(L) Activity 2.3	Staff to participate in HP trai	ining and awareness sessions for beneficiaries at the nutrition sites covering regular water treatment pro					
(M) Indicator 2.1	Nutrition	Target 1000					
(N) Indicator 2.2	Nutrition	number of hygiene and sanitation promotions held. Target					
(O) Indicator 2.3	Nutrition	number of HP training and awareness sessions held Target					
(P) Outcome 3	Improved qualified and appr	ropriate knowledge and practices on childcare, hygiene and maternal nutrition.					
(Q) Activity 3.1	Train 60 volunteers in the pr	roportion of 20 males and 40 females on proper childcare, hygiene and case management.					
(R) Activity 3.2	Conduct campaigns and ed	ucation sessions on breastfeeding and best health seeking behavior practices for women on the same.					
(S) Activity 3.3	Provide soaps for hygiene p	romotion					
(T) Indicator 3.1	Nutrition	Number of Staff/Community Health Workers/outreach workers tr Target 60					
(U) Indicator 3.2	Nutrition	number of women who participated on best child care and breas Target					
(V) Indicator 3.3	Nutrition	number of beneficiaries receiving soaps Target					
(W) Implementation Plan*		organised in such away as to carry on board all stakeholders at the village level to ensure the goodwill					
Describe how you plan to	of the community is sustained	ed and to avoid any conflict of interest. The total project sites are 13 in number all of which will be fixed.					
implement these activities	However, supplies will come	However, supplies will come on weekly basis from Baladul Rahma on weekly basis for security reasons. All the sites will run under					
(maximum 1500 characters)	the oversight of the field nut	the oversight of the field nutritionist. The staff that will be hired for this project will be experienced staff and competent to carry out					
,	the project to its execution.	SomaliAid will also hire nutrition specialist in conducting and carrying the required knowledge and					
	expertise for the field staff. The screening and admission process of malnourished children will be based on the accepted criteria						
	and only those meeting these criteria will be admitted to the SFPs and OTP. UNICEF will provide nutrition supplies while the						
		budget given will cater for other expenses. Based in the field, the field nutritionist, will be in charge of the day to day					
	implementation, management and monitoring of the nutrition project activities while, the project manager will be responsible for the						
	overall management, representation and coordination of the project. He will travel to field periodically to ensure the project is						
	implemented as per plan and gives regular updates to the cluster. The program will be run by a field-based nutritionist with a						
	university graduate and over 7 years experience in the field of nutrition. he has worked with many NGOs including international						
	ones. All other staff have to conform to standards both in academic qualification and experience. The training for volunteers will be						
	conducted once as detailed	in the work plan and will be on proper childcare, hygiene and case management. A copy of each					
	training manual will be provided by UNICEF, however, reproduction of the same will be necessary for the benefit of each						

MONITORING AND EVALUATION (to be completed by organization) The program performance will be assessed through monthly monitoring of the program activities to establish progress towards (A) Describe how you will monitor, evaluate and report on The program performance will be assessed unlough morting monitoring or the program activities to establish progress towards meeting the target set in the logical framework. The monthly reports will be sent to health management and information system (hmis.somalia@unicef.org). In order to ensure the most effective monitoring, SomaliAid has put in place the following mechanisms in addition to regular reporting system: Periodic monitoring exercises (monthly meetings with internal staff, quarterly meetings with your project activities and achievements, including the relevant partners) will allow the opportunity to address management and monitoring issues. Information related to indicators in the logical framework will be collected by the project staff at regular stages during project implementation and progress related to these indicators will be presented in monthly, interim and final reports. Regular support and supervision by email and telephone will also be done. Monthly financial monitoring against disbursement plan will be carried out. The monitoring will ensure adherence of frequency of monitoring, methodology (site visits, observations, remote monitoring external evaluation, etc.), and monitoring tools (reports, statistics, photographs, etc.). Als describe how findings will be required Nutrition Programming requirements as indicated in the Nutrition Programming Needs assessment. Monthly reports will also include monthly morbidity surveillance, safe motherhood (ANC, deliveries, PNC) and EPI surveillance. Progress of children reffered to MSF-1 Hs SC will also be closely monitored through updates from MSF-41 nutrition department. Cooperation between SomaliAid and MSF-H will ensure that the children reffered to and discharged fro MSF can be guaranteed to benefit from used to adapt the project implementation strategy. (maximum 1500 characters) * OTP/SFP and BNSP preventive services. The program will be evaluated through coverage surveys and the realization of the project indicators and expected results.all information will be share with the cluster secretariat and all reports will sent to HMIS.
