrective and preventive action.

The impacted communities are updated on weekly basis on the project progress and cleared spots are officially handed over to them. The teams will have direct communication with them on daily basis during the MRE sessions as well. MDC plan sessions for targeted communities in proper and safe places, MRE female instructor will conduct sessions for girls and women and her couple will train the boys and men. In addition to that MDC considers all safety procedure during EOD and spot clearance, for instance; teams will safe to move the objects or ERWs and maintain enough distance for disposal or making trenches and safe walls during explosions, coordinates such actions with close villages and consider other safety rules strictly.

Implementation Plan

MDC will not sub-grant any component of this project to other organization. All of the project's component will be implemented by MDC.

As all mine action activities is regulated by Government of Afghanistan DMAC and UNMAS therefore, MDC continues its coordination activities with DMAC, OCHA and UNMAS in regard with the proposed project's activities. MDC's operations department and project officer coordinates the operations activities of the project with the Afghan government's Department of Mine Action Coordination DMAC, OCHA and UNMAS or related AMAC, local authorities and the impacted communities on a daily, weekly, monthly and quarterly basis. This coordination includes consolidation of the survey results, reconciling databases, planning future tasking and prioritization and reporting the operations progress. The coordination of the project is done through planned meeting, exchange emails and radio contact. All of the coordination activities are documented and properly recorded at MDC.

It's worth mentioning here that, MDC takes in to account the Government of Afghanistan's (GoA), UNMAS's and OCHA's policies, rules, laws and regulations during the implementation of any aspect of the project. The clearance operation is planned so that maximum efforts have been done to announce the targeted communities free from the impact of mine and ERW. In addition to that MDC will have the capacity to respond to hotline calls in the project site.

Coordination with other Organizations in project area

Name of the organization	Areas/activities of collaboration and rationale
UNMAS	- Coordination of the project's activities
Local authorities	Coordination of the project's activities
Impacted communities	Liaise the project activities with them - Coordination of the project's activities, - Their involvement in the planning process of MRE, and other activities - Update them of project progress, - Handover the cleared spots to them
OCHA – HFU, OCHA regional offices, Protection Cluster, UNHCR and Implementing partners in the region	Coordination and report of the project's activities.

Environment Marker Of The Project

N/A: Not applicable, only used for a small number of services

Gender Marker Of The Project

2a-The project is designed to contribute significantly to gender equality

Justify Chosen Gender Marker Code

Project's principal purpose is to advance gender equality. The gender analysis in the needs assessment justifies this project in which all activities and all outcomes advance gender equality. Targeted actions are projects responding to the disadvantage, discrimination or special needs of women, girls, boys or men. All targeted actions are based on gender and age analysis.

During the implementation of this project MDC will conduct the followings:

- By conducting the mine risk education courses, ensuring that men, women and children in the project's targeted communities are aware of the risks from mines and ERW and are encouraged to behave in a way which reduces the risk to people, property and the environment
- To Implement a comparative analysis between the views of men and women with regards minefields/ battlefields clearance priority setting.
- Ensure that women, men, girls and boys have equal access to mine action activities and their benefits.
- Interview and asking questions from targeted community's member (men, women, girls and boys) about problems and challenges in regard to Mines/ERW in their community and solve them on the spot.
- In order to reach the women and girls, a couple (brother-sister, or husband-wife) MRE trainers will be hired in the structure of each project's teams.

Protection Mainstreaming

A total number of 8 cross trained and 16 MRE teams having the capacity of EOD, Survey, Spot-clearance and MRE will be deployed under this project which will cover all of the indicated priority locations. As mentioned before that the teams will be deployed in consultation with the communities and the communities will fully be involved in the planning process of the project. It means that responding to the priorities of the beneficiaries makes sure their safety and dignity.

During the consultation with the community members the project management and team members will explain about the program , its aims and code of conduct of the staff.

The found ERW will be reported to the communities and local authorities, and will be destroyed safely. Proper measures will be taken in to account to avoid any physical or psychological harm or destruction to the communities. Movement of the teams and locations of base camp will be consulted with the communities. In order to avoid environmental contaminations, all of the base camps' wastes either will be disposed properly or taken in consultation of the communities to the designated places.

The project planned teams will be able to cover 24 locations at one time; they will conduct the initial survey of the sites and prioritize the high, medium and low impact areas. And they will conduct their operations accordingly. In this way the project's team will make sure that the entire prioritized task are taken in to consideration and providing impartial and equal services to the impacted communities. In addition to that the project's team leader will keep daily contact the community focal points and will respond to their urgent need whenever gaining new priorities from the focal points.

The project's teams members will make sure that the impacted community are fully educated on mine/ERW risks so that to enable them to protect themselves from the danger of ERW. As well as MDC will hire couple (female, male) MRE trainers from the communities who will remain as capacity in the project sites and helps the communities in this regard.

The Project management and team members will make sure that the disabled and elderly members of the community have equal access to the MRE and are consulted during the MRE sessions.

Complaint mechanism will be in place spatially for illiterate people and women.

Country Specific Information

Safety and Security

Based on our initial assessment from the planned project sites, the security situation is not stable in most parts of the project sites. So, MDC will make sure through strong and continuous community liaison that the teams operate within the planned communities without facing any problems. As well as MDC will hire some of the project's personnel from the impacted communities, this will also help to make sure the security of the personnel. In addition to that MDC will hire the required rental vehicle of the project from the impacted communities, this will involve the communities in the project and will help to conduct the operations without facing any major security problem. For risk mitigation the following plan is prepared and will be applied during the project implementation.

Risk Mitigation Plan

Hijacking of Vehicle(s):

- Vehicles to travel in pairs if possible
- Use alternate routes when traveling
- Plan all road missions
- Maintain radio communications at all times with the project office and Headquarter.
- Drivers shall be advised not to stop unless individuals are armed
- Lock doors at all times and keep valuable equipment covered and out of site

Kidnapping of Personnel:

- All personnel to be aware of their surroundings.
- Avoid unnecessary movement.
- Maintain close ties to the community and establish intelligence on threats.

