Direct beneficiaries :

| Men | Women | Boys | Girls | Total |
|-----|-------|-------|-------|-------|
| 197 | 4,336 | 2,505 | 2,055 | 9,093 |

Other Beneficiaries :

| Beneficiary name | Men | Women | Boys | Girls | Total |
|--|-----|-------|-------|-------|-------|
| Children under 5 | 0 | 0 | 2,505 | 2,055 | 4,560 |
| Pregnant and Lactating Women | 0 | 4,326 | 0 | 0 | 4,326 |
| Trainers, Promoters, Caretakers, committee members, etc. | 197 | 10 | 0 | 0 | 207 |

Indirect Beneficiaries :

The project will indirectly benefit 40,853 individuals following prevention of malnutrition in 17% (from GAM rates) of the population. There will be reduced need for critical care for especially children leaving time for parents to do other productive activities. Reduced expenses for caring for the sick due to Acute Malnutrition and improved overall performance of children in schools.

Catchment Population:

The catchment population for Tonj South and Tonj East is 240,311 (42.4% Tonj South and 57.6% Tonj East) according to 2016 projections from 2008 general census in South Sudan.

Link with allocation strategy :

In mid-2016 alone, 38,883 cases (Hold the Child report for June 2016) of malnutrition both Children and PLWs were seen in both Tonj South and Tonj East alone. Warrap state has been ranked 2 in the priority setting for round 2. With a population of 240,311 in 2010 (population estimates 2016 from 2008 census) in Tonj South and Tonj East, there has been a need to enhance good health through Nutrition intervention.

Based on our operational and nutrition technical experience in the implementation area (Tonj South and East), activities and targets proposed under the listed key outcomes are feasible during this implementation period of 6 months. This project therefore directly contributes to the standards allocation strategy and directly contributes to the cluster priority actions under this allocation

BACKGROUND

1. Humanitarian context analysis

Malnutrition has been a chronic concern in the communities of Warrap state with persistent elevated levels of Global Acute malnutrition (GAM) exceeding the emergency threshold of 15%. Studies indicate that these high rates are attributed to sub optimal infant and young child feeding practices (IYCF) among children, chronic food insecurity, increased seasonal incidences of diseases like malaria and diarrhea, access constraints to health and nutrition services, poor water, hygiene and sanitation (WASH) and social services. The Nutrition cluster (2016) characterizes Tonj South and Tonj East in Warrap among the vulnerable counties in need of assistance. As the hostilities in the country are still recurrent, the situation remains unpredictable.

During the FSNMS assessments, data indicated a GAM rates of 17.6% both in Tonj South and Tonj East among children under five and PLWs. The high proxy GAM rates show worrying nutrition status both among the under-fives and PLWs in reference to the WHO standards. In May and June alone, 38,883 cases (Hold the Child data 2016) were registered MAM both Children and PLWs. This describes the magnitude of need.

Hold the Child has embarked on a Program running 23 Nutrition sites in Tonj South and Tonj East for TSFP. Poor roads and flooding restrict access to many patients, especially women, girls and children. Food insecurity and reduced immunity underscores the degrees of vulnerability. Our nutrition program has noted that Boys are at a much higher risk of acute malnutrition than their girls' counter parts.

2. Needs assessment

With average GAM rate of 17.6% between Tonj south and East, the counties are among the high hit areas of Warrap (old state). As a result of intermitted conflict in Lakes and WBEG (old states), there has been limited flow of supplies to the cWith average GAM rate of 17.6% between Tonj south and East, the counties are among the high hit areas of Warrap (old state). As a result of intermitted conflict in Lakes and WBEG (old states), there has been limited flow of supplies to the cwisting poor farming practices, coupled with the SSP devaluation; access to basic supplies and food stuff remains low with observable impact on the nutrition status particularly children and PLW.

The 23 supported sites supported by Hold the Child; 11 TSFP in Tonj South and 12 TSFP in Tong East are located in high catchment areas with the existing PHCCs and PHCUs. Smooth operations at the sites is challenged with

- In adequate storage of supplies, requiring multiple trips so as to minimize wastes/theft
- · Shelters for beneficiaries during Health education
- Prompt transportation of supplies to avoid delays and postponement of feeding days
- Insufficient screening due to under-staffing of the nutrition centers
- Limited coverage of Therapeutic feeding services (mention sites)
- To close gap and ensure optimal coverage of emergency nutrition services in the area. This project seeks to address the above and promoted optimal child feeding practices in the area.

3. Description Of Beneficiaries

The survival and welfare of children among the food insecure Warrap is heavily threatening the nutritional status with Tonj South and East ranked among the high priority areas by the Nutrition cluster. This project will supplement on the delivery of integrated lifesaving therapeutic, supplementary and prevention nutrition services directly to 4,560 children <5, 4,326 women and 197 others among the vulnerable populations of Tonj South and Tonj East where;

- 2,505 boys and 2,055 girls will be treated for Moderate Acute Malnutrition (MAM)
- 4,326 Pregnant and Lactating Women will be treated for MAM
- 4,336 women and men will be reached with health education messages
- 25 nutrition staff trained on Community-based Management of Acute Malnutrition approaches as per the guidelines
- 23 additional staff supported to work in the nutrition sites in Tonj South and Tonj East

4. Grant Request Justification

Under this funding, 9,093 direct beneficiaries will be reached through the maintenance of 23 nutrition sites by supporting staff working in the facilities, transport of supplies and equipment, purchase equipment for the sites, train and maintain 23 lead mothers Under this funding, 9,093 direct beneficiaries will be reached through the maintenance of 23 nutrition sites by supporting staff working in the facilities, transport of supplies and equipment, purchase equipment for the sites, train and maintain 23 lead mothers Under this funding, 9,093 direct beneficiaries will be reached through the maintenance of 23 nutrition sites by supporting staff working in the facilities, transport of supplies and equipment, purchase equipment for the sites, train and maintain 23 lead mothers to form mother-to-mother support groups attached to each of the sites to reach 4,336 both men and women with key messages on optimal feeding for children, treat 4,560 children under 5 (2,505 boys and 2,055 girls) and 4,336 Pregnant and Lactating Women (PLWs) with Moderate Acute Malnutrition (MAM). This project will improve nutrition status in Tonj South and Tonj East that have witnessed high rates of Global Acute Malnutrition (GAM) indicated by studies in the recent months.

Our existing relations with health partners, local communities and key stakeholders on ground will facilitate quick coordination, scale-up screening and referrals, timely delivery of supplies that will directly maximize the impact of this SSHF supported project on children survival and welfare. Our built institutional experience in delivering CMAM programs will benefit quality delivery of the proposed initiatives. These plus our longstanding working with partners on ground and the cluster coordination mechanism both at state and national levels makes Hold the Child the most suitable national organization to undertake the operations as proposed in the this funding applications

5. Complementarity

The implementation of this project will benefit from the existing; (1) TSFP Operation in both counties under WFP support, (2) Hold the Child Working relations with the 2 CHDs and the health partners (CCM), World Vision and others since March 2016. And too our institutional experience in working with Nutrition cluster, SSHF, and implementation of emergency nutrition services This will leverage quick execution of training, inclusion of relevant additional staff, establish alternative transportation modalities to supplies and to scale up screening and IYCF key messaging.

Building our relations with Health partners, the project will undertake deliberate efforts to link with other relevant sectors i.e. Education, Protection and WASH to harness the impact of the intervention. Malnutrition in the area has been a chronic pheromone, and as a contribution to our long-term commitment to the children and communities of Tonj in the fight against this, Hold the Child will keep exploring measures to ensure continuity of Nutrition services in the targeted areas following this funding cycle including; strengthening the working relation with the government, WFP and UNICEF

LOGICAL FRAMEWORK

Overall project objective

Reduce morbidity and mortality due to acute malnutrition in emergency affected Tonj South and East, during the last quarter of 2016 and first quarter of 2017 by providing nutrition services for some 2,055 girls and 2,505 boys under-fives, 4,326 PLW, and other vulnerable groups through integrated and community based approaches

| NUTRITION | | |
|---|---|--------------------------|
| Cluster objectives | Strategic Response Plan (SRP) objectives | Percentage of activities |
| CO1: Deliver quality lifesaving management of acute malnutrition for the most vulnerable and at risk | HRP 2016 SO1: Save lives and alleviate suffering through safe access to services and resources with dignity | 75 |
| CO2: Increased access to integrated programmes preventing under-nutrition for the most vulnerable and at risk | HRP 2016 SO2: Ensure communities are protected, capable and prepared to cope with significant threats | 25 |

<u>Contribution to Cluster/Sector Objectives</u>: The project is aimed at reducing malnutrition and also equipping caretakers and other beneficiaries with knowledge on Nutrition. Besides that, it will also involve capacity building of locally recruited staff who will remain as workforce for the area. In relation to the cluster and SRP objectives, the project is designed to fit in to the standards of the set objectives.

Outcome 1

NUTDITION

Improved nutrition status for 4564 children under 5 years (2505 boys and 2055 girls) and 4326 Pregnant and Lactating Women (PLWs) attending nutrition services

Output 1.1

Description

Provided MAM services to 4564 children under 5 years (2505 boys and 2055 girls) and 4326 PLWs attending

Assumptions & Risks

- Good access to the site in terms of security and means of transport

Activities

Activity 1.1.1

Maintain the operation of 23 Nutrition sites in both Tonj South and Tonj East

Activity 1.1.2

Print site management tools (registers, admission cards, discharge cards, referral sheets. tally sheets and information cards for caregivers) for all nutrition sites

Activity 1.1.3

Purchase furniture for the nutrition sites

Activity 1.1.4

Conduct social mobilization and defaulter tracing in the communities

Activity 1.1.5

Conduct referrals between CMAM components

Activity 1.1.6

Purchase site equipment for MAM activities

Activity 1.1.7

Recruit additional 23 staff

M & R

Monitoring & Reporting plan

The over all project management will be under the Programs Director who heads all programs in the organization. The technical management of the project will be under the Program Associate, Health and Nutrition based in Juba. At the field level, the Field CMAM Supervisor will be responsible for the daily activities of the project supervising Nutrition Assistants and

IYCF promoters.

Based on the outlined project outcomes and indicators above, with reference to the project activity plan the following forms the monitoring plan:

. Report on training sessions including participants, and training schedule will be compiled at every end of each training session by the project officer,

i. Children reached with Rapid screening, admissions for SFP, referrals for OTP/SC, IYCF counseling, Training sessions will be compiled on a monthly basis by the nutrition assistants; and filled in the standard Nutrition cluster reporting format by the project officer

iii. Field visits by the management team to the project sites will be scheduled regularly after two months to support the teams on ground iv. Testimonies from the project beneficiaries will be compiled at different instances during the project cycle

v. The finance officer will keep track of the project expenditures will posted and Financial reports will be generated and reported based in SSHF standards

Monthly field meetings will be organized at the field base in Tonj South to review the progress and identify action points for the new month in line with the project plans.

These reports will be summarized into one monthly narrative report that will also include the challenges faced in the reporting period. Reports will be submitted to the cluster using the standards cluster reporting tools. Monthly cluster reports will also be completed and regularly shared by the Project officer

Quarterly SSHF reports will also be compiled by the project officer along with the programs coordinator with inputs from the monthly reports. Workplan

OTHER INFO

Accountability to Affected Populations

The implementation of this project in the target settlements i.e. Tonj South and Tonj East will involve project beneficiary communities at various levels i.e.

• The day to day site activities will be handled by field staff who were recruited from among the beneficiary communities and trained to refresh knowledge on CMAM

All sections of IYCF lead mothers (for mother-mother support groups) will be selected from the target communities through a consultative
processes that will first of all refine the criteria with the local authorities and local leaders in each of the target locations, and then identify
individuals. Women groups will be a priority in this selection process

• IYCF initiatives will involve sensitization sessions with local leaders and among other community members

• Where village health committees exist, the project will involve such in drawing plans for community mobilization/outreaches

 Monthly coordination meeting with stakeholder will be a continuous practice though the project to capture additional inputs from the beneficiaries into the operation of the project in the subsequent implementation period

In line with the organization feedback mechanisms, a suggestion box and notice boards based at the field base will be utilized

Implementation Plan

Hold the Child will directly implementation this project in Tonj South and Tonj East through the following modalities

• The Head of program will oversee the implementation of the project, and will work with project officer who will manage the day today running of the project.

• The project officer and CMAM supervisor will also under the rapid training sessions for health workers/nutrition staffs, the Project Officer along with CMAM supervisor draw will monthly plans; and the CMAM supervisor will work with the facility teams on daily basis to ensure proper implementation of schedule activities.

• Services for MAM and IYCF counselling, will be undertaken by the nutrition assistants and mobilisers at the facilities/units; with the guidance of with the guidance of the CMAM supervisor and Project officer, these teams will also a adopt outreach schedules some hot spot uncovered areas should they be identified as the access situation improves

• Community Nutrition Volunteers and Nutrition Assistants will conduct MUAC rapid screening and the screening report will be drawn by the CMAM supervisor

• The CMAM supervisor will work with IYCF mobilisers/promoters in collaboration with local leaders to support and to mother-mother support groups; prepare demonstration sites and sessions with locally available resources

• Delivery of supplies from and WFP to the project sites will be coordinated by the Project officer and the logistics officer

• Monthly reports of SFP, IYCF will be compiled by the nutrition assistants, CMAM supervisor and verified by the CHD at county level and Project officer

 The monitoring and evaluation of the project including performance ranking, reprogramming due to unforeseen realities will be handled by the Head of Programmes, Project officer and the County Health Department who will work in collaboration with the whole field team;
 The finance officer will keep track of the project expenditures

Environment Marker Of The Project

A: Neutral Impact on environment with No mitigation

Gender Marker Of The Project

2a-The project is designed to contribute significantly to gender equality

Justify Chosen Gender Marker Code

The design of the project is to ensure communities realize that bringing up a child is a responsibility of the community. Both men and women actively need to be involved with bringing up the child. The project will ensure this through; encouraging both men and women to participate in competing for positions to serve the community; health education sessions will be arranged in a way that captures the attendance of both men and women. Opinions of of both men and women will be sought for in matters concerning implementation of the project in the area.

Protection Mainstreaming

Country Specific Information

Safety and Security

Tonj South and Tonj East have lately witnessed a few road side robberies in late April. This was curbed and access was restored. Securutiy issues dont seem to be a setback to project implementation. The area is relatively safe for the last. Inter-communal clashes have recently not been heard of from the areas.

Access

Tonj South and Tonj East are often affected by flooding especially at the peaks of rainy season. Roads become inaccessible. The poor conditions of the roads resulting from poor maintenance often times hamper movement to far locations like Tonj East from Tonj South with light operation machines like motorbikes and small vehicles. Big trucks have also been obstructed often times from accessing far ends of Tonj East to deliver supplies to the sites located there.

Comments For Cover Page

By ssnutritioncluster.coordinator@gmail.com On 9/12/2016 5:21:58 PM (Under 2nd TR Review)

OK

By kokole@holdthechild.org On 9/11/2016 8:54:47 AM (TR 1 Draft)

1. The project summary has been readjusted in line with the gap SSHF will fill for MAM service provision.

2. Indirect beneficiaries and catchment population areas filled

3. Further explanation of the Gaps in WFP funding explained and how SSHF funding will help fill the gap in project summary

4. Number of children expected to be screened, enrolled and referred accordingly for TFP, OTP and SC clarified in project summary 5. The caseload were calculated based on target caseloads for MAM and PLWs projections for 2016 by the Nutrition Cluster. Hold

the Child will reach 65% of the set target.

By brahman@unicef.org On 9/6/2016 10:10:19 AM (Under 1st TR review)

Fill the Indirect Beneficiaries and Catchment population section

By ssnutritioncluster.coordinator@gmail.com On 9/1/2016 5:10:30 AM (Under SR)

1) HCO should clearly explain the linkage between what is funded by WFP and what gap this project is filling.

2) Please clarify the number of children that are expected to be screened and those estimated to be enrolled in TFP (OTP aand SC) and TSFP accordingly.

3) Explain how the caseload was calculated as it does not align with the cluster estimates.

Comments For Background

By ssnutritioncluster.coordinator@gmail.com On 9/12/2016 5:22:31 PM (Under 2nd TR Review)

OK

By kokole@holdthechild.org On 9/11/2016 8:27:20 AM (TR 1 Draft)

Adjustments were made in; needs assessment, description of beneficiaries and grant request justification sections. This was to suite the need to fill the gap in the WFP funding for the MAM services in the project areas.

Comments For Logical Framework

By ssnutritioncluster.coordinator@gmail.com On 9/12/2016 5:22:53 PM (Under 2nd TR Review)

OK

By kokole@holdthechild.org On 9/11/2016 9:38:23 AM (TR 1 Draft)

1. The IYCF activities have been aligned with the MAM services through Health Education.

2. Outcomes 2, 3 and 4 have been adjusted. 3 outcomes have now been planned for.

3. For custom indicator 2.1.1, it was difficult to enter the gender. It is now reflected in the activity by gender.

4. Hold the Child only provides MAM services in the project area. CCM (Commitato Collaborazion Medica) is the partner running

OTP and SC alongside the Ministry of Health (CHDs). There are also other partners including Indeed and Truth, Don Bosco that also run SCs and OTPs in the Health facilities they support.

