

PBF June 2024 Project Progress Report

PROJECT OVERVIEW

Thank you for taking the time to complete the PBF Progress report. For projects with more than one recipient, please consult among co-recipients prior to filling out the form to ensure collaboration on the responses. You can generate a print out of the blank form by clicking on the *print* icon on the top right corner of the page. If you have any questions or require technical assistance in filling out the form, please send an email to gabriel.velasteguimoya@un.org

Project Markers

Please select the Gender Marker Associated with this project *

- ☐ Score 1 for projects that contribute in some way to gender equality, but not significantly (less than 30% of the total budget for GEWE)
- ☐ Score 2 for projects that have gender equality as a significant objective and allocate between 30 and 79% of the total project budget to GEWE
- ☒ Score 3 for projects that have gender equality as a principal objective and allocate at least 80% of the total project budget to Gender Equality and Women's Empowerment (GEWE)

Please select the Risk Marker Associated with this project *

- ☐ Risk marker 0 = low risk to achieving outcomes
- ☒ Risk marker 1 = medium risk to achieving outcomes
- ☐ Risk marker 2 = high risk to achieving outcomes

Please select the PBF Focus Area associated with this project *

- ☐ (1.1) Security Sector Reform
- ☐ (1.2) Rule of Law
- ☐ (1.3) Demobilisation, Disarmament and Reintegration
- ☐ (1.4) Political Dialogue
- ☐ (2.1) National reconciliation
- ☐ (2.2) Democratic Governance
- ☒ (2.3) Conflict prevention/management
- ☐ (3.1) Employment
- ☐ (3.2) Equitable access to social services
- ☐ (4.1) Strengthening of essential national state capacity
- ☐ (4.2) Extension of state authority/Local Administration
- ☐ (4.3) Governance of peacebuilding resources (including PBF Secretariats)

Is the project part of one or more PBF priority windows? *

Select all that apply

- ☒ Gender promotion initiative
- ☐ Youth promotion initiative
- ☐ Transition from UN or regional peacekeeping or special political missions
- ☐ Cross-border or regional project
- ☐ None

Steering Committee and Government engagement

Does the project have an active steering committee/ project board? *

- ☒ Yes
- ☐ No

If yes, please indicate how many times the Project Steering Committee has met over the last 6 months?

Please limit your response to 3000 characters

The project has an active Project Steering Committee but due to changes in the composition of the Committee from the side of the Government, it was postponed since November 2023 and is planned to be held now on the 20th of June 2024.

Please provide a brief description of any engagement that the project has had with the government over the last 6 months. Please indicate what level of government the project has been engaging with. *

Please limit your response to 3000 characters

During the reporting period, the project has had an extensive engagement with the Government at central and local levels in line with the project implementation plan.

Climate change, conflict prevention, and promotion of gender equality priorities were integrated into Local Socio-Economic Development Plans (LSEDP) in 9 target municipalities of Batken province in a human centric manner under the leadership of local self-government bodies. For this, a series of co-creation workshops and consultation sessions were conducted in collaboration with local self-governing bodies (LSG) as follows:

In relation to the project engagement with central public authorities, the followings were undertaken during this reporting period:

Measures to increase preschool education services coverage were integrated into the above-mentioned LSEDPs with a focus on women's entrepreneurship on care services. Home-based care services as one of the new modalities in Batken province were exempted from tax as a result of the project facilitated dialogue between the local authorities, such as tax office, and local community residents. Home-based care services are a totally new modality that was adopted within the Government Accelerator Programme under the Administration of the President. This modality offers a totally new opportunity to families in Batken to provide better opportunity for women to realize their economic rights. In this respect, women as well as other family members receive new opportunities to better manage their domestic resources, such as water, land and agriculture produce. Needless to mention, increasing care services are seen as a critical prerequisite for the advancement of the rights of women and gender equality. For the above, the project managed to engage the Special Envoy of the President on children's rights, the Ministry of Health, the Ministry of Education, the State Agency of Civil Service and Local Governance, and the National Tax Inspectorate.

Moreover, the project is proud to report about the high-level advocacy undertaken by Batken women activists and CSO representatives in the Parliament of the Kyrgyz Republic. They raised concrete concerns and suggestions on climate change, security in cross-border areas, and gender equality advancement as a pre-requisite for the country's development. This was the first time ever women activists from Batken border-area delivered their statements in the Parliament.

This event was organized at the initiative of UN Women Country Office as result of close cooperation with the Parliament on the advancement of the rights of women. It took place in the eve of 8th March with the participation of Members of Parliament, 39 representatives of the Cabinet of Ministers, with the participation of four women activists from Batken province (total 49 women leaders representing women living with HIV, disability, migrants, survivors of violence, women affected by border conflicts)

The project had an extensive engagement with the Border Guard Services as a result of additional funds raised from UK/CSSF funds. Please see the details further in the report.

