

The first half of the year has been marked by an increasingly difficult operational environment at a time when the Central African Republic (CAR) is witnessing a humanitarian crisis without precedent. The intensification of the conflict and the subsequent insecurity forced tens of thousands of people to flee their villages, limited the already precarious access to goods and services, and drastically restricted the survival capacities of affected people. This recent deterioration comes at a time when **3.1 million** people (51 per cent of the population) need assistance and protection, according to the 2022 Humanitarian Response Plan (HRP). Against this backdrop, the CAR Humanitarian Fund (CAR HF) plays a key role in supporting a flexible, efficient and coordinated humanitarian response.

During the first semester of 2022, thanks to donors' continuous generosity and trust, the CAR HF was able to allocate **US\$9.6 million** to **17 projects** of 13 organizations targeting **187,307** people with urgent needs in conflict areas. The CAR HF continued to prioritize frontline responders with **81 per cent** of funding allocated to non-governmental organizations (NGOs). The first CAR HF Standard Allocation was launched in February 2022 for a total of **US\$7.9 million**. Additionally, two Reserve Allocations of **US\$1M** and **US\$750,000** were made to fund gaps in Logistics and Health clusters.
