Total	\$579,728.00

Donors

As you can understand, one of the Goals of the MDG-F is to generate interest and attract funding from other donors. In order to be able to report on this goal in 2010, we would require you to advise us if there has been any complementary financing provided for each programme as per following example:

Please use the same format as in the previous section (budget summary) to report figures (example 50,000.11) for fifty thousand US dollars and eleven cents

Туре	Donor	Total	For 2010	For 2011	For 2012
Parallel		\$0.00	\$0.00	\$0.00	\$0.00
Cost Share		\$0.00	\$0.00	\$0.00	\$0.00
Counterpart		\$0.00	\$0.00	\$0.00	\$0.00

DEFINITIONS

- 1) PARALLEL FINANCING refers to financing activities related to or complementary to the programme but whose funds are NOT channeled through Un agencies. Example: JAICA decides to finance 10 additional seminars to disseminate the objectives of the programme in additional communities.
- 2) COST SHARING refers to financing that is channeled through one or more of the UN agencies executing a particular programme. Example: The Government of Italy gives UNESCO the equivalent of US \$ 200,000 to be spent on activities that expand the reach of planned activities and these funds are channeled through UNESCO.
- 3) COUNTERPART FUNDS refers to funds provided by one or several government agencies (in kind or in cash) to expand the reach of the programme. These funds may or may not be channeled through a UN agency. Example: The Ministry of Water donates land to build a pilot 'village water treatment plant' The value of the contribution in kind or the amount of local currency contributed (if in cash) must be recalculated in US \$ and the resulting amount(s) is what is reported in the table above.

Beneficiaries

Beneficiary type	Targetted	Reached	Category of beneficiary	Type of service or goods delivered
National Institutions	5	3	National Institutions	Promotion of Public Private Dialogue to contribute to improve business environment
Local institutions	0	48	Local Institutions	Promotion of Public Private Dialogue to contribute to improve business environment
Rural	350	334	Citizens/Men	Strengthening the capacity and competitiveness of the stakeholders involved in processing the different products
Rural	520	213	Citizens/Women	Strengthening the capacity and competitiveness of the stakeholders involved in processing the different products

Section II: JP Progress

1 Narrative on progress, obstacles and contingency Measures

Please provide a brief overall assessment (1000 words) of the extent to which the joint programme components are progressing in relation to expected outcomes and outputs, as well as any measures taken for the sustainability of the joint programme during the reporting period. Please, provide examples if relevant. Try to describe facts avoiding interpretations or personal opinions

Pleases describe three main achievements that the joint programme has had in this reporting period (max 100 words)

Progress in outcomes

Joint Programme Outcome 1: Legal and policy framework for supporting diversification of rural economy through tourism is developed and contributes to achievement of Millennium Development Goals

Outcome 1.1: National Rural Tourism Master Plan for Serbia developed and submitted to the Government.

The National Sustainable Rural Tourism Master Plan for Serbia was approved by the Government of Serbia. It comprises a Diagnostic, Strategy, Action Plan and Implementation Plan. All phases of the formulation and approval of the Master Plan were consultative with workshops organized at a national and regional level. Overall, more than 250 stakeholders attended those workshops including municipality representatives from all 19 municipalities, MOeRD, NTOS, UN partners agencies, local NGO's and media. The Master Plan is currently being submitted to Parliament for ratification. The National Rural Tourism Master Plan contains the framework for the development of child, youth and family tourism. Child and youth related tourism models were promoted and presented in 2 rounds of workshops.

Outcome 1.2: Rural Development Program Planning: Rural Development Program planning is mainstreamed in Serbia's National policies; National Program for Rural Development for IPARD Axes 2&3 developed and submitted to Government for adoption

The Study on Access to Services of Women and Children in Rural Areas has been completed and published. The study analyses the problems of access to education, social and health care, and it offers the recommendations for solving the problems. The Study contains recommendations for national institutions dealing in key services, such as health, social care and education, as well as on other issues crucial for life quality in rural areas. The Study also contains an IPARD measure (Axis 3, measure code 302, Diversification and development of rural economic activities – sector services). The Study will be published in August and promoted in target regions and on national level.

Outcome 1.3: Investment Mainstreaming: Sustainable tourism investments mainstreamed in Serbia's national policies.