PART I: OVERALL PROJECT PROGRESS

NOTES FOR COMPLETING THE REPORT:

- Avoid acronyms and UN jargon, use general /common language.
- Report on what has been achieved in the reporting period, not what the project aims to do.
- Be as concrete as possible. Avoid theoretical, vague or conceptual discourse.
- Ensure the analysis and project progress assessment is gender and age sensitive.

Please rate the implementation status of the following preliminary/preparatory activities

Contracting of partners *

☒ Completed ☐ Not Applicable

Provide any additional descriptive information relating to the status of the project, including whether preliminary/preparatory activities have been completed (i.e. contracting of partners, staff recruitment, etc.)

Please limit your response to 3000 characters

WCSOs strengthened their capacity for efficient natural resource management, including land and water resources, UNSCR 1325 and peacebuilding, and green entrepreneurship. WCSOs representatives prepared their plans for small-scale initiatives that went through the assessment of the Selection Committee, comprising LSG representatives and the project management team.

The project supported women-led initiatives on climate-smart agriculture and social cohesion. These include drought-resistant seedlings of almond, pistachio, and strawberry farms with installed drip irrigation systems and water reservoirs, sewing workshops, and the creation of health and development centers. These initiatives contribute to creating employment opportunities and expand economic rights of unemployed women, the issue that was raised during the speed-dating consultations aimed at getting genuine feedback from local residents on the issues of major concern, to be considered while developing Local Socio-Economic Development Plans.

Climate security, conflict prevention and gender equality were integrated into nine Local Socio-Economic Development Plans (LSEDP) in all target municipalities. For the above, the LSGs capacities were strengthened to collaborate closely with women, youth, and other representatives of local communities, and undertake joint analysis, planning and budgeting for the elaboration of LSEDP.

The project has increased interaction and trust between WCSOs, community residents and local authorities through the enhanced co-creation dialogues, thus contributing to local development processes towards sustaining peace. Moreover, the project identified some of the key state processes that enabled WCSOs to engage in and contribute directly to the local development agenda considering women and climate security nexus, with a particular focus on planning and budgeting.

An analysis documenting the process of using an integrated and harmonized approach for local development, taking into account the different drivers of sustainable peace and development, gender equality was prepared. The main purpose of the analysis is to study the mechanisms of integration and harmonization of activities of central and local government bodies on implementation of national and state strategies, programmes, plans aimed at ensuring gender equality, sustainable peace and development, including programmes of socio-economic development of LSG structures. This documented analysis will be used to institutionalize a harmonized and integrated approach to local development planning in relation to national government priorities, including the WPS 1325 NAP, the Gender Equality Strategy and other development policies. The State Agency for Civil Service and Local Government has also expressed interest in scaling up the piloted model on the process of local development planning under the project to the national level in all provinces.

Describe overall progress under each Outcome made during the reporting period (for June reports: January-June; for November reports: January-November; for final reports: full project duration). Do not list individual activities. If the project is starting to make/has made a difference at the outcome level, provide specific evidence for the progress (quantitative and qualitative) and explain how it impacts the broader political and peacebuilding context.

Is the project on track for the timely completion of outputs as indicated in the workplan?

☒ Yes

☐ No

If no, please provide an explanation

Please limit your response to 6000 characters

Project progress summary

Please limit your response to 6000 characters

Under Output 1: During the reporting period, capacity building of WCSOs and women led community organizations and LSGs from all nine communities on climate, security and gender were initiated. "SheVolve" Catalytic Lab was launched in Batken, Osh and Jalal-abad provinces as per project plan. The laboratory provides a platform for the capacitation of WCSOs and women's organizations and groups on organizational resilience and sustainability (e.g. financial management, fundraising, proposal design), women's transformative leadership, gender-responsive structures & processes, and transformative programming (sustaining peace, climate adaptation, and gender equality, with analytical capacity). In total 28 applications were received from WCSOs from Batken, Osh, and Jalalabad, and as a result, 12 WCSOs were selected for the needs assessment stage. Furthermore, tailored capacity development action plans were developed for each of the organizations selected. It is expected that organizations will improve their institutional capacities on management, partnerships and analytical skills and knowledge.

Under Output 1&2: It is critical to mention that the project management engaged LSGs, and CPAs (Central Public Authorities) were extensively engaged in the joint reflection of the project implementation and its progress, as well as in defining detailed actions for the coming period. For this, 47 representatives of administrations of Leilek and Batken districts, the Presidential Plenipotentiary Representative in Batken province, State Border Service and members of the Parliament.

Climate change, conflict prevention, and promotion of gender equality priorities were integrated into LSEDP in 9 target municipalities of Batken province in a human centric manner under the leadership of local self-government bodies.