Theft of Explosives:

- Ensure explosives are well secured at all times
- Only keep a minimum amount of explosives at any time at sites ,in vehicles and at the project office
- Guard explosives at the project office
- Don't advertise that there are explosives present in vehicles or accommodation and office

Armed Robbery of Office :

- Maintain close ties to the community and establish intelligence on threats
- Employ guards for office
- Keep entrances closed and secure at all times
- Limit entrance to office to essential personnel only
- Ensure all attractive items are secure

Armed attack on teams by AGE at work site:

- Maintain close ties to the community and establish intelligence on threats
- Attempt to remain neutral at all times in the public eyes
- Maintain vigilance at worksites and attempt to identify AGE activity early
- Reduce the amount of explosive and attractive items that might encourage attention from AGE

ISAF, ANA, ANP Intervention at the Work site:

- Explain the risk to ISAF, ANA, ANP forces in the regions and ask for their cooperation to avoid troops visiting worksites
 - Provide locations of teams on a regular basis
 - Change work locations if ISAF, ANA, ANP are conducting military operations within the vicinity of the worksites
- Security Situation get worse in the project site (insurgency increase and don not allow the operations) • Stop the operations, report to all related bodies;
- Contact the local security forces;
 - Discuss with the local shoras, and elders if can resume the operations;
 - Relocate the teams to alternative tasks after the approval of OCHA if the above mentioned efforts did not work.
- Weather is good in all seasons of the year in the mentioned provinces
- No need to relocated the teams to alternative locations.

Access

As mentioned before, MDC has sufficient experiences of working in different parts of Afghanistan. And have trained technical personnel from almost all of the provinces of Afghanistan. So, when it comes to this project, MDC will structure the projects' teams mainly from its technical employees who are from the targeted communities. The planned teams will be equipped and deployed to the sites. All of the project's equipment and personnel will be transported from Kabul to the project sites by local transportations. The teams will have their mobile base camp in each of the project sites. They will commute on daily basis from their base camps to the operations sites and back. As mentioned before that the teams will use the rental vehicles for the daily transportation of the teams to the operations sites and back to their base camps. This will make sure the safe access of the teams to the field.

BUDGET

Code	Budget Line Description	D / S	Quantity	Unit cost	Duration Recurrence	% charged to CHF	Total Cost
Staff and Other Personnel Costs							
1.1	Project Officer	D	1	650.00	6	100.00	3,900.00

	<i>The project office will be managed by the following structure: 1 Project officer, 1 Site OPS Officer ., 3 Quality assurance / control inspector 2 Assistant admin/finance, Logistics officer , 1Demining / MRE Instructor, 1 data processor, 1 Community Liaison and 3 guards = 13 members in Project Office. This line: The project officer will directly be responsible for the day to day management of the project office . The unit cost of this position is established from MDC salary scale OF-5 Officer base. This position is a technical position who will be hired from MDC experienced personnel.</i>						
1.2	Site OPS Officer	D	1	500.00	6	100.00	3,000.00
	<i>The Site OPS Officer is responsible for all project teams day to day operations planning, operations activities leading, monitoring, tasks completion reports. The unit cost of this position is established from MDC salary scale OF-5 Officer base. This position is a technical position who will be hired from MDC experienced personnel</i>						
1.3	QA / QC inspector	D	3	450.00	6	100.00	8,100.00
	<i>The project Quality assurance / control inspector is a technical position who will be stationed in the project office and he is responsible for monitoring evaluation and quality management of the project. The unit cost of this line is established from MDC salary scale OF-5 Base.</i>						
1.4	Site AFL Assistant/Log Officer	D	2	350.00	6	100.00	4,200.00
	<i>The Site Admin/Finance and Log Officer will be stationed in the project office to provide on time administration, financial and logistical support to project's team. The unit cost of this position is established from MDC salary scale HS-2 Base.</i>						
1.5	Demining /MRE Instructor	D	1	400.00	6	100.00	2,400.00
	<i>The Demining/MRE Instructor will be responsible for conducting of refresher training of trainers, surveyors , demining operators. The unit cost of this position is established from MDC salary scale HS-1 Base.</i>						
1.6	Data Processor	D	1	450.00	6	100.00	2,700.00
	<i>1 Data processor will be responsible for processing all team daily, weekly, monthly and quarterly reports. The unit cost of this position is established from MDC salary scale HS-1 Base.</i>						
1.7	Team Leader/Paramedic	D	8	440.00	6	100.00	21,120.00
	<i>Each of the cross trained mine action teams will have the following structure: 1 Team Leader , 2 MRE trainers , 1 EOD/Survey operator and 1 security guard = 5 member in each team; so, the quantity of BL 1.8 is established from the above mentioned structure; this line, 8 teams (T) are planned for the project, 8T x 1 TL=8. The unit cost of this line is established from the MDC salary scale (HS-1 II) . The TL will be hired from MDC core staff who will be experienced and highly skilled personnel so, they are adjusted to step II. The MDC salary scale is approved by DMAC and used by all national mine action organizations in Afghanistan, a copy of MDC salary scale is attached here for your information. A team leader will be responsible for utilization and leading the team on daily basis.</i>						
1.8	Deminer/Operator	D	24	300.00	6	100.00	43,200.00
	<i>8 Team x 3 De-miner/Operator (2 MRE trainers , 1 EOD/Survey operator) = 24 . The unit cost of this line is established from MDC salary scale SK-1 Base. This MDC personnel who will play different roles(MRE, EOD, Survey and clearance) during the project implementation. These de-miners are operating under the leadership of the team leader.</i>						
1.9	MRE Trainer (Male)	D	16	300.00	6	100.00	28,800.00
	<i>16 males MRE trainers are responsible to conduct MRE sessions for males in the project targeted communities</i>						
1.10	MRE Trainer (Female)	D	16	300.00	6	100.00	28,800.00
	<i>16 females MRE trainers are responsible to conduct MRE sessions for females in the project targeted communities</i>						
1.11	Paramedic	D	0	0.00	0	100.00	0.00
1.12	Driver	D	1	225.00	6	100.00	1,350.00
	<i>1 Project Office x 1 Driver = 1. The unit cost of this line is established from MDC salary scale SK-1 I.</i>						
1.13	Community Liaison	D	1	180.00	6	100.00	1,080.00
	<i>The Community Liaison is responsible for liaising with community elders and communityshoras. The unit cost of this position is established from MDC salary scale NS-1 Base.</i>						
1.14	Security Gauds	D	11	180.00	6	100.00	11,880.00
	<i>3 guards are responsible for the security provision to the project office and 8 guards (1 for each of crossed trained team) will be responsible to provide security for each of the teams' base camps especially when the teams are in the operations sites so, 3 + 8 = 11. The unit cost of this line is adjusted based on the MDC salary scale NS-1 Based .</i>						
1.15	Hazard Allowance Category I	D	32	32.50	6	100.00	6,240.00