Review of public support to rural tourism at the national level for the period 2008 – 2010 providing important data for activities related to promotion of investment in 2011. During the 2012 programme will continue research of all opportunities to enhance public support for the creation of partnerships in rural areas and the results of the research will become an essential part of the Guidance for Partnership Creation. Training was organized by National Corporation for Tourism Development (NCTD), as SIFT focal point within JP. Participants in training were representatives of Ministry of Economy and Regional Development, Ministry of Agriculture, Trade, Forestry and Water Management, municipalities involved in project (local economic development), local travel organizations and local SME representatives from tourism sector. Training was held as an interactive workshop and all participants showed a great interest for presentations of the speakers and had an active role in discussion during the training.

The First Serbian Tourism and Business Forum took place in Belgrade from November 24-26, 2011. The Forum was organized by the National Corporation for Tourism Development in Serbia and the Joint UN Programme "Sustainable Tourism for Rural Development," (UNEP and UNDP component). The aim of this three-day event, which gathered a large number of experts, consultants and managers from the UK, USA, Ukraine, Germany, Austria, Spain, Switzerland, Croatia, Russia and Italy, was to explore possibilities of investing in new markets and to emphasize how competitive are tourist destination in Serbia. The forum hosted over 170 participants.

Joint Programme Outcome 2: Local rural tourism and support industries are better linked and organized; and local stakeholders' capacity is improved to deliver services and products in line with national strategies

Outcome 2.1 Capacity developed for sustainable rural tourism in order to enhance rural tourism:

Over 300 rural tourism stakeholders were trained through workshops, practical trainings and coaching in programmes;

Awareness raising campaigns helped in adjusting to new regulations which will be introduced during Serbian accession to the EU. These trainings are particularly relevant for ensuring the implementation of food quality standards, which is a key aspect of the rural tourism offer in Serbia;

Partnerships between public, civil and private sectors in four regional stakeholder groups are continually fostered to build frameworks for LAGs, presumably the foundation for sustainable rural development. The programme prepared LEADER and Rural Tourism training jointly with the EU Delegation.

The capacity of local and national stakeholders for the development of child and youth educational tourism was improved through constant awareness-raising activities (inclusion in the policy framework document creation, presentations, various meetings and sessions), promotion of this tourism branch (Tourism Fair, regional and local presentations, etc.) and the Study Tour to Slovenia organised to learn about educational tourism from the best practices.

Partnerships between public, civil and private sectors in four regional stakeholder groups were fostered to build frameworks for LAGs, which will be the foundation for sustainable rural development. List of possible participants, programme of training and experts regarding upcoming trainings on LEADER approach was defined, and trainings were held in Kladovo and Divcibare during the first part of July. Also, cooperation with EU funded project "LEADER Initiatives in Serbia" was defined, related to above mentioned trainings. 20 people from 4 target regions were trained and got certificates

Study Tour to Slovenia (September 2011), and Italy (October 2012). The objective of the visits was to provide a general overview of the Slovenian and Italian experience in Local action groups (LAGs) and LEADER approach. The visit was a logical continuance of training that was held prior to it, with a final goal of establishing pilot local action groups in Serbia, in the near future. Selected candidates are believed to have a potential to lead this establishment, while representatives of National Institutions, which are expected to give an official support, had an opportunity to see the aspects necessary to provide in order to create a conditions for any further process in this matter in Serbia. Number of participants: 33;

Four trainings on the integration of a gender perspective into rural development and rural tourism were held from July 21st to July 26th within the joint UN programme "Sustainable Tourism for Rural Development".

Training cycle on energy efficiency and alternative energy sources started in December and will be continued in 2012. Regional environment studies are in final phase.

Outcome 2.2 Tourism governance structures enhanced in target regions through dedicated organizations, pilot projects and investment promotions.

Tourism governance organizations are well-defined in the Master plan since it evaluates the potentials in each existing structure and proposes new mechanism for support tourism to be established.

The Guidelines for Tourism Service Providers on the Development of Child and Youth Educational Tourism have been prepared. The document will be published together with the Tourism Organisation of Serbia and promoted in 2012;

The Guidelines for tourism service providers catering to children and pupils was drafted. The Guidelines defines key categories in child, youth and family tourism and represents the first document of this kind in Serbia. The document opened numerous questions and represents a good basis for constant scaling up;

The Grant Scheme 2011 is in its final phase. With the amount of almost 500.000 USD available and roughly 70 grantees (local tourist organisations, service providers, NGOs, municipal bodies, etc.) the Scheme is major national event in rural tourism development in 2011 and 2012. The effects will be measured by the end of the Programme and a substantial impact/improvement is expected result.