For this, a series of co-creation workshops and consultation sessions were conducted in collaboration with local self-governing bodies (LSG) as follows: Nine Speed dating consultations were held with the participation of 772 representatives, including local decision makers (in total 109), and community residents (486 women/286 men) representing women and youth groups, persons with disabilities, ethnic minorities, religious leaders and other local civil society organizations, as well as media representatives, and others.

In relation to the project engagement with central public authorities, the following were undertaken during this reporting period:

Measures to increase the coverage of preschool education services were integrated into the above-mentioned LSEDPs with a particular focus on women's entrepreneurship on care services. Home-based care services as one of the new modalities in Batken province were exempted from tax as a result of the project-facilitated dialogue between the local authorities, such as tax office, and local community residents. Home-based care services is a totally new modality that was adopted within the Government Accelerator Programme under the Administration of the President. This modality offers a totally new opportunity to families in Batken to provide better opportunity for women to realize their economic rights. In this respect, women as well as other family members receive new opportunities to better manage their domestic resources, such as water, land and agriculture produce. Needless to mention, increasing care services are seen as a critical prerequisite for the advancement of the rights of women and gender equality.

For the above, the project managed to engage the Special Envoy of the President on children's rights, the Ministry of Health, the Ministry of Education, the State Agency of Civil Service and Local Governance, and the National Tax Inspectorate.

Under Output 3. In total 140 proposals were received from women's groups, youth groups, community-based organizations, and women's CSOs from all nine target communities of Batken province. These were undertaken within the Small Grants initiative of the project, which is aimed at testing and implementing social innovations around gender, climate, peace and security. The was disseminated to apprise WCSOs, women's groups and youth about the commencement of the small grant application process.

The Small Grants initiative was co-created by the community residents and LSGs, thus all project proposals were reviewed and selected for funding based on jointly decided criteria of identified connection between gender empowerment, climate adaptation, strengthening social cohesion, and innovation, group potential and motivation, resolution of the issues during speed dating consultations, co-financing of no less than 10% of the budget, creation of a minimum five job places for women, partnership with government agencies, LSGs, local NGOs, or formal and informal associations and committees. These included

a. proposals that are in line with the priorities of the LSEDP;

b. proposals that demonstrate clear linkages of CPS and WPS nexus;

c. strengthening social cohesion and innovation.

In total 60 concept notes were shortlisted.

Various capacity-building initiatives were undertaken, and mentorship was provided for the shortlisted organizations and groups. These include a series of information sessions and workshops on project writing, elaborating budget, grant regulations and procedures in Batken and Leilek cities. The modalities of allocation of grants were differentiated considering the specifics of the applicants, as follows:

1. NGOs will directly receive the small grant funds for direct implementation.
2. Members of women's and youth groups who applied for business-oriented projects will register as Individual Entrepreneurs (IE) and sign a MoU with other members of their initiative group to receive small grants.
3. Members of women's and youth groups who applied for socially-oriented projects, do not require further registration, but instead, the grant managing (disbursing) organization will purchase all required project items directly for the group/s.

Indicate any additional analysis on how Gender Equality and Women's Empowerment and/or Youth Inclusion and Responsiveness has been ensured by the project to date

Please limit your response to 3000 characters

Gender sensitivity and social inclusivity was mandatory part of all project initiatives in all projects target municipalities. Furthermore, WPS and human-centred CPS approaches were the cornerstones for the project implementation with a specific focus on the needs of left-behind groups with a GEWE perspective. This approach underpinned the methodology of community consultation (speed dating), co-design of solutions and their integration into local development plans.

The project primarily enhanced the engagement of women in the CPS agenda as proactive agents of change by supporting women-led initiatives.

In three municipalities as Suu-Bashi, Sumbula and Leilek where most GALS (Gender Action Learning System) with co-funding support CSSF, the training participants reported positive changes in their personal lives and family relationships, as they began having more open and honest conversations about important topics such as time management, labor distribution, and resource allocation. These also influenced the ways decision-making in their families was made. Gender sensitivity and social inclusivity was mandatory part of all trainings and activities being held in target nine municipalities. Additionally, the project ensured active women's involvement and leadership within the community-level interventions and implementation of community led grant initiatives.

LSGs representatives from all nine communities strengthened their capacities to integrate the critical aspects of social cohesion, climate security, gender equality and gender responsive budgeting, peace and psychosocial rehabilitation into the Local Socio-Economic Development Plans (LSEDP).

In order to increase awareness-raising of community members on positive gender practices in support of women's role and contribution to the local development, women activists were trained to conduct advocacy campaigns on transformation of social norms to counter harmful gender norms and practices at the community level. Specific training sessions on 1325 and GALS were provided for women leaders to increase their knowledge and potential to serve as advocates and to promote rights and interests of women and girls in target communities. They carried out local actions to promote GEWE agenda on the eve of March 8th.

Is the project 1+ year in implementation?

