

Project Title: One Stop Centre: Rolling Out Provision of Integrated Gender-Based Violence (GBV) Response Services in South Sudan

Goal: To reduce the prevalence and negative impact of GBV including CRSV in South Sudan

- LOGFRAME -

	Project Summary	Indicators**	Verification Method	Risks & Assumptions
<p>Outcome 1 Increased percentage of GBV survivors utilizing GBV response services in South Sudan.</p>	<p>The project responds to the high number of reported GBV cases in South Sudan, where there is very limited access to GBV response services due to weak institutional and technical capacities. The survivors, without such services carry on short term and life-long impact of GBV. Many of the GBV perpetrators have continued with impunities due to weak and/or absent legal system.</p> <p>The project is planned to increase use of GBV response services for survivors of GBV including conflict related sexual violence. It uses health facility as an entry point to an integrated range of GBV response services provided under one roof or through a facilitated</p>	<ul style="list-style-type: none"> • Percent increase in level of knowledge on GBV amongst target population. <u>Target: 20% increase</u> • Percent increase in target population with positive attitude towards GBV prevention & response. <u>Target: 15% increase</u> • Percent increase in population who report having experienced GBV, who use GBV response services. <u>Target: 15% increase</u> • Number of hospitals & health centres within targeted areas that offer integrated GBV response services as part of its core services delivery. <u>Baseline: 0; Target: 1</u> 	<p>National surveys on GBV</p> <p>Baseline survey</p> <p>Project evaluation</p>	<p>Parties to the conflict in South Sudan uphold and implement the recently signed peace agreement,</p>

	referral to services outside the facility such as litigation, while legal advice and counseling is provided within the health facility setting. The range of integrated services include: medical, psychosocial support, legal advice and protection services.			
Output 1: GBV survivors have increased access to GBV response services (health, legal psycho-social and protection) in Malakal, Upper Nile State	This output focuses on increasing access, availability and therefore use of GBV response services by survivors.	<ul style="list-style-type: none"> Existence of functional Family Protection Centre or One-Stop Centre for GBV case management located within a health facility in Malakal and having defined referral pathways. <u>Baseline: No; Target: Yes</u> Number of GBV survivors (esp. women and girls) utilizing GBV response services (disaggregated by age, sex, type of service and geographical location). <u>Baseline: 0; Target: 500</u> No. of health service providers trained in survivor-centered GBV case management. <u>Baseline: 0; Target: 100</u> No. of paralegal workers in Malakal trained in provision of GBV legal case management. <u>Baseline: 0; Target: 100</u> 	<p>Project report</p> <p>GBV Information Management System</p> <p>Health workers training report</p> <p>Paralegal training Report</p>	The local state level government leadership remain committed and supportive of the GBV One Stop Centre, and hospital administration assign health workers to support and get mentored in GBV case management
Activities	<ol style="list-style-type: none"> Set up of One-Stop Centre at Malakal state hospital Procure and preposition medical equipment and supplies for management of GBV cases, 	<ul style="list-style-type: none"> One-Stop Centre refurbished, equipped, staffed & providing services Types and number of equipment and supplies procured and prepositioned 	<p>Service statistics</p> <p>Activity reports</p>	There will be adequate number of health workers and paralegals in Upper Nile State to be trained

	<p>including post rape kits for cases of sexual assault</p> <p>3) Train health workers and other partners on GBV case management</p> <p>4) Provide legal aid to survivors of GBV</p> <p>5) Support multi sectoral Coordination meetings</p>	<ul style="list-style-type: none"> • No. of trainings for health workers • No. of trainings conducted for paralegals • No. of meetings conducted 		<p>Equipment and supplies for the project will not be looted or syphoned through pilferages.</p>
<p>Output 2: Community engagement, mobilization and information campaigns are supported to increase the space of protective environment for women and girls</p>	<p>The output focuses on increasing communities' awareness on availability of GBV response services and GBV prevention and risk mitigation interventions. It uses mostly inter-personal communication channels in mobilization and awareness creation.</p>	<ul style="list-style-type: none"> • No. of community dialogues sessions conducted on GBV services availability, GBV prevention and risk mitigation, by estimated audience reached. <u>Baseline: 0; Target: 100 sessions; 10,000 population participating</u> • No. of 1-hour radio programmes aired on GBV services availability and prevention/risk mitigation by estimated audience reach. <u>Baseline: 0; Target: 52 radio programmes; 100,000 population reached</u> • No. and type of IEC materials developed on socio-cultural practices and risk to GBV. <u>Baseline: Not Available; Target: Various</u> 	<p>Project report</p> <p>Radio log-book</p> <p>Project report, copies of materials and delivery note.</p>	<p>Community members will be supportive towards the programme and not perceive it as attacking their culture.</p> <p>Population have access to radio services to be reached with radio messages, especially those outside the targeted Bomas.</p>

<p>Activities</p>	<ol style="list-style-type: none"> 1) Develop plan for community mobilization and awareness activities for the One-Stop Centre at Malakal state hospital 2) Conduct Boma level community mobilization outreaches and targeted dialogue sessions with cultural leaders, women and men groups informed by GBV data seen at the facility 3) Conduct 1-hour radio programs conducted on GBV 4) Develop and print 5000 materials for IEC. 5) Develop/print copies of referral pathway 	<ul style="list-style-type: none"> • Existence of work plan for community mobilization and outreach activities at the One-Stop Centre. Baseline: No; Target: Yes • No. of community mobilization outreaches conducted by number of people participating in the dialogues. Baseline: 0; Target: 200 • No. of radio programmes conducted. Baseline: 0; Target: 52 • No. of IEC materials developed and printed. Baseline: 0; Target:5000 	<p>Project reports</p> <p>Activity reports</p> <p>Radio log book</p> <p>Delivery note</p>	<p>Security permits local community outreaches and engagements, and communities are not sensitive to reject dialogue on GBV which could be perceived as attacking their culture.</p>
<p>PROBLEM STATEMENT</p>	<p>Large number of reported GBV cases, yet very limited availability of GBV response services for survivors of GBV including CRSV in South Sudan</p>			

The project contributes to the following result areas of the UNA’s global results framework:

Outcome 1 – CRSV risks are prevented; survivors and at-risk groups are supported and protected

UNAOuc.1.1 Increased knowledge, technical expertise and/or advocacy capacity of targeted stakeholders to respond to CRSV and protect survivors and at-risk groups

Output 3 – Capacity and technical expertise of institutional, operational, national and other key actors is strengthened to prevent and address CRSV

UNAOup.3.1: Stakeholder groups trained and/or employing knowledge products, advocacy tools and/or resources developed through UNA support, per focus country
