

Section I: Identification and JP Status Integrated Nutrition and Food Security Strategies for Children and Vulnerable Groups in Viet Nam

Semester: 2-11

Country Vietnam

Thematic Window Children, Food Security and Nutrition

MDGF Atlas Project 0006724

Program title Integrated Nutrition and Food Security Strategies for Children and Vulnerable

Groups in Viet Nam

Report Number

Reporting Period 2-11

Programme Duration

Official Starting Date 2010-02-03

Participating UN Organizations * FAO

* UNICEF * WHO

Implementing Partners * Department of Maternal and Child Health, Ministry of Health (MOH)

* Department of Maternal and Child Health, Ministry of Health (MOH)

* Health Education and Communication Center, MOH

* Health Inspection Division, MOH

* Hospital of Endocrinology * Legislative Department, MOH

* Medical Service Administration, MOH

* National Institute of Nutrition

* Northern Mountainous Agriculture and Forestry Science Institute (NOMAFSI)

* Provincial Health Department of 6 provinces * RUDEC (Rural Development Center), MARD

Budget Summary

Total	Ap	proved	Budget

FAO	\$1,092,727.00
UNICEF	\$985,470.00
WHO	\$1,421,803.00
Total	\$3,500,000.00
Total Amount of Transferred To Date	
FAO	\$868,027.00
UNICEF	\$894,520.00
WHO	\$1,230,808.00
Total	\$2,993,355.00
Total Budget Commited To Date	
Total Budget Commited To Date FAO	\$800,362.00
_	\$800,362.00 \$832,219.00
FAO	
FAO UNICEF	\$832,219.00
FAO UNICEF WHO	\$832,219.00 \$1,025,370.00
FAO UNICEF WHO Total	\$832,219.00 \$1,025,370.00
FAO UNICEF WHO Total Total Budget Disbursed To Date	\$832,219.00 \$1,025,370.00 \$2,657,951.00

Donors

Total

As you can understand, one of the Goals of the MDG-F is to generate interest and attract funding from other donors. In order to be able to report on this goal in 2010, we would require you to advise us if there has been any complementary financing provided for each programme as per following example:

Please use the same format as in the previous section (budget summary) to report figures (example 50,000.11) for fifty thousand US dollars and eleven cents

\$2,638,747.00

Туре	Donor	Total	For 2010	For 2011	For 2012
Parallel		\$0.00	\$0.00	\$0.00	\$0.00
Cost Share	Irish Funds	\$0.00	\$0.00	\$50,000.00	\$50,000.00
Counterpart	MOH	\$50,000.00	\$0.00	\$0.00	\$0.00

DEFINITIONS

- 1) PARALLEL FINANCING refers to financing activities related to or complementary to the programme but whose funds are NOT channeled through Un agencies. Example: JAICA decides to finance 10 additional seminars to disseminate the objectives of the programme in additional communities.
- 2) COST SHARING refers to financing that is channeled through one or more of the UN agencies executing a particular programme. Example: The Government of Italy gives UNESCO the equivalent of US \$ 200,000 to be spent on activities that expand the reach of planned activities and these funds are channeled through UNESCO.
- 3) COUNTERPART FUNDS refers to funds provided by one or several government agencies (in kind or in cash) to expand the reach of the programme. These funds may or may not be channeled through a UN agency. Example: The Ministry of Water donates land to build a pilot 'village water treatment plant' The value of the contribution in kind or the amount of local currency contributed (if in cash) must be recalculated in US \$ and the resulting amount(s) is what is reported in the table above.

Beneficiaries

Beneficiary type	Targetted	Reached	Category of beneficiary	Type of service or goods delivered
Direct beneficiary	0	0	Families	Homestead Food Production and Diversification
Direct beneficiary	0	3,107	Families	Other Agricultural Interventions
Direct beneficiary	0	657	National Institutions	Other Agricultural Interventions
Direct beneficiary	10	13	Local Institutions	Other Agricultural Interventions
Direct beneficiary	34	50	Children from 2 to 6 Years/Female	Access to High Quality Nutrients
Direct beneficiary	60,000	54,000	Children from 2 to 6 Years/Male	Access to High Quality Nutrients
Direct beneficiary	64,432	62,045	Breast Feeding Women	Acces to Quality Water Supply

Section II: JP Progress

1 Narrative on progress, obstacles and contingency Measures

Please provide a brief overall assessment (1000 words) of the extent to which the joint programme components are progressing in relation to expected outcomes and outputs, as well as any measures taken for the sustainability of the joint programme during the reporting period. Please, provide examples if relevant. Try to describe facts avoiding interpretations or personal opinions

Pleases describe three main achievements that the joint programme has had in this reporting period (max 100 words)

Progress in outcomes

Progress in outcomes:

Outcome 1: "Improved monitoring system on Food, health and nutrition status of mothers and children..." This outcome is achieved through

- Data and baseline survey completed and disseminated with all target province.
- IDD monitoring and reporting supported for all 63 provinces of Vietnam.
- Standardised Monitoring and Assessment of Relief and Transition (SMART) methodology introduced to the target provinces.
- Food Insecurity and Vulnerability Information Mapping System (FIVIM) introduced and in place for target provinces.
- National Nutrition Strategy 2010-2020 completed and submitted to the Government for approval.
- 3rd draft of the IYCF action plan 2011-2015 developed and reviewed.
- First draft of the National Plan of Action for Nutrition developed.
- Results of the general nutrition survey are disseminated to 63 provinces of the country.

Outcome 2: "Improved infant and young child feeding practices...". This outcome has been achieved through

- Support the National communication campaigns in line with the joint communication plan among Ministry of Health and UN
- Training package introduced on IYCF, including trainer of trainers for the whole of the targete provinces and replication at communication level. The package includes theoretical and practical skills on IYCF and breastfeeding counselling in the whole of targeted provinces
- Introduction of BFHI to the hospital and health clinic system, including trainer of trainers and circular on BFHI developed and endorsed by the hospital in 2 provinces.
- Paid maternity leave for 6 months approved by National Assembly Committee for Social Affairs in December 2011 and related provisions included into the Labour Code Amendment;
- Revision of Decree 21 on Marketing of Nutrition Products for Young Children approved by the Minister of Health and included into MoH's official work plan.
- Support to the model of "Village Breastfeeding Mum Support Group" and establishment of new BF support groups

Outcome 3: "Reduction of micronutrient deficiencies ...". This outcome has been partially achieved. The conditions for future achievement have been ready

- Developing training materials and guidance on micronutrient integrated into stunting reduction package and Infant and Young Child Nutrition IEC
- Procurement of Nutrition supplies as iron folic acid to pregnant women and distribution of Vitamin A
- Standard Operating Procedures (SOPs) for flour fortification with micronutrients and salt iodisation developed

Outcome 4: "Improved care and treatment service...". This outcome has partially achieved through

- Integrated Management of Acute Malnutrition (IMAM) model introduced to Kon Tum, Dien Bien and Ninh Tuan Provinces to develop local capacity and systems for inpatient and

outpatient treatment of malnourished children

- Medical and nutrition supplies provided to 5 hospitals and 9 commune health centres
- Local production of Ready to Use Therapeutic Food in line with global product specification established through research and development.
- Introduction of global nutrition in emergencies training package for disaster risk management to 14 disaster prone provinces
- Development of training materials, including revision of kangaroo-mother care guideline

Outcome 5: "Improvements in availability, access and consumption of more diverse food..." This outcome has partially achieve through