	8 TL + 24 de-miner operator = 32; based MDC's HR SOPs, the TL and de-miner/operators , entitled US\$.1.375/Day hazardous allowance, every team member will spent an average of 24 days/month in operations, the unit cost of this line: 24*1.375 = 33 USD per month 33 x 32 x 6= 6240							
1.16	Hazard Allowance Category II	D	41	19.50	6	100.00	4,797.00	
	<i>Based on MDC's HR SOPs, the remaining project personnel rather than TL and de-miners are entitled US\$.0.81/Day hazardous allowance, they will spent an average of 24 days/month in the field, the unit cost of this line: 24 x 0.81 = 19.5USD/per month 19.5 x 41 person x 6 month = 4797 USD</i>							
1.17	Pension NGO contribution (10% of salary)	D	86	29.00	6	100.00	14,964.00	
	<i>Based on MDC's HR SOPs, all mine action personnel are entitled 10% of their basic salaries as NGO contribution to their pension. 86 project personnel an average of US.29/month. The total amount of this line is calculated the 10% of the total amount of the basic salaries of all 130 project person.</i>							
1.18	Medical Allowance (USD 10 / person/month)	D	86	10.00	6	100.00	5,160.00	
	<i>Based on MDC's HR SOPs, all mine action personnel are entitled US\$. 10/month medical allowance so, 86 project personnel x US\$. 10 X 7 months=5160</i>							
1.19	Life Insurance Category I,	D	32	39.00	6	100.00	7,488.00	
	<i>8 TL + 24 de-miner operator = 32; based on MDC's HR SOPs, the TL and de-miner/operators are ensured under category I, and based on MDC contract with insurance company, the monthly cost of this line is US\$.39/month.</i>							
1.20	Life Insurance Category II,	D	41	25.00	6	100.00	6,150.00	
	<i>1 Project Officer + 1 Site OPS Officer + 3 QA / QC inspector + 1 Data Processor + 2 Site AFL Assistant/Log Officer + 1 Demining /MRE Instructor + 16 MRE Trainer (Male) + 16 MRE Trainer (Female) = 41; based on MDC's HR SOPs, these positions are ensured under category II, and based on the MDC contract with insurance company the monthly cost of this line is US\$.25/month.</i>							
1.21	Life Insurance Category III,	D	13	9.00	6	100.00	702.00	
	<i>1 Driver + 1 Community Liaison + 11 Security Guards = 11, based on MDC's HR SOPs, these positions are ensured under category III, and based on the MDC contract with insurance company the monthly cost of this line is US\$.9/month.</i>							
	Section Total						206,031.00	
Supplies, Commodities, Materials								
2.1	Stationary	D	29	40.00	6	100.00	6,960.00	
	<i>The stationary is budgeted for 28 teams+1 Project Office =29; the 28 teams will use this amount for postures, printed notebooks , brochures , pens that will be distributed by MRE trainers during MRE sessions.</i>							
2.2	Stabilizer/batteries (Minor Equipment)	D	29	20.00	6	100.00	3,480.00	
	<i>The line is budgeted 28 project's teams + 1 project office; the unit cost of this line is estimated 20/team and project office, based on MDC's other teams actual costs.</i>							
2.3	Uniforms	D	86	80.00	1	100.00	6,880.00	
	<i>"The line is budgeted for all project's personnel =130; the unit cost of this line is estimated 80/personnel. We need to budget all of the required materials of each project under its own budget. This item cannot be shared because its required only for the project personnel of this project and cannot be used for other project to be shared with. The main items of the uniform will be the followings: 1- 1 Pair Uniform (pants+ T shirt) = US\$.30 2- 1 Pair of Shoes = US\$.20 3- 1 Pairs of Overcoat = US\$. 25 4- 1 Pairs of Socks, underwear, belt = US\$.5 5- Total unit cost = US\$.80 "</i>							
2.4	Medical Supplies (Medicine & Equipment)	D	8	60.00	1	100.00	480.00	
	<i>"The line is budgeted for 6 project's teams; the unit cost of this line is estimated US\$.60/team, based on MDC's other teams actual costs. This will include mainly the first aid medicines and medical equipment for the teams, these items will include the followings: 1- Stretcher for medical evacuation from the field to the administration area of the team = US\$.20, 2- First aid box = US\$. 10, 3- First aid medicine = US\$.30. 4- Total unit cost = US\$.60 "</i>							
2.5	Field Supplies (Paints, Lime, Marks)	D	8	30.00	6	100.00	1,440.00	
	<i>The line is budgeted 8 project's teams; the unit cost of this line is estimated 30/team, based on MDC's other teams actual costs.</i>							
	Section Total						19,240.00	

