implement these activities	conducted by ACTED/SADO. The	e local communities will be involved in all stages of the project to enhance decision making,				
(maximum 1500 characters)		lity of service delivery and sustainability. Prior to implementation of activities, the project will				
	conduct strong community mobili	zation to inform targeted populations about the objectives of the intervention. Local Committees				
	comprised of village elders and o	ther opinion leaders will be created through open nomination and selection by communities.				
	Throughout the project, they will	undertake beneficiary selections, provide security during implementation and support program				

## 5. MONITORING AND EVALUATION (to be completed by organization)

(A) Describe how you will monitor, evaluate and report on your project activities and achievements, including the frequency of monitoring, methodology (site visits, observations, remote monitoring, external evaluation, etc.), and monitoring tools (reports, statistics, photographs, etc.). Also describe how findings will be used to adapt the project implementation strategy. (maximum 1500 characters) \*

ACTED will place a strong focus on monitoring and evaluating the proposed activities and indicators of results. This will lay under the direct responsibility of ACTED's Appraisal, Monitoring and Evaluation (AME) Manager based in Nairobi and two ACTED AME Officers based in Sakow town. The AME Officers, will conduct the evaluations. The AME Manager will be in charge of the data analysis in order to identify where adjustments, if deemed necessary, may be needed to remain in step with the achievement of expected results. The necessary adjustments will be communicated to the Local Committees and program staff. M&E will include baseline, mid-term and final surveys, as well as initial and final KAP assessments. AME tools and methods to be used will include interviews and case studies, focus groups, surveys, SWOT analysis, pair-wise ranking. In order to verify AME materials submitted to the Nairobi office, the ACTED AME Officer will conduct at least two assessment missions to the project implementation area. During these missions ACTED will also ensure effective integration and mainstreaming of gender into all programs and will provide technical oversight of trainings. ACTED Somalia monitors and evaluates income and expenditure through monthly accounting process using SAGA software; procedures of accounting verification; cost control; budget control and internal control. The capital office in Nairobi also oversees the work of and supports SADO financial/logistics department.

	Distribution of						
	agricultural inputs - ACTED/SADO will						
	distribute agricultural						
	inputs to 2960						
	vulnerable agro-						
	pastoral households and 1505 riverine						
	households to help re-						
	start livelihoods, and						
	improve access to food.						
	A detailed list of the						
	selected beneficiaries – including the content of						
	the seeds package –						
	will be drawn up, and						
	will be used during the						
	distributions. Beneficiaries must have						
	lost their crops to the						
	previous drought and						
	floods and must have						
	access to arable lands.						
	ACTED/SADO will give priority to female-						
	headed households.						
	Following selection, the						
	project team will brief						
	the beneficiaries on their obligations after						
	receiving the inputs –						
activity will be carried out	1.1* the inputs are meant for	X	Χ				
	Capacity building of 600						
	vulnerable farmers - Training on improved						
	farming practices will be						
	provided to the 400						
	target riverine						
	households and 200 target agro-pastoral						
	households with the aim						
	of ensuring enhanced						
	livelihood gains and						
	increased resistance to external shocks,						
	improving production						
	and sustainable access						
	to food at district level.						
	It will be based on a						
	training guide developed by						
	ACTED/SADO with						
	support of the French						
	Embassy. The manual						
	was developed during a 3-day workshop with						
	agricultural						
	extensionists from the						
	area and was trialed in						
	Sakow riverine areas in 2010. It also circulated						
	in the Agricultural						
	Working Group and the