- Introduction of Farmer Field School on RICM for 350 farmers and support for demonstration sites in 3 provinces
- Support homestead food model for the target provinces, including fruit garden and soy bean production in 2 mountainous provinces
- Introduction of rice seed production model to farmer in disadvantaged areas
- Diverse livelihood opportunities for farmers to enhance the nutritional sources and adequate food for daily consumption

Progress in outputs

Progress in Outputs:

1.1Technical support for strengthening the existing nutrition data collection and utilization system on food-health-nutrition

UNICEF provided technical and financial support to National Institute of Nutrition in updating indicators and the data collection framework for the National Nutrition Surveillance System. The General Nutrition Survey and Surveillance Reports with updated indicators and data tables guided the development of the 2011-2020 National Nutrition Strategy. The introduction of Standardized Monitoring and Assessment of Relief and Transition Methodology (SMART) and planning and analysis software (ENA) facilitated the establishment of a more comprehensive and collaborative system to ensure reliable and timely data is used for decision making and reporting. New global indicators for infant and young child feeding was also incorporated into the surveillance system and applied in all programme provinces with national application from 2011. Regional review meetings were held with assessment of programme performance, budget allocation analysis, planning and combined with training on lodine Deficiency Monitoring and Control by UNICEF in collaboration with technical staff from Hospital of Endocrinology, Provincial Preventive Medicine Centres and salt manufacturers.

WHO provided technical and financial support for conducting a population based nutrition survey in the WHO target provinces. This survey was designed to provide the baseline data for measuring the impact of the activities implemented under the Joint Programme of Nutrition. The specific objectives aimed in the survey were to assess the prevalence of malnutrition of the under 5 year old children; the prevalence of anaemia among women of reproductive age to describe Breastfeeding and Complementary Feeding knowledge and practice among mothers with children under 5 year old using WHO IYCF indicators; and to collect information on indicators related to coverage of micronutrients including iron folate, vitamin A supplementation and iodized salt usage.

For achieving those objectives, a sample of 1974 women in reproductive age and children under five were collected from each of the two WHO provinces in the four districts of both Cao Bang and Dak Lak provinces. National and provincial capacities were strengthened on data collection, including the development of the protocol, and questionnaire were developed, four teams in Cao Bang and three in Dak Lak have been trained for the data collection which will last for one month. To complete the survey, data entry and supervision is being carried out by staff from the Reproductive Health Centers, Preventive Health Center and MCH team. New data framework and recommended global indicators to survey and surveillance system are applied. In the first half of the year 2011, data on baseline survey available and disseminated to the target provinces; IDD monitoring and reporting supported for all 63 provinces with data ready for dissemination

WHO has given financial support at national level to conduct the annual review workshop to be held in January 2011 and for the monitoring and supervision trips during January 2011.

A review on anaemia interventions and recommendations for inclusion into National Nutrition Strategy has been made with technical support of involved Agencies.

1.2. Improved information on food production, stocks, availability and market prices at national, provincial and local levels FAO support for household baseline surveys in the targeted provinces to investigate the current status of household economy and agricultural production and to identify

necessary interventions for assisting households improving their production and income. Training need assessments crop production and livestock production were conducted and training needs identified for improving local staff and officers capacity in crop monitoring and decision making. Based on the training need, training materials were developed and printed. Trainings were delivered to for 144 local staff and officers.

GIEWS system has been set up at national level. A study on current monitoring capabilities to set up GIEWS workstations at national level was produced and so far, 4 targeted provinces have been prepared to set up GIEWS workstations. Training material and training on the use of GIEWS in agricultural production were delivered for 120 local staff in 6 provinces.

Series of training manual for monitoring market prices, analysing market prices, training guideline for climate monitoring and analysis were developed in 2010 and quite a few training sessions on analytical tools and information management conducted for 150 staff at provincial and district level in 6 provinces. The training sessions for 6 provinces have been conducted in the first half of the year 2011 for both technical staff at targeted provinces and local farmers.

- 1.3. Establish a sustainable tracking system to monitor the impact of the food crisis on nutrition status of mothers and children
- To establish a sustainable tracking system to monitor impact of volatile food prices and crisis on the nutritional status of women and children, UNICEF supported inclusion of sensitive indicators into the National Nutrition Surveillance system. A comprehensive training was conducted for the Surveillance Department at National Institute of Nutrition, General Statistic Office, Viet Nam Red Cross and representatives involved in the surveillance system from the joint programme supported provinces. The training was conducted by the developers of the global SMART guidelines and ENA software to provide the participants with skills and essential tools to collect the data necessary for monitoring and planning direct and targeted interventions. The training focused mostly on the nutrition indicators, and the next steps would be to complement with the food security component of the methodology when these guidelines have been finalised at the global level.

Food crisis monitoring has been integrated into national surveillance system with surveillance of seasonal incidence of malnutrition. Health and nutrition personnel from central level government and in 15 disaster prone provinces demonstrate increased knowledge and capacity to conduct nutrition assessments with introduction of Standardized Monitoring and Assessment of Relief and Transition (SMART) methodology and tools. 6 nutrition assessments at 6 communes have been conducted after natural disasters using updated methodology and tools.

- 1.4 Improved food and nutrition information through updated Food Insecurity and Vulnerability Information Mapping System (FIVIMS)
- Vulnerability maps and vulnerable group's profiles are identified and at the final reports are to complete in early 2011.

FAO supported to complete the report on current situation on food security monitoring system, information needs and data for FIVIMs. Guideline on food insecurity assessment has been prepared and shared with all stakeholders. Till the end of 2010 150 staff at provincial and district levels of 6 provinces are provided training on strengthening national capacity in collecting and analysing data on food insecurity and vulnerability.

Food Insecurity and Vulnerability Information Mapping System (FIVIM) has been in place at 12 communes of 6 provinces in the JP.

In order to run the system, technical knowledge and knowhow have been designed to be transferred to local level where necessary inputs are entered. A couple of training sessions have been provided to provincial staff on market price monitoring and analysis. Pilot monthly data collection of market price has been introduced to provincial level to test the system before applying to all targeted provinces in the third year of the project implementation. Recommendation from testing of monthly data collection will be incorporated into the report to be sent to the Government for application nationwide.

1.5 National policies, strategies and actions relating to protecting and promoting the nutrition of infants, children, pregnant women and mothers developed and implemented The 2011-2020 National Nutrition Strategy was finalised and submitted to the Prime Minister for approval in December 2011. Paid maternity leave for 6 months was also approved by National Assembly Committee for Social Affairs in December 2011 and related provisions included into the Labour Code Amendment following extensive advocacy work at national and sub-national level. The monitoring report on 5 years of implementation of Decree 21 is now available and facilitated approval of the revision by the Minister of Health for inclusion into MoH's official work plan.

Intervention to prevent anaemia throughout the life-cycle was reviewed in a consultative meeting with 90 participants from the Government, Academic Institutions, UN agencies and NGOs and key recommendations were formulated for consideration in the development of the national nutrition strategy and relevant action plans The joint programme has technical and financially supported the Infant and Young Child Feeding National Action plan review. MCH department developed a road map on the IYCF National Action Plan which as being reviewed and approved. National experts, involved in the development of the previous Action plan have being identified and the report is finalized. Disseminated results of the general nutrition survey to 63 provinces and to guide provinces in developing provincial plan on nutrition. National guidelines on use of zinc and ORS new format in treatment of acute diarrhoea has been developed and distributed.

1.6 Implementation of pro-poor agricultural and rural development policies for better nutrition

In the last two quarters of 2010, FAO has supported for the development of guidelines and training material on policy analysis, development and implementation. Technical report on review of current policy integrating nutrition objectives, including policy on nutrition, food security and rice production have been prepared. The stakeholders are encouraged to use these technical reports and guidelines for planning of their activities in 2011.

