## MONITORING AND EVALUATION (to be completed by organization) Monitoring and evaluation will be an integral part of the project and will be carried out in line with the existing Mercy Corps M&E structure. The Program Manager and M&E team in collaboration with Juba Foundation will design the M&E system, including appropriate tools and databases that track outputs, outcomes and key indicators. Data collection will be the primary responsibility of Juba Foundation and submitted the Mercy Corps M&E team for analysis, reporting and feedback, disaggregated by location, (A) Describe how you will monitor, evaluate and report on your project activities and achievements, including the of Juda Foundation and submitted the wetry Corps wate retain for alraysis, reporting and releadack, disaggregated by location, gender and age at a minimum. Regular program monitoring will be conducted monthly. During project startup and beneficiarly targeting, a comprehensive household survey will be conducted to establish baseline food security indicators. Cash-for-work outputs will be tracked through attendance and payment sheets as well as quality checklists for infrastructure developed with engineers. Stakeholders will be routinely updated in program implementation and progress. The monitoring system will allow easy generation of reports to share with OCHA and other stakeholders. We will ensure the submission of updated 4Ws. A participatory evaluation will be conducted with beneficiaries, community elders, project staff, local government officials and other humanitarian organizations in the regions. PLA tools will be used to allow all members of the community, including momen and risk to express their needs and not riorities. frequency of monitoring, methodology (site visits, observations, remote monitoring external evaluation, etc.), and monitoring tools (reports, statistics, photographs, etc.).