Progress in outputs

Governance and Coordination:

□ The PIU retreat was held in December 2011. During the retreat, the participating agencies reflected on previous period and lessons learnt, discussed the detailed plan of activities and defined priorities for 2012 as well as potential follow-up project potential.

□PIU meetings are held regularly and provide an effective mechanism to jointly plan and execute activities. □Meetings of the participating UN agencies (including participation via Skype for non-resident agencies) as well as the meetings of the three Joint Managers are held when needed. □JP contributes to the monthly NSC letter, which the RC sends to NSC members and participating agencies and national partners, to share information in regards to progress made.
Joint Programme Visibility: □ Programme Communication and Advocacy Strategy implemented, contributing to the overall effectiveness of the programme. □ The programme was promoted on several occasions such as Investment Forum, UN Week and through printed and electronic media. □ In addition to the media coverage of the visibility events, news pieces on these visibility events have been written and posted on UN Serbia websites. □ Previously developed visual identity tools (JP logo, letterhead, various presentations, publications) are actively used by the team, beneficiaries and partners. □ Majority of workshops were organized, mainly in rural tourism households, .as part of promotion of upcoming activities in 2011/12.
Joint Programme Management, Implementation & Operations: All agencies actively participated in the submission of the Master Plan. Relevant inputs were exchanged between teams working on the Master Plan and on IPARD measures including studies on the importance of rural tourism for small farming sector and analysis of local products of importance for rural tourism and included into the Master Plan. Fregional rural development centres organised capacity building through trainings and mentoring for strategic and action planning. Fregional environmental studies almost completed exploring opportunities and challenges and examining sustainability of tourism development in target regions. Study on access to services in rural areas, barriers to access and potential solutions is completed and published. Revision of local strategies in terms of inclusion of rural tourism initiatives and gender-responsive aspects finalised and work on introducing proposed recommendations almost completed.
□Joint Call for Proposals for Diversification of Rural Economy through Tourism issued and Grant Scheme 2011 in progress. □Eramework for the development and stimulation of child-related tourism is shaped through the documents (Master Plan and the guidelines for tourism service providers catering to children and pupils) that are disseminated. Monitoring and Evaluation:
Baseline analysis report has been delivered. The company for collecting the data needed for Monitoring and evaluation of whole JP is contracted. Key objective is to collect data for M&E and to provide data to national stakeholders for future planning and policies for rural development purposes. The key data need to be gathered: Estimate the income generated from rural tourism in 19 target municipalities during 2009 and 2010, Identify the number and quality of functional partnerships for rural tourism in 19 target municipalities until 2010 and analyze the effects that the public investment (national, local and international) had on diversification of economy towards rural tourism in 19 targer municipalities.
□SeCons presented a report on conducted surveys related to income generation from rural tourism in 19 target municipalities. A thorough survey on public investment in tourism, including state, regional and local level, is in its final phase.

□ The seventh PMC meeting was held on 21 October 2011 with the participation of all UN agencies and national partners.

Measures taken for the sustainability of the joint programme
National and Local Partner Ownership:
The representatives of the national partners have actively participated in organised workshops; collecting the data for policy documents; participated in all PMCs and additional

meetings have been organized to share and include national partners in decision-making and implementation processes.

Rural Development Network (RDN):

The Rural Development Network (RDN) has been implemented following actions: organisation of workshops and collect the data for policy documents. RDN also actively participated in the development of a stakeholder database for the target regions.

Local tourism organisations and other local institutions: Key local tourism organizations take active part in data gathering and in participation on most important educational events such as EIAT conference, Green Hotels Forum, International Rural Tourism Congress, International ENAT conference, International Belgrade Tourism fair, Danube floating conference, as well at national and local tourism events.

Are there difficulties in the implementation?

Coordination with Government

What are the causes of these difficulties?

Other. Please specify

Other: Global Financial Crisis was not expected, which had a negative impact on the tourism

Briefly describe the current difficulties the Joint Programme is facing

1.Coordination with Government is no longer a cause for difficulty in the project. Still, national implementing partners MoERD and NTOS strongly requested from Programme Implementation Unit to increase the visibility of the Programme and it is being done presently, in close cooperation with C&A Advisor and RCO.

