4. LOGICAL FRAMEWORK (to	be completed by organization	on)				
(A) Objective*	Reduce exposure of communities t	to the effects of drought				
(B) Outcome 1*	Livestock assets of 10500 vulnerable pastoralist protected and increased through animal health provision and animals distribution					
(C) Activity 1.1*	Community awareness and mobilization; selection of beneficiaries with a gender balance approach; training of service providers					
(D) Activity 1.2	Distribution of 5 breeding animals to 80 households of most vulnerable pastoralists in the most hit areas					
(E) Activity 1.3	Animal health provision to the herds of 1750 poor pastoralist households through voucher system					
(F) Indicator 1.1*	Agriculture and Livelihoods	Number of people (divided per livelihood groups and by gender) th Target*	10500			
(G) Indicator 1.2	Agriculture and Livelihoods	Number of people whose herds will be increased by the distributio Target				
(H) Indicator 1.3		Target				
(I) Outcome 2	Capacity to cope and to react to dr	rought enhanced both at household and at community level for 1800 benefic	ciaries			
(J) Activity 2.1	Community awareness and mobilize	zation				
(K) Activity 2.2	Identification of beneficiaries and o	of 6 community assets to rehabilitate in 6 locations in Jarriban, Galkayo and	Galdogob districts			
(L) Activity 2.3	Rehabilitation of 6 community asse	Rehabilitation of 6 community assets through cash for work approach (6000 working days generated)				
(M) Indicator 2.1	Agriculture and Livelihoods	Number of people (divided per livelihood groups and by gender) th Target	1800			
(N) Indicator 2.2	Agriculture and Livelihoods	Community assets rehabilitated Target				
(O) Indicator 2.3	Agriculture and Livelihoods	Target				
(P) Outcome 3						
(Q) Activity 3.1						
(R) Activity 3.2						
(S) Activity 3.3						
(T) Indicator 3.1	Agriculture and Livelihoods	Target				
(U) Indicator 3.2	Agriculture and Livelihoods	Target				
(V) Indicator 3.3	Agriculture and Livelihoods	Target				
(W) Implementation Plan*	VSF-G has a strong presence in M	ludug and the existing networks will be used to fast track the project. The in	tervention will be			
Describe how you plan to implement	presented to all stakeholders followed by missions of VSFG staff to the targeted villages.Communities will be fully involved starting					
these activities (maximum 1500	with the selection of beneficiaries that will be based on vulnerability criteria such as: size of the herd (below 50 shoats), number of					
characters)	children below 5y, women headed households, etc. VSF-G staff will be counter checking that beneficiaries selected fit the vulnerability					
	criteria agreed.Result1: beneficiaries will receive voucher for animal health services (treatments against internal (worms) and external					
	parasites, antibiotics against common infection, etc). Other beneficiaries will receive five breeding animals to imcrease their herds.					
	Result2:Community mobilization and awareness and capacity building of the local authorities will be conducted on contingency					
	Interning methodologica and imper	tongo The findings will be discussed with the communities and key commu	oite cocoto to robobilitoto			

5. MONITORING AND EVALUATION (to be completed by organization)

(A) Describe how you will monitor, evaluate and report on your project activities and achievements, including the frequency of monitoring, methodology (site visits, observations, remote monitoring, external evaluation, etc.), and monitoring tools (reports, statistics, photographs, etc.). Also describe how findings will be used to adapt the project implementation strategy. (maximum 1500 characters)*

VSF Germany has in place a monitoring and control system of the activities, with clear definition of role and responsibilities of the different stakeholders. In fact the beneficiaries, the service providers, the elders, the local authorities as well as the VSF-G monitors and officers play all a role in this monitoring system providing, confirming and triangulating information about the activities' implementation.

Specific monitoring tools will be fine tuned for measuring the achievement against the indicators by the project team and with support the M&E officer.

Monitors based in the intervention areas will weekly monitor the activities, senior project staff will visit monthly all locations and expatriate staff will visit the intervention area at least every second month. Monitoring report will be produced monthly with a general update on the status of the implementation and a specific update on the achievements, pictures of the activities will be taken capturing the most crucial situation (goats distribution, community assets before and after rehabilitation,etc).

Also the local authorities will be involved for triangulation purposes with field visits, this system will also act as informal complaint mechanism as beneficiaries will get in touch with different sources to express their point of view. Monitoring by OCHA staff shall also take place. Finally an internal evaluation will be conducted at the and of the action and findings will be shared with the stakeholders.

(B) Work Plan

Must be in line with the log frame.

Mark "X" to indicate the period
activity will be carried out

	Timeframe					
Activity	Please select 'weeks' for projects up to 6 months, and 'months' for projects up to 12 months Week 1-4 Week 5-8 Week 9-12 Week 13-16 Week 17-20 Week 20-24
