3. Description Of Beneficiaries	The project will focus on provision	gonoloo ana oalbii	0	, , onaing intolli						

beneficiaries for services through fixed and outreach services of the static health clinics and volunteer. Breakdown of the targets has been done based on data from EPI, NRVA and CSO ad detailed in project summary section.

#### 4. Grant Request Justification.

The project will be focusing on provision of basic health and emergency health services to the population of targeted villages have compromised access to health services being provided through the fixed health facilities functioning in the ares. The project will work during winter months where roads to villages targeted in this application get blocked due to heavy snow fall. this blockage in particular affect women and children who needs basic and emergency health services including RH services. This project will address emergency needs of an estimated population of 43,127 living in eight districts (Chagcharan, Saghar, Dowlatyar, Dolaina, Shahrak, Tulak, Passaband and Taiwara). Out of total 33,200 people living in three populated areas of three districts (Chagcharan, Saghar, Dowlatyar and Saghar) will be covered through three static health clinics and 9,927 people living in 20 villages in seven districts (Chagcharan, Saghar, Dolaina, Shahrak, Tulak, Passaband and Taiwara) will have access to first aid services through 20 trained volunteers. As discussed in project summary section, three static health facilities will be stationed in central villages in Ghara-Siagak of Murghab aea in Chaghcharan, Dara-e-Keshrao in Dowlat Yar district and in a central village for be decided) in a cluster of villages of Saghar district. 20 Volunteers will be trained from - 2 in CCN 1 in Plasang & 1 Khujaghar vilalge. - 3 in Dilaina (1 Khakyarak, 1 Zanoo, 1 Garmabak). - 3 in Shahrak (1 Tang-e-vulma, 1 Wushansultan, 1 Zangaw) - 3 in Tulak (1 Guldan, 1 Takhara, 1 Asquran) - 3 in Saghar (1 Guhar, 1 Disheer, 1 Robat) - 4 in Passaband (1 each in Safidbuz, Durodi, Kauri and Kafter Khana) - 2 in Taiwara (1 Yakhan sufta, Nawabad-e-Fararol) As volunteer working in district with no proposed static clinic cover less population, therefore small percentage is covered in districts where only volunteers are trained.

# **5. Complementarity**. Explain how the project will complement previous or ongoing projects/activities implemented by your organization.

The project will complement BPHS health services especially through improve access to health services in targeted villages of the province which have low access to the services during winters and BPHS cannot cope with this extra need. The project further support BPHS project in reaching its set targets on different indicators set for the BPHS including vaccination, ANC, PNC, OPD visits and detection of malnourished children among the general population of the province.

#### LOGICAL FRAMEWORK

Overall project objective

To improve access of the people living in targeted villages to basic primary health services and to decrease avoidable morbidity and mortality through improved information sharing and response.

#### Logical Framework details for HEALTH

Cluster objectives	Strategic Response Plan (SRP) objectives	Percentage of activities
Objective 1. People affected by conflict and insecurity have equitable access to effective, safe, and quality essential health services	Provide Emergency Healthcare and Prioritize Access to Critical Services	100

Outcome 1	People living in targeted villages have access to primary health services and to emergency/outbreak response services during winter months								
Code	Description	Assumptions & Risks							
Output 1.1	Three static health clinics are functioning providing basic PHC & emergency health care and 20 trained volunteer providing emergency services and information sharing on increase burden of diseases	Project approval ensured before actual blockage of roads, staff hiring possible during narrow planning phase for the project							

