As per findings FSNAU Post Deyr 2010/11, The nutrition situation among the Afgoye IDPs has deteriorated to Very Critical from Critical levels in post Gu ' 2011. A nutrition assessment conducted in the IDP settlements along the Afgoye corridor in December 2010 reported a GAM rate of 21.6% (18.2 - 25.3) and a SAM rate 3.2% (2.2-4.6) indicating a Very Critical nutrition situation and deterioration from the Critical rates reported in July 2010 when GAM and SAM rates were 15.1% (11.4-19.8) and 1.7% (1.0-3.0) respectively. The same survey also revealed a higher proportion of boys (23.4%) than girls (19.8%) were acutely malnourished, although the difference was not statistically significant. (C) List and describe the activities that your organization is currently implementing to address these needs.(maximum 1500 characters) With funding support from HRF/UNCCHA, SOYDA has been providing basic health services to the IDP population in Afgoye.The project involved the provision of consultation and basic treatment and prevention services. Similarly, the CHF/OCHA Somalia has also supported SOYDA with an emergency health project. The project is a continuation of the previuos and has availed vital healt services to the IDP population who cannot afford to buy or seek medical attention from the private clinics/pharmacies. SOYDA regularly carries out mobile health clinics, vists and consultations.tje organization carried health campaigns and free medical camps in the year 2010. 4. LOGICAL FRAMEWORK (to be completed by organization)

TI EGGIOTE I TOTALE TOTALE	to be completed by organiza					
(A) Objective*	To Increase access and utilization	on of Nutrtion services among IDPs including provision of appropriate Nutrition	treatment services			
(B) Outcome 1*	More than 75% of severely main	More than 75% of severely malnourished children recieve appropriate and quality Nutrition treatment and services				
(C) Activity 1.1*	Screening of all children under fi	Screening of all children under five years and consequently register and admit those meeting the admission crieteria of SAM without				
(D) Activity 1.2	Provision of the appropriate RUT	Provision of the appropriate RUTF(ready to use therapeutic foods) to the admitted severely malnourished children without medical co				
(E) Activity 1.3	Referral and follow up of benefic	Referral and follow up of beneficiaries				
(F) Indicator 1.1*	Nutrition	% Coverage of the estimated caseload disagregated by type of m Target*	10246			
(G) Indicator 1.2	Nutrition	Nore than 75% of children with severe malnutrition without medica Target				
(H) Indicator 1.3	Nutrition	NUTRITION - SAM treatment programs achieve > 75% cured rate Target				
(I) Outcome 2	Appropriate Basic Nutrtion Servi	ices package (BNSP) provided and availed				
(J) Activity 2.1	Provision of Vitamin A and iron	and other micronutrient supplementation, appropriate IYCF services, deworming	g for malnourished chi			
(K) Activity 2.2	Immunizations and prevention of	Immunizations and prevention of common illness including malaria and offer treatment services at the SOYDA health and Nutrtion or				
(L) Activity 2.3	Avail Sanitation and Hygiene info	Avail Sanitation and Hygiene information and promote appropriate child feeding and caring practices				
(M) Indicator 2.1	Nutrition	Number of children receiving vitamin A and deworming Target	10246			
(N) Indicator 2.2	Nutrition	% refered to the appropraite programmes Target				
(O) Indicator 2.3	Nutrition	Increased awaraness level of Sanitation and Hygiene information Target				
(P) Outcome 3	Capacity of Nutrtion staff enhance	ced though appropriate trainings for nutrition staff and community groups				
(Q) Activity 3.1	SOYDA health and Nutrition staf	ff trained in IMAM				
(R) Activity 3.2	Conduct trainings for mothers,community health workers and other community groups					
(S) Activity 3.3						
(T) Indicator 3.1	Nutrition	Target	40			
(U) Indicator 3.2	Nutrition	Care givers/mothers Target				
(V) Indicator 3.3		Target				
(W) Implementation Plan*	SOYDA will implement this proje	ect directly whilst working closely with local authorities and partners at the field.	SOYDA is planning			
Describe how you plan to	to open 3 OTP site centers medi	lical teams to work at 2 different strategic locations in Afgoi corridor(Arbis and L	afole) and one TSFP			
implement these activities	(Elasha). The Staffs will comprise 3 nutritional officer, 3 nurses, and 3 nutrition screeners, 1 project support officer, 6 community					
(maximum 1500 characters)	mobilizers and 1 doctor for suppervising and cons ulting with any medical complications for the target site areas . The teams will be					
	operational six days a week with	operational six days a week with 8 working hours per day. Each day daily attendance sheets registration of the staffs and the				
	patients shall be deployed and managed by the SOYDA field team, while the project coordinator will supervise the activities at the					
	field progress. UNICEF will prov	vide all necessary supplies during the project				

5. MONITORING AND EVALUATION (to be completed by organization)

(A) Describe how you will monitor, evaluate and report on your project activities and achievements, including the frequency of monitoring, methodology (site visits, observations, remote monitoring, external evaluation, etc.), and monitoring tools (reports, statistics, photographs, etc.). Also describe how findings will be used to adapt the project implementation strategy. (maximum 1500 characters) *

SOYDA will involve the communities and other stakeholders to participate in the project monitoring including the elders and the IDPs caps leaders, this will make sure the effectiveness and the quality of the work done and the relevancy as well as the acceptance of the project among the beneficiariy groups.

Monitoring and evaluation will be done through on-site visits and daily supervision.

The main element of programme monitoring is through monthly reporting and, on an individual level, the use of OTP cards. The main indicators to be monitored and reported monthly are;

* Admissions (by criterion (Children younger than 5 years (or less than 110 cm in height) who are severely malnourished (weight-for-height "less than -3 Z-scores" or "less than 70% of median") and/or children with oedema, Accumulation of fluid in inter-cellular spaces of the body related to a deficiency in the diet, Severely malnourished children older than 5 years, Low birth weight (LBW) babies, Live born babies with a birth weight less than 2500 g reflecting inadequate nutrition and ill health of the mother, Mothers of children younger than one year with breastfeeding failure (only in exceptional cases where relactation through counseling and traditional alternative feeding have failed).)
