## 3. BACKGROUND AND NEEDS ANALYSIS (please adjust row size as needed)

<ul> <li>(A) Describe the project rationale based on identified issues, describe the humanitarian situation in the area, and list groups consulted. (maximum 1500 characters) *</li> <li>(B) Describe in detail the capacities</li> </ul>	This action targets regions currently facing famine in Southern Somalia caused by total failure of 2010 Deyr rains, and poor performance of 2011 Gu rains. This has resulted to crop failure, reduced labor demand, poor livestock body condition, and excess animal mortality. Thousands of Somalis are arriving every day at camps across the Ethiopian and Kenyan borders. The IDPs and refugees need shelter, water and sanitation services, to reduce the pressure on drought affected host communities. Findings from 11 nutritional surveys conducted in July 2011, indicate acute malnutrition exceeds 38% and is highest within agro-pastoral communities in Bay, Bakol and Gedo where GAM prevalence exceeds 50%. The nutrition crisis is exacerbated by limited access to safe water for drinking, and poor sanitation and hygiene practices, resulting in high incidence of AWD. Children are worst affected with under 5 death rates between 4-13/10,000/day in the southern Somalia. Poor and destitute families have sold their assets, and are heavily in debt. Others are either abandoning their villages and towns to seek assistance or desperately trekking hundreds of Assessments conducted by COOPI and UNICEF in the target districts in July 2011 have established that there is extreme food
	insecurity in Bay region making prices of available cereals and other food stuffs high and unaffordable for the poor and IDPs.
and needs in the proposed project	
locations. List any baseline data. If	Random screening of MUAC of 100 children indicated that 48% severely malnourished, 42% moderately malnourished and 10%
necessary, attach a table with	normal. OTP centers assessed in Bay Region have inadequate WASH services and capacities to cater for the swelling numbers of
information for each location.	patients. Malnutrition problem among the drought affected households is being exacerbated by drinking of contaminated water, poor
(maximum 1500 characters) *	sanitary conditions and hygiene practices. Over 80% of households surveyed have access to water from unprotected/untreated
	water sources. Latrine coverage in Dinsor and Qansadhere districts is estimated at 18%. Occurrence of diarrhoea cases was
	confirmed at 58% for the two districts. Dinsor IDP camp is currently hosting 1000 households with no access to sanitation facilities.
	Existing water sources are either overstretched or facing breakdowns and yields have declined in some. Dinsor district has chronic
(C) List and describe the activities	COOPI has developed a comprehensive program for response to current humanitarian emergency in southern Somalia targeting
that your organization is currently	10,000 most affected households with food, water vouchers and hygiene promotion. In Dinsor and Qansandhere Districts in Bay
implementing to address these	Region, COOPI is supporting 2,170 households from 24 locations with food vouchers through ERF to enable access to food in
needs.(maximum 1500 characters)	sufficient quantity and quality to meet nutrition needs. Food vouchers are being provided on monthly basis for 3 months. The
needs.(maximum 1500 characters)	
	proposed project will target the same beneficiaries by providing them with safe water supply though voucher system, and providing
	Sanitation and Hygiene services. These interventions were defined through needs assessment carried out by UNICEF and COOPI
	in July 2011 and address felt needs of the target communities.

(A) Objective*	To increase equal and sustained a	access to WASH Services for families in Humanitarian Emergency in Bay region, Southern Soma
(B) Outcome 1*	24,000 IDPs, rural and urban poo	r women, girls, boys and men in humanitarian emergency have increased access to safe water for
(C) Activity 1.1*	Provide safe water to 2170 HH thr	ough voucher system for 4 months.
(D) Activity 1.2	10 hand dug wells are rehabilitate	d & upgraded to provide safe water supply for 5 locations
(E) Activity 1.3		
(F) Indicator 1.1*	Water, Sanitation and Hygiene	Number of people, disaggregated by sex, with access to safe wat Target* 13020
(G) Indicator 1.2	Water, Sanitation and Hygiene	At least 8,000 persons (2240 women, 2240 girls, 2160 Boys and Target
(H) Indicator 1.3		Target
(I) Outcome 2	9600 displaced and host women,	girls, boys and men in humanitarian emergency have access to appropriate gender sensitive san
(J) Activity 2.1	Construction of 200 gender sensit	ive pit latrines:
(K) Activity 2.2		
(L) Activity 2.3		
(M) Indicator 2.1	Water, Sanitation and Hygiene	Number of people, disaggregated by sex, with increased access trarget 9600
(N) Indicator 2.2		Target
(O) Indicator 2.3		Target
(P) Outcome 3	24,000 displaced and host womer	n, girls, boys and men in humanitarian emergency have access to Hygiene and Sanitation Service
(Q) Activity 3.1	Hygiene promotion in 24 locations	through 96 trained CHPs (8 stationed at OTPs)
(R) Activity 3.2	2170 Households receive hygiene	kits for improved hygiene practice
(S) Activity 3.3		
(T) Indicator 3.1	Water, Sanitation and Hygiene	Target 96
(U) Indicator 3.2	Water, Sanitation and Hygiene	13020 persons, (3,646 women, 3,646 girls, 3,515 boys and 2,213 Target
(V) Indicator 3.3		Target
(W) Implementation Plan*	The action will be implemented dir	rectly with COOPI staff in coordination with local stakeholders and using participatory approaches
Describe how you plan to	Selection of interventions has bee	n done jointly with target groups and links with the ongoing emergency interventions as phase ou
implement these activities	Interventions targets strategic loca	ations, and most needy IDP and rural households to reduce drought and diarrheal related risks.
(maximum 1500 characters)	Designs factor needs of women a	nd children. Rehabilitation of wells, construction of latrines and waste pits will be contracted to
	local artisans who will also receive	e on-the-job training. Target groups will contribute locally available materials and part of unskilled
	labour. Hygiene promotion will be	conducted through village based and trained community hygiene promoters, and will be
		oap for hand washing, and jerry cans. The action considers needs of local health facilities (OTP

## 5. MONITORING AND EVALUATION (to be completed by organization)

(A) Describe how you will monitor, evaluate and report on your project activities and achievements, including the frequency of monitoring, methodology (site visits, observations, remote monitoring, external evaluation, etc.), and monitoring tools (reports, statistics, photographs, etc.). Also describe how findings will be used to adapt the project implementation strategy. (maximum 1500 characters) \*

(P) Work Plan

Monitoring plan based on project goal, expected outcome and implementation approaches will be developed at inception. It will involve participation of beneficiaries, community committees and health facility staff to ensure community ownership, equity, accountability and transparency. The plan will outline roles and responsibilities in the monitoring process, define mechanisms for receiving complaints and giving project information to the public. Elements to be monitored include: effectiveness of targeting process, quality of service provided by water vendors, and water prices in the local markets monitoring any potential impacts for the project. The infrastructural works will be supervised by project staff and monitoring done jointly with community committees. Impact of the project on beneficiaries will be assessed through, feedback collected at OTPs and hospitals, and subsequent impact survey at the end of the response. All monitoring data will be disaggregated by age and sex. Photographs of the interventions before, during and after will be taken and included in the progress reports. All the monitoring findings will be shared with UNICEF, OCHA and the WASH cluster and information provided through the 4W matrix.
