|  | OPS Project Ranking   |  | OPS Gender Marker                                    |                  |                               |
| Project Summary  | <p>This project will contribute to reduce the impact of conflict and disasters on vulnerable boys, girls, women and men in South Sudan through timely and effective assessments, adequate responses and enhanced coordination among humanitarian actors with regards to NFI/ES needs. With this project Medair aims to maintain its mobile emergency response capacity to respond to emergency situations across the country with a mobile team and continue to act as NFI/ES State Focal Points for Upper Nile and Central Equatoria. It is envisaged that the project will be co-funded by ECHO.</p>  |  |  |                  |                               |
| Direct beneficiaries   |   | Men                                    | Women  | Boys             | Girls                         |
|  | Beneficiary Summary   | 12000                                  | 18000  | 15000            | 15000                         |
| <b>Total beneficiaries include the following:</b>  |   |  |  |                  |                               |
| Indirect Beneficiaries   |   |  | Catchment Population                                 |                  |                               |
| Link with the Allocation Strategy  | <p>This project contributes to all the three Cluster objectives in the 2015 SRP. Objective 1: The effective delivery of needs-base lifesaving non-food items and acute emergency shelter for conflict-affected people, with a focus on the most vulnerable will be met by the deployment of mobile emergency response teams at short notice to assess, verify and respond to identified needs across the country in cooperation with the Cluster and other stakeholders. This project will contribute to the effective coordination of NFI/ES needs by acting as state focal points in Upper Nile and Central Equatoria states with a coordination base in Juba as well as Malakal. Objective 2: The project will seek to provide locally appropriate and sustainable shelter solutions to conflict-affected people building upon the experiences gained in 2014 as well as pilot-testing new approaches. Objective 3: Building upon the experiences in 2014, the project has made financial provisions to organize its own air transport for a limited number of interventions and as a last resort option where an immediate response is required and in the case of the Logos Cluster having a backlog.</p>  |  |  |                  |                               |
| Sub-Grants to Implementing Partners  |   |  | Other funding Secured For the Same Project (to date) |                  |                               |
| Organization focal point contact details   | Name  | Title                                  |  | Phone            | Email                         |

| <b>BACKGROUND INFORMATION</b>  |   |  |  |                  |                               |
| <b>1. Humanitarian context analysis.</b> Humanitarian context: Describe the current humanitarian situation in the specific locations where this project will be implemented  | <p>South Sudan is expected to have a population of 12 million people in 2015, half of who are projected to be in need of humanitarian assistance due to the on-going conflict situation and sustained food insecurity. Since the onset of the conflict in December 2013, some 1.8 million people have been displaced from their homes including 1.3 million people who are hosted by host communities, over 100,000 people who have sought refuge in Protection of Civilians (PoC) sites inside UN bases and 400,000 people who have crossed into neighbouring countries (OCHA, October 2014). The current conflict was caused by a split within the ruling government party (SPLM) and the former vice president who has since then led the SPLM-in-opposition movement with a large portion of the army defecting to this new movement. The government and opposition forces have since been fighting over the territory of key strategic towns. The states most affected by the current conflict are Jonglei, Upper Nile and Unity where counties are either held by the government or opposition forces, a situation which needs to be taken into consideration when planning any humanitarian response. Projections for 2015 indicate a similar level of need than in 2014. Continued armed violence is expected to result in repeated displacements, with communities expected to move further into remote, harder to access areas, carrying few belongings. Protracted conflict is expected to result in further ethnic targeting and violence, resulting in high needs for non-food items and emergency shelter. Significant displacement is expected to occur in the three states of Jonglei, Unity and Upper Nile, as well as in bordering states and areas. Repeated displacements will likely result in a high need for acute emergency shelters, as well as more robust shelters during the rainy season and for IDPs in spontaneous settlements and concentrated sites.</p>   |  |  |                  |                               |
| <b>2. Needs assessment.</b> Explain the specific needs of the target group(s), explaining existing capacity and gaps. State how the needs assessment was conducted, list any baseline data and explain how the number of beneficiaries has been developed. Indicates references to assessments such as Multi-cluster/sector Initial Rapid Assessments (MIRA) | <p>The ES/NFI emergency response programme is informed by the review of secondary data published by OCHA and the ES/NFI cluster as well as intervention data by Medair emergency response teams. Medair teams carry out multi-sector assessments based on the IRNA (MIRA adapted for South Sudan) to determine responses required prior to the start of new interventions. Following the assessment, the identified needs are prioritised and recommendations made for response. Medair teams also support multi-agency IRNAs coordinated by OCHA to assess sector needs. With extremely low baseline indicators to begin with, displaced populations and host communities face competition when it comes to accessing shelter options and NFI. Across South Sudan, only 50% of households own a blanket (National Baseline Household Survey, 2009) and only 34% own a long-lasting treated mosquito net (South Sudan Household Health Survey, 2010). Particular attention will thus also have to be paid to the needs of host community members, where large groups of IDPs have settled, so as to prevent conflict between host and IDP populations, and in order that existing coping mechanisms, community support structures and social networks are not undermined. During assessments and interventions in 2014, several worrying trends were observed: - Multiple layers of displacement: e.g. during an assessment in Nov 2014 in Pulturuk, Nyirol county, the team found that people who had been displaced from several areas into Pigi county, now again had been displaced into Pulturuk. This type of repeated displacement makes populations extremely vulnerable and undermines the coping mechanism of being hosted with relatives or tribesmen in the area of origin. - Areas that have been centres of militarization, even by forces friendly to the local community, have been depleted of resources. A Medair NFI assessment team found an example of this in July, in Yuer, Uror county. The local population had left the area following heavy militarization and found their homesteads largely empty of NFIs upon return. - In addition to impassable roads during the rainy season, areas of insecurity and frontlines have cut off supply lines of many places. As much as this affects supply of many food items it also affects the availability of the most basic NFIs. This is particularly the case in areas under opposition control. - The lack of freedom of movement hinders usual seasonal patterns of movement of especially pastoralist communities. This undermines the coping mechanism of populations moving closer to rivers or water wells during the dry season, increasing their vulnerability. Also, IDPs may occupy the designated dry season go-to-area for local populations (example Pulturuk, Nov 2014). This will increase competition over land, food, cooking fuel and shelter materials. The constant movement of IDP groups requires quick responses. To prevent tensions, missing out of beneficiaries and to create support for targeted approaches were blanket distributions cannot be done (due to logistical constraints or overwhelming need), close collaboration with local authorities and leadership is needed. Targeted beneficiaries can be found staying in the open, having built makeshift shelters or borrowing shelter from friends, relatives or host community. GBV has been rampant during the last year, and venturing outside of protection sites for fetching firewood, accessing markets or doing business has proven to expose women and girls to high risks of GBV (Press release, UN Special Representative 13 Oct 2014). These groups either rely totally on service provision within the PoC sites or are exposed to high risks. In non PoC sites, care needs to be taken not to draw beneficiaries to locations with higher security or GBV risks, and not to make them pass through unsafe areas to reach distribution sites. Beneficiary numbers are based on projections for 2015 made by OCHA, the ES/NFI cluster and past experience of the team.</p> |  |  |                  |                               |
| <b>3. Description Of Beneficiaries</b>   | <p>Girls, boys, women and men who had been internally displaced as well as vulnerable host communities will benefit from the support services of this project. Medair carries out needs assessments before responding to emergencies to ensure that critical humanitarian needs are identified and most vulnerable population groups receive adequate assistance. Based on the assessment results, beneficiary selection criteria are drawn-up in cooperation with the Relief and Rehabilitation Commission (RRC) or the local leaders based on which beneficiaries are registered and verified. Special attention is given to most vulnerable groups like children, pregnant and lactating mothers, people with special needs and the elderly.</p>   |  |  |                  |                               |
| <b>4. Grant Request Justification.</b>   | Medair has been implementing a multi-sectoral emergency preparedness and response programme in South Sudan providing life-saving services to vulnerable   |  |  |                  |                               |