#### Indicators

Code	Cluster	Indicator	End Cycl	End- Cycle							
			Men	Women	Boys	Girls	Target				
Indicator 1.1.1	HEALTH	Population covered by emergency PHC and referral services					12938				
	Means of Verification:	OPD register, Midwife register, referral sheets, EPI registers, outbreak response reports, Delivery room register,									
Indicator 1.1.2	HEALTH	# of volunteers trained on DEWs and on first aid					20				
Means of Verification:		Training report									
Indicator 1.1.3	HEALTH	Percentage of children received penta 3 vaccine					25				
	Means of Verification:	EPI fixed and outreach registers									
Indicator 1.1.4	HEALTH	% of women delivered by SBAs inside the health clinic and community					9				
	Means of Verification:	Proportion of births attended by skilled attendants									
Indicator 1.1.5	HEALTH	Early warning established in 80% of newly covered conflict affected areas					23				
	Means of Verification:	DEWs reports									
Indicator 1.1.6	HEALTH	# of health shuras established and conducting monthly meeting throughout the project period					3				
	Means of Verification:	Health shura members list, monthly health shura meetings									
Indicator 1.1.7	HEALTH	# of visits undertaken by fixed EPI team					60				
	Means of Verification:	EPI monthly outreach reports									
Indicator 1.1.8	HEALTH	100% of health facilities are staffed with female technical staff					3				
	Means of Verification:	Staff contracts, payrolls, attendance register									
Indicator 1.1.9	HEALTH	# of pneumonia cases treated by the static clinics/month					80				
	Means of Verification:	OPD register, monthly reports, outbreaks response reports									
Indicator 1.1.10	HEALTH	# of pneumonia cases referred out by static clinics per month					15				
	Means of Verification:	Monthly static clinics HMIS reports, referral register, referral sheets									
Indicator 1.1.11	HEALTH	# of measles cased treated by static clinics					30				
	Means of Verification:	Monthly facility HMIS reports, outbreak response resports									
Indicator 1.1.12	HEALTH	# of measles cases referred out by each static clnic					5				
	Means of Verification:	HMIS reports, referral register, outbreak response reports									

### Activities

Activity 1.1.1

Hire staff (MD/Nurse, MW and Vaccinators for the proposed Static clinics

Activity 1.1.2	Orient staff on project planned objectives and activities
Activity 1.1.3	Orient technical staff on DEWs, sample collection and on outbreak response
Activity 1.1.4	Provide furniture, equipment, medicine and resupplies to the static health facilities.
Activity 1.1.5	All three centers provide OPD, ANC, PNC, Delivery and vaccination services
Activity 1.1.6	Train 20 (14 already working and 6 new volunteers) on DEWs and sharing information on outbreaks with ACTD office in Ghor/PHD team
Activity 1.1.7	Provide first aid kit to 6 newly trained volunteers and medicine and resupply kit to all 20 volunteers

Output 1.2

Outbreaks of diseases are timely responded through static clinics and BPHS facilities

Areas of outbreak are accessible for staff of the clinics during winter. Information received from areas not covered with telephone

# Indicators

Code	Cluster	Indicator	End Cycle	Beneficiaries	3		End- Cycle Target				
			Men	Women	Boys	Girls					
Indicator 1.2.1		% of outbreaks reported and responded by static clinics in catchment area of static clinics					90				
	Means of Verification:	DEWs report, Outbreak response reports									
Indicator HEALTH 1.2.2		% of outbreaks reported by 20 trained volunteer and responded by BPHS project staff (PO and HFs)					80				
	Means of Verification:	# of DEWs reports received, outbreak response reports by BPHS PO and HFs									
Indicator 1.2.3	HEALTH	100% of the alarms are investigated within 48 hours from notification					100				
	Means of Verification:	Investigation reports									
Indicator 1.2.4	HEALTH	100% of outbreaks reported by volunteers are coordinated and responded by BPHS HFs					100				
	Means of Verification:	DEWs reports, outbreak response reports	DEWs reports, outbreak response reports								

#### Activities

Activity 1.2.1	Establish Emergency response committee at project office and BPHS Health facilities for timely response to outbreaks in catchment ares.
Activity 1.2.2	Provide training and medical kits to emergency response committees
Activity 1.2.3	Provide resupply kit, reporting format and communication cost to 20 (14 already working and 6 new volunteers) for sharing information on health status of their communities and increase load of diseases with their respective HFs/ACTD PO or PHD office
Activity 1.2.4	Record all reports shared by volunteers on outbreaks and shared with project management for decision
Activity 1.2.5	Provide separate outbreak kits to three static clinics for use during response to outbreaks in their catchment area