☒ Yes

☐ No

FOR PROJECTS 1+ YEAR IN IMPLEMENTATION ONLY:

Is the project demonstrating outcome-level peacebuilding results? *

Outcome-level peacebuilding results entail results achieved at the societal or structural level, including changed attitudes, behaviours or institutions.

☒ Yes

☐ No

If yes, please provide concrete examples of such peacebuilding results *

Please limit your response to 6000 characters

The Parliament of the Kyrgyz Republic took a decision to organize a dialogue with women from conflict-affected border areas, along with women representing other groups on annual basis. This became possible as a result of the first-ever Women Leaders Forum organized in the eve of 8th of March as part of the project advocacy under the leadership of UN Women Country Office. Four women(out of 49w) representing Women CSOs from Batken province addressed the issues of migration at the border areas, inclusiveness of governance processes and women leadership and gender equality advancement as a pre-requisite for the country's development. This was the first time ever women activists from Batken border-area delivered their statements in the Parliament.

The new approaches that enabled open dialogue on the role of women and WCSOs in peace and security, and climate agenda in the context of local development and peace frameworks were tested. For instance, 38 WCSOs prioritised the need to amplify the voices of women and youth, while LSGs identified the pivotal role of collaboration with WCSOs in sustaining peace and addressing climate security challenges at the local level.

The project contributed to key local processes by enabling WCSOs to engage in and contribute directly to the local development agenda considering women and climate security agenda. For this, various actors were identified at central and local levels to engage in the planned processes of co-creation of existing and new opportunities and mechanisms for WCSOs engagement in climate, peace and security agenda.

The process of local development planning was extensively discussed, and the process mapping was co-created jointly with local and central level authorities, WCSOs and other actors to integrate gender and climate security into local planning and budgeting.

If yes, please provide sources or references (including links) as evidence of peacebuilding results, or submit them as additional attachments.

Evidence may be quantitative or qualitative but needs to demonstrate progress against outcome indicators in the project results framework. Sources may include project surveys (such as perception surveys), monitoring reports, government documents, or other knowledge products that have been developed by the project.

AnnexV_Report on Dialogue at Parliament on the eve of 8th March-1_3_58.pdf

PART II: PROJECT RESULTS FRAMEWORK

How many OUTCOMES does this project have *

1

2

3

4

5

more than 5.

Please write out the project outcomes as they are in the project results framework found in the project document

Outcome 1: **Outcome: Women Civil Society Organizations in Kyrgyzstan mitigate climate-related security risks in target localities and national level contributing towards sustained peace.**

Outcome 2:

Outcome 3:

Outcome 4:

Outcome 5:

Outcome 6:

Outcome 7:

Outcome 8:

Additional Outcomes
If the project has more than 8 outcomes, please enumerate the remaining outcomes here

INDICATOR BASED PERFORMANCE ASSESSMENT

Using the Project Results Framework as per the approved project document or any amendments, provide an update on the achievement of key **outcome** and **output** indicators in the table below.

- If the outcome has more than 3 indicators, select the 3 most relevant ones with most relevant progress to highlight.
- If the outcome has more than 5 outputs, please select 5 of the most relevant outputs per outcome, and provide an update on the progress made against 3 most relevant output indicators.
- Where it has not been possible to collect data on indicators, state this and provide any explanation. Provide gender and age disaggregated data. (500 characters max per entry)

» **Outcome 1: Outcome: Women Civil Society Organizations in Kyrgyzstan mitigate climate-related security risks in target localities and national level contributing towards sustained peace.**

Outcome 1	Performance Indicators	Indicator Baseline	End of Project Indicator Target	Current Indicator progress	Reasons for Variance/ Delay (if any)
1.1	Indicator 1.1 # of WCSOs in local and national level indicating increased level of participation in WPS agenda.	4	15	8WCSOs	On track
1.2	Indicator 1.2 # of WCSOs in local and national level indicating increased level of contributing to the WPS agenda.	4	10	8 WCSOs	On track
1.3	Indicator 1.3 % increase of women in the target localities who are confident in the performance of formal and informal local institutions in preventing and mitigating conflicts (disaggregated by gender, age, host/displaced, livelihood category)	62,5%	20	62,5%	On track

How many outputs does outcome 1 have?

1 2 3 4 5 more than 5.

Please list up to 5 of most relevant outputs for outcome 1

Output 1.1

WCSOs in the South of Kyrgyzstan have strengthened institutional capacities to plan, engage and act jointly with local and central level authorities and other actors towards sustaining peace.

Output 1.2

Targeted Government and Local Self-governing bodies have increased capacities to plan and partner with WCSOs on integrating gender, climate security and peace in line with national priorities in the framework of SDGs and UNSCR 1325.

Output 1.3

WCSOs in the South of Kyrgyzstan use institutional mechanisms and procedures to interact with government and other actors to jointly address climate-related security risks and peace building agenda in a sustainable manner.

