**Government**

In order to maintain a secure and efficient food system, it is crucial to ensure strong partnerships and collaboration between all agencies and stakeholders. This will enhance the overall management and coordination of the food system. The government, through its various departments and agencies, is working towards developing a comprehensive and efficient food system that is sustainable and resilient.

**Industry**

The food industry plays a vital role in ensuring the availability and quality of food products. By working closely with the government and other stakeholders, the industry can contribute to the overall success of the food system.

**Community**

The community plays a crucial role in promoting a healthy and sustainable food system. Through education and awareness campaigns, the community can help raise the importance of food security and nutrition.

**Individuals**

Individuals can make a significant impact by adopting healthy eating habits and supporting local food production. By being mindful of their food choices, individuals can help in achieving a more sustainable and secure food system.
insufficient, and 67% of households are severely food insecure.

The 2022 State of Food Security and Nutrition in the World report revealed undernourishment prevalence of 25.9% with an estimated 372 million people in Pakistan is undernourished. Further, around 22.6% of households are moderately or severely food insecure.

According to the report, 45% of people aged 65 and above in Pakistan are not receiving the recommended minimum acceptable diet. Among children, 6.5% of children under 5 years of age in Pakistan are not receiving the recommended dietary intake of vitamins and minerals. This is a significant gap in the nutritional status of the population, particularly in rural areas.

Pakistan has made significant progress in reducing child malnutrition. However, the current level of 27.7% still falls short of the World Health Organization's target of 15% by 2025. This indicates the need for continued efforts to improve nutrition outcomes.

**Joint Program Description**

- **GENO:** Make no significant contribution to gender equality/women empowerment.
- **GENM:** Make a significant contribution to gender equality/women empowerment.
- **GENZ:** Have gender equality/women empowerment as the primary or principal objective.

70. Reduced major drivers of malnutrition, improved quality of diets and increased accessibility. The quality of diets.
According to the Nutrition and Food Security System (NFSS), the government is responsible for the provision of food security and nutrition to the people. "A diet rich in nutritive balance and diversity, and with adequate and nutritionally balanced food intake, is essential to ensure the health and well-being of the population." (Medina, 2021)

The NFSS is a comprehensive framework that aims to ensure food security and nutrition for all. It is based on the principle that nutrition is a basic human right and that everyone has the right to have access to adequate, nutritious, and safe food. The NFSS is designed to address the complex interplay between food security and nutrition, and to ensure that the needs of the most vulnerable populations are met.

The NFSS is an integrated approach that combines policies, programs, and actions to promote food security and nutrition. It recognizes that food security and nutrition are not only about the availability of food, but also about the quality of food and the ability of people to access it. The NFSS is designed to ensure that people have access to a diverse range of food, and that the food they consume is nutritious and safe.

The NFSS is implemented through a system of monitoring and evaluation, which allows for the identification of areas where interventions are needed. The system is designed to be flexible and responsive, allowing for the adaptation of interventions as needed. The NFSS is also designed to be participatory, involving communities and other stakeholders in the decision-making process. This ensures that the interventions are tailored to the needs of the people.

The NFSS is supported by a range of policies and programs, including those related to agriculture, food production, and distribution. It also includes programs related to nutrition education, health care, and social protection. The NFSS is funded through a mix of domestic and international resources, and is monitored and evaluated regularly to ensure that it is achieving its goals.

The NFSS is a critical component of the country's strategy to ensure food security and nutrition. It is designed to be a long-term approach, and it is expected to have a lasting impact on the health and well-being of the population.
advantage of these PUNOs is their institutional capacity and extensive experience in food security and nutrition monitoring system, systems strengthening and facilitating experiences sharing from other countries and regions.

**Risk Management**

Risk Management involves identifying potential risks and implementing measures to mitigate them. For example, if a project is at risk due to financial issues, measures such as budget allocation, financial forecasting, and risk assessment will be implemented to ensure the project's success.

**Additional Information**

- Additional information is provided in the operational guidelines of the Joint SDG Fund. Fund managers must ensure that all SOG funds and programs are aligned with the Joint SDG Fund's overall objectives.
- The Fund's operations are guided by the Joint SDG Fund's Operational Guidelines.

**Resident Coordinator**

Departmental amounts were approved. I also confirm that the PNUO's initial cost does not exceed 32%.

The above includes the costs incurred. There is no need for any additional costs. The approved costs are as follows:

<table>
<thead>
<tr>
<th>UNRSP Budget Categories</th>
<th>Amount (USD)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Salaries and benefits</td>
<td>$524,528</td>
</tr>
<tr>
<td>2. Supplies and consumables</td>
<td>$12,114</td>
</tr>
<tr>
<td>3. Equipment (including transportation)</td>
<td>$2,000</td>
