BACKGROUND INFORMATION									
Humanitarian context     analysis Humanitarian context:     Describe the current humanitarian situation in the specific locations where this project will be implemented	According to the Sudan popul intrapartum and very early ne among the health facilities wa challenges of poor accessibility gap since it's very difficult to antenatal care. Some of the h	eonatal deat s at 54%. It ity, the upta get a qualifi	th rate for health facilities t is a government declar ake for MCH services is ed midwife hence leaving	at 24.9% it also show ed flood prone area ma very low; the discontir g the pregnant women	vs that the percentage o aking it completely inacc nuation of TBAs at the he even more vulnerable in	f institutional maternal dea essible during the rainy sealth facilities and lack trans a accessing safe delivery	aths due to indirect ca season. Due to the ained midwives has left at the health facilities		

intrapartum and very early neonatal death rate for health facilities at 24.9% it also shows that the percentage of institutional maternal deaths due to indirect causes among the health facilities was at 54%. It is a government declared flood prone area making it completely inaccessible during the rainy season. Due to the challenges of poor accessibility, the uptake for MCH services is very low; the discontinuation of TBAs at the health facilities and lack trained midwives has left a big gap since it's very difficult to get a qualified midwife hence leaving the pregnant women even more vulnerable in accessing safe delivery at the health facilities and antenatal care. Some of the health facilities are more than 5 km away from the population residences making it hard for mothers and children <5 both boys and girls to access health services. The disease burden in Mayendit County is increasing especially on children boys and girls <5 (AWD, ABD and Malaria) and also on the PLW (Malaria). Since the beginning of the year Mayendit recorded high number of patients per week of not less than 1000. Destruction and looting of health facilities put the IDPs and host communities at a more vulnerable state in health service provision especially boys and girls <5 and PLW where services were being provided in the bush hence creating no privacy for the pregnant women and putting them at risk when it came to child birth. Measles suspected cases and deaths have been reported in Mayendit HQ and the CHD says that there are even more in the other payams. This has been caused by lack of vaccination in the county as the cold chains were vandalized and the solar panels and batteries taken away thus leaving no functioning cold chain. Mayendit County is one of the counties that was gravely affected by the crisis that happened in South Sudan. HFs were destroyed and health staff killed during the crisis reducing further the already lean HR in the health institutions which also affected service delivery. According to OCHA, there are 32,765 IDP

2. Needs assessment. Explain the specific needs of the target group(s), explaining existing capacity and gaps. State how the needs assessment was conducted, list any baseline data and explain how the number of beneficiaries has been developed. Indicates references to assessments such as Multi-cluster/sector Initial Rapid Assessments (MIRA)

The beneficiaries include less than five years boys and girls, between 5 and 15 years boys and girls, women of child bearing ages, old men and women, disables,

# 3. Description Of Beneficiaries

current & post war trauma victims, local chiefs, teachers and their related groups like PTA and others for the host communities, pastoralists and the IDPs

### 4. Grant Request Justification.

The proposed project activities will maintain the existing emergency health sector safety net in Mayendit county by providing basic health packages and emergency referral services in the targeted 7 health facilities (Mayendit PHCC, Thaker, Kuok, Dablual, Tutnyang, Pabuong and Luom PHCUs) of Mayendit county and the surrounding communities. Through a focus on maternal and child health (MCH) - especially obstetric care, integrated management of childhood illnesses (IMCI) protocols, and EPI, UNIDO intends to ensure the promotion of mother and child survival in its supported healthcare facilities whilst continuing to provide services in line with the Basic Package of Health Services (BPHS). Special focus will be in place to boost the coverage for measles vaccination through enhanced outreach activities and regular cyclic vaccination campaigns. UNIDO has initiated the use of community health committees to intensify community education and social mobilization for the utilization of services at the community level. UNIDO plans to use community health committees to conduct health promotion on common illnesses, MCH, nutrition, healthcare seeking behavior, and information on available services in the health facilities, HIV/AIDS since one of the facilities Mayendit PHCC has a VCT. UNIDO shall procure and distribute sesential drugs, kits (including trauma kits), medical supplies, basic medical equipment, and laboratory supplies through direct supply and the MoH's supply chain from the State to facility level. UNIDO shall continue in partnerships with UNFPA and UNICEF to ensure the timely procurement and distribution of essential RH and EPI commodities, and ensure proper functioning of the cold chains installed in Mayendit PHCC to ensure rapid and accurate diagnoses to support timely treatment of communicable diseases and reporting on the HMIS. The SMOH still lacks capacity in HR hence the timely procurement and common on the seven (7) health facilities and community-based health workers on safe motherhood, child health, com

# **5. Complementarity**. Explain how the project will complement previous or ongoing projects/activities implemented by your organization.