Travel							
5.1	Duty travel	D	29	40.00	6	100.00	6,960.00
<i>The line is budgeted 8 project's teams; the unit cost of this line is estimated 40/team, based on MDC's other teams actual costs.</i>							
5.2	Evacuation & Medical Treatment of Staff	D	1	1,000.00	1	100.00	1,000.00
<i>"1 case of evacuation & medical treatment of project staff is budgeted under this line, this will cover the mine/ERW casualty of the project's personnel, his/her air transportation cost, and medication. This line will cover the costs as follows: 1-Estimated Air evacuation cost of two project personnel (1 patient + 1 paramedic) from project site to Kabul = US\$.300.00"</i>							
5.3	Vehicle Running cost (Fuel) and maintenance	D	1	250.00	6	100.00	1,500.00
<i>1 MDC vehicle is planned under this project that will provide transportation to the project office. The unit cost is established base on MDC estimation from its other projects.</i>							
5.4	Vehicle Leasing	D	34	800.00	6	100.00	163,200.00
<i>Based on mine action standards it is mandatory to be 1 ambulance with the crossed trained team when the team is doing spot clearance in project targeted site . 15 vehicle (7 ambulance and 8 vehicles for transportation of personnel and equipment) for 8 crossed trained teams, 16 vehicle for 16 stand alone MRE teams are required and 3 vehicles for the supervision and quality assurance members of the project 8 crossed trained teams = 34 total vehicle required =34 . As the teams are operating in unstable security situation so, it will be safer to move from one location to the other by the local rental vehicles.</i>							
5.5	Per diem Field staff	D	86	104.00	6	100.00	53,664.00
<i>Based on MDC's HR SOPs, all project's personnel (86) are entitled US\$.4.3/day the Per diem when they are in the field mission. These personnel will spend an average of 24 days/month in the field so 24 x4.3 = 104.</i>							
Section Total							226,324.00
General Operating and Other Direct Costs							
7.1	Facility Rent	D	29	100.00	6	100.00	17,400.00
<i>This line includes the rental cost of faculties (house) for each of the teams and the project office in the project office; the project office is established in a rented facility in Center of Kunduz province and teams' camps will be established in rented facilities as close as possible to their operations sites. So, 28 teams + 1 Project office = 29. The unit cost of this line is based on average facility costs in the project sites. Its budgeted a bit higher than the previous budget because its updated based on the new information from the project sites.</i>							
7.2	Utilities	D	29	40.00	6	100.00	6,960.00
<i>The line is budgeted 28 project's teams + 1 project office; the unit cost of this line is estimated 40/team and project office, based on MDC's other teams actual costs.</i>							
7.3	Minor repair & Maintenance (Premises)	D	29	10.00	6	100.00	1,740.00
<i>The line is budgeted 28 project's teams + 1 project office; the unit cost of this line is estimated 10/team and project office based on MDC's other teams actual costs.</i>							
7.4	Communication and IT services	D	29	30.00	6	100.00	5,220.00
<i>The line is budgeted 28 project's teams + 1 project office; the unit cost of this line is estimated 30/team and project office, based on MDC's other teams actual costs.</i>							
7.5	Fuel for Generator	D	29	60.00	6	100.00	10,440.00

	<i>The line is budgeted 28 project's teams + 1 project office; the unit cost of this line is estimated 70/team and project office , based on MDC's other teams actual costs.</i>

Nangarhar -> Jalalabad	1	695	728	927	960	3,310	<p>Activity 1.1.1 : Conducting Mine Risk Education sessions in the project targeted communities 8 cross trained teams for North, Northeast and East (4 cross trained for North, 2 cross trained for Northeast, 2 cross trained for East) will train targeted population about mine/ERWs risks and transfer safety messages to the communities and this is the first activity in sequence.</p> <p>Activity 1.1.2 : Conducting mobile, prioritized and responsive surveillance and demarcation of ERW in conflict impacted communities. 8 cross trained teams for North, Northeast and East (4 cross trained for North, 2 cross trained for Northeast, 2 cross trained for East) will do survey and demarcation of the targeted communities, this is the second activity in sequence.</p> <p>Activity 1.1.3 : Conducting Spot-ERW clearance in conflict impacted communities. 8 cross trained teams for North, Northeast and East (4 cross trained for North, 2 cross trained for Northeast, 2 cross trained for East) will identify and destroy the ERW, which is the third activity.</p> <p>Activity 1.1.4 : Monitoring and Evaluation</p> <p>MDC has a monitoring and evaluation cell under the operations department at MDC HQ who will regularly conduct the monitoring and evaluation of the project's activities in the field and reports on monthly basis to the operations senior manager and on weekly basis to the project's officer. During this project, MDC monitoring and evaluation cell will conduct totally 150 internal monitoring missions and visits of teams in the field. The project officer will conduct the monitoring mission of their teams on weekly basis. In order to avoid the requirement for mid-course correction, MDC continuously monitors all of the productivity of its operations through direct visits, checking of monthly, quarterly and mid-term activity and monitoring reports. The results of these monitoring will be shared with MDC top management and on time preventive actions will be taken. If MDC faces any problem regarding the achievement of the planned target, it will be shared with DMAC, UNOPS and the donor to find proper solution. The performance of the project activities will be tracked through checking the</p>

progress reports of the project as well as the quality management and monitoring reports. MDC expects that correction and adjustment of the design and plans will be facilitated on the basis of the above-mentioned monitoring and evaluation feedbacks.

Recruitment

MDC will deploy existing stand by trained MRE instructors and support staff for this project according to plan which is making as an separate annex, but in some provinces where the security is not so good, MRE instructors will be hired from the community, for whom MRE training of trainers training will be conducted for three days in order to motivate local communities to assist our project and they know better the language, culture and situation of their own communities.

Supervision and Quality Management

The supervision of the teams will be conducted by the teams' leaders at team level on daily basis; in addition to that the project office and HQ technical staff conduct regularly the monitoring and supervision of the project teams. The team leaders have the responsibilities of the overall team's leading, supervision and control. So, in this way every working lane of the teams are supervised and controlled continuously during the operations.

The project officer will conduct the supervision and monitoring mission of their teams on weekly basis. And at head quarter level each team is supervised and monitored every other month by MDC's operations department's monitoring and supervision staff.