2.Key Statistical data are insufficient for effective monitoring of programme implementation. The Official data from the Serbian Statistical Office are not disaggregated and need to be updated for 2009 and 2010. The real picture on the number of rural tourism service providers, the income generated from the tourism and the levels of partnerships is, therefore, collected and analysed.

The decline in living standards will negatively affect tourism in Serbia, this will be demonstrated in 2010 statistics:
According GFK extensive regional survey
□The 60 %of the population in Serbia had decline in living standards in Serbia.
□The 20 % of them had a drastic drop in standards.

Given that the Joint Programme was launched in the midst of the economic crisis and faces unforeseen challenges, additional effort and creativity is required to adapt its activities to the difficult economic circumstances.

Briefly describe the current external difficulties that delay implementation

Explain the actions that are or will be taken to eliminate or mitigate the difficulties

b) Actions regarding Coordination with Government and Joint Programme design challenges:

Timory and oxforeive discommitation of information to the key for a postave origing.
□Exchange of ideas at the early planning stage of the planned activities.
□Eactsheet updates (summary information products) circulated to the national partners on a regular basis by the JPM.
□Communication and exchange of programme information through governance mechanisms (via STRD PMC/NSC meetings and reports);
□linclusion in STRD activities, e.g. invitations to special events (grant signing ceremony, certificates for trainings).
□ln-person meetings on key topics as required – establishment and maintenance of professional relationships, fostered by the JPM; meeting reports to be shared with the
STRD team.
□JPM liaises with the Ministries to obtain the contact person and deputy contact person of each of the implementing partners and shares those details with the team and any
other relevant stakeholder.
□Monthly meeting with contact persons from the partner ministries (JPM and POs (with the Pos rotating each month).
□Establishment and maintenance of professional relationships between STRD "expert" staff with specific agencies.
□Communication and advocacy strategy provides a platform for all to implement the above-mentioned points.
□ #Joint programme already took some actions to overcome communication issues. Efforts have been made on revising of the master plan with national partners, and have
shown good results and positive reactions, so this practice will continue.

2. In order to measure the project results and to give recommendations for the further public investments, it is necessary to collect and analyze rural tourism related data in 19 target municipalities. This will enable the evidence based situation and results monitoring and provide up-to-date information to national stakeholders for planning and policy development purposes. Official data from the Serbian Statistical Office need to be disaggregated and updated for 2009 and 2010. The real picture on the number of rural tourism service providers, the income generated from the tourism and the levels of partnerships will be therefore collected and analysed. That is why the revision and inclusion of the new baseline data is needed.

Actions regarding the negative effects of the financial crisis: Potentials for rural tourism to increase revenue for the public and the private sector and other stakeholders are more highlighted in public discussions and events like International tourism fair in Belgrade and International Danube floating tourism conference, Investment Forum.

More than 250 representatives of the national partners, local self-governments, regional and local tourism organisations, NGOs, private rural households, rural tourism associations and LAGs had the opportunity to influence the Master Plan for rural tourism during public discussions regarding the Master Plan. Finally, relevant Government bodies had their say before the Adoption of the Plan.

2 Inter-Agency Coordination and Delivering as One

1 Timely and extensive dissemination of information is the key for a positive change:

Is the joint programme still in line with the UNDAF?

Yes true No false

If not, does the joint programme fit the national strategies?

Yes No

What types of coordination mechanisms

In order to ensure smooth communication between the PMC and NSC, the PMC for DPS is attended by the Spanish Embassy representative, UN Coordination Officer and SEIO/DACU Representative.

The PMC has rotational chair between the Ministry of Agriculture/FAO and Ministry of Economy and Regional Development /UNWTO. This mechanism proves to function very well.

The horizontal cooperation between STRD and other programmes is most appreciated by donors, particularly in the context of the contribution that STRD and other programmes make to the EU integration processes in the country.

The last PMC meeting that was held in Belgrade in October, resulting in endorsement of several strategic decision such as approval of no-cost extension, organizing of the international conference on sustainable rural tourism, planning of the follow-up phase/project, etc. Linkages between STRD and other EC funded programmes in the domain of agriculture and rural development have been established as well.

The National Steering Committee worked and communicated by e-mail during the reporting period (approving numerous documents/requests submitted to it). The national representative to the NSC changed in late 2010. Ms Milica Delevic, the Serbian EU Integration Office Director, is the new co-chair from Government side. The NSC meeting took place in June 2011. The NSC appreciated the progress and value brought in by the three MDG F JPs and in particular the contribution that the programmes bring to the EU integration processes. National ownership promoted through the JPs is seen to pave the way for the forthcoming decentralized implementation modality to be put in place on the way to the EU integration.

