Steering Committee and Government engagement

Does the project have an active steering committee? *

(●) yes

(○) no

If yes, please indicate how many times the Project Steering Committee has met over the last 6 months?

Twice

Please provide a brief description of any engagement that the project has had with the government over the last 6 months. Please indicate what level of government the project has been engaging with. *

None during past 6 months. This is a result of the eruption of fighting between the Sudan Armed Forces (SAF) and the Rapid Support Forces (SAF) in Sudan starting in April 2023, which negatively affected the ability to implement humanitarian activities, and involved large-scale looting and attacks against humanitarian and government premises. The heavy fighting in Khartoum, the Darfur States and Northern Kordofan led to the forced displacement millions of people to neighbouring states in Sudan and also to surrounding countries, the breakdown of government structures. The latter led to the unavailability and of government focal points of this project, making it challenging to engage with them on project progress or planned activities. Furthermore, with the serious security situation, project staff themselves either relocated or were evacuated, resulting in limited physical presence and the disruption of communication, which in turn affected their ability to successfully work remotely further negatively affecting engagement with local authorities.

At the time of the previous PBF progress report (November 2022), preparation for the data collection exercises had begun. Between November 2022 and April 2023, data collection as part of Outcome 1 of the project was completed by IOM displacement tracking matrix (DTM) team in Darfur, Sudan and UNHCR/INSEED in Chad. Data cleaning and analysis was then completed by both DTM and Social Inquiry during the months following.

The next planned step was the undertaking joint analysis workshops and community consultations (under Outcome 1) and community support projects (under Outcome 2). However, the conflict in Sudan which started mid-April 2023 has dramatically changed the context the implementing agencies have to navigate.

Due to the suspension of all but critical activities as per UN programme criticality guidelines, the evacuation of staff and the continued insecurity, the project's activities could no longer be carried out in Darfur or Khartoum. Furthermore, the changes in context in Sudan mean that the project's overall Theory of Change and results framework are no longer applicable. However, IOM and Social Inquiry teams are reviewing the data already collected to determine which insights are still valid and could be useful for humanitarian, development, and peacebuilding actors in future emergency responses and early recovery programmes.

Furthermore, IOM and UNHCR are proposing reprogramming the remaining activities under Outcome 2, which will be submitted in due course.

Summarize *the main structural, institutional or societal level change* the project has contributed to. This is not anecdotal evidence or a list of individual outputs, but a description of progress made toward the main purpose of the project where evidence of contribution to outcomes is available if requested *

FOR PROJECTS WITHIN SIX MONTHS OF COMPLETION ONLY (550 word limit)

The project team will submit a request for a No-Cost Extension for this project due to the inability to continue activities in conflict affected areas.

Despite the Sudanese conflict having a dramatic effect on Sudan's peacebuilding context, IOM and UNHCR will continue discussing durable solutions dividends of the project's activities to date. For example, data collected across the Darfur region can be analysed to understand community grievances prior to the conflict and assess mobility trends of the targeted population groups. As such, once the targeted regions stabilise, the findings under Outcome 1 can potentially provide useful information for future peacebuilding and conflict-resolution efforts. Additionally, UNHCR and IOM will determine which community interventions are realistic under Outcome 2, for a proposal for reprogramme the remaining activities, which will be submitted in due course to PBF.

PART II: RESULT PROGRESS BY PROJECT OUTCOME

Describe overall progress under each Outcome made during the reporting period (for June reports: January-June; for November reports: January-November; for final reports: full project duration).
Do not list individual activities. If the project is starting to make/has made a difference at the outcome level, provide specific evidence for the progress (quantitative and qualitative) and explain how it impacts the broader political and peacebuilding context.

- "On track" refers to the timely completion of outputs as indicated in the workplan.
- "On track with peacebuilding results" refers to higher-level changes in the conflict or peace factors that the project is meant to contribute to. These effects are more likely in mature projects than in newer ones.

