### 1. Background

Pandemic Influenza Contingency (PIC) was created at the beginning of 2007 within the UN Office for the Coordination of Humanitarian Affairs (OCHA) in Geneva. It is based in Geneva with 7 regional officers posted around the world. PIC focuses on greater readiness of the UN System, national governments and the humanitarian community for the next influenza pandemic or similar international catastrophe. In 2008, PIC's overall goal is to support implementation of the multi-sector elements of the Chairman's Proposed Road Map from the New Delhi Conference on Avian and Pandemic Influenza, 4-6 December 2007. PIC aims to sustain 7 regional platforms based in OCHA regional offices overseas. This project proposal is to finance a regional platform based in the OCHA regional office in Dakar. This would comprise of one international officer at L4 level and two national officer staff. The purpose of the regional platform is(a) to help UN country teams in West Africa to develop and maintain robust plans to protect their staff health and safety, so as to be able to continue essential programmes and support national government pandemic preparedness planning; (b) to advocate for, help and measure West African national government pandemic preparedness beyond the health sector; and(c) to stimulate and support humanitarian agency pandemic preparedness in the region through coordination, information management and advocacy. PIC and its 7 regional platforms were funded in 2007 through support from the Governments of Japan, Canada, USA and Denmark. The Government of Japan, PIC's largest supporter in 2007, has recently decided to focus its 2008 AHI funding on vaccine issues. As a result PIC is seeking funding for its West Africa activities from the CFIA. The total cost of PIC's proposed West Africa regional platform is \$392,000. We are proposing to source \$320,000 from the CFIA and the remainder from other donors.

# 2. Purpose of Proposed Programme/Project

| Intended outcomes   | Outcome indicators   | Some key intended outputs  |
|---|--|--|
| UN country teams in West Africa more ready to maintain essential operations and assist their national host governments  | PIC data show at least a 20% improvement in West Africa UNCT readiness year to year  | PIC-backed UN basic measurement of national pandemic readiness updated well for over 14 West African countries                                     |
| Greater awareness in West<br>Africa of the need to prepare<br>for a high mortality influenza<br>pandemic  | UN country teams use PIC tools and capacities to assist improvement of national readiness in 7 or more West African countries  | At least 7 UN country teams in West Africa assisted to support their national governments with pandemic preparation, including simulations         |
| Governments in West Africa improve their preparedness for a sudden pandemic   | PIC data show at least a 20% improvement in West African national readiness year to year   | Key presentations made at 2+<br>regional and subregional<br>organisations' high level<br>meetings advocating multi-sector<br>pandemic preparedness |
| Governments, UN and partners in West Africa prepared to support humanitarian response in a pandemic   | At least 75% of West African national governments answer yes to the question: 'Is pandemic planning integrated into existing national disaster management structures?' | Regional platform of the key actors in AHI organised and maintained, covering participants from over 14+ countries                                 |
| In the event of WHO Pandemic<br>Phase 4, 5 or 6 being declared<br>the UN performs well in<br>assisting governments to face<br>the situation in a broad multi-<br>sector fashion | Post-pandemic studies  | Best practices in pandemic readiness widely disseminated to key actors in easy-to-absorb forms in 14+ countries                                    |

|              |  | focal point 14+ count inclusion      | disaster risk mitigation<br>nts lobbied in at least<br>stries to advocate<br>of preparedness for a<br>andemic in disaster risk<br>work |
|--------------|--|--------------------------------------|--|

UN CAP Objective (one or more of the seven objectives) and Key Immediate Objectives: Objective 6: continuity under pandemic conditions

-Pandemic influenza preparedness plans built upon existing mechanisms for disaster preparedness, mitigation and response and - as much as possible - fully integrated into existing structures for disasters and crisis management

-Stakeholders engaged in the facilitation of coherent strategies for pandemic preparedness

and response, including in humanitarian settings, encouraging synergy

- -Assessment, tracking and monitoring of pandemic preparedness
- -Support to national pandemic preparedness planning

**Outputs and Key Activities:** 

**Outputs:** 

UNCAP 4.2.4 (IV) Regional Interagency Platform strengthened, organised and maintained to provide support to country-level pandemic contingency planning, covering participants from over 14+ countries

UNCAP 6.1.3 (I) PIC-backed UN basic measurement of national pandemic readiness beyond the health sector updated well for over 14 countries

UNCAP 6.1.1 (II) At least 7 UN country teams assisted to support their national governments with pandemic preparation, including simulations

UNCAP 6.1.2 (II) Key presentations made to 2+ regional and sub-regional organisations' high level meetings advocating multi-sector pandemic preparedness

UNCAP 6.1.1 (III) Best practices on pandemic readiness widely disseminated to key actors in easy-to-absorb forms in 14+ countries

UNCAP 6.1.1 (II) National disaster risk mitigation focal points lobbied in at least 14+ countries to advocate inclusion of preparedness for a sudden pandemic in disaster risk reduction work

Key activities:

AHI planning meeting for West Africa (4.2.4)

ECOWAS regional simulation (4.2.4)

Collaboration with Surge capacity and coordination on 9 priority countries for IASC CP updating (4.2.4)

Private sector engagement (6.1.2)

Piloting of Ghana for national capacity building initiative (6.1.1)

Continued support to UNCT testing and simulation exercises (6.1.1)

Dissemination of further practical guidance on non-health sector preparedness (6.1.1)

Develop further OCHA/ROWA Business Continuity Plan and SOPs (4.2.4)

Quarterly thematic regional platform meetings (4.2.4)

Individual meetings with regional partners (6.1.2)

1 annual AHI planning meeting with partners (4.2.4)

1 mid year review of 3Ws (4.2.4)

Identification of Africa wide issues and contacts for alignment and effectiveness (6.1.2)