# WORK PLAN

Project workplan for activities defined in the Logical framework

#### M & R DETAILS

#### Monitoring & Reporting Plan:

Describe how you will monitor the implementation of each activity. Describe the tools you plan to use (checklist, photo, questionnaires, interviews, suggestion box etc.) in order to colect data and how you will store data. Explain the frequency type and protocol of reporting (how often do you report about what to whom?). State if, when and how you plan to evaluate your project.

ACTD have well established project office in Chaghcharan (CCN) with trained and capable technical and support team. The project team will develop a monitoring and reporting plan during inception phase of the project. The technical team of the project especially cluster supervisors, EPI supervisors, CBHC team and project management team will conduct monitoring visits to the area of operation of the proposed project. Standard MoPH approved national monitoring checklist will be used for monitoring of the project. A comprehensive monitoring report will be developed and shared with the static health facilities staff after each monitoring visit. An action plan will be developed jointly with the health facility teams for improvement of the gaps identified by the monitoring teams. Necessary supplies and capacity building will be done by the project team in order to help the health facility team to cover the identified gaps in implementation of the project planed activities and deliver optimal quality of health services. HMIS monthly project activities reports will be submitted by the HFs to the project office in HMIS reporting formats. Reports will be collected by the supervisory teams visiting to the area or through telephone by the health teams to the project focal point at project office. Quarterly report and end of project report will be shared with OCHA based on agreed timelines in contract. ACTD will regularly share monthly progress report with health cluster and MoPH. DEWs reports will be regularly collected (on weekly basis) and more frequently in case of case identification/outbreak(s) and shared with DEWs officer in PHD office. Moreover the teams will ensure recording complete address and telephone number of patients or their attendants for sharing with OCHA for remote monitoring of the project activities.

#### OTHER INFORMATION

Accountability to Affected Populations

ACTD have established health facility shuras in all health facilities of the province. Each shura have members from most of the major villages of the catchment area of the health facility. ACTD will develop health facility shura for all three static health facilities planned in this application. Members of the shuras will be selected from the villages located in catchment area of each static HF based on their accessibility to attend the monthly meeting. Similarly separate shuras will be activated in areas of visiting of the health facilities out of the villages these static health facilities are stationed in. Members of these shuras will be oriented and informed on scope of work of the health teams. They will be asked to communicate information they received from their meetings with the community members. Health Shura members will be encouraged to share their personal feedback and from community members on the services that the HF is providing. Similarly

Implementation Plan: Describe for each activity how you plan to implement it and who is carrying out what.

ACTD will manage all planned activities proposed through this project through its project office based in Chaghcharan (CCN) in Ghor. The project management staff will hire and orient staff for the static health facilities, orient them on project implementation plan, specifically on DEWs and on outbreak response. 20 volunteers from 20 distantly located villages will be invited to act office in CCN for training. All activities will be closely coordinated with PHD team and with PHDC members. Provincial council members and especially members from the targeted areas under this project will be consulted for their inputs in timely launching of the planned activities and smooth running of the project planed activities. They will also be urged to help the static health clinics staff during implementation of the planned activities. ACTD using its experience of the province, linkage with medical staff who already worked with ACTD in other projects will try to timely staff proposed health clinics and timely mobilize health teams to targeted areas (before possibility of blockage of roads to the area). Supply of medicine and resupplies will be done from the buffer stock for the outbreaks which has been stored at ACTD stock at CCN which later on will be replaced from procurement of medicine from this grant. Similarly fuel for heating in winter (Wood) will be purchased from the local villages where available and supplied from CCN to areas where wood in not available for the whole winter season for heating of the health facility. The project activities has already been discussed in a committee composed of EPR and GCMU (MoPH) and WHO and the committee agreed on need of the intervention. Moreover ACTD had approached GCMU regarding planned intervention with agreement of the GCMU for the same and provision of written agreement. ACTD as implementing organization will need approved of MoPH for hiring of staff for the project and will try to mobilize staff already worked with organization for this project as soon as it can. ACTD will