- Quality Management

MDC makes sure that the planned resources under this project operate in accordance to the IMAS, AMAS and MDC approved SOPs during the project period. MDC hires 3 qualified quality inspectors from its core capacity under this project who will be stationed in the project office to conduct regularly the internal QA inspections of the teams. The quality assurance inspection of each team is conducted by the project quality inspectors at least twice a month. The activities of the above mentioned personnel are over sighted by MDC HQ quality management manager. Furthermore, the project activities will externally be inspected by DMAC, OCHA and UNMAS. All of these inspections are documented and recorded properly and the required corrective preventive actions will be taken on each of the non-conformity reports.

- Corrective and Preventive Actions Process

- Identification of the problem through supervision and quality management missions;
- Clearly definition of the problem;
- Assign the extent and impact of the problem;
- Perform a thorough analysis of the problem;
- Creating a list of required actions;
- Execution of the plan;
- Verification and assessment of the effectiveness.

Activity 1.1.5 : Feedback Mechanism:

MDC teams collect feedbacks during classroom/sessions planning and at the end of sessions in a specific forms as well. Both literate and illiterate trainees are asking randomly some questions and their viewpoints about de-mining/MRE activities.

							Activity 1.3.1 : Record, analyze and report the project progress , financial and quality management reports to the UNMAS/DMAC and OCHA regional offices monthly , quarterly final reports.

MDC expects that correction and adjustment of the design and plans will be facilitated on the basis of the above-mentioned monitoring and evaluation feedbacks.

Recruitment

MDC will deploy existing stand by trained MRE instructors and support staff for this project according to plan which is making as an separate annex, but in some provinces where the security is not so good, MRE instructors will be hired from the community, for whom MRE training of trainers training will be conducted for three days in order to motivate local communities to assist our project and they know better the language, culture and situation of their own communities.

Supervision and Quality Management

The supervision of the teams will be conducted by the teams' leaders at team level on daily basis; in addition to that the project office and HQ technical staff conduct regularly the monitoring and supervision of the project teams. The team leaders have the responsibilities of the overall team's leading, supervision and control. So, in this way every working lane of the teams are supervised and controlled continuously during the operations.

The project officer will conduct the supervision and monitoring mission of their teams on weekly basis. And at head quarter level each team is supervised and monitored every other month by MDC's operations department's monitoring and supervision staff.

- Quality Management

MDC makes sure that the planned resources under this project operate in accordance to the IMAS, AMAS and MDC approved SOPs during the project period. MDC hires 3 qualified quality inspectors from its core capacity under this project who will be stationed in the project office to conduct regularly the internal QA inspections of the teams. The quality assurance inspection of each team is conducted by the project quality inspectors at least twice a month. The activities of the above mentioned personnel are over sighted by MDC HQ quality management manager. Furthermore, the project activities will externally be inspected by DMAC, OCHA and

								<p>UNMAS. All of these inspections are documented and recorded properly and the required corrective preventive actions will be taken on each of the non-conformity reports.</p> <ul style="list-style-type: none"> - Corrective and Preventive Actions Process - Identification of the problem through supervision and quality management missions; - Clearly definition of the problem; - Assign the extent and impact of the problem; - Perform a thorough analysis of the problem; - Creating a list of required actions; - Execution of the plan; - Verification and assessment of the effectiveness. <p>Activity 1.1.5 : Feedback Mechanism:</p> <p>MDC teams collects feedbacks during classroom/sessions planning and at the end of sessions in a specific forms as well. Activity 1.1.5 : Feedback Mechanism:

MDC teams collect feedbacks during classroom/sessions planning and at the end of sessions in a specific forms as well. Both literate and illiterate trainees are asking randomly some questions and their viewpoints about demining/MRE activities.

Activity 1.2.1 : Conducting Mine Risk Education sessions to 54488 conflict affected population

Activity 1.3.1 : Record, analyze and report the project progress, financial and quality management reports to the UNMAS/DMAC and OCHA regional offices monthly, quarterly final reports.

Laghman -> Dawlatshah	1	23	24	31	32	110	Activity 1.1.1 : Conducting Mine Risk Education sessions in the project targeted communities 8 cross trained teams for North, Northeast and East (4 cross trained for North, 2 cross trained for Northeast, 2 cross trained for East) will train
-----------------------	---	----	----	----	----	-----	--

targeted population about mine/ERWs risks and transfer safety messages to the communities and this is the first activity in sequence.

Activity 1.1.2 : Conducting mobile, prioritized and responsive surveillance and demarcation of ERW in conflict impacted communities.

8 cross trained teams for North, Northeast and East (4 cross trained for North, 2 cross trained for Northeast, 2 cross trained for East) will do survey and demarcation of the targeted communities, this is the second activity in sequence.

Activity 1.1.3 : Conducting Spot-ERW clearance in conflict impacted communities.

8 cross trained teams for North, Northeast and East (4 cross trained for North, 2 cross trained for Northeast, 2 cross trained for East) will identify and destroy the ERW, which is the third activity.

Activity 1.1.4 : Monitoring and Evaluation

MDC has a monitoring and evaluation cell under the operations department at MDC HQ who will regularly conduct the monitoring and evaluation of the project's activities in the field and reports on monthly basis to the operations senior manager and on weekly basis to the project's officer. During this project, MDC monitoring and evaluation cell will conduct totally 150 internal monitoring missions and visits of teams in the field. The project officer will conduct the monitoring mission of their teams on weekly basis. In order to avoid the requirement for mid-course correction, MDC continuously monitors all of the productivity of its operations through direct visits, checking of monthly, quarterly and mid-term activity and monitoring reports. The results of these monitoring will be shared with MDC top management and on time preventive actions will be taken. If MDC faces any problem regarding the achievement of the planned target, it will be shared with DMAC, UNOPS and the donor to find proper solution. The performance of the project activities will be tracked through checking the progress reports of the project as well as the quality management and monitoring reports. MDC expects that correction and adjustment of the design and plans will be facilitated on the basis of the above-mentioned monitoring and evaluation feedbacks.

Recruitment

MDC will deploy existing stand by trained MRE instructors and support staff for this project according to plan which is making as an separate annex, but in some provinces where the security is not so good, MRE instructors will be hired from the community, for whom MRE training of trainers training will be conducted for three days in order to motivate local communities to assist our project and they know better the language, culture and situation of their own communities.