Output 1.4

Output 1.5

Other Outputs

If Outcome 1 has more than 5 outputs, please enumerate the remaining outputs here

For each output, and using the, project results framework, provide an update on the progress made against 3 most relevant output indicators

» Output 1.1

Output 1.1: WCSOs in the South of Kyrgyzstan have strengthened institutional capacities to plan, engage and act jointly with local and central level authorities and other actors towards sustaining peace.	Performance Indicators <i>Describe the indicator</i>	Indicator Baseline <i>State the baseline value of the indicator</i>	End of Project Indicator Target <i>State the target value of the indicator at the end of the project</i>	Indicator progress for reporting period <i>State the current value of the indicator for the reporting period</i>	Indicator progress to date <i>State the current cumulative value of the indicator since the start of the project</i>	Reasons for Variance / Delay (if any) <i>Explain why the indicator is off track or has changed, where relevant</i>

1.1.1	A tool created to undertake an organizational capacity assessment of WSCOs in peace-building	0	1	Laboratory Kadam was launched to systematize the capacity development of the WSCOs in peacebuilding. Self-assessment tool for WSCOs to develop institutionally (legal, financial, partnership and M&E) and in the fields of peacebuilding was developed and tested with 12 organizations engaged currently.	A tool to undertake organizational capacity assessment of WSCOs in peacebuilding is created	On track
1.1.2	# WSCOs representatives report increased institutional capacities on management, partnerships and analytical skills and knowledge. (disaggregated by sex and age)	0	19	38 local and central WSCOs increased their capacities (Visioning training, Design Thinking workshops, Project proposals co-creation workshops with Government representatives, project mid-term review workshops and National Forums)	38 local and central WSCOs increased their capacities (Visioning training, Design Thinking workshops, Project proposals co-creation workshops with Government representatives, project mid-term review workshops and National Forums)	On track

1.1.3	1.1.5. # scenarios created based on new generated data on gender, climate, peace and security to define effective means to address climate-related security risks and sustain peace.	0	3	After the mid-term review workshop on revision of the project results and project small grant initiatives to be supported, it was agreed to take stock of most successful initiatives implemented and to develop scenarios with all key stakeholders using gamification approach	Two scenarios with a focus on climate-related security risks were developed.	On track

PART III: Cross-Cutting Issues

Is the project planning any significant events in the next six months? (eg. national dialogues, youth congresses, film screenings, etc.)

If yes, please state how many, and for each, provide the approximate date of the event and a brief description, including its key objectives, target audience and location (if known)	Event Description	Tentative Date	Location	Target Audience	Event Objectives (900 characters)
Event 1	Peace Week	21-28 September	Bishkek, Osh, Batken	Government, WCSOsInternational Community, Academia, Private sector	To hold discussions on CPS and WPS agendas with engagement of diverse partners
Event 2	Donors meeting	20 November	Bishkek	Government, WCSOs International Community, Academia, Private sector	To enhance partnerships with donors and institutionalize the mechanisms and procedures of partnering with WCSOs on gender, climate, and peace agenda.

Event 3	Central Asian Women Leaders Caucus	25 September	Bishkek	Decision-makers of CA	To hold regional discussions on opportunities for promoting WPS agenda
Event 4					

Human Impact

This section is about the human impact of the project. Please state the number of key stakeholders (including but not limited to: Civil Society Organiziations, Beneficiaries, etc.) of the project, and for each, please briefly describe:

i. The challenges/problem they faced prior to the project implemantation

ii. The impact of the project in their lives

iii. Provide, where possible, a quote or testimonial from a representative of each stakeholder group

This is an optional question. You may leave it unanswered if not relevant

Human Impact	Type of stakeholder	What has been the impact of the project on their lives?	Provide, where possible, a quote or testimonial from the stakeholder

1	CSOs/WCSOs representative	The representatives of WCSOs acknowledged they had capacity and willingness to participate in Climate security and peacebuilding efforts, and they received access to facilities and resources to voice the concerns and recommendations in decision-making. Through launching small-scale initiatives, women demonstrated commitment and enthusiasm to engage in community activities, seek for opportunities to expand their existing initiatives, acquire skills to advocate and contribute to sustainability of good practices in promoting CPS agenda	The representative of WCSOs noted: "The process of co-creation of solutions by applying Design Thinking methodology was a great tool as it provides problem-solving methodology that emphasizes a human-centered approach to innovation, and it is a creative and iterative process that involves empathy, ideation, and prototyping. I liked this tool as it allowed women and local authorities to jointly reflect on existing issues of the community and co-create together and seek joint solutions".
---	---------------------------	--	--