populations for many years, and as a result has built up a significant contextual understanding of the complex operating environment of South Sudan. Medair operates mobile emergency response teams that meet acute emergency NFI and emergency shelter needs in any of the 10 states of South Sudan. Medair responds with NFI and shelter items once needs have been assessed, verified and documented through reports, conducted by Medair, cluster partners or a combination of the two. Single sex focus groups with gender balanced teams are integrated into all assessments. This ensures an appropriate response adapted to context and gender, with the needs of the most vulnerable households (female headed households, pregnant and lactating mothers, unaccompanied girls and boys, the disabled or chronically ill, the elderly, and households with girls and boys under the age of 5) taken into account. Medair is currently acting as the NFI/ES State Focal Point for Upper Nile and Central Equatoria coordinating NFI/ES activities and ensuring that critical gaps throughout the state are identified and covered. Medair is also part of the Strategic Advisory Group for the Shelter and NFI Cluster. So far, in 2014 Medair has conducted NFI and emergency shelter distributions to vulnerable populations in 12 different locations where the local authorities or other NGO partners did not have capacity to respond due to a lack of funding or support structures. For the NFI distributions in 3 locations Medair was able to organise its own air transport to ensure an immediate response for displaced populations. In 2015 Medair aims to retain the capacity to deploy its emergency response team at short notice and respond to emergency situations across the country and continue to act as NFI/ES State Focal Points for Upper Nile and Central Equatoria. While continuing to maintain a presence in Malakal, and coordinating activities in areas accessible from there, due attention will also be given to less accessible parts of the state. Coordination for these locations will be carried out through a combination of efforts in the state capital - Malakal, Juba, and periodic visits to Operational Centres or response hubs in other parts of Upper Nile State. Medair's emergency response programme was co-funded by ECHO in 2014 and Medair is currently in the process of developing a new funding proposal to ECHO for 2015. This CHF allocation will enable Medair to main its emergency mobile response capacity for emergency shelter and the distribution of NFIs and to continue acting as state focal points for Upper Nile and Central Equatoria states.

**5. Complementarity.** Explain how the project will complement previous or ongoing projects/activities implemented by your organization.

The Medair Emergency Response team is multi-sectoral and consists of a WASH team, a health team, a nutrition team and an NFI team. The response is coordinated by project managers for each sector and a projects coordinator overseeing the operations of all teams. Where possible and when needed, teams will carry out joint assessments and interventions. This allows for effective and well-coordinated responses and efficient use of resources. Medair has considerable experience in (ES/NFI) emergency response in South Sudan and will build on this experience and use it to support other cluster partners. Medair aims to be a stable partner and to continue to support the cluster in the development and rollout of the cluster strategy. Furthermore the programme will continue to respond to similar emergencies as in 2014 and continue to coordinate responses in Upper Nile and Central Equatoria in its role as State Focal Point for both states.

#### LOGICAL FRAMEWORK

|                                  |  |
|----------------------------------|--|
| <b>Overall project objective</b> | To reduce the impact of conflict on vulnerable communities in South Sudan through the timely and effective assessment of NFI/ES needs, targeted and appropriate response options to address the identified needs, and the enhanced coordination among humanitarian actors. |
|----------------------------------|--|

#### Logical Framework details for NON FOOD ITEMS AND EMERGENCY SHELTER

| Cluster objectives   | Strategic Response Plan (SRP) objectives  | Percentage of activities |
|--|---|--------------------------|
| 2015 SSO 1: Coordinated delivery of needs-based lifesaving non-food items and emergency shelter assistance for conflict-affected people, with a focus on the most vulnerable | SO 1: Save lives and alleviate suffering by providing multi-sector assistance to people in need | 70                       |
| 2015 SSO 2: Provision of locally appropriate and sustainable emergency shelter solutions where possible for conflict-affected people   | SO 1: Save lives and alleviate suffering by providing multi-sector assistance to people in need | 20                       |
| 2015 SSO 3: Efficient procurement, transportation, pre-positioning and storage of shelter and NFI to ensure swift delivery to those in need                                  | SO 1: Save lives and alleviate suffering by providing multi-sector assistance to people in need | 10                       |

|  |   |   |                                |                                |
|--|---|---|--------------------------------|--------------------------------|
| <b>Outcome 1</b>                                 | Increased access to appropriate NFI/ES items for emergency affected people  |   |                                |                                |
| <b>Code</b>                                      | <b>Description</b>  |   |                                | <b>Assumptions &amp; Risks</b> |
| <b>Output 1.1</b>                                | Emergencies are assessed and verified for NFI/ES needs using robust and improved targeting methodology and assessment reports are circulated to relevant stakeholders |   |                                |                                |
| <b>Indicators</b>                                |   |   |                                |                                |
| <b>Code</b>                                      | <b>Cluster</b>  | <b>Indicator</b>  | <b>End Cycle Beneficiaries</b> | <b>End-Cycle Target</b>        |
| Indicator 1.1.1                                  | NON FOOD ITEMS AND EMERGENCY SHELTER  | [Frontline services] # of needs assessments conducted [total] | Men<br>Women<br>Boys<br>Girls  | 12                             |
| <b>Means of Verification:</b> Assessment reports |   |   |                                |                                |