Supervision and Quality Management

The supervision of the teams will be conducted by the teams' leaders at team level on daily basis; in addition to that the project office and HQ technical staff conduct regularly the monitoring and supervision of the project teams. The team leaders have the responsibilities of the overall team's leading, supervision and control. So, in this way every working lane of the teams are supervised and controlled continuously during the operations.

The project officer will conduct the supervision and monitoring mission of their teams on weekly

							<p>basis. of the project's activities in the field and reports on monthly basis to the operations senior manager and on weekly basis to the project's officer. During this project, MDC monitoring and evaluation cell will conduct totally 150 internal monitoring missions and visits of teams in the field. The project officer will conduct the monitoring mission of their teams on weekly basis. In order to avoid the requirement for mid-course correction, MDC continuously monitors all of the productivity of its operations through direct visits, checking of monthly, quarterly and mid-term activity and monitoring reports. The results of these monitoring will be shared with MDC top management and on time preventive actions will be taken. If MDC faces any problem regarding the achievement of the planned target, it will be shared with DMAC, UNOPS and the donor to find proper solution. The performance of the project activities will be tracked through checking the progress reports of the project as well as the quality management and monitoring reports. MDC expects that correction and adjustment of the design and plans will be facilitated on the basis of the above-mentioned monitoring and evaluation feedbacks.

Recruitment

MDC will deploy existing stand by trained MRE instructors and support staff for this project according to plan which is making as an separate annex, but in some provinces where the security is not so good, MRE instructors will be hired from the community, for whom MRE training of trainers training will be conducted for three days in order to motivate local communities to assist our project and they know better the language, culture and situation of their own communities.

Supervision and Quality Management

The supervision of the teams will be conducted by the teams' leaders at team level on daily basis; in addition to that the project office and HQ technical staff conduct regularly the monitoring and supervision of the project teams. The team leaders have the responsibilities of the overall team's leading, supervision and control. So, in this way every working lane of the teams are supervised and controlled continuously during the operations.

The project officer will conduct the supervision and monitoring mission of their teams on weekly basis. And at head quarter level each team is supervised and monitored every other month by MDC's operations department's monitoring and supervision staff.

- Quality Management

MDC makes sure that the planned resources under this project operate in accordance to the IMAS, AMAS and MDC approved SOPs during the project period. MDC hires 3 qualified quality inspectors from its core capacity under this project who will be stationed in the project office to conduct regularly the internal QA inspections of the teams. The quality assurance inspection of each team is conducted by the project quality inspectors at least twice a month. The activities of the above mentioned personnel are over sighted by MDC HQ quality management manager. Furthermore, the project activities will externally be inspected by DMAC, OCHA and UNMAS. All of these inspections are documented and recorded properly and the required corrective preventive actions will be taken on each of the non-conformity reports.

- Corrective and Preventive Actions Process

- Identification of the problem through supervision and quality management missions;
- Clearly definition of the problem;
- Assign the extent and impact of the problem;
- Perform a thorough analysis of the problem;
- Creating a list of required actions;
- Execution of the plan;
- Verification and assessment of the effectiveness.

Activity 1.1.5 : Feedback Mechanism:

MDC teams collect feedbacks during classroom/sessions planning and at the end of sessions in a specific form as well. Both literate and illiterate trainees are asking randomly some questions and their viewpoints about demining/MRE activities.

Activity 1.2.1 : Conducting Mine Risk Education sessions to 54488 conflict affected population
 Activity 1.3.1 : Record, analyze and report the project progress, financial and quality management reports to the UNMAS/DMAC and OCHA regional offices monthly, quarterly final reports.

8 cross trained teams for North, Northeast and East (4 cross trained for North, 2 cross trained for Northeast, 2 cross trained for East) will do survey and demarcation of the targeted communities, this is the second activity in sequence.

Activity 1.1.3 : Conducting Spot-ERW clearance in conflict impacted communities.

8 cross trained teams for North, Northeast and East (4 cross trained for North, 2 cross trained for Northeast, 2 cross trained for East) will identify and destroy the ERW, which is the third activity.

Activity 1.1.4 : Monitoring and Evaluation

MDC has a monitoring and evaluation cell under the operations department at MDC HQ who will regularly conduct the monitoring and evaluation of the project's activities in the field and reports on monthly basis to the operations senior manager and on weekly basis to the project's officer. During this project, MDC monitoring and evaluation cell will conduct totally 150 internal monitoring missions and visits of teams in the field. The project officer will conduct the monitoring mission of their teams on weekly basis. In order to avoid the requirement for mid-course correction, MDC continuously monitors all of the productivity of its operations through direct visits, checking of monthly, quarterly and mid-term activity and monitoring reports. The results of these monitoring will be shared with MDC top management and on time preventive actions will be taken. If MDC faces any problem regarding the achievement of the planned target, it will be shared with DMAC, UNOPS and the donor to find proper solution. The performance of the project activities will be tracked through checking the progress reports of the project as well as the quality management and monitoring reports. MDC expects that correction and adjustment of the design and plans will be facilitated on the basis of the above-mentioned monitoring and evaluation feedbacks.

Recruitment

MDC will deploy existing stand by trained MRE instructors and support staff for this project according to plan which is making as an separate annex, but in some provinces where the security is not so good, MRE instructors will be hired from the community, for whom MRE training of trainers training will be conducted for three days in order to motivate local communities to assist our project and they know better the language, culture and situation of their own communities.

Supervision and Quality Management

The supervision of the teams will be conducted by the teams' leaders at team level on daily basis; in addition to that the project office and HQ technical staff conduct regularly the monitoring and supervision of the project teams. The team leaders have the responsibilities of the overall team's leading, supervision and control. So, in this way every working lane of the teams are supervised and controlled continuously during the operations.

