## **Project Document**

1. COVER (to be completed by	y organi:	zation sul	bmitting th	ne proposal)					
(A) Organization*	Danish Refugee Council								
(B) Type of Organization*	UN Agency International NGC			o Local NGO International NGO					
(C) Project Title*	Improving Access to Water and Sanitation Facilities for Drought- and Conflict-Affected Populations in Somaliland, Puntland and South-Central					d South-Central			
For standard allocations, please use the CAP	Somalia								
title.		SOM-11/WS/3	20065	I					
(D) CAP Project Code	High		Not required for Emergency Reserve proposals outside of CAP						
(E) CAP Project Ranking	Standard Allocation 2 (Feb 2011)		Required for proposals during Standard Allocations						
(F) CHF Funding Window*	Standar	2356302		Must be equal to	total amount request	ed in current CAR	•		
(G) CAP Budget (H) Amount Request*	543324		Must be equal to total amount requested in current CAP						
(I) Project Duration*	12 months		Equals total amount in budget, must not exceed CAP Budget  No longer than 6 months for proposals to the Emergency Reserve						
(J) Primary Cluster*	Water, Sanitation and Hygiene  Water Sanitation and Hygiene								
(K) Secondary Cluster	Water, Sanitation and Hyglene  Only indicate a secondary cluster for multi-cluster projects

## 4. LOGICAL FRAMEWORK (to be completed by organization)

	o be completed by organization/
(A) Objective*	Improving access to water and sanitation facilities for drought- and conflict-affected populations in Somaliland, Puntland and South C
(B) Outcome 1*	Drought- and conflict-affected people have increased access to potable water
(C) Activity 1.1*	Construct and rehabilitate/upgrade water sources and conduct regular water quality monitoring: DRC shall rehabilitate boreholes in E
(D) Activity 1.2	Water treatment by chlorination: DRC shall chlorinate boreholes and wells upon completion. DRC shall also chlorinate wells at regula
(E) Activity 1.3	Distribution of water vouchers in Hiraan region: DRC shall develop water vouchers (as per the WASH cluster guidelines) and provide
(F) Indicator 1.1*	Water, Sanitation and Hygiene Number of people, disaggregated by sex, with access to safe wate Target* 44000
(G) Indicator 1.2	Water, Sanitation and Hygiene Number of water points with safe water Target
(H) Indicator 1.3	Water, Sanitation and Hygiene People receiving an average of 7.5 liters/day/person through DRCTarget
(I) Outcome 2	Populations in drought-prone areas improve their resilience to drought
(J) Activity 2.1	Construction of 10 shallow wells in drought-prone areas along livestock migration routes: In Hiraan region, DRC has identified shallo
(K) Activity 2.2	Training and capacity building of water management committees on operation and maintenance
(L) Activity 2.3	Training of communities affected by drought on drought related disaster risk management: This proposal focused on drought interver
(M) Indicator 2.1	Water, Sanitation and Hygiene Number of people, disaggregated by gender, benefited form const Target 24000
(N) Indicator 2.2	Water, Sanitation and Hygiene Number of wash committee members and institutions trained in w Target
(O) Indicator 2.3	Water, Sanitation and Hygiene Number of people in drought-prone areas with improved resilience Target
(P) Outcome 3	
(Q) Activity 3.1	
(R) Activity 3.2	
(S) Activity 3.3	
(T) Indicator 3.1	Water, Sanitation and Hygiene Target
(U) Indicator 3.2	Water, Sanitation and Hygiene Target
(V) Indicator 3.3	Target
(W) Implementation Plan*	DRC has field offices in Somaliland, Puntland and South Central Somalia. With this presence and a strong team of WASH human
Describe how you plan to	resource (WASH officers and engineers), DRC has the capacity to implement directly (without any partners) in all the selected
implement these activities	locations and project sites. At the start and during the implementation of the project activities, DRC shall engage in community
(maximum 1500 characters)	mobilization which will be undertaken to ensure that communities understand their entitlements and obligations. The Project
	Implementation Plan (PIP) and Monitoring and Evaluation plan (MEP) will also be used to define the necessary steps and standards
	for the project as well as benchmarks for measuring the outcome and quality of the project on completion. A baseline survey shall be
	carried out to get information of the beneficiaries at household level. To ensure proper qualitative data, focus group discussions
	(COD) 11 1/1 1/1/1

## 5. MONITORING AND EVALUATION (to be completed by organization)

(A) Describe how you will monitor, evaluate and report on your project activities and achievements, including the frequency of monitoring, methodology (site visits, observations, remote monitoring, external evaluation, etc.), and monitoring tools (reports, statistics, photographs, etc.). Also describe how findings will be used to adapt the project implementation strategy. (maximum 1500 characters) \*

Monitoring and evaluation is part of the project cycle management and shall be done on a systematic basis, with several monitoring functions already identified to ensure proper progress, quality monitoring and humanitarian accountability principles (HAP) compliance. DRC will ensure that monitoring and evaluation is integrated into the design of the project mipplementation. During the inception period of the project a detailed implementation plan (DIP) and an M&E indicator plan shall be developed. A special focus will be directed to operations in SCZ where access and achievement of projects is difficult due to insecurity; in such circumstances, DRC will maintain flexibility in programming by monitoring the indicators and scaling them depending on the severity of the situation. Monitoring tools will be developed to assist the WASH staff to collect information that can measure impact of the interventions. The program implementation will be carried out under the existing comprehensive country monitoring and evaluation structure. The M&E will focus on reviewing program achievements/accomplishments versus targets, identifying issues and concerns affecting program implementation, and designing courses of action necessary to address those issues. Since DRC staff will be implementing (primary project staff include the chief engineers, the WASH engineers, and the WASH officers), site visits shall be done to supervise the ongoing implementation to ensure quality of work. DRC has developed a daily site instructions hand book used to record ongoing site activities. At least during implementation, weekly visits shall be done and internal progress reports done. Photos shall be taken before during and after project managers. A require staff extraction of the project staff include the chief engineers to measure progress and enable feedback from regier managers. A require staff

(B) Work Plan