|                   |  |  |  |  |
|-------------------|--|--|--|--|
| <b>Activities</b> |  |  |  |  |
| Activity 1.1.1    | Carry out NFI/ES needs assessments including verifications and registrations in line with Cluster quality standards, outlining the specific needs of children and women    |  |  |  |
| Activity 1.1.2    | Circulate assessment reports to relevant stakeholders  |  |  |  |
| <b>Output 1.2</b> | Emergency affected households most in need are provided with essential NFI items and/or emergency shelter and distribution reports are circulated to relevant stakeholders |  |  |  |

|   |                                      |   |                                |                         |
|---|--------------------------------------|---|--------------------------------|-------------------------|
| <b>Indicators</b>   |                                      |   |                                |                         |
| <b>Code</b>   | <b>Cluster</b>                       | <b>Indicator</b>  | <b>End Cycle Beneficiaries</b> | <b>End-Cycle Target</b> |
| Indicator 1.2.1   | NON FOOD ITEMS AND EMERGENCY SHELTER | [Frontline services] Total conflict or disaster affected people provided with NFI support     | 24300                          | 29700                   |
| Indicator 1.2.2   | NON FOOD ITEMS AND EMERGENCY SHELTER | [Frontline services] Total conflict or disaster affected people provided with shelter support | 2700                           | 3300                    |
| Indicator 1.2.3   | NON FOOD ITEMS AND EMERGENCY SHELTER | [Frontline services] # of Post-Distribution Monitoring exercises conducted [total]            |                                | 6000                    |
| <b>Means of Verification:</b> Intervention reports                |                                      |   |                                |                         |
| <b>Means of Verification:</b> Intervention reports                |                                      |   |                                |                         |

**M & R DETAILS**

|   |  |
|---|--|
| <b>Monitoring &amp; Reporting Plan:</b><br>Describe how you will monitor the implementation of each activity.<br>Describe the tools you plan to use (checklist, photo, questionnaires, interviews, suggestion box etc.) in order to collect data and how you will store data. Explain the frequency type and protocol of reporting (how often do you report about what to whom?). State if, when and how you plan to evaluate your project. | Medair teams will prepare a ToR for each assessment and distribution, outlining objectives and key activities to be undertaken by the teams, which are reviewed and approved by the NFI project manager and ERT project coordinator. This assures the quality of needs assessments, a critical review of assessment results based on specific vulnerability criteria as well as a transparent and targeted approach within a reasonable timeframe. Medair will also continue to consult other ES/NFI partners and the Cluster at the national level, before taking a decision to intervene in cases where the needs or scale of intervention required are unclear, as is the current practice. Additionally, Medair releases summary reports for each assessment and distribution conducted (multi-agency reports may be substituted if Medair worked with other partners) after the NFI project manager and ERT project coordinator have tracked the activities and ensured that objectives have been met. These reports are circulated to the NFI Cluster and relevant partners on the ground and in Juba, allowing transparency of achievements and greater accountability within the humanitarian community. Medair conducts post-distribution monitoring exercises (PDMs) to ensure adequate coverage, effectiveness and quality of items and appropriateness of items distributed. PDMs incorporate household surveys, focus group discussions and market surveys. Care will be taken in surveying to ensure gender balance and the evaluation of gender specific needs by holding separate female and male focus group discussions and conducting household questionnaires with female and male headed households. The results of PDMs will be critically reviewed by the NFI senior management team and the ERT project coordinator and fed back into future responses. The NFI project manager is responsible for on-going monitoring of activities and results and the ERT project coordinator is responsible for ensuring overall quality of interventions, through oversight of the project managers and field visits. The M&E officer supports the NFI project manager in putting adequate monitoring systems in place and trains NFI staff on how to conduct PDM exercises. Internally, Medair carries out monthly and quarterly organisational reviews of progress made by its teams against agreed indicators. Progress against indicators is also reported and monitored on a monthly basis by senior project staff and management. In its state focal point responsibility, Medair will continue to submit monthly NFI/ES stock level reports from Upper Nile and Central Equatoria to Juba and circulate the minutes of all state-level NFI Cluster meetings held (at least monthly). |
|---|--|