In close collaboration with local government, field investigation and analysis of local pro-poor and policies situations have been conducted to bring in the roadmap on possible solutions to integrate pro-poor into local policies and action plan. An action plan to be drafted with key actions to improve food, health and nutrition for the poor in September 2011.

2.1 Intensive BF promotion/advocacy campaigns through mass media and community-based activities and for medical professionals

Communication for behavioural impact training has been conducted to facilitate develop of a comprehensive communication strategy for Nutrition in Viet Nam. Following the training, a plan on communication activities for reaching a behavioural impact campaign was developed. The methodology and available formative research on Infant and Young Child Nutrition were used in the preparations for the World Breastfeeding Week Campaigns and other events. The 10 Steps to Successful Breastfeeding from the Baby Friendly Hospital Initiative was the topic of the campaign and target audience from health facilities was reached through special events, mass media and activities in the provinces. Over 20 published articles on breastfeeding were recorded in more than 20 newspapers during the week. WHO has financially supported to broadcast a TV spot on VTV1 on early initiation of breastfeeding which was broadcasted 23 times during the world breastfeeding week and another TV spot on exclusive breastfeeding out of the world breastfeeding week.

A village and community based model for promotion of breast feeding practice were formulated and implemented in An Giang Province to synchronize the activities at national level. Support groups of village collaborators and breastfeeding mothers were naturally formed in villages and received assistance in terms of technical information, knowledge and skills from peers, family members, village health workers, the commune health centre and mass organizations such as women union and youth union. A review meeting of the model was conducted to look further expansion of successful breastfeeding support models at village and commune level.

National communication campaigns conducted in line with the joint communication plan among MoH, UN and A&T. Training on Communication for behaviour impact training conducted. World breastfeeding week and logical framework for the communication campaign developed. TV spots on early initiation of breastfeeding and exclusive breastfeeding broadcasted on National TV channel.

Evidence report for revision prepared with data from 15 provinces and 5 municipalities and to be disseminated in July 2011 during the 5 year review meeting of Decree 21 implementation.

Nutrition Association, Pediatric Association and Vietnam Association for Protection of Children's Rights involved in advocacy for BF protection and promotions - including maternity leave. Health workers from community level to national hospital demonstrate increased knowledge and capacity to counsel on breastfeeding.

IEC on BF for BFHI clinics being developed jointly with WHO and A&T

2.2 Integrated BF promotion with ANC, delivery, and postpartum care

A training of trainers on Infant and Young Child Feeding has been conducted. The course has been facilitated by an international consultant and 5 of the National trainers on

Breastfeeding. The training of trainers was held at national level and with participation from participants from national level as teachers from the Secondary Medical School, managers from the provincial health department, managers from the provincial and district hospitals, health staff working in the these hospitals and medical school professionals. There were 15 trainers coming from Cao Bang and Dak Lak provinces which were trained from the first week which trained another 25 participants from the mentioned provinces. Materials on IYCF Counselling integrated course to be adapted

During the 2 weeks, 4 practical sessions on breastfeeding counselling with dolls and complementary feeding in the classroom and 4 clinical Practice on breastfeeding counselling took place at the Hanoi Obstetric and Gynaecology Hospital and complementary feeding at the National Institute of Nutrition.

A plan for scaling up the IYCF course in the WHO provinces was developed. The courses in the provinces have reached to train the 100 % of the Commune Health Workers and Nutrition Collaborators of the target districts with the materials of the IYCF Counselling integrated course. WHO has supervised the training in both provinces.

In order to strengthen the capacities on the breastfeeding counseling, WHO has also developed the guidelines/questionnaire for pretesting of IEC materials, conducted a rapid survey questionnaire on knowledge, attitudes and practices, and media channels, on exclusive breastfeeding materials. Other IEC materials that have been developed are poster to promote exclusive breastfeeding among expectant mothers, poster among mothers and poster among parents. Commune Health Workers in project areas are trained and able to carry out comprehensive counselling on breastfeeding in 10 communes of Binh Thanh Dong and Phu Tho district, An Giang.

Output 2.3 Increased number of health facilities introduced to Mother-Baby Friendly Hospital Initiative and granted MBFH certificate

There are currently only 59 BFHI hospitals (<1%) in the country and development of government standards for BFHI at all health facilities in the country has been initiated in collaboration with MoH Medical Services Administration to increase coverage and develop a national system for accreditation. Since most of the deliveries take place at district or commune health facilities, UNICEF supported establishment of BFHI standards at hospitals and 10 commune health clinics belong to Phu Tan District where 90% of the delivery cases take place. More than 100 doctors, midwifes and nurse working in district hospital and commune health centre were trained on the BFHI's 10 steps and breastfeeding counselling at the health clinics; 14 big size posters and 20,000 leaflets on breastfeeding were prepared and distributed in the community. At Phu Tan district in An Giang Province, 108 sessions of group counselling practice were also conducted by well trained health staff for about 1500 mothers and child care givers.

A Training of Trainers on Baby Friendly Hospital Initiative. Twelve participants from the Joint Nutrition Programme provinces of Cao Bang and Dac Lak, plus staff from Save the Children and Alive and Thrive project are participating in the first week of the TOT. The materials used are the Baby Friendly Hospital Initiative: revised, Updated and Expanded for Integrated Care, 2009. The training objective achieved is to increase the initiation and exclusive breastfeeding rate in the targeted provinces through the ten steps of successful breastfeeding. The TOT covers the implementation of BFHI at national and provincial level, the course for hospital managers and the course for maternity staff. The course has been facilitated by an international consultant and 6 National trainers on Breastfeeding. The training of trainers was held at national level and with participation of managers from the provincial health department, managers from the provincial and managers from district hospitals of the WHO provinces. BFHI materials have been adapted and translated to Vietnamese. Health staff from obstetric and pediatric departments from provincial and district hospitals trained on the BFHI at Cao Bang and Dak Lak provinces.

Heads of obstetric and pediatric departments assessed the implementation of the 10 steps of BFHI.

The IYCF materials versions 2009 have been translated to Vietnamese with the support of WHO.

These trainings have the objective of increasing the initiation and exclusive breastfeeding rate in the targeted provinces through ten steps of successful breastfeeding. The TOT covers the implementation of BFHI at national and provincial level, the course for hospital managers and maternity staff. Breastfeeding support groups integrated to the BFH initiative at hospital level. The model of "Village Breastfeeding Mum Support Groups" were established and well functioned first in the two selective communes of Phu Tho and Binh Tan of An Phu district. This demonstration model was shared up to the national Child Malnutrition Control Programme at MOH and other international NGO in Dec 2010 and July 2011.

Output 2.4:

Enhanced implementation of national code for marketing and trading breast milk substitutes

The joint programme supported Ministry of Health and Health Inspection department with code monitoring on marketing of breastmilk substitutes in close collaboration with Ministry of Industry and Trade. All 63 provinces were trained in code monitoring and demonstrate enhanced capacity to enforce Decree 21. A report on 5 years implementation of Decree 21 on Marketing of Breastmilk substitutes identifying violations by hospitals and formula companies have also been made available and disseminated to strengthen enforcement of the national code.

The joint programme has also supported the translation of Annotated International Code of Marketing of Breastmilk Substitutes and subsequent WHA resolutions materials (ICDC2008) into Vietnamese.