# LOGICAL FRAMEWORK

Overall project objective

Increase access to and improve quality of comprehensive emergency primary healthcare services through health facilities and community-based services provision in Mayendit county by the end of June 2015.

# Logical Framework details for HEALTH

Cluster objectives	Strategic Response Plan (SRP) objectives	Percentage of activities
2015 SSO 1: Improve access to, and responsiveness of, essential including emergency health care, and emergency obstetric care services	SO 1: Save lives and alleviate suffering by providing multi-sector assistance to people in need	100

Outcome 1	Increased access to integrated quality primary health care services in 1 PHCCs and 6 PHCUs to th county.	e IDPs, pastoralists, host community and other vulnerable groups in Mayendit
Code	Description	Assumptions & Risks
Output 1.1	1 PHCC and 6 PHCUs are strengthened to deliver quality primary health care services to pastoralists, host communities and other vulnerable groups.	Security remains stable     Funds disbursed on time     Weather is conducive

# Indicators

Code	Cluster	Indicator	End Cycle	End- Cycle			
			Men	Women	Boys	Girls	Target
Indicator 1.1.1	HEALTH	[Frontline services] Total # of outpatient consultations in conflict-affected and other vulnerable states	12550	12550	8750	8750	42600
	Means of Verification:	UNIDO reports, cluster reports, QSC reports					
Indicator 1.1.2	HEALTH	[Frontline services] # of >5 outpatient consultations in conflict-affected and other vulnerable states	12550	12550			25100
	Means of Verification:						
Indicator 1.1.3	HEALTH	[Frontline services] # of <5 outpatient consultations in conflict-affected and other vulnerable states			8750	8750	17500
	Means of Verification:						

# Activities

Activity 1.1.1	Maintain the existing provision of basic health packages and emergency referral services in Mayendit PHCC, Luom, Kuok, Tutnyang, Dablual, Pabuong and Thaker PHCUs of Mayendit county
Activity 1.1.2	Provide consultations and treatment of common illnesses in OPDs and IPDs, including the use of IMCI protocol for <5 girls and boys in Mayendit PHCC, Luom, Kuok, Tutnyang, Dablual, Pabuong and Thaker PHCUs
Activity 1.1.3	Provide laboratory services with improved diagnostic capacity in Mayendit PHCC
Activity 1.1.4	Provide maternal healthcare (routine ANC/PNC checkup, TT injection, detection of danger signs and referral of complicated pregnancies, ITN and IPT to prevent malaria, immunization, clean and safe delivery by qualified midwifes, BemONC, FP services) in Mayendit PHCC, Luom, Kuok, Tutnyang, Dablual, Pabuong and Thaker PHCUs
Activity 1.1.5	Strengthen universal precautions and infection prevention including medical waste management in Mayendit PHCC, Luom, Kuok, Tutnyang, Dablual, Pabuong and Thaker PHCUs
Activity 1.1.6	Strengthen community health committees and conduct targeted health awareness education on HIV Aids, MCH, nutrition, and healthcare seeking behavior, information on available services in the health facilities and hygiene and sanitation in Mayendit PHCC, Luom, Kuok, Tutnyang, Dablual, Pabuong and Thaker PHCUs
Activity 1.1.7	Conduct on the job and formal/refresher training for health workers, health promoters, community based health workers, community midwifes on MISP, safe motherhood, child health, community health, common morbidities, HMIS
Activity 1.1.8	Procure and distribute essential drugs, medical supplies, basic medical equipment and laboratory supplies/equipments to all supported health facilities

# Output 1.2 Strengthened EPI and vaccination campaign services that reach to vulnerable communities.

Inter-tribal conflicts will not escalate to the extent of hindering community participation in the delivery of health services