Coordination, joint missions (6.1.2)

Support UNCTs in national preparedness efforts (6.1.1)

Identify and address cross border issues (4.2.4)

Coordination between the UN, Government and Civil Society Organisations (6.1.2)

UN organization that has lead responsibilities for the objective of the UN CAP Review Date: 13

February 2008
Secretariat Review Date: 5 February 2008

Management Committee Approval Date: 20 February 2008

Secretariat Review Date: 5 February 2008

Management Committee Approval Date: 20 February 2008
Total Approved Amount: \$320,000.00

## Appendix B

# Programme/project Justification

The Pandemic Influenza Contingency team in OCHA aims (a) to support UN country teams to protect staff health and safety, so as to be able to maintain key operations and to provide support to national governments during pandemic; (b) to support UN country teams to provide assistance to national governments with pandemic preparedness beyond the health sector; and (c) to support humanitarian actors to prepare to be able to deliver humanitarian assistance to vulnerable populations during pandemic. PIC's strategy comprises advocacy, measurement and help. PIC aims to maintain 7 regional platforms based in OCHA regional offices overseas. The West Africa regional platform was launched in the autumn of 2006. The position of PIC West Africa Regional Planning Officer is currently vacant. The West Africa regional platform comprises one international professional staff member and two national officers. They are the PIC/OCHA front line in terms of supporting UN country teams with pandemic preparedness beyond health in West Africa.

### Background

The West Africa regional platform has been running since the autumn of 2006 but the regional planning officer position is currently vacant. In 2007, the Japanese Government was the main donor to PIC globally, providing \$1 m. In 2008, the Japanese Government has decided to withdraw funding for PIC and other UN humanitarian agencies in order to focus its resources on the vaccine aspects of pandemic preparedness. For this reason PIC is seeking funding from the CFIA, to help to fill the hole left by the Japanese withdrawal, so as to be able to continue to afford to sustain its 7 regional platforms.

### Programme/project approach

In 2008, PIC's overall goal is to support implementation of the multi-sector elements of the Chairman's Proposed Road Map from the New Delhi Conference on Avian and Pandemic Influenza, 4-6 December 2007. PIC's strategy can be simply summarised as 'Measure, Advocate and Help'. Advocacy includes diplomatic, inter-governmental or coordination work as well as more mass advocacy. Assisting with readiness activities, like simulations, is essential to the credibility of the advocacy and measurement effort.

PIC/OCHA West Africa covers 20 countries, ECOWAS plus Mauritania, Cameroon, Sao Tome and Principe, Gabon and Equatorial Guinea. The population is 250 million. 50% of the population live in environments plagued by violent conflicts, protracted tensions or slow onset natural disasters. 55% of the population live on less than \$1 a day. 10% of the population have access to electricity.

PIC/OCHA West Africa has established a Pandemic Influenza regional platform. PIC/OCHA West Africa provides a website as a service to platform members. The IFRC have been elected as the rotating chair of the platform. Consistent and active partners include UNICEF, WFP, IFRC, WHO, USAID and CDC. The platform facilitates networking and disseminates who is doing what where information. Through information management, OCHA catalyses getting things done.

PIC/OCHA West Africa runs regional workshops to identify areas of support needed in coordination, preparedness and response planning; to facilitate information-sharing between UNCT AHI focal points, national AHI coordinators and the regional AHI platform; and to review overall response and capacities in order to update UN system AHI contingency plans.

Priorities for 2008 include planning meetings with partners, regional simulations, updating IASC contingency plans, engaging the private sector, piloting national capacity building in Ghana, supporting UNCT testing and simulation exercises, disseminating guidance on non-health sector preparedness, developing the OCHA regional office's business continuity plan and standard operating procedures, quarterly thematic regional platform meetings, joint missions with partners, supporting UNCTs in national preparedness efforts, addressing cross border issues, and facilitating coordination between UN, Government and civil society organizations.

### Management arrangements

PIC's West Africa regional platform is situated within OCHA's West Africa Regional Office in Dakar, Senegal. The West Africa Regional Planning Officer reports to the Head of OCHA's Regional Office and operates under the overall direction of the Director of PIC in Geneva.

PIC operates under the same reporting, auditing, monitoring and evaluation regime that applies to all OCHA projects, including the OCHA cost planning and work planning processes.

PIC operates a website which contains online measurement of UN country team pandemic preparedness planning and national government pandemic preparedness planning for all countries with a UN country team presence, using a system of simple indicators. This website enables us to review progress with pandemic preparedness on a country by country basis. Since the key goals of the West Africa regional platform are to achieve better preparedness by UNCTs and Governments, the website offers the best and simplest overview of whether these key goals are being achieved.

Some 4 major inter-agency workshops a year organised by PIC West Africa review contingency plans, identify gaps and formulate strategies for addressing gaps.

PIC West Africa will undertake a mid year review of who is doing what where information management tool.

PIC will monitor our outputs twice per year.

## Analysis of risks and assumptions

There is a risk of waning interest in governments, international organisations and UN country teams if the current avian influenza epizootic subsides, along with media coverage of the issue. We intend to confront this problem with our advocacy and diplomacy work. We will promote operational, simple and short contingency plans. We will deliver user-friendly guidance on why and how to prepare for the non-health impacts of pandemic. We will encourage the mainstreaming of pandemic preparedness into existing plans, processes and structures, to promote sustainability.

There is a risk that PIC West Africa would not be able to assist in a pandemic. Therefore we are taking steps to develop robust plans to ensure that we can continue to maintain key operations.

There is a risk that if PIC fails to secure sufficient donor funding, it will be unable to achieve all its intended outputs. We are seeking funding from the CFIA and developing a strategy to approach other potential key donors.
