OTHER INFORMATION

Coordination with other	Organization	Activity
Organizations in project area	1. APD	Capacity building of their staff on integration of IYCF into their existing IMAM activities
	2. UNICEF	Submit monthly IYCF and community outreach reports
	3. All organizations implementing Nutrition in Somalia	ServePA will coordinate with all nutrition partners by sharing finding of assessments and update partners on ongoing activities during monthly national cluster meetings
	4. Nutrition cluster	Coordinators
	5. UNICEF	Coordinator
	6. SAF	Capacity building of their staff on integration of IYCF into their existing IMAM activities
	7. WRRS	Capacity building of their staff on integration of IYCF into their existing IMAM activities
Gender theme support	Yes	
Outline how the project supports the gender theme	age from the planning to th months, the further advocat decision making in infant fe equality among the boys ar building activities and also 60% of project staff consist women do not spend so mu	rated gender in the various planned project interventions ensuring all the activities as planned are disaggregated by sex and e output stages. This project will aim at achieving optimal IYCF practices for both boys and girls between the age of 0=59 tes for men taking an active role in infant feeding and family decision in addition to increasing the influence of women on beding. The project considers vulnerability girls to sub-optimal feeding practices and seeks to adress this and ensure ad girls with regards to infant feeding practices. The project also ensures equal selection of participants for planned capacity advocates for training of more women since they are most involved in infant feeding. the project further seeks to ensure that of women and 40% male representation. The project considers the socially construed roles for each gender ensuring that uch time in the program at the expense of their other children who are not malnourished. There will be promotion of women gh mother to mother support and health promotion
Select (tick) activities that supports the gender theme		ct 60 IYCF counselling and promotion sessions for 2201 caregivers (1284 women of child bearing age, 817 men and 100 ill target PLWs with identified individual challenges, men and grandmothers identified as lead decision makers at household.
		v and train 50 community nutrition workers (CNWs) (25 women and 25 men) and 50 Traditional Birth attendants (TBAs) in the YCF practices, hygiene practices, active case finding and screening
