PBF PROJECT PROGRESS REPORT
COUNTRY: Guinea Bissau
TYPE OF REPORT: SEMI-ANNUAL, ANNUAL OR FINAL: semi-annual
YEAR OF REPORT: 2021

Project Title: No Ianda Djuntu- Drawing the pathway together: new leadership for meaningful participation, peace and stability in Guinea Bissau **Project Number from MPTF-O Gateway: IRF 125914**	

If funding is disbursed into a national or regional trust fund: ☐ Country Trust Fund ☐ Regional Trust Fund **Name of Recipient Fund:**	**Type and name of recipient organizations:** **NUNO** Interpeace **(Convening Agency)**

Date of first transfer: 12/02/2021
Project end date: 12/06/2021
Is the current project end date within 6 months? No

Check if the project falls under one or more PBF priority windows:
☐ Gender promotion initiative
☒ Youth promotion initiative
☐ Transition from UN or regional peacekeeping or special political missions
☐ Cross-border or regional project

Total PBF approved project budget (by recipient organization):
Recipient Organization   **Amount**

Interpeace $ 341000.00
             Total: $ 34100000.00

Approximate implementation rate as percentage of total project budget: 23% of project budget (64% of first tranche)
ATTACH PROJECT EXCEL BUDGET SHOWING CURRENT APPROXIMATE EXPENDITURE

Gender-responsive Budgeting:
Indicate dollar amount from the project document to be allocated to activities focussed on gender equality or women's empowerment: 102.300 USD (30% as by last revision from PBSO)
Amount expended to date on activities focussed on gender equality or women's empowerment: 23.082 USD.

Project Gender Marker: GM2
Project Risk Marker: Low
Project PBF focus area: 2.2 Democratic Governance

Report preparation:
Project report prepared by: Interpeace Programme Manager for Guinea Bissau
Project report approved by: PBF Secretariat in Bissau
Did PBF Secretariat review the report: Yes

PART 1: OVERALL PROJECT PROGRESS

Briefly outline the **status of the project** in terms of implementation cycle, including whether preliminary/preparatory activities have been completed (i.e. contracting of partners, staff recruitment, etc.) (1500 character limit):

Despite the project official starting date has been set on the 12th of February 2021, the implementation of the project started earlier in January 2021 with a kick-off meeting involving the whole project team to revise the project logic, activities and indicators and develop the M&E and Annual Workplan. In January, an MoU between Interpeace and Voz di Paz, its implementing partner in Guinea Bissau, including the financial arrangement between the two organizations has been drafted and the project team was consolidated. The team, which counts on a total of 10 members, is composed by 1 Programme Manager from Interpeace, 3 Researcher Assistants, 1 Audio-visual Manager and 1 Audio-visual Assistant from Voz di Paz fully dedicated to the project and 1 Driver, 1 Accountant, 1 Research Coordinator and 1 Administrator, always from Voz di Paz, who are partially employed by the project. In February 2021 was organized a meeting with the PBF Secretariat to revise the Annual Workplan and M&E Plan. New indicators were added in the M&E Plan and a mid-term evaluation was included in the plan, which has entailed a minor change to the budget with a reallocation of 855,80 USD from the final evaluation budget line to the monitoring one. As explain in the respective Note to the File submitted to the PBF Secretariat, the change is administrative in nature and will not impact the project's results. Implementation of activities in the regions started in March 2021 with dialogue sessions and the creation of youth platforms at the regional level.

Please indicate any significant project-related events anticipated in the next six months, i.e. national dialogues, youth congresses, film screenings, etc. (1000 character limit):

In line with the workplan defined, no public events are foreseen in the next 6 months. The project team will focus on the operationalization of a micro-grant mechanism to financially and technically support selected youth initiatives to advocate for a more meaningful youth participation in decision making processes. Planned activities for the next 6 months also include the monitoring of youth platforms created in this first months of implementation, the training on storytelling and communication techniques of some of their members and the broadcasting of radio programmes developed based on intergenerational dialogues carried out in the different regions.