The project officer will conduct the supervision and monitoring mission of their teams on weekly basis. And at head quarter level each team is supervised and monitored every other month by

								<p>MDC's operations department's monitoring and supervision staff.</p> <p>- Quality Management</p> <p>MDC makes sure that the planned resources under this project operate in accordance to the IMAS, AMAS and MDC approved SOPs during the project period. Badakhshan -> Baharak	1	991	1,038	1,137	1,369	4,535	<p>Activity 1.1.1 : Conducting Mine Risk Education sessions in the project targeted communities 8 cross trained teams for North, Northeast and East (4 cross trained for North, 2 cross trained for Northeast, 2 cross trained for East) will train targeted population about mine/ERWs risks and transfer safety messages to the communities and this is the first activity in sequence.</p> <p>Activity 1.1.2 : Conducting mobile, prioritized and responsive surveillance and demarcation of ERW in conflict impacted communities. 8 cross trained teams for North, Northeast and East (4 cross trained for North, 2 cross trained for Northeast, 2 cross trained for East) will do survey and demarcation of the targeted communities, this is the second activity in sequence.</p> <p>Activity 1.1.3 : Conducting Spot-ERW clearance in conflict impacted communities. 8 cross trained teams for North, Northeast and East (4 cross trained for North, 2 cross trained for Northeast, 2 cross trained for East) will identify and destroy the ERW, which is the third activity.</p> <p>Activity 1.1.4 : Monitoring and Evaluation</p> <p>MDC has a monitoring and evaluation cell under the operations department at MDC HQ who will regularly conduct the monitoring and evaluation of the project's activities in the field and reports on monthly basis to the operations senior manager and on weekly basis to the project's officer. During this project, MDC monitoring and evaluation cell will conduct totally 150 internal monitoring missions and visits of teams in the field. The project officer will conduct the monitoring mission of their teams on weekly basis. In order to avoid the requirement for mid-course correction, MDC continuously monitors all</p>

of the productivity of its operations through direct visits, checking of monthly, quarterly and mid-term activity and monitoring reports. The results of these monitoring will be shared with MDC top management and on time preventive actions will be taken. If MDC faces any problem regarding the achievement of the planned target, it will be shared with DMAC, UNOPS and the donor to find proper solution. The performance of the project activities will be tracked through checking the progress reports of the project as well as the quality management and monitoring reports. MDC expects that correction and adjustment of the design and plans will be facilitated on the basis of the above-mentioned monitoring and evaluation feedbacks.

Recruitment

MDC will deploy existing stand by trained MRE instructors and support staff for this project according to plan which is making as an separate annex, but in some provinces where the security is not so good, MRE instructors will be hired from the community, for whom MRE training of trainers training will be conducted for three days in order to motivate local communities to assist our project and they know better the language, culture and situation of their own communities.

Supervision and Quality Management

The supervision of the teams will be conducted by the teams' leaders at team level on daily basis; in addition to that the project office and HQ technical staff conduct regularly the monitoring and supervision of the project teams. The team leaders have the responsibilities of the overall team's leading, supervision and control. So, in this way every working lane of the teams are supervised and controlled continuously during the operations.

The project officer will conduct the supervision and monitoring mission of their teams on weekly basis. And at head quarter level each team is supervised and monitored every other month by MDC's operations department's monitoring and supervision staff.

- Quality Management

MDC makes sure that the planned resources under this project operate in accordance to the IMAS, AMAS and MDC approved SOPs during the project period. MDC hires 3 qualified quality inspectors from its core capacity under this project who will be stationed in the project office to conduct regularly the internal QA inspections of the teams. The quality assurance inspection of each team is conducted by the project quality inspectors at least twice a month. The activities of the above mentioned personnel are over sighted by MDC HQ quality management manager. Furthermore, the project activities will externally be inspected by DMAC, OCHA and UNMAS. All of these inspections are documented and recorded properly and the required corrective preventive actions will be taken on each of the non-conformity reports.

- Corrective and Preventive Actions Process

- Identification of the problem through supervision and quality management missions;
- Clearly definition of the problem;
- Assign the extent and impact of the problem;
- Perform a thorough analysis of the problem;
- Creating a list of required actions;
- Execution of the plan;
- Verification and assessment of the effectiveness.

The results of these monitoring will be shared with MDC top management and on time preventive actions will</p>

be taken. If MDC faces any problem regarding the achievement of the planned target, it will be shared with DMAC, UNOPS and the donor to find proper solution. The performance of the project activities will be tracked through checking the progress reports of the project as well as the quality management and monitoring reports. MDC expects that correction and adjustment of the design and plans will be facilitated on the basis of the above-mentioned monitoring and evaluation feedbacks.

Recruitment

MDC will deploy existing stand by trained MRE instructors and support staff for this project according to plan which is making as an separate annex, but in some provinces where the security is not so good, MRE instructors will be hired from the community, for whom MRE training of trainers training will be conducted for three days in order to motivate local communities to assist our project and they know better the language, culture and situation of their own communities.

Supervision and Quality Management

The supervision of the teams will be conducted by the teams' leaders at team level on daily basis; in addition to that the project office and HQ technical staff conduct regularly the monitoring and supervision of the project teams. The team leaders have the responsibilities of the overall team's leading, supervision and control. So, in this way every working lane of the teams are supervised and controlled continuously during the operations.

The project officer will conduct the supervision and monitoring mission of their teams on weekly basis. And at head quarter level each team is supervised and monitored every other month by MDC's operations department's monitoring and supervision staff.

- Quality Management

MDC makes sure that the planned resources under this project operate in accordance to the IMAS, AMAS and MDC approved SOPs during the project period. MDC hires 3 qualified quality inspectors from its core capacity under this project who will be stationed in the project office to conduct regularly the internal QA inspections of the teams. The quality assurance inspection of each team is conducted by the project quality inspectors at least twice a month. The activities of the above mentioned personnel are over sighted by MDC HQ quality management manager. Furthermore, the project activities will externally be inspected by DMAC, OCHA and UNMAS. All of these inspections are documented and recorded properly and the required corrective preventive actions will be taken on each of the non-conformity reports.

