## 4. LOGICAL FRAMEWORK (to be completed by organization)

T. LOUICAL I NAMEWORK	(to be completed by organiza	uon)						
(A) Objective*	Strengthen the capacity of IDPs to	o avoid, respond to, and mitigate the effects of protection risks through the provision of livelihood sup						
(B) Outcome 1*	IDP households have reduced exposure to protection risks through expanded livelihood opportunities and increased regular income.							
(C) Activity 1.1*	Create 12 vegetable gardens and 5 honey farms in groups; supported with CFW and capacity building activities (participatory approac							
(D) Activity 1.2	Provide Business grants to IDP and host community households, including donkey carts and wheelbarrows for water vending, includin							
(E) Activity 1.3								
(F) Indicator 1.1*	Protection	Number and location of people facing specific protection risks (dal Target* 350						
(G) Indicator 1.2	Protection	Reduction in beneficiaries experiencing protection risks due to reliTarget						
(H) Indicator 1.3	Protection	Target						
(I) Outcome 2	Improve market access for labour	and products to Galkayo and strengthen purchasing power of IDP households						
(J) Activity 2.1	Develop service businesses for yo	outh and strengthen market access through provision of 5 motorbikes and driving courses to IDP and						
(K) Activity 2.2	Unconditional Cash-Grants for 23	0 vulnerable households, increasing purchasing power of IDPs, and encouraging investment in petty						
(L) Activity 2.3	Donkey carts mentioned in Outcome	me 1, Activity 1.2 also have secondary outcome of improving market access for products						
(M) Indicator 2.1	Protection	Number and location of people facing specific protection risks (dai Target 314						
(N) Indicator 2.2	Protection	# of beneficiaries who change their livelihood activities from risk-p Target						
(O) Indicator 2.3		Target						
(P) Outcome 3	Ensure livelihood interventions are	e grounded in the strengths and capacities of IDPs, take into account relative vulnerability to protect						
(Q) Activity 3.1	Conduct participatory assessment	ts, and socio-economic profiling, with data disaggregated by age and gender - including through focu						
(R) Activity 3.2	Conduct Protection and Livelihood	d Impact Surveys as part of innovative monitoring and evaluation to assess the impact of protection						
(S) Activity 3.3								
(T) Indicator 3.1	Protection	Target 664						
(U) Indicator 3.2		Target						
(V) Indicator 3.3		Target						
(W) Implementation Plan*	To facilitate implementation of the	e CHF, UNHCR will enter in partnership enter into partnership with the Danish Refugee Council						
Describe how you plan to	(DRC) and Intersos. UNHCR and	partners will conduct a baseline survey for IDPs in Haloboqad and a participatory assessment,						
implement these activities	which will inform the allocation of identified project activities to the appropriate profile of IDP household and host community -							
(maximum 1500 characters)	facilitating beneficiary selection. A	facilitating beneficiary selection. A balance between host-community and IDP beneficiaries will aim to mitigate the risks of creating						
	tensions between the two groups,	tensions between the two groups, while implementation of e.g. gardens are dependent on and could strengthen co-operation with						
	the host community. Some project assets will be held in trust for the groups and associations formed during the initial project perio							
	for instance, motorbikes will be handed over to the youth association only after the association has been formed and is receiving							

## 5. MONITORING AND EVALUATION (to be completed by organization)

(A) Describe how you will monitor, evaluate and report on your project activities and achievements, including the frequency of monitoring, methodology (site visits, observations, remote monitoring, external evaluation, etc.), and monitoring tools (reports, statistics, photographs, etc.). Also describe how findings will be used to adapt the project implementation strategy. (maximum 1500 characters) \*

M&E against activity indicators will be grounded on the initial baseline survey. Monitoring will be conducted with multi-functional teams, involving the beneficiary community, partners and UNHCR. Monitoring tools such as the "Project Monitoring Chart" will be used to monitor progress towards outputs and impact. The partner will be responsible for setting up monitoring and feedback systems with the beneficiary community, for regular focus group discussions with different community groups (women, men, youth, elders), for data analysis and cross-checking, and for reporting to UNHCR. An end of project evaluation will be carried out by a multi functional team led by UNHCR, using both quantitative and qualitative methodologies to assess the actual protection impact, against the aforementioned indicators, rather than simply livelihood or project output-related indicators. This Protection and Livelihoods impact assessment has already been tested by UNHCR on project in South Central, the findings and methodology of which have been presented to donors and the IASC.

(B) Work Plan
Must be in line with the log frame.
Mark "X" to indicate the period
activity will be carried out