2	Community residents	<p>As a result of participation in focus group discussions and training, local communities started to think over the impact of climate change on their livelihoods and how they can contribute to adaptation measures. They realise it is necessary to get together with other community members and cooperate with local authorities to take action and to raise awareness about climate change. The established demonstration fields on drip irrigation systems increased communities' interest, knowledge and skills on using water saving technologies and development of fruit gardening - contributing this way to reduced pressure on water resources in border areas. One family changed their migration plans and decided to stay in the country to do fruit gardening on dry lands using drip irrigation systems.</p>	<p>Ms. Buuzara Matislamova, 56 years old, head of women's council, member of local Kara Bulak Kenesh: "We have introduced innovative methods to resolve problems with lack of drinking and irrigation water. Among them are installation of water reservoirs, mobile use of drip irrigation technology, smart meters for drinking water, rainwater collection. Further, we have started to make concrete water canals in Dara village (so that water does not get lost on its way) and plant perennial trees such as almonds and pistachios. Moreover, we use vermicompost for organic horticulture as Californian worms consume all the waste."</p> <p>Ms. Mamahaba Ormoshova, leader of a local initiative group: 'We have united 15 women from different households and decided to apply for a small grants program. We have received rosehip seedlings and planted them on 2 hectares of land in the flooded zone of the village of Kara-Suu. This will help to reduce the flow of floods, and we also hope to accumulate crops and get our first income in three years. Thanks to this project, we started to meet often with our fellow women and thus, improve our relationships.' Nasiba, from village Korgon joined the project with a special business plan on raspberry growing and received seedlings. She has improved her business skills and was trained on a business plan writing for introduction climate - smart agriculture</p>
---	---------------------	---	---

			<p>technologies. Before she was working with growing strawberries in the Chui region and now successfully continues this type of activity in Leilek. “We are very happy to receive seedlings of strawberries to increase incomes of our households. Growing strawberries is quite a new culture for us. We keep in touch with agronomist and continually consulting with him”</p>
--	--	--	---

--	--	--	--

3	Local and National authorities	<p>Capacity building of women activists, employees of Local Self-Government (LSG) bodies, and women's civil sector organizations in communities has been significantly enhanced. The efforts of women's councils, village health committees, and public prevention centers have been instrumental in strengthening interaction with LSGs and authorities. The Social-Economic Development Plan (SEDP), which previously consisted of only a few pages and was developed in isolation, has been transformed. New tools such as "Speed Dating" and "Design Thinking" have been utilized, allowing for comprehensive consultations with representatives from diverse community segments, including youth, women, people with disabilities, and the elderly. Furthermore, school students have been greatly engaged through contests of drawings, essay writing, and poetry composition, which were organized within the framework of the project. These contests have resonated widely and yielded excellent results, fostering a deeper understanding and awareness of climate change, climate security, peace, cooperation, and gender equality among the youth. At the district level, systematic organization of such contests has been decided upon, further embedding these important themes into the community consciousness. The training and</p>	<p>Karimberdiyeva Maksatai - Deputy Head of Leilek District State Administration 53 years old. As a leader in charge of social issues, I can say that addressing climate security, disaster prevention, gender development, and social cohesion are the main issues on the agenda. Since the beginning of this project, the above issues have received new impetus, especially capacity building of women activists, employees of Local Self-Government (LSG) bodies, and women's civil sector organizations in communities. Women's councils, village health committees, public prevention centers, and similar entities play an important role in strengthening interaction with LSGs and authorities. Mr. Ismanali Raimberdiev, 56 y.o, head of Leilek municipality "When the project "Ayaldar-Tynchtyk Tiregi" started in 2023, I can openly say that I did not expect such changes among activists and such interest of the local community to the realization of this project. Because climate change is already felt in our region. As the head of LSG I want to note a very important point, if before this time we wrote the SEDP from year to year, sitting in the office and it consisted of several (2-3 pages), the new SEDP was developed using new tools: "Speed dating" and taking into account the results of the "Design Thinking" training. During these meetings I, as the head, was able to get new</p>

		<p>workshops provided have notably improved the collaboration between district government, local self-government bodies, activists, and civil society organizations, particularly women's organizations. This improved interaction has empowered women's councils and women members of local municipal parliaments to play a more active role in community planning and decision-making. The engagement of many young women and girls in civic activism has been a particularly encouraging outcome of the project. With continued cooperation with partners, sustainable results are anticipated, ensuring the long-term benefits of these initiatives for the community.</p>	<p>information on different aspects of the community, to hear the opinions of representatives of different segments of society, such as youth, women, disabilities and elderly people, who participated in the Consultations within the framework of this project. As a result of the joint planning, 87 items have been included in the SEDP, including items on "Adaptation to climate change, strengthening community cohesion and conflict prevention, and capacity development of youth, women and girls". We are now working closely with women activists and women's civil society organizations. Finding solutions together leads to greater cohesion and a positive atmosphere".</p>

In addition to the stakeholder specific impact described above, please use this space to describe any additional human impact that the project has had.