Coordination with other Organizations in project area

Name of the organization	Areas/activities of collaboration and rationale
1. PHD team	Overall care taker of the health services in the province. Through coordination with PHD, ACTD will coordinate project planned activities with provincial shura members and with government departments for their support in project implementation
2. UNICEF and WHO focal points in the province	Involve them in supportive supervision and monitoring of the project activities
3. DEWs team (PHD)	Share DEWs information, involve them in training on DEWs and have their support in response to outbreaks
4. Health Cluster/WHO at Kabul	ACTD will share monthly project updates with WHO, ask for assistance in case of high level outbreaks, outbreaks in inaccessible areas of the province for arrangement of resources including air transport.

#### Environmental Marker Code

A+: Neutral Impact on environment with mitigation or enhancement

Gender Marker Code

2a-The project is designed to contribute significantly to gender equality

Justify Chosen Gender Marker Code

ACTD aims to use proposed project budget for improving access of men, women, girls and boys to the project planned activities. To obtain this aim ACTD will hire men and women technical staff for proposed three static clinics. ACTD team in Ghor has already started searching suitable staff especially midwives for proposed static clinics. ACTD will hire local staff for this proposed project. ACTD using its presence in the province, existing trusts with communities and staff, contacting staff worked with ACTD for other projects and considered suitable salary package for the staff (considering difficulties of the proposed places for operation and short contract period) will actively search for finding suitable qualified and experienced staff based on project proposed structure. Moreover ACTD field team has contacted its already working staff in BPHS, in CHNE and CME schools to contact staff they know and encourage them to contact ACTD project office for mentioned project. PID team of Ghor was also asked to contact staff they know and encourage them to contact ACTD project for employment in mentioned project. Fortunately in addition to the male staff, ACTD field team has also identified two MWs who are willing to work in proposed project for ACTD. They will be contacted soon after getting go ahead sign from OCHA to join ACTD and will be mobilized to the site after short orientation. To further ensure access of men, women, girls, boys and children to get benefited from the project activities, ACTD will start project activities in close coordination with the communities in the area. Trust building of the community elders and general community will be taken into consideration through involvement in project planning, frequent meetings, exposure visit of the community members to the established static clinics and respecting dignity of the beneficiaries. Health staff will take care of patients privacy especially during physical examination and delivery. Each static HF will establish a health committee from the community el

Protection Mainstreaming

The project will target overall population of the targeted area with special focus to people prone to diseases (women and children and elderly), the project will be designed to allow access of the people to the health facility (health facility will be established in central village, with convenient access from other villages) and planned outreach visits to surrounding villages. Health facility teams will provide response to outbreaks to provide timely support and decrease mortality and morbidity.

Safety and Security

Mostly security situation improved during winters in Ghor province. Moreover based on ACTD experience of working in province, the health service providers are allowed to work by the opponents groups. ACTD will ensure its impartiality during service provision in order to ensure staff safely and access of communities to the health services.

Access

The project is targeted to improve access of the population in danger of cut off during winter from the nearby health facilities. Proposed health clinics will be established in areas easily accessible to most of the people living in targeted villages which remain cur off during winters. 20 volunteers will work in their own villages in order to improve access of the people to first aid health services and the provincial health authorities have more information about any problem in those remote areas for timely planing response.

# BUDGET

1 Staff and Other Personnel Costs (please itemize costs of staff, consultants and other personnel to be recruited directly by the implementing partner for project implementation)

Code	Budget Line Description	D/S	Unit Quantity	Unit Cost	Duration	Percent Charged to CHF / ERF	Total Cost
