(W) Implementation Plan* Describe how you plan to implement these activities (maximum 1500 characters)	Upon organisatins request, provide safe air support to UN and Humanitarian Staff evacuation from remote areas in case of security environment deterioration scenario. The air craft will multiply DSSs operational capability and support to humanitarian actors and target one of the acute security problems faced in Somalia. The aircraft will be able to be fitted as air ambulance and with the minimum of 80 monthly hours of flying time, to be used for Emergency Evacuations, Relocations, MEDEVAC, to perform security risk assessments in support of AFPs and Humanitarian Actors (INCOs) as well as UNDSS field operations. Medical staff of the trauma centres will also provide capacity development for national medical facilities and their staff to provide a longer term solution to current national medical capacity gaps for humanitarian workers. This project will be integrated with UNHAS availability and the MCHMERT and CALKIT projects. The operations of the aircraft is carried out between the humanitarian actors, DSS Officers on ground, MERT Paramedics, and UNHAS operational team to oversee a well coordinated and enhanced accountability of the resources.					

ATION (to be completed by The aircraft project is integrated wi evaluation as well through the setu agencies and I/NGOs supported is needs will be conductd by the UN Counselor which sends out a queseligible dependents.