Regular meetings for the MDG F JPM and UN RC and RCO are held regular communication/cooperation maintained.

JPM takes part at UNCT meetings and other related activities.

STRD from Serbia was given visibility at the recent MDG F hosted workshop held in Morocco.

STRD was given also great visibility with modest resources invested during the Tourism Fair in Belgrade held in February and Business and Investment Forum in November 2011 as well as through Grant Scheme 2011. The quality of STRD work, presentation of activities was most appreciated by all partners, including Spanish Embassy.

Please provide the values for each category of the indicator table below

Indicators	Baseline	Current Value	Means of verification	Collection methods
Number of managerial practices (financial, procurement, etc) implemented jointly by the UN implementing agencies for MDF-F JPs	2			Online submissions
Number of joint analytical work (studies, diagnostic) undertaken jointly by UN implementing agencies for MDG-F JPs	Strategic rural tourism development document for Serbia		Published on the MoERD website	Surveys, interviews

Number of joint missions undertaken jointly by UN implementing agencies for MDG-F JPs

Regional Conferences :1; Workshops: 8: Regional events:4

Internal reports

Internal surbvevs

The key statistical data for rural tourism in Serbia are missing and the Programme is trying to find a solution to the problem. The problem is more severe because the selected 19 municipalities in Serbia cannot be representative of the whole Serbian population. However, the Programme will continue in gathering data jointly.

Coordination between the Agencies in the Programme in gathering data for different policy documents have so far been one of the key successes in the Programme implementation.

3 Development Effectiveness: Paris Declaration and Accra Agenda for Action

Are Government and other national implementation partners involved in the implementation of activities and the delivery of outputs?

Not Involved false
Slightly involved false
Fairly involved false
Fully involved true

In what kind of decisions and activities is the government involved?

Policy/decision making

Who leads and/or chair the PMC?

UNWTO, Ministry of Economy and Regional Development, FAO, alternating

Number of meetings with PMC chair

6

Is civil society involved in the implementation of activities and the delivery of outputs?

Not involved Slightly involved Fairly involved False Fully involved true

In what kind of decisions and activities is the civil society involved?

Management: service provision

Are the citizens involved in the implementation of activities and the delivery of outputs?

Not involved false
Slightly involved false
Fairly involved false
Fully involved true

In what kind of decisions and activities are the citizens involved?

Management: service provision

Where is the joint programme management unit seated?

National Government

Current situation

Key points in relation to ownership to be mentioned are the following:

National ownership
□All national implementing partners are members of the JP PMC.
□ The Government of Serbia – through the Ministry of Economy and Regional Development, the Ministry of Agriculture, Trade, Forestry and Water Management, and the
National Tourism Organization of Serbia - is included into all aspects of implementation of the JP.
□Rural Development Council established.
□The JP Manager regularly liaises with the national implementing partners.
Regional and local ownership
Rural Development Network as well as local Tourism Organizations actively participated in programme implementation through various activities

4 Communication and Advocacy

Has the JP articulated an advocacy & communication strategy that helps advance its policy objectives and development outcomes?

Yes true No false

Please provide a brief explanation of the objectives, key elements and target audience of this strategy

The JP has articulated a communications and advocacy strategy, outlining 4 most important objectives

- □ Guide JP Communications internally among partner agencies to support JP implementation.
- □ Provide guidance and quality assurance for JP external communication in order to ensure consistent and appropriate visibility for JP activities, and to support the creation and maintenance of positive and successful relationships with STRD stakeholders.
- Outline JP communication activities' framework to support the achievement of programme outputs and outcomes.
- □ Provide the basis for co-ordinate advocacy action among all JP partners and team members, utilizing advocacy opportunities and resources to help achieve the positive

change identified, contributing to advocacy around the achievement of JP goals and MDGs.

The JP Communication and Advocacy Strategy contains a matrix on stakeholder communication, which outlines the stakeholder groups, communication goals, and communication tools and processes to be used; detailed guidelines on visibility of the JP and C&A events and products; and the framework for the implementation of the C&A activities over the course of the JP as well as a template for quarterly C&A work plans. The Communication and Advocacy Analyst works closely with the PIU team and other partners (see Joint Programme Visibility under the 'Progress section above). Some aspects of enhanced communication include the following:

- 1. Clear and effective visual identity of the JP.
- 2. Targeted promotional activities at the local, national and international levels,
- 3. Media presence in the local and national media,
- 4. Partnership building with relevant organizations.

