Two-three sentences with a brief project description and succinct explanation of how the project is time sensitive, catalytic and risk-tolerant/ innovative: The project contributed to a peaceful environment for the conduct of presidential, parliamentary and local council elections in March 2018 through the encouragement of peaceful dialogue, peace advocacy, preventing violence and support to the judiciary. March 2018 elections is the first elections to be conducted by the national government and without a UN security mandate. Following the peaceful transition of power after a politically charged electoral process, the project continues its work in support of key government priorities to support social cohesion and national reconciliation. The project mobilized support from the United Kingdom and Canada governments, was innovative in implementing a wide range of diverse but interconnected activities to increase capacities for violence prevention and strengthen systems for prevention of future violence.

Summarize the in-country project consultation and endorsement process prior to submission to PBSO, including through any PBF Steering Committee where it exists:

The Vice President of Sierra Leone requested that UNDP in collaboration with national civil society stakeholders implement activities that will lead to nation-wide social cohesion through the Conflict Prevention and Mitigation Project funded by PBF. This is crucial for ensuring stability in view of the post-election violence that occurred across the country and the longer-term peacebuilding agenda. Ministry of Internal Affairs, which is the host institution for the project, has been consulted and endorsed this important agenda. This is an addition to the implementing partners request for extension of some components of the project that will cause project activities to run beyond the current end date.

Brief justification for amendment:				
The need to organize a run-off presidential election, which were not foreseen at project design stage, the increase in election related violence and reprisals in hotspot communities, and the fluid political environment in the aftermath of elections led to delays in efforts to conclude all interventions and conduct project closure activities. Furthermore, the new Government of Sierra Leone requested a stronger focus on project objectives that prioritize community healing and social cohesion. As such, an extension of the project by 6 months is requested. No additional costs are being sought.
