2. Needs assessment. Explain the specific needs of the target group(s), explaining existing capacity and gaps

Organization

Specific needs of the targeted population of Nyirol County have gained serious attention over the past two months due to the ongoing civil conflict and recent flooding in the area have caused multiple displacements. The flooding of 2014 left farmlands completely washed away, inundated homes and caused large scale animal fatality. The impact of the flood continues to have a devastating toll on food and livelihood security of the people, as large amount of animals perish daily from

State how the needs assessment was conducted, list any baseline data and explain how the number of beneficiaries has been developed. Indicates references to assessments such as Multi-cluster/sector Initial Rapid Assessments (MIRA)

the outbreak of various waterborne diseases and protracted water logging. The fighting also destroyed homes and forced most of the population to leave the payam headquarter and settle in surrounding bomas inland. Many have relocated to the river banks in order to have easy access to water and pasture for their animals. Livelihoods of the people are fast depleting: food stores at household level are empty, animals are dying, and people are surviving on wild leaves and fruits. Similarly, February 2015 Food Security update for the County/State provided by Food Security Cluster indicates a more worrisome food security outlook for the area. Markets are completely out of stock with about 3-4 traders in the market. Market prices are high and there is no major source of income for the vulnerable. Livestock disease is high and high number of livestock are dying due to disease.

The report further indicated that household food stock is completed depleted. The report suggested that it would be helpful if humanitarian assistance, mainly food, fishing kits and seeds, were distributed to reduce the walking distance of those in need. They further indicated that provision of such assistance would be very helpful especially to those who are expected to return during the rainy season for vegetable cultivation and fishing activities, who can be mainly women and children. Several protection reports since the movement of these people accounts for several harassment, including rape that they are faced with. For families that have remained, harassment is not common. This situation needs to be averted by providing services in the homes of these people so that they will not move outside their home where they are likely to be victimized. According to FEWSNET Livelihood zone description, Nyirol County falls within Nile basin for fish and Agropastoralism (Zone 8). The primary source of food for consumption for poorer households is from fishing, their own crop production, milk and the collection of wild foods. Fishing is more important than agriculture among this group. Due to the conflict, most households lost their fishing equipment. Therefore, its imperative and a need to support this activity if people's livelihood, are to be restored. Milk production is considerably affected due to disease outbreak, which could not be managed because of lack of access to livestock drugs and veterinary services. According to FSNMS round 15 report that due to displacement planting in the area have been reduced, which will impact overall cereal production and lead to faster stock depletion and food insecurity remained severer than normal in most of Jonglei, Upper Nile and Unity States. Conflict continued to uproot and displace households, preventing many from planting and forcing them to sell off assets.

3. Description Of Beneficiaries

The project will directly target the most vulnerable IDP and host Community members. Households with critical disability or vulnerability will be targeted through another household member in that family. The following criteria will used to identify the most vulnerable households: 1. Households with malnourished children, 2. Households with returnees, 3. Women headed households, 4. Household member with HIV affected victim, 5. Marginalized groups especially women, and 6. GBV household member that have family member with disability/chronically ill family members. Women, men, boys and girls that meet the criteria of vulnerable will be selected through a participatory process involving community leaders in order to ensure transparency and accountability to the target beneficiaries and the community. Selection of targeted beneficiaries will be done purely on life saving basis.

Specifically, JAMs uses the correct protocol entry points to involve community stakeholders from the beginning, such as local leaders, Elders and Chiefs, and local authorities where possible. One, gain equality from the payam of operation JAM would be serving with FAO inputs for the programmes success, and two, progress the project through a participatory approach, which from experience is key in the current environment, especially with regards conflict of interest and intertribal attacks and events happening currently. Therefore, the team will carry out these initial meetings to allow the stakeholders to understand the programme and determine identification and beneficiary selection based on JAMs category distribution targets and plan. Furthermore, through these meetings the most vulnerable communities including the displaced and severely food insecure were identified.

4. Grant Request Justification.

As robustly explained in the humanitarian context analysis and need analysis, there is urgent need for rapid intervention to save lives. JAM SS is proposing interventions that are very much critical to meet the current need through the provision of agricultural inputs, including vegetable seeds and fishing kits. Fishing is one of the major sources of income and food for Nile Basin fish and Agropastoralist (Zone 8). Supporting this intervention will not only increase access to food, but will provide a source of income for more vulnerable households. Supporting intervention in Vegetable production will contribute significantly in improving the household dietary intake of nutritious food thereby addressing malnutrition.