- 3.1 Supplies of vitamin A capsules, iron folic tablets, zinc and de-worming drugs available to all targeted children and women in the programme area
- 3, 149,000 children received the recommended two doses of vitamin A in 2010 through donations in kind to UNICEF. The vitamin A capsules were successfully distributed with support from MDG-F funds and contributing to 99 percent coverage at national level.

Nutrition supplies procured and Quality Assurance / Certification process initiated with support from UNICEF Supply Division in Copenhagen.

- 3.2. Improved capacity of local health workers in implementing micronutrient deficiency control activities (vitamin A, iron anaemia and IDD). In the baseline survey conducted in the provinces, WHO has trained the health workers on testing hemoglobulin level to detect anaemia deficiency and identification of household lodized salt usage. Local health workers of the target districts have been trained to give counselling of vitamin A, iron anaemia and IDD. The data collected from the survey, will estimate the knowledge of the population on vitamin A, iron anaemia and IDD for the development of the IEC materials.

 Micronutrient guidance and capacity development integrated into the essential stunting reduction package for managers, trainers and health workers.
- 4.1 Capacity of health workers on care and treatment of children with severe acute malnutrition (SAM) and with special needs in community and hospital systems improved A national training of trainers was conducted on Integrated Management of Acute Malnutrition with international facilitators (Professor Michael Golden and Dr Yvonne Grellety) with 52 participants from Ministry of Health Departments, Regional Paediatric Hospitals and senior paediatricians from 6 joint programme supported provinces. A pre- and post test was conducted showing an overall initial score of 38% emphasises the relatively limited knowledge prior to the workshop. The post-test, which is of course the most important in terms of future treatment of malnourished children in Vietnam, was 70%. This is above average of the 30 workshops conducted by the experts globally.

Joint programme provinces have also been supported to conduct capacity assessment for management of acute malnutrition, and Kon Tum province has developed a comprehensive action plan at commune, district and province level. Provincial health care workers at all levels were trained in management of acute malnutrition and anthropometric equipment were provided for screening and case identification. A national consultative meeting have also been held to agree on the next steps after the training and for other provinces to initiate their planning for implementation of integrated management at both community and hospital level. The draft guidelines and programme design was also reviewed by the consultants in collaboration with UNICEF Regional Office, and specific recommendations provided to strengthen the model of management. The model functional comprehensively in Kon Tum province outreach support by Reproductive Health Centre. The Integrated Management of Acute Malnutrition model was expanded to Dien Bien and Ninh Tuan in December 2011 and will be rolled out further in 2012.

Technical support has been provided to develop the National guidelines for Kangaroo-Mother care for low birth weight/premature newborns. Evidence based literature regarding Kangaroo-Mother care guidelines have been shared from WHO to the national expert identified.

Government officials from 14 out of 15 disaster prone provinces (94%) and relevant institutions/agencies from the Nutrition Cluster trained in the global nutrition in emergencies training package for disaster risk management.

4.2 Provision of key supplies to support nutrition services for selected provinces and localities at high risk, including micronutrient supplements and ready to eat therapeutic foods

Therapeutic milk F75, F100, ReSoMal and essential equipment for preparations have been procured for management of 3,000 children with Severe Acute Malnutrition at health facilities and communities at the modelling sites. Mid-Upper-Arm-Circumference (MUAC) tapes, height boards and scales for infants and children have been procured for active case finding and screening of acute malnutrition. Posters and IEC material was developed and distributed to the sites. Local production of RUTF was established and the product is in line with the global product specification. An acceptability trial was conducted in malnourished pre-school children, and a randomised community-based effectiveness trial is ongoing in Kon Tum province to further guide the research and development of therapeutic foods.

Equipment has been transported and delivered to the WHO target provinces to diagnose haemoglobin deficiency, scales and measurement boards for infant, young child and women in reproductive age.

Inpatient Unit functional at Kon Tum Provincial Hospital, Dak Ha District Hospital and Regional Referral Hospitals (HCMC, Hue, Hanoi). Therapeutic feeding products have been provided to Kon Tum and Regional Referal Pediatric Hospitals in HCMC, Hue and Hanoi.

All nutrition supplies available in provinces. Iron Folic Acid for pregnant women and women of reproductive age in the target districts are in place.

5.1. Increased efficiencies in rice production in the highland and mountainous regions in Vietnam through building capacity in rice integrated crop management systems (RICM)

FAO supported to conduct relevant survey to investigate the current status of the local crop seed production and supply in the targeted provinces. Training needs assessment was also conducted to identify on-farm quality rice seed production and storage.

Training manual for RICM training courses were developed and training conducted for 80 provincial staff in An Giang, Ninh Thuan, Kon Tum and Dak Lak provinces

Preparation works for field demonstrations in the next rice crop season from January in 2011 in Dien Bien, and March 2011 in Cao Bang are finalised. Training services for local technical staff and farmers in on-farm rice seed production using FFS (farmer field schools) will be conducted accordingly.

In 2010 and early 2011, demonstration site for ICM on rice seed were conducted at two mountainous provinces, one in the northern and one in the central highland where the geographical condition is hard for cultivation and livelihood. A total of 350 farmers were provided knowledge and skill on RICM technology through FFS. Through FFS, seedling and fertiliser were also provided with support of FAO.

RICM model is also successful conducted in Ninh Thuan for disadvantaged ethnic groups with total of more than 100 households

5.2. Improved homestead food production including animal sourced foods (small livestock, poultry, fisheries and aquaculture), processing and preservation, and nutrition education

With the support of FAO, survey missions to provinces were organised to investigate current capacity of local staff and NGOs in supporting homestead food production and small livestock production.

Report on training need assessment on for improving homestead food, small livestock production with findings and recommendations have been done. Training manuals for potentials for homestead food production and estimating livestock production were developed and printed for technical staff and project team. Training sessions were conducted for 160 staff from local NGOs in An Giang, Ninh Thuan, Kon Tum, Dak Lak, Dien Bien and Cao Bang provinces, including local agro-forestry extension workers, officers and staff from local seed companies, women unions and farmers association.

Training sessions on homestead food production skills are provided to 686 farmers in An Giang, Ninh Thuan, Kon Tum, Dak Lak, Dien Bien and Cao Bang provinces, comprising

skills in harvest, postharvest and processing of some agro-products (legumes, maize, rice, soybean and fruits).

In 2011, demonstration models for homestead food production has been set up at Cao Bang province, including fruit garden and soya bean tested based on the needs of local government. Farmers are supported to visit Rice seed production model to learn on the production skill and technique.

Ethnic households in central highland have been provided technical support in aquaculture production at small household level through demonstration models and regular technical guidance on raising tilapia in fresh water pond.

Measures taken for the sustainability of the joint programme

Are there difficulties in the implementation?
UN agency Coordination
Joint Programme design

What are the causes of these difficulties? External to the Joint Programme

Briefly describe the current difficulties the Joint Programme is facing

The joint programme in the initial phase has faced some constraints in term of establishment of PMU, PMC because of changes in personnel at the central and provincial levels. The delay in establishment of PMU and PMC leads to not-timely revision of 1st year work plan. The National Coordinator has not yet been recruited to coordinate inputs from different agencies for the programme. Due to the funding arrival in February, our quarterly and biannual reporting would only reflect one and four months of actual implementation. The design and reporting of JP follows a "project design" while UN agencies and the activities and outputs focus on strengthening of national systems and national programmes were it is difficult to separate between attribution and contribution. It is also a difficulty that there exist many different operational modalities among PUNOs and this has been partially sorted out through planning exercises where activities can be jointly done or tasks shared among PUNOs and implementing partners.