FOR PROJECTS WITHIN SIX MONTHS OF COMPLETION: summarize **the main structural, institutional or societal level change the project has contributed to**. This is not anecdotal evidence or a list of individual outputs, but a description of progress made toward the main purpose of the project. (1500 character limit):

The project is not within six months of completion yet. Nevertheless, baseline information collected in the first months of the project shows that the project is aligned with the context and with beneficiaries needs, which contributes to achieve the main changes that the project aims to bring about.

As by the data of the project baseline, the majority of youth participating in the process consider to not have full access to institutions (66%) and think their participation in decision making is limited (46%) while, on the other side, 71% of institutional actors involved refer they do involve young people in decision making and 98% consider them as valid counterpart in decision making. The strong difference in the perception of different generations shed light on the importance of a relational approach to make decision making processes more inclusive to youth. By involving actors from different generations in dedicated dialogues, the project aims to improve the **relationship between elders and youth,** creating a mutual understanding which would be key entry point to concretely materialise and enhance youth participation. Even the results from the national dialogue process carried out in the first months of implementation highlighted this point: spaces for concertation and exchanges among different generations and the development of dedicated channels and policies to improve youth access to institutions have been mentioned as priorities in almost all the dialogue sessions.

Another key element is youth confidence, only half (55%) of youth leaders surveyed and involved in the project demonstrating confidence in his/her capacities to influence decision making processes at the local and national level. The project aims to increase youth **confidence and capacities** to act and influence decision making. The creation of protected spaces for youth networking and youth peer-to-peer capacity building in the first months of the project, gave to youth leaders the opportunity to increase their capacities and directly test them, defining their associative rules, developing key relationships with other civil society organizations, and mobilizing local institutional actors. The commitment of youth leaders to organize activities despite the lack of financial support in this first phase of the project, demonstrate their interest and need to increase their capacities and confidence.

In a few sentences, explain whether the project has had a positive **human impact**. May include anecdotal stories about the project's positive effect on the people's lives. Include direct quotes where possible or weblinks to strategic communications pieces. (2000 character limit):

The project aims to set the basis to rethink youth participation in decision making processes in the country. To do so, the project is contributing to create a common understanding about the need of increasing and enhancing youth participation in those processes by identifying obstacles and opportunities to their meaningful participation. Despite being in its first months of implementation, some elements already emerged from the project activities carried out. Cooperation between generations has been identified as one of the most relevant elements to create meaningful participation: if on one side project participants recognize that "*old generations must recognize that youth have capacities and they need to cede space to them. Is not only when they need youth force that old generations must remember of them*", on the other side participants to the dialogue sessions also highlighted that "*if youth do not listen to old generations how they can listen to youth?*". The project is also contributing to identify possible pathways for youth meaningful participation. Among them, youth capacity building is also considered key in this regard: "*It is fundamental for youth to build their capacity to participate and create a change in the paradigm making old people trust in their new competencies and innovative capacities*". In the coming months, the project will work to improve capacities and

self-confidence of youth leaders to allow them leading independent advocacy activities throughout the country to increase youth participation in decision making at the local level.

PART II: RESULT PROGRESS BY PROJECT OUTCOME

Describe overall progress under each Outcome made during the reporting period (for June reports: January-June; for November reports: January-November; for final reports: full project duration). Do not list individual activities. If the project is starting to make/has made a difference at the outcome level, provide specific evidence for the progress (quantitative and qualitative) and explain how it impacts the broader political and peacebuilding context.

- *"On track" refers to the timely completion of outputs as indicated in the workplan.*
- *"On track with peacebuilding results" refers to higher-level changes in the conflict or peace factors that the project is meant to contribute to. These effects are more likely in mature projects than in newer ones.*

If your project has more than four outcomes, contact PBSO for template modification.

Outcome 1:
Relationships between youth leaders and key government institutions/authorities at the national and local level are improved.

Rate the current status of the outcome progress: on track

Progress summary: *(3000 character limit)*
In the first 6 months of the project, 394 people from different generations have been involved in a national dialogue process to develop a common vision on challenges and opportunities of youth participation in decision making at the local level. The dialogue, carried out in 11 localities in all the regions of the country, gave the opportunity to connect youth leaders active at the regional level with representatives of key government institutions belonging to older generations (Output 1.1). 42% of participants were representatives of key institutions and 59% were youth under 35, which have been identified after a careful mapping of all the formal and informal youth-based organizations in the country. 55% of youth participating in the dialogues come from organizations/initiatives that are already working to enhance youth participation.