# Indicators

Code	Cluster	Indicator	End Cycle		End- Cycle

Activity 1.2.1 Undertake memorandums of understanding with UNICEF or the transportation and distribution of EPI supplies including cold chain	2015	Х											
Activity 1.2.2 Provide child healthcare (Routine immunization, accelerated mass campaign for measles and NIDs for polio in Mayendit PHCC, Luom, Kuok, Tutnyang, Dablual, Pabuong and Thaker PHCUs and the areas without access to health care	2015	х	Х	X	X	Х	X						
Activity 1.3.1 Provide vehicles for emergency referral services to the Hospital in Leer for surgical interventions e.g trauma.	2015	Х											
Activity 1.3.2 Strengthening of facility staff health workers, health promoters, community midwivess on health/disease surveillance, eporting and analysis (HF based surveillance/IDSR, community surveillance and epidemic/outbreak investigation and response); case inding, treatment and health awareness raising for the prevention of common infectious diseases e.g. cholera, meningitis, malaria, HIV/AIDS and other communicable diseases	2015		X										
Activity 1.3.3 Training of health workers in EP&R for disease outbreaks, aboratory and clinical management of malaria, TB and casualty ncidents from conflicts and other causes	2015		X										
Activity 1.3.4 Prepositioning of essential emergency supplies and kits	2015	х											

(drugs, vaccines, IV fluids, PEP) in the said health facilities, laboratory							
diagnostic capacity and coordination mechanisms with other							
humanitarian actors in the county and at the clusters in Bentiu and Juba.							

### M & R DETAILS

# Monitoring & Reporting Plan: Describe how you will monitor the implementation of each activity. Describe the tools you plan to use (checklist, photo, questionnaires, interviews, suggestion box etc.) in order to collect data and how you will store data. Explain the frequency type and protocol of reporting (how often do you report about what to whom?). State if, when and how you plan to

UNIDO will use the existing HMIS, IDRS and DHIS reporting systems on weekly and monthly basis respectively as well the surveillance forms for diseases' out breaks. Our M & E has also developed indicators tracking template which will also complement the other reporting systems. UNIDO will continuously preposition the supplies (the reporting tools like registers OPDs registers for (<5 as well for >5), registers for ANC, laboratory, birth notifications and also the death certificates) from MOH. UNIDO will also make sure that the staffs are trained on how to use each of the above mentioned tools for proper reporting system and thereafter must share those reports on weekly and monthly basis with SMOH and CHF. Routine monthly supervisions to all facilities must be done in collaboration with the CHD to monitor the efficient and quality services deliveries to the community.

# evaluate your project . OTHER INFORMATION

Accountability to Affected Populations

UNIDO will establish an awareness and community support team through the various group associations and disseminate existing messages and materials using appropriate channels. In environment UNIDO will ensure an environmental friendly measures by correct disposal of plastic paper bags, grading of waste such as hazardous, non hazardous, and sharps all put in separate containers and ensure availability of incinerators; also have dustbins strategically put in various places in the HFs in order to encourage a clean environment. UNIDO will continue with demonstration farms as a way of protecting the soil from erosion.

Implementation Plan: Describe for each activity how you plan to implement it and who is carrying out what.

This health project will be directly implemented by UNIDO personnel. Monitoring and evaluation of the project progress will be central to the success of the project and will be carried out to ensure the quality, effectiveness and service delivery performance. Monthly management reports in line with project targets, the state of financial resources, and summary of expenditures, shall be compiled. These will result to quarterly programmatic and financial reports detailing progress made in accordance with the project activity implementation requirements. The medical coordinator and finance manager will ensure that all necessary reports are prepared, compiled and submitted at the end of each quarter. Various tools e.g. observation, review of documentation, key informants techniques will be used to capture and document the project performance. Project stakeholders and beneficiaries feedback will play a vital role in assessing the extent of project success. This will help in restructuring the project implementation course in order to maximally deliver the project activities.

Coordination with other Organizations in project area

Environmental Marker Code

Gender Marker Code

2b-The principal purpose of the project is to advance gender equality

Justify Chosen Gender Marker Code

UNIDO plans that women, men, boys and girls utilize the health services without hindrances. This will be achieved by ensuring that women & men; men are represented equally in the villages health committee (VHCs). These committee are elected for each supported facility to plan adequately for their respective health facilities for the aim of cartering for all. Secondly, men & men shall be trained on their role to the use of reproductive health services so that they at the end time convey the same message to the wider community.
