ONS UNIES

# RATIVE

### a) Rationa

The weak health system and socio-cultural practices coupled with frequent movements of people are accelerating the spread of the outbreak, including to densely populate urban cities such as Conakry, Guéckédou, Nzérékoré, Macenta, Lola, Forecariah, Siguiri, Dubréka, Coyah etc.

The government of Guinea has declared a health emergency in the country and has taken measures to intensify and scale up the response, in particular in the affected areas and along the borders with Sierra Leone and Liberia.

24 districts and the capital city of Conakry have been directly affected since the beginning of the epidemic, representing a total population of 8.9 million (83 percent of the total national population estimated at 10.6 million; the total reported cases as of November 4<sup>th</sup> amounted to 1,744 (1,494 confirmed; 204 probable and 46 suspected cases) included 451 cases for the month of October alone; the trend of the epidemic is putting more people at risk; The spread of EVD in Guinea has been fuelled by limited health infrastructure, poor hygiene practices, and the inability to control contacts, population movements, suspicion and growing resistance in some villages in Coya, Lola, Forecariah, macenta, Nzerekore.

There are currently only 03 treatment centers in the country; based on experience and lessons from previous large scale outbreaks (smallpox, SARS etc) the hospital and health facility centered approach will have to be complemented by some sort of community (ie local centers for those infected) and household (especially for contacts and suspected cases) quarantine approach is required;

In order to achieve that and be successful in the fight against Ebola, UNICEF will set up 41 Community Care Centers; funding from UNMEER will support 10 Community Care Centers:

### Sites recommended by the National Coordination Committee

| N° | Region | Prefecture | Site and Target<br>Population | Number<br>of CWC | Direct Beneficiaries            |
|----|--------|------------|-------------------------------|------------------|---------------------------------|
| 1  | Kindia | Kindia     | Friguiagbe                    |                  | Expected suspected cases: 70    |
|    |        |            | 37,000                        | 175              | Expected Contacts: 600          |
|    |        |            |                               |                  | Orphans/Separated Children: 120 |
|    |        |            |                               | 1                | Capacity: 08 Beds               |

<sup>&</sup>lt;sup>1</sup> If there is more than one RUNO in this project, additional signature boxes should be included so that there is one for every RUNO.

| 2  |           | Forecariah  | Kaback             |    | Expected suspected cases: 55    |
|----|-----------|-------------|--------------------|----|---------------------------------|
|    |           |             | 24,000             | 68 | Expected Contacts: 360          |
|    |           |             |                    |    | Orphans/Separated Children: 70  |
|    |           |             |                    |    | Capacity: 08 Beds               |
| 3  |           |             | Pamelap            |    | Expected suspected cases: 42    |
|    |           |             | 12,300             | 24 | Expected Contacts: 520          |
|    |           |             |                    |    | Orphans/Separated Children: 52  |
|    |           |             |                    |    | Capacity: 08 beds               |
| 4  | Faranah   | Kissidougou | Kissidougou centre |    | Expected suspected cases: 96    |
|    |           |             | 103,000            | 89 | Expected Contacts: 726          |
|    |           |             |                    |    | Orphans/Separated Children: 102 |
|    |           |             |                    |    | Capacity: 12 beds               |

|    |           |             | 24,000             | 20 | Expected Contacts:450           |
|    |           |             |                    |    | Orphans/Separated Children:36   |
|    |           |             |                    |    | Capacity: 08 beds               |
|    |           |             |                    |    |                                 |

# b) Coherence with existing projects: The proposed project is complementary to others strategic objectives:

1-Link with the mission critical action of social mobilization and community engagement: The CCC will be set up in the communities; Community Watch Community are the main actors within and outside the CCC;

The main objective is to improve <u>community participation</u>, <u>buy-in and ownership</u>, fight <u>stigmatization</u>, <u>care seeking</u> for persons with illness and <u>contact tracing</u> of exposed family members. The Village Watch Committee will serve as an interface between the community/village and external groups including the national coordination committee, NGOs and other stakeholders. The Village Watch Committees includes traditional and religious leaders, representatives of women and the youth, representatives of traditional brotherhoods (traditional hunters and healers) and other opinion leaders and groups of the village.

This project is complementary to the project submitted by UNICEF and UNDP to set up CWC and scale up social mobilization

2-The project is linked to the Mission Critical Action of Access to Basic Social Services. Past experience in disease outbreaks and treatment centers has underlined the importance of maintaining WASH services, especially those in high density population settings; in addition to delivering care services, gaining the trust of communities so that they undertake profound behavior changes is essential. Presently both need to be strengthened and linked Children who are already vulnerable are now more at risk due to exposure to the epidemic and loss of caregivers and family members. Stigma and lack of understanding of the cause of the disease and the role of health workers means that many children are isolated and forbidden from returning to their places of origin. These children are unable to access basic services, health care, education and protection, and are in need of psychosocial support and alternative care.

### c) Capacity of RUNO(s) and implementing partners:

UNICEF is mobilizing the necessary human, supply and financial resources to support the response at scale; UNICEF has a central office in Conakry and 03 zonal offices in the regions covering the entire country; more than 150 national and international staff will be deployed.

UNICEF will work with Guinea Red Cross and the Government to implement and run the Community Care Centers; the average staffing for each Community Care Center is estimated at 30 inclusive of doctors, nurses and hygienists

UNICEF response plan is estimated at 100,000,000 USD for the next 06 months; 33,000,000 million have been mobilized so far to cover the multisectoral ebola response plan.

CCC are part of Ebola case management chain and involved pre agreed partnerships with others UN agencies (WHO, WFP, UNFPA) and NGOs(MSF, ALIMA); a technical steering committees comprise of WHO, MSF, ALIMA, UNMEER, MoH will be put in place to supervise and ensure quality control.

In regard to share responsibilities, UNICEF will be in charge of setting the temporary infrastructures during the first 03 months and UNICEF will later support the government with permanent infrastructures; WASH infrastructures will be built by UNICEF

In regard to training, UNICEF in collaboration with WHO, MSF will deploy trainers from DRC to train in collaboration with the MoH, the necessary medical staff to run the CCC; at this time MSF is not available to provide the training

### d) Proposal management:

The CCC project is managed by a senior project leader based in Conakry; the CCC will be set up in the regions of Kindia, Mamou, Faranah, Kankan, Boke and Nzerokore; a project coordinator and a medical officer will be deployed to each of the region.

Quality assurance staff will be based on each of the CCC to ensure daily running. The CCC are two majors pillars.

1-The first Pillar is the strongest link with the social mobilization and community engagement; the CCC will be built within the community and strongly link to the Village Watch Committees (Comites de Veille Villageois)

2-The second Pillars is the clinical case management: the CCC are the first step of referral in the community; patient and contacts will be further screened and safely referred to the Ebola Treatment centers; clinical staffs are necessary not only to provide the screening but the initial and needed cares of patient during isolation, and secured transport/referral to Ebola treatment centers

## e) Risk management:

Table 5 – Risk management matrix

| Risks to the achievement of SO in targeted area        | Likelihood of occurrence (high, medium, low) | Severity of<br>risk impact<br>(high,<br>medium, low) | Mitigating Strategy (and<br>Person/Unit responsible)                                 |
|--|--|--|--|
| Increase Resistance                                    | Medium                                       | High   | Community Engagement through the Village Community Watch C4D Coordinator             |
| Another Disease<br>Outbreak (Cholera,<br>Measles, etc) | Medium                                       | High   | Ensure continuity of Immunization services' Prevention campaigns Child Survival Unit |

### f) Monitoring & Evaluation:

UNICEF will recruit two Humanitarian Performance Monitoring Specialists in charge of data collection, monitoring, evaluation and reporting on key indicators of the project:

- Percentage of safe referral with 48h
- Number of staff trained
- Infection Control: Number of health staff contaminated
- Supply chain
