3. BACKGROUND AND NEED	S ANAL	YSIS (please adjus	st row size as	needed)				
(A) Describe the project rationale		g to a recent rapid asse						
based on identified issues,		d risk of recruitment into						
describe the humanitarian	violations including death and injury. They are often separated from their families and caregivers and have difficulty obtaining food							
situation in the area, and list	and humanitarian assistance. The emotional impact on children affected by these circumstances is profound and those who							
groups consulted. (maximum	remain in the care of their caregivers and communities are likely to be more and more vulnerable. Schools are closed while those							
1500 characters) *	that are open remain inaccessible in the target area, Banadir regions.							
	The above mentioned situation largely obtains in Zone-K, Sigale and Siliga Amerikanka. There are cases of abduction and coercion of children — some as young as seven years of age – to join armed forces or groups, where they are used as porters, spies, fighters and for sexual purposes. The former government (TFG) had put in place some preventive measures, whereby it signed an action-plan to end recruitment of children and to allow child protection parnters to release children from the Somali National Army. There are no known efforts by the new government or AMISOM to combat Gender Based Violence in areas under their control							
	even though laws on the same exist. Clan protection makes prosecution of perpetrators difficult. Although rape is rampant, there are no reports of prosecution. There are limited medical facilities to treat the survivors of GBV and structures to provide psychosocial treatment for those suffreing from post GBV trauma are lacking. There is very little sensitization about how to prevent or deal with rape cases. Furthermore, there is a lack of awareness among the local population on the danger of FGM. A rapid assessment conducted by IIDA in July 2011 revealed that there are many GBV cases in the camps in Mogadishu. Such camps include Ex-Control Camp with an estimated population of 1,000 households and Siligga Mareykan with a population of							
								population of
	1,500 households.							

Child and forced marriage is prevalent throughout Somalia, especially in the assessd camps where parents often marry off their daughters as young as age 12. Similarly, domestic violence targeting women is also a serious problem in the IDP camps, yet there are no specific laws addressing it. However, both Sharia and customary laws address the resolution of family disputes. Sexual violence in the home is reportedly a serious problem, linked to the general gender discrimination. Laws prohibiting rape exist in the government controlled areas but they are not enforced, hence no reports of prosecution of any

rape cases to date. Indeed, an accusing finger has often pointed at the police and militia members as the worst culorits, with regard to engagement in rape. Rape is also commonly used as a weapon in inter-clan conflicts. Women and girls in IDP camps are especially vulnerable to sexual violence (including rape), contributing to the spread of HIV/AIDS. UNIE 2008 report revealed that IDP women and girls, particularly those belonging to minority groups were increasingly targets of sexual violence by youth

gangs. Monitoring reports gathered from Zone K, Sigaale and Siliga focal points reveals an horrific and shocking statistics of protection cases that are beyond the reach of the project. During the months of April, May and June 2012 alone, the project recorded 75 IIDA has considerable experience in implementing similar projects in other locations. Similarly, IIDA has has good community acceptance which gives us easy access to those communities to mobilize their participation in the project. There exists good rapport between IIDA and the current committees in the three IDP settlements that will be readily available for consultation and for mobilizing local support for the project implementation. Children and youth groups consulted during previous assessments will be involved in the implementation of the project through the existing children and youth clubs who will be promoting safe play activities activities and the implementation of the project through the existing children and youth clubs who will be promoting safe play activities activities and activities and activities and activities and activities and activities and activities activities activities and activities activitities act proposed project locations. List any baseline data. If necessary, attach a table with information for and awareness creation on the key child protection concerns the project seeks to address. On the ground in Mogadishu, IIDA has got both technical child protection staff and operations support staff who will all be contributing to the implementation of the project IIDA is a member of the CPWG in Mogadishu and will be actively engaged with other actors in child protection to both share each location. (maximum 1500 characters) * information and learn from what others are doing.

IIDA currently runs Release and Reintegration project which provides vocational training within or in close proximity to the project locations so beneficiaries can access these learning centres. The capacities mentioned above will be fully utilized in addressing the felt-needs highlighted in previous assessments, which

include safe means for children to earn a livelihood, access to education opportunities, prevention of family separation and reunification of unaccompanied children, addressing the acute shortage of opportunities for children and youths to engage in play and recreation opportunities and more importantly to prevent or minimize the incidence of child recruitment and sexual exploitation

IIDA is currently implementing a Release and Reintegration Projection which targets ex Al Sabaab, Somalia National Army, Hizbu Islam fighters. The project provides psychosocial support, vocational training, basic WASH and Health services. Setting up this (C) List and describe the activitie that your organization is currently implementing to address these needs.(maximum 1500 project in Sigaale, Siliga and Zone K will enable possible ex-fighters and ordinary children to benefit from the existing child rotection services. characters)