Please limit your response to 4000 characters.

Raikhana Kamalova is an amazing woman with a clear vision for her community. She was born and raised in the beautiful Batken region of Kyrgyzstan and has always felt a deep connection to her homeland and its people. In April 2023, Raikhana participated in a forum that brought together leaders from nine pilot villages, service workers, and parliamentary deputies to address various social and economic challenges facing their region.

After gathering insights from the forum, Raikhana was one of women leaders who took the lead in implementing initiatives for community development and empowerment. These included design thinking workshops, speed dating events to foster collaboration, social cohesion programs, gender equality workshops, and climate adaptation training sessions.

"Exceptional insights we've experience when we learnt about the Gender Action Learning System (GALS) training. It boosted women's involvement in decision-making and promoted gender equality within communities," shares her very first impressions Raikhana.

These initiatives had a further significant impact. More than 120 individuals, including farmers, educators, healthcare workers, and religious leaders, actively participated in the speed dating sessions. That event became a space where local leadership, along with the collaborative efforts of Batken region leaders, resulted in tangible improvements in community engagement and social cohesion.

When the region's socio - economic development program for 2024 - 2026 was developed, Raikhana and villagers worked closely with local authorities to allocate resources and support community-driven initiatives. Despite facing challenges such as bureaucratic hurdles and limited funding, they all remained determined in her pursuit of positive local changes.

"One of the key moments in my personal life happened when I spoke up for women's rights in Parliament, on March 1. Motivated by my life experiences and the needs of her community, I had a chance to passionately address issues we as residents of the border villages face every day. I was delighted and proud of myself to be a rural woman who speaks up and demand positive changes for our region", expresses Raikhana about one of her most memorable days of spring.

Raikhana's commitment to community development extended beyond formal programs. Recognizing the importance of fostering a sense social cohesion, self-support and resilience among residents, Raikhana took active part in implementing initiatives such as fitness clubs and vocational training programs to provide practical support and promote well-being among villagers.

Moving forward, Raikhana is committed to continuing to address the ongoing challenges facing her community. By empowering individuals and fostering a culture of collaboration, she believes that border residents can overcome challengers and build resilient, coherent communities.

"My humble leadership and unwavering long-term dedication aim to inspire positive change among local women leaders and create a lasting impact in my unique Batken region", underlines her purest dreams Raikhana.

Please tick the applicable change based on above narrative.

How we worked:

*

Please select up to 3.

- ☐ Enhanced digitization
- ☒ Innovative ways of working
- ☒ Mobilized additional resources
- ☐ Improved or initiated policy frameworks
- ☒ Strengthened capacities
- ☐ Partnered with with local/grassroots Civil Society Organizations
- ☐ Expanding coalitions & galvanizing political will
- ☐ Strengthened partnerships with IFIs
- ☐ Strengthened partnerships with UN Agencies

Please explain

Please limit your response to 3000 characters.

A project promoted use of innovative approaches. A series of co-creation workshops and consultation sessions were conducted in collaboration with local self-governing bodies (LSG) as follows: Nine Speed dating consultations were held with the participation of 772 representatives, including local decision makers (in total 109), and community residents (486 women/286 men) representing women and youth groups, persons with disabilities, ethnic minorities, religious leaders and other local civil society organizations, as well as media representatives, and others. Among the participants of speed dating consultations, 173 persons (130 women /43 men), including 40 decision-makers, were identified and engaged in in-depth dialogues using the Design Thinking method.

Please explain

Please limit your response to 3000 characters.

The project attracted additional funds from FCDO (UK). In July 2023, UK (FCDO) provided additional 180,000 USD for activities related to social cohesion in three of the 9 target municipalities through UN Women From Development agencies as OSCE and NDI funds were mobilized for the GPI project launch in the amount: OSCE- 800 USD and NDI- 3800 USD through parallel funding

Please explain

Please limit your response to 3000 characters.

Within the project 38 local and central WCSOs increased their capacities (Visioning training, Design Thinking workshops, Project proposals co-creation workshops with Government representatives, project mid-term review workshops and National Forums)

Who are we working with (in addition to the implementing partners)

*

- ☐ Strengthened partnerships with IFIs
- ☐ Strengthened partnerships within UN Agencies
- ☒ Partnered with local civil society organizations
- ☒ Partnered with local academia
- ☐ Partnered with sub-national entities
- ☐ Partnered with national entities
- ☐ Partnered with local volunteers

Please explain

Please limit your response to 3000 characters

The project partnered with various stakeholders including the WCSOs, academia as Osh, Batken State Universities, Osh Pedagogical Institute, University of Arbaeva to promote CPS agenda in Batken province

Leave No one Behind

Select all beneficiaries targeted with the PBF resources as evidenced by the narrative

Mandatory

- ☒ Unemployed persons
- ☒ Minorities (e.g. race, ethnicity, linguistic, religion, etc.)
- ☐ Indigenous communities
- ☒ Persons with Disabilities
- ☒ Persons affected by violence (e.g. GBV)
- ☒ Women
- ☒ Youth
- ☒ Children
- ☐ Minorities related to sexual orientation and/or gender identity and expression
- ☒ People living in and around border areas
- ☒ Persons affected by natural disasters
- ☒ Persons affected by armed conflicts
- ☒ Internally displaced persons, refugees or migrants

PART IV: Monitoring, Evaluation and Compliance

» Monitoring

Please list key monitoring activities undertaken in the reporting period *

Please limit your response to 3000 characters.

