Duration	30 months

Project Description	<p>Considering that the legal and institutional anti-corruption framework has only recently been established in Iraq, there is a need to strengthen the institutional framework, and to streamline the laws and regulations that govern the mandates, powers, and interaction between the various anticorruption agencies.</p> <p>Legislative reform on its own will not be sufficient to combat corruption in Iraq, particularly if the personnel that are responsible for enforcing the law are not equipped with up-to-date knowledge and skills. This project will provide administrative and technical assistance to the newly established Anti-Corruption Academy, particularly with a view to enabling capacity building and knowledge development for the country's anti-corruption agencies.</p>
