3. BACKGROUND AND NEEDS ANALYSIS (please adjust row size as needed)

(A) Describe the project rationale based on identified issues, describe the humanitarian situation in the area, and list groups consulted. (maximum 1500 characters) *	Somalia security situation has remained extremely volatile over the last 20 years, with every year seemingly getting worse. 2.85 million people are in crisis (FSNAU 20 June 2011, up to 19% from January this year). The country's infrastructure has been depleted while natural hazards have hit the country, making the matters worse. Sustainable development programs have been replaced by emergency intervention that do not last long enough to meet the needs of a population constantly on the move in fear of the effects of war. As a result, the vulnerability levels of Somali populations have increased as time advances. The current drought has made situations worse and the community is suffering heavily from shortage of food and water due to lack of rains and the last failed crop season. Food prices have increased as much as 300% according to FSNAU 28 June 2011 and are still on the rise. Water shortages have been reduced in some areas, however other areas received little rain. River levels are far below the normal level due to the failed rain in the Ethiopian highlands. The main problem is now malnutrition which needs urgent attention at this moment. In Lower Shabelle...
(B) Describe in detail the capacities and needs in the proposed project locations. List any baseline data. If necessary, attach a table with information for each location. (maximum 1500 characters) *	Lower Shabelle has officially been declared a famine area. People move from Mogadishu and at the same time people move from other areas towards towns and cities. They are in need of food since their livelihood is currently non existing. Due to the drought, the main basis of the rural people's livelihood, i.e. cattle and agriculture, has been hit hard. Large numbers of livestock, sometimes up to more than 80% of one families holding, have died and the lack of rain made the agriculture practically nonexistent for at least season. The area of Afghoye has low river levels and since they are depending on gravity irrigation this limits the irrigation as well. This has led to an acute shortage in food on top of the water situation. The area is also housing a large influx of refugees trying to escape to Mogadishu but are held up by AISHabab who prevents them from continuing. Since the malnutrition situation seems rapidly to get worse, food intervention is badly needed. The harvest which is estimated as the maximum of 50% of the average will take place in august and for now food aid is needed to help the people survive the period till then. The most vulnerable people in the...
(C) List and describe the activities that your organization is currently implementing to address these needs.(maximum 1500 characters)	Currently Woccaa is working with a number of International NGOs in the target areas. In Lower Shabelle especially the IDP camps, we are working with Interos/UNHCR in protection and in Merca, Woccaa is working with FAO in an attempt to increase production in Lower Shabelle. Also WOCCA has been implementing some water provision projects in the last few months in both Aden Yabal, Adale and Jalalaqsi just to save the lives of the people and livestock. Currently Woccaa is implementing a similar life saving project in only Adan Yabal. Some other stakeholders such as Interos are attempting to intervene in terms of health and WASH, however no major livelihood intervention is taking place apart from Woccaa's adhoc activities. Since the malnutrition situation seems rapidly to get worse, food intervention is urgently needed. Last month Woccaa signed a contract with UNICEF for the provision of water by rehabilitation of wells, chlorination and hygiene promotion. Children are very malnourished and any AWD outbreak will endanger their lives enormously and food can not stay in their stomachs when they are affected.

4. LOGICAL FRAMEWORK (to be completed by organization)

(A) Objective*	Assist 2800 households (16800 individual beneficiaries) with emergency food for surviving until the harvest in August		
(B) Outcome 1*	2800 households receive 80kg of maize, 5 kg of sugar, 4 l of oil fortified with vitamin A and 6 kg of pulses (kidney beans) each month		
(C) Activity 1.1*	Select 2800 households in the target area, in accordance with the selection criteria		
(D) Activity 1.2	2800 households are assisted with 80kg of maize, 5 kg of sugar, 4 l of oil and 6 kg of pulses each month for 2 months		
(E) Activity 1.3			
(F) Indicator 1.1*	Agriculture and Livelihoods		Target* 2800
(G) Indicator 1.2		Number of households receiving food assistance	Target
(H) Indicator 1.3			Target
(I) Outcome 2			
(J) Activity 2.1			
(K) Activity 2.2			
(L) Activity 2.3			
(M) Indicator 2.1			Target
(N) Indicator 2.2			Target
(O) Indicator 2.3			Target
(P) Outcome 3			
(Q) Activity 3.1			
(R) Activity 3.2			
(S) Activity 3.3			
(T) Indicator 3.1			Target
(U) Indicator 3.2			Target
(V) Indicator 3.3			Target
(W) Implementation Plan* Describe how you plan to implement these activities (maximum 1500 characters)	<p>Wocca has always had a strong presence on the ground and some of its staff members are embedded within the community, aware of the needs of the population. At first the community will be mobilized through mobilizers who will contact the elders and religious leaders. The purpose of the project will be explained as well as the beneficiary selection criteria and the voucher system. The aim is to put the project at the hands of the end beneficiary so that it is a community driven project. During the mobilization period the beneficiaries will be selected with the help of the community representatives with the following criteria <input type="checkbox"/></p> <p>1- Pregnant and lactating women are given a priority selection. <input type="checkbox"/></p> <p>2- Families with malnourished children or death occurring in the family due to the current famine. <input type="checkbox"/></p> <p>3- The weak, elderly and sick mothers and other extremely vulnerable individuals are also prioritized. <input type="checkbox"/></p>		

5. MONITORING AND EVALUATION (to be completed by organization)

(A) Describe how you will monitor, evaluate and report on your project activities and achievements, including the frequency of monitoring, methodology (site visits, observations, remote monitoring, external evaluation, etc.), and monitoring tools (reports, statistics, photographs, etc.). Also describe how findings will be used to adapt the project implementation strategy. (maximum 1500 characters) *

The project work plan and log frame will be used to monitor project activities. Other methods include project reports and photographs. Senior Field Coordinator will visit Community Elders to identify target beneficiaries and discuss project work plan. Senior Field Coordinator will also visit sites on at least a monthly basis. Gender as a cross cutting issue will also be considered throughout the project implementation focussing families with malnourished children to prevent death. During the project implementation period, WOCCA will measure the project outcome by ascertaining the number of target beneficiaries in the areas of interventions who have improved access to food based on the indicators. The following are the selected project outcomes that will be measured. □

- * # of beneficiaries with access to food (photos, beneficiary signature list, vouchers) □

Project activities will be monitored through the project work plan. These include MOUs signed with the tender winners, Senior Field Officer's reports, photographs for all the activities conducted. The community representatives will be engaged to launch the project and a great deal of the the casual employees will be vetted from these particular target groups so that the project is in the hands of the community and the indicators and output level are clear to the community elders. Performance reports will be submitted as per the requirement. Project progress reports and Final reports will be submitted.

(B) Work Plan
Must be in line with the log frame. Mark "X" to indicate the period activity will be carried out

Activity	Timeframe						
	Please select 'weeks' for projects up to 6 months, and 'months' for projects up to 12 months						
	Week 1-4	Week 5-8	Week 9-12	Week 13-16	Week 17-20	Week 20-24