The dialogue launched the foundation to develop a common understanding on youth participation needs and obstacles existing at the local level. At the end of each dialogue session, a document with main priorities to enhance youth future engagement and inclusion in decision making bodies/instances at regional level (Output 1.2) has been validated by all participants, including members from institutions. Each one of the 11 documents elaborated at the regional level entails the priorities for effective youth participation tackling the obstacles and barriers identified during the dialogue process. More than 160 representatives from the Local Administration, traditional institutions, various branch of Security and Defence Forces (SDF) and Political Parties sections validated the priorities identified, showing a certain openness to the dialogue with younger generation.

Indicate any additional analysis on how Gender Equality and Women's Empowerment and/or Youth Inclusion and Responsiveness has been ensured under this Outcome:
(1000 character limit)

Despite the equal representation of women in all the dialogue sessions (48% of overall participants were women), only 1 of the recommendations in the 11 roadmaps developed included gender related issues. Consideration on young women participation and on the need of an equal representation of young men and women in decision making have been raised only in the session held in Bissau, where the debates on women participations is more advanced and legitimated. This shows the distance between the context in the regions and in Bissau. To better understand further aspects beyond this dynamic, this issue will be addressed in the midterm evaluation moment.

<u>Outcome 2:</u> Capacities and self-confidence of young men and women to influence public decision-making at the local, regional and national level are strengthened.

Rate the current status of the outcome progress: on track

Progress summary: *(3000 character limit)*
The project contributed to connect 212 youth leaders (64% younger than 30) at the regional level through the creation of 11 mentoring platforms (Output 2.1) in 11 localities following the conduction of the regional intergenerational dialogues. While meetings are still ongoing, platforms already met 19 times around the different regions, with an average participation of 10 members for each platform (50%), giving youth the opportunity to exchange about their own experiences in youth participation and strengthen their personal network. 42% of meetings carried out included peer to peer capacity building on topics as advocacy and sensitisation techniques, conflict management, youth participation, risk associated with social media use and human rights issues linked with youth (forced marriage and sex-transmitted illness). Participating youth leaders also defined the mentoring platform's structures and action plan including the design and implementation of sensitization activities at the community level. Among the actions identified at the end of the meetings, most platforms listed: the presentation of the platform to the local and traditional authorities, the organization of sensitization activities through local radios and the creation of capacity building opportunities for youth and youth associations at the community level. Most of these activities have been then carried out independently by each platform with the only remote supervision of Voz di Paz staff. No financial support has been giving to participants at this stage of the project, nor for the organization of platforms meetings, nor for the organization of the above-mentioned activities. If on one hand, this contributes to diminish the number of participants in the platforms' meetings, on the other, it shows the engagement and commitment of those youth who participated to pursue their ambitions of meaningfully participate in local governance and decision making.

In these first months the project team has also carried out a reflection on how to increase young leaders' access to technical and financial support (Output 2.2) and defined main steps and criteria for the operationalization of a micro-grant mechanism that will enable local initiatives promoting youth engagement in decision-making to be designed and implemented by the participant youth leaders.

Indicate any additional analysis on how Gender Equality and Women's Empowerment and/or Youth Inclusion and Responsiveness has been ensured under this Outcome: *(1000 character limit)*

With 51% of platforms members who are women, their participation within the platforms is equal to men's one. Participation of women seems stable also in the meetings carried out by

the different platforms at the regional level, with an average participation of 5 women (out of 10 average participants).

Outcome 3: **Local/regional and national support for new youth-owned leadership model is increased challenging the common narrative around young men and women leadership.**

Rate the current status of the outcome progress: on track

Progress summary: *(3000 character limit)*
Along with the dialogue sessions carried out in the first months of the project, the audio-visual team of Voz di Paz collected the interventions of participants which constitute the base for the production of 22 radio programmes which will be broadcasted nationwide starting from the month of July 2021 through national and community radios. 11 Small videos capturing the contents of each dialogue session are also being produced by the audio-visual team of Voz di Paz and will be disseminated through social media.