What concrete gains are the adovacy and communication efforts outlined in the JP and/or national strategy contributing towards achieving?

Increased awareness on MDG related issues amongst citizens and governments increased dialogue among citizens, civil society, local national government in edge.

Increased dialogue among citizens, civil society, local national government in erlation to development policy and practice

New/adopted policy and legislation that advance MDGs and related goals

Establishment and/or liasion with social networks to advance MDGs and related goals

Key moments/events of social mobilization that highlight issues

Media outreach and advocacy

What is the number and type of partnerships that have been established amongst different sectors of society to promote the achievement of the MDGs and related goals?

Faith-based organizations
Social networks/coalitions
Local citizen groups 20
Private sector 17
Academic institutions 1
Media groups and journalist

Other 19 Municipal authorities

What outreach activities do the programme implement to ensure that local citizens have adequate access to information on the programme and opportunities to actively participate?

Household surveys
Use of local communication mediums such radio, theatre groups, newspapers
Open forum meetings
Capacity building/trainings
Others

Most important region based events

Section III: Millenium Development Goals Millenium Development Goals

Target 1.B: Achieve full and productive employment and decent work for all, including women and young people JP Outcome

Beneficiaries

JP Indicator

Value

Legal and policy framework for supporting diversification of rural economy through tourism is developed and contributes to achievement of Millennium Development Goals.

0

MDG Indicators: By 2015, reduce the unemployment rate by at least 50%/

Total unemployment rate (15-64)

Youth unemployment rate (15-24 years)

By 2015, reduce the poverty rate of the entire population/ Rural areas poverty rate

JP Indicators:

- IPARD axis 2 and 3 measures prepared & submitted to MAFWM by end of JP.
- -Number and type of organizational stakeholders & partners involved in development of IPARD.
- -Representatives of rural women included in development IPARD.
- -Number of workshops, presentations & coordination meetings held during preparation and adoption of IPARD.
- -Serbia Rural Tourism Master Plan is submitted to the Government contributing to:
- 1. The creation of direct and indirect employment through the stimulation of the rural tourism sector.
- 2. Support and activation of the participation of women in rural areas in the tourism sector, thereby, creating employment and contributing to the

Target 7.A: Integrate the principles of sustainable development into country policies and programmes and reverse the loss of environmental resources

JP Outcome

Beneficiaries

JP Indicator

Value

Legal and policy framework for supporting diversification of rural economy through tourism is developed and contributes to achievement of Millennium Development Goals.

MDG Indicators:

Integrate principles of sustainable development into country policies, stop the loss of environmental resources and encourage their revitalization Percentage of investments in the protection of the environment in relation to the achieved GDP (%)

JP Indicators:

- -Sustainable development principles included in the rural tourism Master Plan to ensure that the development of rural tourism protects natural resources and prevents their deterioration.
- -The revitalising of natural assets which are not being used to benefit the rural communities are encouraged through the Master Plan.
- The principles of sustainability are key principles which underlie the development of any tourism activity related to rural tourism.
- -Where possible, the rural tourism Master Plan identifies ways in which energy can be used in an efficient way.
- -Number and type of organizational stakeholders & partners involved in development of the Master Plan.
- -Representatives of rural women included in the development of the Master Plan.

Target 8.A: Develop further an open, rule-based, predictable, non-discriminatory trading and financial system.

JP Outcome

Beneficiaries

JP Indicator

Value

Local rural tourism and support industries are 0 better linked and organized; and local stakeholders' capacity is improved for delivering services and products in line with national strategies

MDG Indicator: Dynamic and sustainable growth of gross domestic product /GDP Growth rate

- JP Indicators:
- -Number of LAGs established and trained.
- -Number of local development strategies that include rural tourism.
- -Number and type of different training courses provided over life of JP.
- -Number of TGOs established and trained based on needs assessment and with attention to gender and PPP.
- -Amount of public and private investment leveraged through JP pilot projects and investments.
- -Guidelines/standards for schools and tourism service providers catering for children submitted to the Ministry of Education for endorsement by the end of JP.
- -Number of pilot projects financed and functional over life of project.
- -Number of pilot projects supported through the JP which are accessible to persons with disabilities.
- -Number of pilot projects supported through the JP which specify rural women as beneficiary.