Briefly describe the current external difficulties that delay implementation

Due to the fluctuation of the economic situation and food price rising in the region and in Vietnam as well as the devaluation of Vietnamese dong currency in 2011, the implementation of the Joint Programme faces difficulties in term of funding shortage and replication of activities on larger scale.

Natural disaster and flooding in targeted provinces also hamper the implementation process of the JP in terms of field activities and financial shortage.

Explain the actions that are or will be taken to eliminate or mitigate the difficulties

2 Inter-Agency Coordination and Delivering as One

Is the joint programme still in line with the UNDAF?

Yes

true

No false

If not, does the joint programme fit the national strategies?

Yes true No false

What types of coordination mechanisms

Vietnam is a pilot country for Delivering as One approach and is currently implementing the One Plan II (2006-2010 with the extension year of 2011). The new cycle will start from 2012 and the development of One Plan 2012-2016 went through a long consultative process in a tripartite manner with Government and Development partners. The One Plan 2012-2016 is expected to be signed soon in early 2012 and under One Plan 2012-2016, there will be three Focus Areas and 12 Outcomes.

The current One Plan Coordination Architecture under One Plan II includes Programme Coordination Groups (PCGs), which are co-chaired by the Government and UN and are established to coordinate joint delivery of activities under the One Plan II. The Joint Programme falls under the PCG on Sustainable Development. Once the One Plan 2012-2016 is signed, the One Plan Governance Architecture will be brought into discussion with Government and final PCG structure will be agreed upon.

Within the JP on Nutrition and Food Security, UN agencies are working together under the coordinating role of FAO as the Lead Coordinating Agency. A PMU has been set up at Department of Maternal and Child Health, Ministry of Health.

With support from the UNRC office, the JP has also worked with staff from the other 2 MDGF JPs for revising and harmonizing the TORs of the NSC. The MDG-F Joint Programmes regularly share information on programme management procedures to facilitate smooth implementation.

The exit strategy for the JP has been mentioned and discussed in the JP meeting where the results of the JP will be incorporated into the current system of the Government and some follow up activities are earmarked to be funded under the next OP cycle.

Please provide the values for each category of the indicator table below

reade provide the values for each category of the indicator table below				
Indicators	Basel ine	Current Value	Means of verification	Collection methods
Number of managerial practices (financial, procurement, etc) implemented jointly by the UN implementing agencies for MDF-F JPs	83%	83%	Harmonised Approach for Cash Transfer (HACT), UN-EU Cost norms	Regular reports, HACT monitoring
Number of joint analytical work (studies, diagnostic) undertaken jointly by UN implementing agencies for MDG-F JPs			Joint Programme meeting and monitoring plan of Programme Coordination Group (PCG)	Reports, meeting minutes
Number of joint missions undertaken jointly by UN implementing agencies for MDG-F JPs		4	Joint field trip reports	

Under the framework of ONE UN in Vietnam, relevant UN agencies apply UN-EU Cost norms while only 2 out of 3 agencies apply Harmonised Approach for Cash Transfer (HACT) in their operation.

The joint programme would like to use existing coordination and information sharing mechanism and analytical work will be reviewed through PCG meetings, Nutrition Cluster and Partnership Group and other national review meetings. However it is too early in the joint programme to show the results of these indicators. Joint field trips were planned

after the first national level planning meeting in early 2011. By the end of 2011, four joint monitoring missions have been conducted with the participation of all UN agencies and the Government, including both Ministry of Agriculture and Rural Development and the Ministry of Health.

Annual planning and review meeting was planned and organised to mobilise ideas from local to national level with the leadership of MCH where PMU locates.

3 Development Effectiveness: Paris Declaration and Accra Agenda for Action

Are Government and other national implementation partners involved in the implementation of activities and the delivery of outputs?

Not Involved Slightly involved Fairly involved Fully involved

In what kind of decisions and activities is the government involved?

Policy/decision making Management: budget

Management: service provision

Who leads and/or chair the PMC?

Institution leading and/or chairing the PMC: Maternal and Child Health Department of Ministry of Health

Number of meetings with PMC chair

Is civil society involved in the implementation of activities and the delivery of outputs?

Not involved Slightly involved Fairly involved Fully involved

In what kind of decisions and activities is the civil society involved?

Management: service provision

Are the citizens involved in the implementation of activities and the delivery of outputs?

Not involved false
Slightly involved true
Fairly involved false
Fully involved false

In what kind of decisions and activities are the citizens involved?

Management: service provision

Where is the joint programme management unit seated?

National Government Local Government

Current situation

4 Communication and Advocacy

Has the JP articulated an advocacy & communication strategy that helps advance its policy objectives and development outcomes?

Yes false No true

Please provide a brief explanation of the objectives, key elements and target audience of this strategy

The proposal for advocacy and communication is integrated in the national communication strategy for specific event. National communication campaigns conducted in line with the joint communication plan among MoH, UN and A&T. For example for the National week on breastfeeding is an event where the joint effort of the Government and the UN agencies are mobilised to disseminate the message through mass media and open air events and meetings.

In the long run, PMU will take the initiative in coordination with PUNOs in formulating the Communication strategy for spreading messages from the JP to targeted audience.

What concrete gains are the adovacy and communication efforts outlined in the JP and/or national strategy contributing towards achieving?

Increased awareness on MDG related issues amongst citizens and governments
Increased dialogue among citizens, civil society, local national government in erlation to development policy and practice
New/adopted policy and legislation that advance MDGs and related goals
Key moments/events of social mobilization that highlight issues
Media outreach and advocacy

What is the number and type of partnerships that have been established amongst different sectors of society to promote the achievement of the MDGs and related goals?

Faith-based organizations
Social networks/coalitions
Local citizen groups
1
Private sector
Academic institutions

Media groups and journalist
Other

10

What outreach activities do the programme implement to ensure that local citizens have adequate access to information on the programme and opportunities to actively participate?

Household surveys
Use of local communication mediums such radio, theatre groups, newspapers
Capacity building/trainings
Others

For two years of implementation, the Joint programme has gradually set up the foundation for cooperation and partnership with Academic institutions, local citizen groups and media. Quite a few of collaboration and relation have been shared with National Nutrition Institute, University, A&T, TV channel on the results of the JP. At grass root level, Farmer Union is playing an active role in promoting the activities and results, especially those related to crop productions, demonstrations of pilot models for income generation and nutrition supply for daily consumption of the people.

Community meetings held by mass organisations (Women Union, Youth Union, Farmer Union) and Nutrition Rehabilitation Group.

Section III: Millenium Development Goals Millenium Development Goals

Target 1.A: Halve, between 1990 and 2015, the proportion of people whose income is less than one dollar a day Beneficiaries

JP Outcome Improved monitoring systems on food, health

and nutrition status of mothers and children used to guide food, health and nutritionrelated policies, strategies and actions

JP Indicator

Value

Improved availability and sharing of reliable food and nutrition-related information by province, ethnicity, gender and social sectors.

Analytical reports to guide nutrition policy formulation for reducing malnutrition in women and children.

Pro-poor policies for improving food, health and nutrition formulated and integrated into national and provincial development goals and strategies. National and provincial policies, strategies and plans contain nutrition objectives, targets and indicators (Socioeconomic Development Plan (SEDP) 2011-2015; MARD's rural development strategy; National Nutrition Strategy

2011-2020 and National Plan of Action

for Nutrition 2011-2015.