- Corrective and Preventive Actions Process

- Identification of the problem through supervision and quality management missions;
- Clearly definition of the problem;
- Assign the extent and impact of the problem;
- Perform a thorough analysis of the problem;
- Creating a list of required actions;
- Execution of the plan;
- Verification and assessment of the effectiveness.

according to plan which is making as an separate annex, but in some provinces where the security is not so good, MRE instructors will be hired from the community, for whom MRE training of trainers training will be conducted for three days in order to motivate local communities to assist our project and they know better the language, culture and situation of their own communities.

Supervision and Quality Management

The supervision of the teams will be conducted by the teams' leaders at team level on daily basis; in addition to that the project office and HQ technical staff conduct regularly the monitoring and supervision of the project teams. The team leaders have the responsibilities of the overall team's leading, supervision and control. So, in this way every working lane of the teams are supervised and controlled continuously during the operations.

The project officer will conduct the supervision and monitoring mission of their teams on weekly basis. And at head quarter level each team is supervised and monitored every other month by MDC's operations department's monitoring and supervision staff.

- Quality Management

MDC makes sure that the planned resources under this project operate in accordance to the IMAS, AMAS and MDC approved SOPs during the project period. MDC hires 3 qualified quality inspectors from its core capacity under this project who will be stationed in the project office to conduct regularly the internal QA inspections of the teams. The quality assurance inspection of each team is conducted by the project quality inspectors at least twice a month. The activities of the above mentioned personnel are over sighted by MDC HQ quality management manager. Furthermore, the project activities will externally be inspected by DMAC, OCHA and UNMAS. All of these inspections are documented and recorded properly and the required corrective preventive actions will be taken on each of the non-conformity reports.

- Corrective and Preventive Actions Process

- Identification of the problem through supervision and quality management missions;
- Clearly definition of the problem;
- Assign the extent and impact of the problem;
- Perform a thorough analysis of the problem;
- Creating a list of required actions;
- Execution of the plan;
- Verification and assessment of the effectiveness.

Activity 1.1.5 : Feedback Mechanism:

MDC teams collect feedbacks during classroom/sessions planning and at the end of sessions in a specific forms as well. Both literate and illiterate trainees are asking randomly some questions and their viewpoints about demining/MRE activities.

Activity 1.2.1 : Conducting Mine Risk Education sessions to 54488 conflict affected population
 Activity 1.3.1 : Record, analyze and report the project progress , financial and quality management reports to the UNMAS/DMAC and OCHA regional offices monthly , quarterly final reports.

MDC has a monitoring and evaluation cell under the operations department at MDC HQ who will regularly conduct the monitoring and evaluation of the project's activities in the field and reports on monthly basis to the operations senior manager and on weekly basis to the project's officer. During this project, MDC monitoring and evaluation cell will conduct totally 150 internal monitoring missions and visits of teams in the field. The project officer will conduct the monitoring mission of their teams on weekly basis. In order to avoid the requirement for mid-course correction, MDC continuously monitors all of the productivity of its operations through direct visits, checking of monthly, quarterly and mid-term activity and monitoring reports. The results of these monitoring will be shared with MDC top management and on time preventive actions will be taken. During this project, MDC monitoring and evaluation cell will conduct totally 150 internal monitoring missions and visits of teams in the field. The project officer will conduct the monitoring mission of their teams on weekly basis. In order to avoid the requirement for mid-course correction, MDC continuously monitors all of the productivity of its operations through direct visits, checking of monthly, quarterly and mid-term activity and monitoring reports. The results of these monitoring will be shared with MDC top management and on time preventive actions will be taken. If MDC faces any problem regarding the achievement of the planned target, it will be shared with DMAC, UNOPS and the donor to find</p>

proper solution. The performance of the project activities will be tracked through checking the progress reports of the project as well as the quality management and monitoring reports. MDC expects that correction and adjustment of the design and plans will be facilitated on the basis of the above-mentioned monitoring and evaluation feedbacks.

Recruitment

MDC will deploy existing stand by trained MRE instructors and support staff for this project according to plan which is making as an separate annex, but in some provinces where the security is not so good, MRE instructors will be hired from the community, for whom MRE training of trainers training will be conducted for three days in order to motivate local communities to assist our project and they know better the language, culture and situation of their own communities.

Supervision and Quality Management

The supervision of the teams will be conducted by the teams' leaders at team level on daily basis; in addition to that the project office and HQ technical staff conduct regularly the monitoring and supervision of the project teams. The team leaders have the responsibilities of the overall team's leading, supervision and control. So, in this way every working lane of the teams are supervised and controlled continuously during the operations.

The project officer will conduct the supervision and monitoring mission of their teams on weekly basis. And at head quarter level each team is supervised and monitored every other month by MDC's operations department's monitoring and supervision staff.

- Quality Management

MDC makes sure that the planned resources under this project operate in accordance to the IMAS, AMAS and MDC approved SOPs during the project period. MDC hires 3 qualified quality inspectors from its core capacity under this project who will be stationed in the project office to conduct regularly the internal QA inspections of the teams. The quality assurance inspection of each team is conducted by the project quality inspectors at least twice a month. The activities of the above mentioned personnel are over sighted by MDC HQ quality management manager. Furthermore, the project activities will externally be inspected by DMAC, OCHA and UNMAS. All of these inspections are documented and recorded properly and the required corrective preventive actions will be taken on each of the non-conformity reports.

- Corrective and Preventive Actions Process

- Identification of the problem through supervision and quality management missions;
- Clearly definition of the problem;
- Assign the extent and impact of the problem;
- Perform a thorough analysis of the problem;
- Creating a list of required actions;
- Execution of the plan;
- Verification and assessment of the effectiveness.

Activity 1.1.5 : Feedback Mechanism:

MDC teams collect feedbacks during classroom/sessions planning and at the end of sessions in a specific forms as well. Both literate and illiterate trainees are asking randomly some questions and their viewpoints about de-

							mining/MRE activities.
							Activity 1.3.1 : Record, analyze and report the project progress , financial and quality management reports to the UNMAS/DMAC and OCHA regional offices monthly , quarterly final reports.
