## 5. MONITORING AND EVALUATION (to be completed by organization)

(A) Describe how you will monitor, evaluate and report on your project activities and achievements, including the frequency of monitoring, methodology (site visits, observations, remote monitoring, external evaluation, etc.), and monitoring tools (reports, statistics, photographs, etc.). Also describe how findings will be used to adapt the project implementation strategy.

This Emergency project proposes provision of water for livestock through voucher system targeting to 1334 vulnerable pastoral households living in and around 18 target villages within Hudun and Las-Anod Districts for one month. 2206 HH in Sool region are considered in Humanitarian Emergency situation. They face absolutly extreme water shortage. The project will provide 1334 HHs with water for livestock through water voucher system for 30 days. The Target HHs are living in and around 18 pastoral villages in mainly Hudun and Las-Anod Districts of Sool Region. The project targets vulnerable households in each village and therefore on an average will select about 75 HHs in each target village. Vulnerablity will be measured against the size of the animals owned by individual HH, which should be 45 or less. Each pastoral HH will obtain 2,400 litres of water (12 barrels) for one month, which is distributed in 4 weeks (4 barrels for each week). The project will utilize water voucher system that will enable the beneficiaries to collect water from venders during the harsh Season (Feb. & March). With its office in Las-Anod, SOMTRAG will ensure implementation of the project activities by mobilizing local authorities at regional and district levels, community elders at village levels and beneficiaries inclueding women groups. SOMTRAG Office in Las-Anod will be used to coordinate the overall responsibility of the project during the implementation. The project will also utilize the services of the Head Office staffs including The Ex. Director, The Finance Manager

(B) Work Plan Must be in line with the log frame		Diagonal	Timeframe  Please select hypoths' for projects up to 6 months, and 'months' for projects up to 12 months.