Additional Narrative Comments

Please provide any relevant information and contributions of the programme to de MDGs, whether at national or local level

Comments obtained from participating agencies on their contribution include the following:

At the national level

- •The Master Plan for Sustainable Rural Tourism Development targets the following achievement of the MDGs: to reduce poverty, achieve gender equality, foster sustainable development and a Global Partnership for Development.
- •The creation and implementation of the Master Plan for rural tourism should ensure that rural development contributes to the improvement of living conditions of the rural population, primarily of women and children and to create opportunities for job creation in rural communities.
- •Introducing two sets of measures of the Axis 2 and Axis 3 related to nature protected areas and sustainable environmental management connected to the farming sector and tourism and rural tourism development as a component of the rural economy diversification (on-farm and rural community based) into the Serbian IPARD plan.
- •Providing input to build capacities on the Governmental level to deal with decision making for rural development on the inter-ministerial level.
- •In order to support rural development, contributes to both outcomes that will be achieved only through cooperation between the partners on the national and on the local level and capacity building for local level to be able to channel and lobby for their interest with governing structures and cultivate community interests in rural development through local partnerships.
- •The creation of strategy guidelines for securing and leveraging public-private partnerships and provision of strategic investment training for target group of public decision-makers and private investors.
- •Partnerships for development and fight against poverty are the cornerstone of the Millennium Development Goals (MDGs). This commitment embedded in MDG 8 calls for partnerships between governments, civil society, private sector and other stakeholders to develop and implement strategies that would improve the quality of living for children, women and men in rural areas.
- •Contributing through capacity building for local stakeholders, which should provide services to local beneficiaries of rural development support programmes (national and IPARD).
- •Provide support through variety of trainings specified in programme document
- •Thought grant schemes to all local stakeholders ready to work in the partnership
- •Institutional and governance structure of rural tourism development.
- •Market-oriented products.
- •Sustainable quality of tourism services.

Please provide other comments you would like to communicate to the MDG-F Secretariat

Section IV: General Thematic Indicators

1 Promote and support national and local policies and programmes in favor of enterprise develop

1.1 Number of laws, policies or plans supported by the Joint Programme related to the advancement of enterprises (including agroindustry)

Policies

National Local

Laws

National Local

Strategies

National 1 Local 13

1.2 Please briefly provide some contextual information on the law, policy or plan and the country/municipality where it is going to be implemented

- -The development of the National Rural Tourism Master Plan will synchronize, clarify and unify all existing local plans and strategies.
- -The creation of the IPARD plan will enable the access to IPARD resources.
- -The Public Private Partnership Guidance will merge efforts of both Ministries in regards to creation of partnerships.
- -13 local, municipal and regional strategies will be revised with regards to tourism and gender.
- 1.3 Number of entrepreneurs and/or entities that the law, policy or strategy directly affects

b. Joint Programme M&E framework

This template is the same as the one you will find in the JP documents. We have added 3 columns to provide spaces for baselines of the indicators as well as targets. All the values for indicators in this template are cumulative. This means the past values obtained accumulate (add up over time) as the joint programme gets implemented. We are expecting you to include not only the indicators but the value of these indicators. If you do not provide them, please explain the reason and how you are going to obtain this information for the next reporting period.

Expected Results (Outcomes & outputs)	Indicators	Baseline	Overall JP Expected target	Achievement of Target to date	Means of verification	Collection methods (with indicative time frame & frequency)	Responsibilities	Risks & assumptions

c. Joint Programme Results Framework with financial information

This table refers to the cumulative financial progress of the joint programme implementation at the end of the semester. The financial figures from the inception of the programme to date accumulated (including all cumulative yearly disbursements). It is meant to be an update of your Results Framework included in your original programme document. You should provide a table for each output. Definitions on financial categories

- Total amount planned for the JP: Complete allocated budget for the entire duration of the JP.
- Estimated total amount committed: This category includes all amount committed and disbursed to date.
- Estimated total amount disbursed: this category includes only funds disbursed, that have been spent to date.
- Estimated % delivery rate: Funds disbursed over funds transferred to date.
- Estimated % delivery rate: Funds disbursed over funds transferred to date.

JP Outcome 1: Legal and policy framework for supporting diversification of rural economy through tourism is developed and contributes to the achievement of Millennium Development Goals.

Please highlight the rate of delivery for each joint programme's output:
