Annex B: IRF Results Framework – Search for Common Ground

Country name: Kyrgyzstan									
Project Effective Dates: October 1, 2016 - March 30, 2018									
PBF Focus Area: Promote coexistence and peaceful conflict resolution									
<p>IRF Theory of Change: <i>If youth who are most vulnerable to involvement in violent conflicts strengthen leadership and critical thinking skills, are involved in promoting civic engagement by relating to positive role models in the media and have opportunities to engage with their elder counterparts in law enforcement and local government in political decision-making processes, then they are less likely to join religious and nationalist extremist groups AND can contribute to community resilience against violent conflict AND can develop constructive ways to address grievances, because they will have a sense of belongingness in their communities and be empowered and entrusted to build dialogue across divided lines.</i></p>