For the Unity Project, this quarter period, Greater Upper Nile regions volatile security situation and the constant changing of the environment has not been easy with the insecurity, conflict and the communities being displaced, included, JAMs beneficiaries running to the POC throughout the months. Therefore, it has not been possible to fully operate and distribute in those Guit Payams, also, not been able to operate out of Rubkona/Bentiu to fly in agricultural inputs from the pipeline due to the security clearance of Government NOT allowing anything to be taken from Rubkona airfield to IO areas, i.e. food, agricultural inputs, NFIs or anything. For the project JAM has a rapid response team on the ground, trying to find a window of opportunity, and it is optimistic with the current situation on the change for the next reporting period that progress can be made with that team in the targeted operation Payams (Nimni, Kadeat, Bill and Wathnyona), in a mobile existence modality, at first giving regular concrete information and updates about movement of the people and their livestock, their livelihood, and the security situation.

5. Complementarity. Explain how the project will complement previous or ongoing projects/activities implemented by your organization.

JAM implemented a Food Security and Livelihoods project in partnership with WFP in Lankien and Waat in the years before the current crisis. Nyirol county is known to JAM. JAM is implementing Food Security and Livelihood interventions in Bor South and Twic East counties in Jonglei (and Greater Pibor Administrative Area of Boma); Awerial, Yirol East, Yirol West and Rumbek North Counties of Lakes State; Twic County in Warrap; and Aweil South and Aweil Centre Counties in Northern Bahr El Ghazal. Equally important, JAM implements Nutrition programmes in Twic East, Duk, and Pibor in Jonglei. In the Nutrition programme JAM implements both preventative and treatment interventions, including linking up SAM cases with Stabalisation Centres run by sister agencies in Twic East and Pibor, Boma. Knowledge and experience gained from these and other locations and modalities will, once contextualised to Nyirol, prove valuable to successful implementation of this project.

LOGICAL FRAMEWORK

Overall project objective

To contribute to improved Household Food Security among Vulnerable Hosts, IDPs in IPC Emergency and Crisis Phases in Thol (Lankien) and Pading Payams of Nyirol County, Jonalei State.

Logical Framework details for FOOD SECURITY AND LIVELIHOODS

Cluster objectives	Strategic Response Plan (SRP) objectives	Percentage of activities
	SO 3: Improve self-reliance and coping capacities of people in need by protecting, restoring and promoting their livelihoods	100

Outcome 1	Livelihoods of the most vulnerable and displaced are protected and rehabilitated, by sustainably rest households in IPC phase 3 and 4 in Thol (Lankien) and Pading Payams of Nyirol County, Jonglei Sta	
Code	Description	Assumptions & Risks
Output 1.1	Emergency livelihood vegetable kit support provided to food insecure and displaced households – 6000HH project beneficiaries in Thol (Lankien) and Pading Payams of Nyirol County, Jonglei State.	Insecurity is a major risk, if aggression is escalated.

Indicators								
Code	Cluster	Indicator	End Cycle	End- Cycle				
			Men	Women	Boys	Girls	Target	
Indicator 1.1.1	FOOD SECURITY AND LIVELIHOODS	[Frontline services] [Livelihood] # of people provided with vegetable seeds	3000	12000			15000	
	Means of Verification:	Monthly reports						
Indicator 1.1.2	FOOD SECURITY AND LIVELIHOODS	[Frontline services] [Livelihood] # of agricultural tools distributed/kits					15000

Jonglei Nyirol		15000	15000	3000			Activity 1.1.1: Assessment - Community Stakeholders Meetings; Mobilisation and Sensitisation of the Community - Hold initial meetings in the villages, to present the FAO programme being implemented by JAM Field teams on the ground to the stakeholders. Activity 1.1.2: Identification, Verification and Registration of Beneficiaries From household assessment and registration interviews, vulnerable groups will be identified; from the stakeholder initial meetings, this will determine identification and beneficiary selection through JAMs allocated distribution plan. Activity 1.1.3: Collection of 6,000 Vegetable Kits from Pipeline and pre-positioning of the vegetable kits to various communities. Activity 1.1.4: Training in Vegetable Conservation Agricultural Best Management Production Practices and Use through Targeted Farmer Field Schools (FFS): Enhancing smallholder production and profitability – the objective will focus on assisting smallholder farming households to increase their yields and profitable production via targeted producer training on good agricultural practices, improved access and adoption of improved technology, producer group formation and governance. Activity 1.1.5: Distribution of the 6,000 Vegetable Kits.