Outcome 1 of the project was a comprehensive data and analysis process which was intended to inform planning and interventions in key target areas across West, Central, and North Darfur. All data collection activities related to this outcome commenced in the first week of November 2022 and were completed by March 2023, prior to the start of the conflict in April 2023. In Darfur, data was collected by IOM Sudan's Displacement Tracking Matrix (DTM) team in coordination with Social Inquiry, while in Chad the data collection exercise was managed by UNHCR and its partner National Institute of Statistics, Economic and Demographic Studies (INSEED). The data collected was then cleaned and analysed by Social Inquiry to produce actionable findings in preparation for Outcome 2's community interventions. The workshops were due to take place in April 2023 but with many of the worst conflict hotspots situated across the Darfur region, these workshops are no longer possible in the target areas. Stakeholders cannot be gathered to attend community consultation workshops and UN staff are not permitted to work in those areas.

Social Inquiry and IOM Sudan are currently reviewing the analysis against current conflict dynamics and intend to prepare a number of thematic briefs to be issued before the end of the year. These thematic briefs will provide information on the data collection's findings that may still prove useful to future peacebuilding and humanitarian activities despite the dramatic changes to the Darfur context. These include themes around peacebuilding needs, historical inter-communal tensions and grievances, and traditional nomadic and other movements, the situation prior to the conflict and the potential impact of the current conflict on them.

Indicate any additional analysis on how Gender Equality and Women's Empowerment and/or Youth Inclusion and Responsiveness has been ensured under this Outcome

Please limit your response to 3000 characters including spaces.

The sampling strategy for data collection included quotas for gender and age so data incorporates the views of both women and youth. The questionnaire included gender issues as potential responses to some questions (for example, with regards to incidence of violence and reasons for marginalization). Due to the quotas incorporated in the sampling strategy, the project team can identify insights that correlate to certain gender or age groups, which will be incorporated into the thematic briefs mentioned above.

Outcome 2: Peaceful return and (re)integration processes of Sudanese refugees and IDPs enhanced by increased awareness and access to information and improved basic services.

The conflict in Sudan commencing mid-April 2023 erupted prior to the implementation of planned stakeholder consultation workshops across West, Central, and North Darfur. These consultation workshops were intended to contextualise the data collected earlier during the reporting period and provide useful inputs for planned activities under outcome 2 including (1) the generation of materials relating to the project's objectives and (2) community support interventions.

However, this is no longer possible due to the insecurity in the region, the significant change in the region's conflict and peacebuilding dynamics in comparison to the pre-conflict context, mass forced displacement internally and to neighbouring Chad, and the conflict's impact on the participation of local stakeholders. Consultations between IOM and UNHCR are continuing to gauge how planned community support interventions can still be coordinated under the current circumstances, including potential reprogramming in other areas of Sudan.

Please limit your response to 350 words.

Displacement data was collected to inform Sudanese authorities and stakeholders with evidence (comprehensive data and analysis) on the profile of Sudanese refugees, IDPs, returnees, and non-displaced communities. Also, the data provides information on the material, legal, security, and social factors in target locations which are conducive for safe residence and for durable solutions. Thes include the development of relevant policies and interventions which support the peace process and enable the voluntary, safe, sustainable and peaceful return and (re)integration of displaced populations. With the start of the conflict mid-April 2023, non-critical activities have been suspended. Given that the conflict has altered the durable solutions context in Sudan, some of the data collected may no longer reflect the reality on the ground but may nevertheless be able to inform current emergency response considerations and future programme planning.

Has the project launched outcome level data collection initiatives? e.g. perception surveys *

Before the outbreak of the conflict, the analysis reports were intended to be relevant to national and local authorities and international actors to plan durable solutions and peacebuilding interventions and policies. Following the change in the durable solutions context due to the ongoing military conflict, widespread displacement across the Darfur states and the destruction of civilian infrastructure in state capitals across Darfur, the thematic briefs which will now be issued may inform future peacebuilding efforts, though due to the sensitivity of their content, may not be shared publicly or with national authorities.

Are there any other issues concerning project implementation that you want to share, including any capacity needs of the recipient organizations?

Please limit your response to 350 words.