Target 4.A: Reduce by two-thirds, between 1990 and 2015, the under-five mortality rate JP Outcome Beneficiaries

Improved infant and young child feeding practices including increased compliance with the UNICEF/WHO quidelines on exclusive breastfeeding from 0-6 months and safe complementary feeding for children 6-24 months

JP Indicator

Value

% infants breastfed within one hour after delivery % infants exclusively breastfed throughout the first 6 months of life % children 6-9 month of age appropriately fed % children 6-24 months provided appropriate and safe complementary feeding

Target 4.A: Reduce by two-thirds, between 1990 and 2015, the under-five mortality rate JP Outcome Beneficiaries JP Indicator Value Reduction of micronutrient deficiencies in % low birth weights % mothers and under 5 children with Vitamin A targeted children and women deficiency % mothers and children receiving high dose Vitamin A supplements % pregnant women with nutrition anaemia % women receiving iron supplements % newborns covered with vitamin K injection % population consuming adequately iodized salt Improved food consumption and dietary diversity (rise in dietary diversity scores)

Target 4.A: Reduce by two-thirds, between 1990 and 2015, the under-five mortality rate JP Outcome Beneficiaries

Improved care and treatment services for young children with severe malnutrition and improved nutrition services for young children in emergency situations

JP Indicator Value

% U5 children moderately and severely stunted (height for age)
% U5 children moderately and severely wasted (weight for age)
% U5 children moderately and severely wasted (weight for age) admitted in CSAM under emergency and non-emergency contexts
U5 child and maternal rates in hospitals and communities

Target 4.A: Reduce by two-thirds, between 1990 and 2015, the under-five mortality rate JP Outcome

Beneficiaries

JP Indicator

Value

Improvements in availability, access and consumption of a more diverse food supply in the highland and mountainous regions in Vietnam

% farmers adopt RICM practices Increased food production (rice, animal, fish, fruit and vegetables) in target areas % households use improved food preservation and processing techniques Increased availability of food for consumption (rice; animal source foods) Reductions in length and depth of the "lean season" and in food insecurity and risk of hunger at community level Enhanced public knowledge of and information about good nutritional practices Increased dietary diversity (dietary diversity scores) especially of animal sourced foods for vulnerable households and women and children

Additional Narrative Comments

Please provide any relevant information and contributions of the programme to de MDGs, whether at national or local level

The joint programme contributes to the effort of the Government of Vietnam in combating hunger and poverty with success on the achievement of the MDG1. The Joint Programme also make a contribution to realising the MDG 5 on improve maternal health.

Please provide other comments you would like to communicate to the MDG-F Secretariat

UN agencies in Vietnam, including FAO, UNICEF and WHO are focusing their support to national programmes through policy development and system strengthening where it is difficult to measure attribution versus contribution related to number of direct and indirect beneficiaries. Support for development of policies, advocacy, strategies, legal documents, plans and guidelines and further support for capacity development in these areas are expected to have an impact for all children under 5 in Viet Nam which is according to the 2009 Census 7,316,000 children. New approaches are modelled and best practices generated from our support to selected provinces. These efforts and experiences are used to further strengthen national programmes, health systems and policies.

Part of the support is for piloting best practices on agricultural production with suitable models for each geographical area covered by the Joint Programme. Provision of micronutrients and vitamins for under 5 children and mothers are channelled through local health clinics, hospitals and centers.

Section IV: General Thematic Indicators

Expected Results (Outcomes & outputs)	Indicators	Baseline	Overall JP Expected target	Achievement of Target to date	Means of verification	Collection methods (with indicative time frame & frequency)	Responsibili ties	Risks & assumptions
OUTCOME 1: Impactions	proved monitoring	systems on food,	health and nutriti	on status of mothers and children used to	guide food, health a	and nutrition-relat	ted policies, st	rategies and
Output 1.1: Technical support for strengthening the existing nutrition data collection and utilization system on food-health- nutrition	New nutrition indicators and official data collection frameworks for nutrition	NIN-MOH, 2006, Multiple Indicator Cluster Survey (MICS) 2006	New nutrition indicators and data collection frameworks for nutrition developed; New data framework and indicators applied in annual nutrition survey; Updated data on IDD and iron anaemia available; Updated data on IDD and USI status available	New data framework applied to National Nutrition Surveillance with inclusion of recommended global indicators on IYCF, micronutrients and maternal nutrition; Updated data consolidated and disseminated in annual surveillance reports and provincial profile cards for 63 provinces Review meeting on anaemia interventions and recommendations for inclusion into National Nutrition Strategy. Data on baseline survey available and disseminated to the target provinces. IDD monitoring and reporting supported for all 63 provinces with data ready for dissemination. Information of the National Nutrition Survey disseminated to the 63 provinces during 3 regional workshops.	Manual or technical guides defining methodologies produced, including the definition of data to be collected, templates to be used; Report on results of specific studies on IDD and iron deficiency anaemia (IDA) and vitamin A deficiency. IYCF and BF practices New nutrition survey from 2010 will use new frame work and questionnaire	Report from international and local consultants; Specific studies on IDD, iron anaemia and vitamin A deficiencies. Reviewing process and newly formulation		Data available to, and used by, local and national decision- makers and policy-makers; Data adequately reflects the incidence, nature and causes of food insecurity and vulnerability; Data collection and analysis conducted timely and data is of acceptable quality; Lack of cooperation and insufficient support from project partners and institutions. Willingness of national Government to

								support the process;
Output 1.2: Improved information on food production, stocks, availability and market prices at national, provincial and local levels	Improved methodologies for monitoring production and food prices adopted and applied; Number of provincial staff trained in crop production and livestock estimates; Improved monitoring systems implemented;	AgroInfo (MARD), 2009	GIEWS Workstation set-up and country-wide food price monitoring mechanism connecting each district established; Regular reports and bulletins on food statistics and market prices.	Current monitoring capabilities to set up GIEWS workstations at national level reported; Training material and training on the use of GIEWS in agricultural production for 120 local staff in 6 provinces conducted; Training needs assessment on crop production and livestock production conducted, training materials and training sessions conducted in 6 province for 144 provincial staff; Training manual for monitoring market prices, analysing market prices, training guideline for climate monitoring and analysis developed, training sessions on analytical tools and information management conducted for 150 staff at provincial and district level in 6 provinces; National GIEWS set up and hosted by Ministry of Agriculture and Rural Development; Frame work for training sessions on GIEW for staff at provincial and local levels prepared and training provided for local technical staff at 6 provinces; Staff and officers at provinces are trained on food market prices analysis and skills to run GIEWS workstation; Dissemination of information on early warning system on food insecurity at 6 provinces	Situation analysis note on market information systems; Monthly national market briefs; Quarterly national market reports; Manual or technical guides.	Field visits; Annually and quarterly progress reports; Mission reports	FAO	Data available; willingness of the Government to the establishment of the national GIEWS
Output 1.3: Establish a sustainable	Sentinel monitoring of affects of food	Data established in year 1		Indicators integrated into surveillance system. Training conducted in Standardised Monitoring and	Setting up a small scale sentinel site surveillance on	Collection of data through pre and post visit	UNICEF	