In line with the workplan, trainings on storytelling and communication techniques are expected to be held in the months of October and November to members of the platforms so to allow them to document the activities which will be granted in the framework of the micro-grant mechanism. Radio debates for dissemination of youth experiences along the project are going to be organized only from January 2022.

Indicate any additional analysis on how Gender Equality and Women's Empowerment and/or Youth Inclusion and Responsiveness has been ensured under this Outcome:
(1000 character limit)

In line with the workplan, the activities under this outcome will be implemented mainly in the II and III semesters of the project. No specific consideration on gender equality and women's empowerment are thus possible at the moment.

PART III: CROSS-CUTTING ISSUES

Monitoring: Please list monitoring activities undertaken in the reporting period (1000 character limit)	Do outcome indicators have baselines? yes
	Has the project launched perception surveys or other community-based data collection? yes
In collaboration with the global MEL Manager of Interpeace and the Specialist in Peacebuilding Monitoring, Evaluation and Reporting of the PBF Secretariat in Bissau, the project team revised the Results Framework of the project and elaborated the M&E plan accordingly, which included the additions of new indicators in the result matrix and a mid-term evaluation to assess the impact of the project.	The project team developed two questionnaires, one for youth and one for representatives of institutions, to define a baseline for the project. The questionnaires have been applied to all participants to the activities carried out and data collected will serve as a base to measure further progress towards outcome 1 and 2. The project team developed also a monitoring system based on a KoBo online questionnaire to ensure support to youth mentoring platforms in the regions collecting real-time information on their meetings and orienting them, when needed, in the development of their objectives. Data collected allow the

	project team to better understand the level of participation within the platforms, supporting their members meanwhile allowing their independence in the organization and development of their meeting.
Evaluation: Has an evaluation been conducted during the reporting period? no	Evaluation budget (response required): 16.205,20 USD If project will end in next six months, describe the evaluation preparations *(1500 character limit)*:
Catalytic effects (financial): Indicate name of funding agent and amount of additional non-PBF funding support that has been leveraged by the project.	Name of funder: Amount:
Other: Are there any other issues concerning project implementation that you want to share, including any capacity needs of the recipient organizations? *(1500 character limit)*	

PART IV: COVID-19

Please respond to these questions if the project underwent any monetary or non-monetary adjustments due to the COVID-19 pandemic.

1) Monetary adjustments: Please indicate the total amount in USD of adjustments due to COVID-19:

    $ 0,00

2) Non-monetary adjustments: Please indicate any adjustments to the project which did not have any financial implications:

    To comply with covid-19 prevention measures published in January 2020, the number of participants in the first dialogue sessions have been reduced to 25, impacting the overall number of participants in the national dialogue. After the first sessions and in compliance with the Governmental Decree, Voz di Paz contacted the High Commissariat for Covid-19 which allowed the implementation of the activities with a higher number of people (40 in each) but with further restrictions such as social distances and the obligation to wear mask. All the following sessions have been carried out as foreseen in the project document, always in compliance with the High Commissariat indications to ensure the security of participants.

3) Please select all categories which describe the adjustments made to the project (*and include details in general sections of this report*):

☐ Reinforce crisis management capacities and communications
☐ Ensure inclusive and equitable response and recovery
☐ Strengthen inter-community social cohesion and border management
☐ Counter hate speech and stigmatization and address trauma

☐ Support the SG's call for a global ceasefire
☒ Other (please describe): prevention

If relevant, please share a COVID-19 success story of this project (*i.e. how adjustments of this project made a difference and contributed to a positive response to the pandemic/prevented tensions or violence related to the pandemic etc.*)

PART V: INDICATOR BASED PERFORMANCE ASSESSMENT

*Using the **Project Results Framework as per the approved project document or any amendments** - provide an update on the achievement of **key indicators** at both the outcome and output level in the table below (if your project has more indicators than provided in the table, select the most relevant ones with most relevant progress to highlight). Where it has not been possible to collect data on indicators, state this and provide any explanation.* Provide gender and age disaggregated data. (300 characters max per entry)