5. All revisions have been made as recommended by SRC.

By ssnutritioncluster.coordinator@gmail.com On 9/9/2016 1:54:01 PM (Under 1st TR review)

Please revised the project as initially recommended by SRC below., otherwise the project will be blocked from further stages.

The IYCF activities should be revised and reflected in the context of MAM management for which these funds are meant for.

Be cear ! there is no training that is organized on CMAM principles and procedures (outcome 2) please see the initial comments below

By brahman@unicef.org On 9/6/2016 10:12:01 AM (Under 1st TR review)

1. Segregate the custom indicator 2.1.1 by gender

2. Management of SAM component are missing are you only implementing the MAM component and IYCF? So who is implementing the SAM component like OTP in your project area?.

By ssnutritioncluster.coordinator@gmail.com On 9/1/2016 4:59:11 AM (Under SR)

1) Why 4 outcome 2,3 and 4 overlapping, need to revise.

2) The IYCF activities should be revised and reflected in the context of MAM management for which these funds are meant for.

Comments For Other Info

By ssnutritioncluster.coordinator@gmail.com On 9/12/2016 5:23:45 PM (Under 2nd TR Review)

OK

By ssnutritioncluster.coordinator@gmail.com On 9/9/2016 2:11:46 PM (Under 1st TR review)

AAP section need further improvement: Refer to the nutrition cluster operational framework on AAP. There are key indicators suggested to be used to capture AAP. for example, % of beneficiaries who are aware of their entitlements in the project area and number of complaints submitted, resolved and feedback provided to the communities. Please include at least these indicators in the description of the AAP section.

By brahman@unicef.org On 9/6/2016 10:07:02 AM (Under 1st TR review)

- 1. Select Environmental Marker Code
- 2. Fill the Protection mainstreaming section

Comments For Budget

By ssnutritioncluster.coordinator@gmail.com On 9/12/2016 5:24:09 PM (Under 2nd TR Review)

OK

By kokole@holdthechild.org On 9/11/2016 11:04:52 AM (TR 1 Draft)

1. Most of the funds are to support the improvement of services for MAM by increasing staffing, quality of service and improving service provision conditions which were not underscored by WFP funding to that level.

2. WFP funds some of the items in the budget but this funding will supplement and introduce new items to the services for MAM in the catchment area.

3. The increased allocation will provide for additional services for improved quality of services

4. Budget has been revised to the ceiling. The additional 0.03\$ was difficult to adjust off. It does not affect a round of to 0 decimal place of the total budget.

5. An additional CMAM supervisor has been added such that there is 1 CMAM supervisor in Each county with an additional 1 Nutrition Nurse to support.

6. The refresher training has been moved from "General operating costs" to "Supplies and commodities"

7. Incentives have been removed following recommendation and readjustment of project activities to exclude IYCF

8. The budget for shelter materials has been significantly reduced to \$7,130 from \$18,000 as recommended

9. Supplies handling budget has been removed as per recommendation. WFP support will be maximized for this line.

By nkidiaka@un.org On 9/10/2016 12:25:02 PM (Under TR 1 HFU)

General operating costs are too high:

- Kindly move the refresher training from "General operating costs" and put them under "Supplies and commodities".

Kindly remove the incentives form the SSHF budget. As far as I know this was not agreed to be funded through SSHF funding.
 It is surprising to see \$18,000 budget for shelter materials in a nutrition project. This too expensive, please either you reduce this line significantly or remove it.

- \$24,000 for supplies handling costs. Please remove this budget line which we do not understand at all. If this is referring to nutrition supplies, please reduce significantly the amount assigned for this and move it under "supplies and commodities"

By ssnutritioncluster.coordinator@gmail.com On 9/9/2016 2:05:37 PM (Under 1st TR review)

Please revise the budge to the ceiling provided below.

Respond to the SRC comments provided earlier (

There is only one CMAM supervisor for two counties? Cut some of the funds from supply handling to increase the MAM supervisors or nurses to improve quality and supervision.

By ssnutritioncluster.coordinator@gmail.com On 9/1/2016 5:07:55 AM (Under SR)

1) most of the funds should be allocated for programme cost and implementation key activities on MAM management.

2) explain clearly if the above activities are not funded by WFP.3) With an understanding that more resources will be allocated for programme activities, revise HCO budget to 227,947.42