tracking system to monitor the impact of the food crisis on nutrition status of mothers and children	crisis set up; Joint rapid nutrition assessments conducted in emergency situations.			Assessment of Relief and Transition (SMART) and Emergency Nutrition Assessment (ENA) software Food crisis monitoring integrated into national surveillance system with surveillance of seasonal incidence of malnutrition ongoing at selected sites Health and nutrition personnel from central level government and in 15 disaster prone provinces demonstrate increased knowledge and capacity to conduct nutrition assessments with introduction of Standardised Monitoring and Assessment of Relief and Transition (SMART) methodology and tools. 6 nutrition assessments (6 communes) conducted after natural disasters using	food prices and nutrition status Rapid nutrition assessment reports; Impact assessment reports.	reports; Pre and post intervention surveys; Annually and quarterly progress reports; Mission Reports.		
Output 1.4: Improved food and nutrition information through updated Food Insecurity and Vulnerability Information Mapping System (FIVIMS)	Revised vulnerability maps and/or vulnerable group profiles produced reflecting the latest food and nutrition insecurity situations.	FAO-FIVIMS (2000)	FIVIMS set up and maintain at national level	updated methodology and tools Report on current situation on food security monitoring system, information needs and data for FIVIMs completed; Guideline on food insecurity assessment prepared and shared with all stakeholders; 150 staff at provincial and district levels of 6 provinces are provided training on strengthening national capacity in collecting and analysing data on food insecurity and vulnerability; food insecurity maps and vulnerability factors produced Food Insecurity and Vulnerability Information Mapping System (FIVIM) in place at 12 communes of 6 provinces in the JP. Market price monitoring and analysis skills trained for provincial staff Monthly data collection of market price in place at pilot communes	Vulnerability analysis and monitoring methodologies; FIVIMS information dissemination and mapping system; National FIVIMS reports.	Vulnerability assessment reports; Annually and quarterly progress reports; Mission Reports.	FAO	Data available, FIVIM review and set up

Output 1.5: National policies, strategies and actions relating to protecting and promoting the nutrition of infants, children, pregnant women and mothers developed and implemented	National Strategy for Nutrition 2011- 2020 and 5 year Action Plans for Nutrition 2011- 2015 including micronutrient deficiency control; National IYCF Plan of Action;; Lawand/or Gov regulations relating to support and protection of BF revised and submitted to government for approval.	National Nutrition Strategy 2001- 2010; National Action Plan on Nutrition; Existing policies on maternity leave and on marketing of breast milk substitute. National action plan on IYCF		IYCF action plan 2006-2010 (including maternal nutrition) reviewed and 3rd draft of the IYCF action plan 2011-2015 developed and reviewed. Disseminated results of the general nutrition survey to 63 provinces and to guide provinces in developing provincial plan on nutrition. National action plan on Nutrition 2011-2015 first draft developed and reviewed in English and Vietnamese. National micronutrient guidelines under development 2011-2020 National Nutrition Strategy finalised and submitted to the Prime Minister for approval in December 2011; Paid maternity leave for 6 months approved by National Assembly Committee for Social Affairs in December 2011 and related provisions included into the Labour Code Amendment; Revision of Decree 21 on Marketing of Nutrition Products for Young Children approved by the Minister of Health and included into MoH's official work plan.	Progress reviews Documents of National strategy for nutrition 2010-2020 and the 5 year action plan for nutrition and IYCF 2010- 2015; (It will be included in National Action Plan on Nutrition)	Annually and quarterly progress reports; Mission reports.	WHO, UNICEF and FAO	
Output 1.6: Implementation of pro-poor agricultural and rural development policies for better nutrition	Analytical reports and recommendation s for national and sector policies and institutional reforms; Policy briefs and position papers directly	Resolution No. 63/NQ-CP on national food security	-	Guideline and training material on policy analysis, development and implementation developed; Technical report on review of current policy integrating nutrition objectives, including policy on nutrition, food security and rice production Field investigation and analysis of local pro-poor and policies situations Action plan drafted with key actions to	National development policies; Government reports	Sector monitoring reports of national government	FAO	

	addressing the needs, constraints and opportunities of the most vulnerable and malnourished; Increased visibility of food, health and nutrition in policy frameworks (PRSPs, UNDAF); Implementation of existing propoor policies that improve food, health and nutrition.		improve food, health and nutrition for the poor; National seminar on food security and policies of local authorities addressing the needs of food with good quality and nutritional value as well as the coordination between two components: food security and health

knowledge and capacity to counsel on
breastfeeding.
IEC on BF for BFHI clinics being
developed jointly with WHO and A&T
PMU is operational at the two target
provinces
UN and Alive & Thrive supported a
national and provincial-level campaign
during the World Breastfeeding Week
2011 with large events in Ha Noi and
Ho Chi Minh city, supported by nine
additional provincial-level events to
additional provincial-tevel events to

			extend impact and reach. NCHE (under MoH) was responsible to coordinate with Ham Nghi Co. to execute the event in Hanoi, including launching Music Night and Festival Day. Each organization was responsible for their respective responsible provinces. The campaign was co-funded by 3 organizations. Joint Monitoring trips to An Giang and Cao Bang provinces conducted to support the external evaluator trip to develop the Mid-term evaluation.				
Output 2.2: Integrated BF promotion with ANC, delivery and post-partum care	IYCF trainer team available in (project sites) 6 provinces; Counseling skills on breastfeeding of health workers at commune, health centres, district and provincial levels improved.	Data establish ed in year 1.	Teams of five provincial trainers in 4 provinces established and are able to provide training in BF and CF counselling to district and commune health staff. Community breastfeeding support networks established in An Giang and being initiated in Dien Bien and Ninh Thuan. Refresher training for IYCF trainer teams is on-going in collaboration between WHO and UNICEF. Increased the knowledge on IYCF, including the Trainer of Trainers on IYCF conducted at national level with 12 trainers and 20 participants. Plan for scaling up in Cao Bang and Dak Lak developed. Materials on IYCF Counselling: an integrated course adapted. IEC materials on Breastfeeding reviewed and designed. Trainers from national, provincial and district level trained and increased theoretical and practical skills on IYCF Increased the knowledge on IYCF,	Reports on training. Provincial plan for scaling up the IYCF training	Pre and post training assessment	WHO UNICEF	The IYCF steering committee of the MOH continued to be supported to fulfil their function and responsibility by the MOH

			Materials on IYCF Counselling: an integrated course adapted. Commune Health Workers in project areas are trained and able to carry out comprehensive counselling on breastfeeding in 10 communes of Binh Thanh Dong and Phu Tho district, An Giang. Health workers demonstrate increased knowledge and skills on breastfeeding counselling in Cao Bang and Dak Lak provinces. Counselling corners established in 3 national hospitals and 2 provincial hospitals and knowledge on breastfeeding and post-delivery care provided. IEC materials provided for the hospitals. Conference on Promotion of Exclusive BF practices for the health staff of the whole 30 southern hospitals of Vietnam.				
Output 2.3: Increased number of health facilities introduced to Mother-Baby Friendly Hospital Initiative and granted MBFH certificate	Number of provincial hospitals that maintain Mother-Baby Friendly Hospital Initiative standards; Number of new community health facilities that provide BF counseling and IEC activities	Self Assessm ent Annual report of the BFHIs	Circular on BFHI as minimum standard for hospitals with accreditation system under developments; Provincial Hospitals in Kon Tum, Dien Bien, Ninh Thuan and An Giang maintain BFHI standards and BF counselling using updated IEC is now available in 40 project communes. District BFHI model introduced to two new districts in An Giang. Currently only 59 BFHI hospitals. Development of standards for BFHI at all health facilities in the country initiated to increase coverage by strengthening requirements and systems. BFHI standards established at Phu Tan District Hospital and 10 commune	Annual reports from provincial programme; Report of external assessment of BFHs; Field trip reports. Self assessment of BFHI in all provinces	External assessment of BFHs Observation during field trips	WHO, UNICEF	

health stations in An Giang Province. BFHI Trainer of
Trainers for 12 provincial trainers from
Cao Bang and Dak Lak provinces
conducted.
BFHI materials translated to
Vietnamese. Circular on BFHI as minimum standard
for target hospitals developed and
endorsed by hospitals.
Training on BFHI carried out at the
provincial hospitals. BFHI materials
adapted and translated to Vietnamese.
Health staff from obstetric and
paediatric departments from provincial
and district hospitals trained on the
BFHI at Cao Bang and Dak Lak
provinces. Heads of obstetric and paediatrics
departments assessed the
implementation of the 10 steps of BFHI.
Breastfeeding support groups integrated
to the BFH initiative at hospital level.
Provincial and district hospitals have
developed their own implementation plan and schedule for the BFHI.
"Breast milk-let's talk about love" even
at general hospitals of Dak Lak and Cao
Bang. Breastfeeding support groups
established in Cao Bang province (41 breastfeeding clubs) and Dak Lak
province with the participation of the
Vice chairman of the Woman's Union,
head of CHC, reproductive health
workers, nutrition collaborators and
mother with children < 2 year old.