**OTHER INFORMATION**

|  |  |
|--|--|
| Accountability to Affected Populations   | Medair adheres to the standards of the Humanitarian Accountability Partnership-International (HAP-I) framework, and is certified under the ISO-9001 Quality System that defines beneficiaries as primary "clients". HAP principles of transparency, participation and complaints handling are used. Medair will be seeking to adhere to the Core Humanitarian Standards as they are finalized. The emergency response teams consult communities at all stages of interventions. Medair ensures adequate representation of all sections and community groups during such community meetings. Post distribution monitoring assessments are an integral part of the project design and are aimed at assessing the appropriateness, effectiveness and coverage of an intervention; which informs future interventions. Medair South Sudan staff members get an orientation on the Code of Conduct and have to sign it, together with a "Summary of Minimum Standards for the Protection of Women and Children Against Sexual Abuse and Exploitation". Both are part of the National and International Staff Guidelines. Medair has Fraud and Misconduct Notification Guidelines.   |
| Implementation Plan: Describe for each activity how you plan to implement it and who is carrying out what. | Medair will directly implement activities, relying on offices in Malakal and Juba to support mobile teams who will be field-based. Mobile teams consist of NFI officers, Senior NFI officers, one NFI manager and one NFI project manager. NFI teams in Upper Nile and Central Equatoria states, under the oversight of the NFI project manager, will maintain regular contact with key humanitarian actors in their respective states with the aim of monitoring emergencies and emerging needs. They are responsible for leading the assessment process as well as organising specific distributions based on the outcomes of verification and registration exercises carried out. Local NGOs may be engaged or casual labour hired to support in carrying out any of the activities. No components of the project are sub-granted. The NFI manager or Senior officers take responsibility in compiling assessment and distribution reports including the collection of required monitoring data. Post distribution monitoring exercises will be facilitated by Medair's M&E officer in close cooperation with the Medair NFI team, the ES/NFI Cluster and other agencies involved. The NFI project manager provides overall leadership and guidance to the NFI teams, assures quality of reporting and ensures that learning from monitoring and reporting feed back into the response. The NFI project manager also ensures coordination and cooperation with all stakeholders involved. All assessments and distributions will be undertaken in partnership with state, county and payam level RRC representatives, and relevant INGOs, National NGOs and CBOs. Medair will coordinate responses with IOM as cluster coordinator and primary provider of NFI items. As State Focal Point in Upper Nile and Central Equatoria, Medair will hold monthly or more frequent coordination meetings to ensure that needs are communicated and gaps are being addressed, and ensure compilation and timely |

dissemination of monthly stock reports. Medair will rely on IOM as a warehouse and transport partner in Central Equatoria State. Medair's team will also coordinate closely with other clusters, such as WASH and health, allowing for integrated emergency responses.

| Coordination with other Organizations in project area | Name of the organization       | Areas/activities of collaboration and rationale  |
|---|--------------------------------|--|
|   | 1. Any ES/NFI cluster partner  | On a case by case basis, multi-NGO teams will be formed to carry out joint assessments and joint responses, depending on staffing needs and availability. In addition, Medair fills the role of cluster state focal point in two states, Central Equatoria and Upper Nile. As such, Medair is involved in coordinating all activities in the sector in these states, aiming to prevent both overlap and gaps in the response |
|   | 2. Protection cluster partners | Protection partners may be invited to join on assessments or to carry out protection monitoring during distributions. This has proven to be helpful as during distributions, NFI staff can be too busy to also monitor the wider area around a distribution site.  |

|                                   |   |
|-----------------------------------|---|
| Environmental Marker Code         |   |
| Gender Marker Code                | 2a-The project is designed to contribute significantly to gender equality   |
| Justify Chosen Gender Marker Code | Gender considerations are reflected throughout project implementation through gender analysis in needs assessments (gender specific needs identified), gender sensitive activities (including women in distributions and seeking out female community leaders and key informants) and gender sensitive outcomes (prioritizing female headed HHs, pregnant and lactating mothers and families with large numbers of young children). Surveys and interviews in PDMs will be gender balanced. Additionally pregnant and lactating women and children under 5 are likely to suffer the most from exposure and vector-related health problems, and are thus the greatest beneficiaries of NFI and emergency shelter distributions.        |
| Protection Mainstreaming          | The emergency response teams hold community meetings before, during and after interventions, and when needed conduct mapping exercises with local partners and communities. Medair seeks to ensure adequate representation of women, youth and the elderly during such community meetings to ensure equal and impartial access to assistance and services and the targeting of vulnerable groups. Through this process, Medair teams identify key locations and meet community leaders and beneficiary groups, providing an opportunity for them to give input to assessments and interventions. During distributions Medair ensures that vulnerable groups are prioritized and that they have safe access to the distribution sites. |