Output 2.4: Enhanced implementation of national code for marketing and trading breast milk substitutes	Number of baby food and milk companies and health facilities who violate the national code on trading and marketing of breast milk substitutes.	Annual report on Code Violation (MOH)		Annual report available and to be disseminated January 2011. International code translated and disseminated in Vietnamese. Report on 5 years implementation of Decree 21 on Marketing of Breastmilk substitutes identifying violations by hospitals and formula companies available and disseminated All 63 provinces trained in code monitoring and demonstrate enhanced capacity to enforce Decree 21. Annual review on code implementation included in the revision process for decree 21 with dissemination ahead of world breastfeeding week. Statements from Cao Bang and Dak Lak provincial hospitals prohibiting the formula milk companies contact and usage of formula have been released and	Reports on results of monitoring trips on implementation of National Code	Monitoring trips with observation and using checklists	WHO, UNICEF	
				disseminated at the provincial health settings.				
OUTCOME 3: Red	uction of micronutrient d	leficiencies i	n targeted childre	en and women				
Output 3.1: Supplies of vitamin A capsules, iron folic tablets, zinc and de-worming drugs are available to all targeted children and women within the programme area	Amount of Vitamin A, iron folic tables, deworming drugs, multiple micronutrients, zinc, vitamin K and ORS procured and available for targeted women and children against the plan % coverage of targeted subject/house hold with vit. A or iron folic, iodized salt USI in households and vit. K	MICS (2006) Provincia 1 data establish ed in year 1		Vitamin A available from IKD with 99 percent coverage; 2,340 ORS sachets for SAM (ReSoMal) procured and distributed Vitamin A available from IKD with 99 percent coverage; 2,340 ORS sachets for SAM (ReSoMal) procured and distributed; Nutrition supplies procured and Quality Assurance / Certification process initiated with support from UNICEF Supply Division in Copenhagen.	Procurement report; Field trip report; Annual reports from provincial programme	Procurement records Records of receiving of supplied by programme, provinces Programme reporting system	UNICEF	Miro-nutrient deficiency control will be still a key component of the new national nutrition strategy 2011-2010

	injection in new borns							
Output 3.2: Improved capacity of local health workers in implementing micronutrient deficiency control activities (vitamin A, iron anaemia and IDD)	% provincial, district and commune health workers in targeted provinces trained on national guidance for micronutrient deficiency control; IEC materials on micronutrient deficiency control distributed to health facilities.	Data collected in year 1		Training on IYCF to health staff at provincial and district level and nutrition collaborators conducted in Cao Bang and Dak Lak. Micronutrient guidelines from the National Institute of Nutrition development have been approved by MOH, first draft of the guidelines has been developed. Micronutrient guidance integrated into the essential stunting reduction package for managers, trainers and health workers Micronutrient guidance and capacity development integrated into the essential stunting reduction package Micronutrient guidance integrated into the essential stunting reduction package and Infant and Young Child Nutrition IEC materials Provincial Center of Health Education of Dak Lak broadcasted messages on anaemia prevention and breastfeeding practices.	Training reports Annual reports from provincial programme	Pre and post training assessment Programme records	WHO	
OUTCOME 4: Imp	proved care and treatmen	t services fo	r young children	with severe acute malnutrition and imp	roved nutrition serv	ices for young chil	dren in emerg	gency
Output 4.1: Capacity of health workers on care	Number of pediatricians trained in inpatient therapeutic	to be locally establish		National Training of trainers conducted for Integrated Management of Acute Malnutrition with 40 participants from	Report on training activities	Records of training activities	WHO, UNICEF	The policy on establishment

and treatment of children with severe acute malnutrition (SAM) and with special needs in community and hospital systems improved	care and treatment for child severe acute malnutrition; CSAM units in provincial hospitals and in two selected district hospitals; % of responsible government officials and international partners in the country Nutrition Cluster network trained in nutrition in emergencies using latest global training package	ed in year 1	national and provincial level; Provincial training and planning meetings conducted in Kontum. Dien Bien and Ninh Tuan Provinces for managers, paediatricians, nurses and other health workers; Inpatient Units functional at Kon Tum Provincial Hospital, Dak Ha District Hospital and 3 Regional Referral Hospitals (HCMC, Hue, Hanoi); Community-based management available and functioning in Kon Tum province at 9 communes and in other catchment areas through outreach support by Reproductive Health Centres. Government officials from 14 out of 15 disaster prone provinces (94%) and relevant institutions/agencies from the Nutrition Cluster trained in the global nutrition in emergencies training package for disaster risk management Kangaroo-mother care guidelines reviewed. Training on MUAC and anaemia prevention provided to commune health workers and village health workers in Dak Lak and Cao Bang provinces.	Record and report from provincial programme Field trip report Provincial report 2009 before intervention of the CSAM	Observation during field trips		of the dietetic department in provincial/dist rict hospital will continued to be encourage by the MOH
Output 4.2: Provision of key supplies to support nutrition services for selected provinces and localities at high risk, including micronutrient supplements and ready to use therapeutic foods	Medical equipment installed in inpatient CSAM units at provincial hospitals and in 2 district hospitals; Number of inpatient and out-patient therapeutic feeding centres adequately supplied with key RTUF and drugs	to be locally establish ed in year 1	Iron Folic Acid for pregnant women and women of reproductive age in the target districts s requested Medical and nutrition supplies provided to 5 hospitals and 9 commune health centres; Local production of Ready to Use Therapeutic Food in line with global product specification established through research and development.	Procurement report Record and report from provincial programme Provincial report 2009 before intervention of the CSAM	Procurement records Records of therapeutic feeding products received by the programme provinces	WHO, UNICEF	The policy on establishment of the dietetic department in provincial/dist rict hospital will continued to be encourage by the MOH

OUTCOME 5: Imp	provements in availability	y, access and	l consumption of	a more diverse food supply in the highlar	nd and mountainous	s regions in Vietnai	n	
Output 5.1: Increased efficiencies in rice production in the highland and mountainous regions in Vietnam through building capacity in rice integrated crop management systems (RICM)	% of farmers adopt RICM practices; Increased food production (rice, animal, fish, fruit and vegetables) in target areas;	Local data to be collected in year 1		RICM training courses conducted for 80 provincial staff in An Giang, Ninh Thuan, Kon Tum and Dak Lak provinces Demonstration site for ICM on rice seed at two provinces 350 farmers were provided knowledge and skill on RICM technology through FFS	Minutes of meetings; Reports of field surveys and studies	Specific studies Questionnaires Research and field surveys; Annual and quarterly progress reports; Mid term review and final evaluation report	FAO	Existing extension network can reach farmers of targeted communities and involve food insecure communities; Extension workers allowed and encouraged to participate fully in training provided under the project; Appropriate technologies identified and successful methodologic al approaches applied.