- The series of project monitoring visits took place during the reporting period including outcome-level monitoring and joint reflection with the local authorities and local activists on the mid-term results achieved so far (report from the 8th of June even in Leilek)
- Project mid-term review with participation of extended project team that included all responsible partners of the programme working at national and local levels and its consultants to review linkages between gender, climate, security and peacebuilding dimensions of the programme (report on the workshop conducted on the 27th-28th of May)
- Ongoing context monitoring in relation to conflict sensitivity of project activities and overall security situation in pilot municipalities.
- Monitoring of various communication platforms created within the project: WhatsApp groups, telegram channels.
- Coordination of the joint Project Work Plan with further details, unpacking the actions prioritized, identifying issues and challenges and discussing them.
- Providing regular support to Implementing Partners on the development of data collection tools, data collection, and data analysis materials for relevant project indicators as per the Project Results Framework and additional programme indicators by Implementing Partners

Do outcome indicators have baselines? *

If only some of the outcome indicators have baselines, select 'yes'

- ☒ Yes
- ☐ No

If yes, please provide a brief description. If not, explain why not and when they will be available. *

Please limit your response to 3000 characters.

Yes, baseline collection was finalized in the end of 2023 in parallel with Speed Dating consultations where 643 community residents took part including 429 female and 189 male. As the result of the study conducted, it was revealed that according to the responses received 47,5 believed that local self-governing bodies contribute the most to the socio-economic development of their communities. On the question, to whom surveyed turn to for help in case of controversial issues in the villages, 62,5% indicated local self-governing bodies, and the 17,3% indicated other public organizations like women's committees, water-user associations and like. 81.6% of the surveyed also responded that they can participate in the decision-making processes related to development of their villages. The confidence index among Batken province residents was the highest among the 7 provinces of the country in the end of 2022 according to the survey results conducted by the National Statistics Commission, that correlates with the perception survey results conducted within the project.

Elaborate on what sources of evidence have been used to report on indicators (and are available upon request) *

Please limit your response to 3000 characters.

The following sources of evidence were used to report on outcome indicators: - - Community perception survey conducted in November 2023; - - National confidence index study conducted in December 2022.

Has the project launched outcome level data collection initiatives? e.g. perception surveys *

- ☒ Yes
- ☐ No

Please provide a brief description

Please limit your response to 3000 characters.

Yes, the community perception survey to determine outcome level baseline data was conducted in November 2023.

Has the project used or established community feedback mechanisms?

☒ Yes

☐ No

Please provide a brief description

Please limit your response to 3000 characters.

es, there are various community feedback mechanisms established within the project: Speed-data consultations engaging various groups of population residing in the community were used to collect feedback on the most urgent and important issues of local residents. Decision-makers who took part in the SD also appreciated this approach to work. In their interviews, the DM noted that this is the best method to convey information to the residents and identify the most important problems in a short period of time. Usually, during large meetings and sessions, the population is silent, but in this setting, with small groups, the participants quickly opened up and took an active part. All representatives of decision-makers noted the effectiveness of this technique. The primary finding reached by decision-makers is that there is a need to enhance communication between the population and local self-government. It was observed that SD could be a great tool to improve the communication between local government and residents to bridge the information gap that exists surrounding the activities of local self-government and to strengthen the dialogue and trust in local authorities. Some feedback from participants include: «I really liked this methodology, I was able to come here to Batken and hear the voice of people, understand what problems they have related to climate change, how they see it, I also shared, in my opinion, very important information, I recorded a lot for myself and am leaving with a positive impression" – DM "Before attending yesterday's meeting, I had been eager to draft projects and actively sought out opportunities. However, after participating in the meeting, I realized that individual efforts alone cannot bring about significant change. Solving problems and initiating projects requires collective action and support from the community and local authorities. It became clear to me that I cannot achieve this alone; rather, we must collaborate to address issues together, engage the community, and ensure interaction with local authorities." – NGO representative "I believe that the voice of women has been heard, individually we cannot say, for example, complain about medical services, we are afraid that we will be disliked for criticism and this will be reflected in the future on the quality of service, but here, together with a group, we were able to speak out, because there were many of us." – Housewife 2) Community perception survey that was held in November 2023 was another mechanism used to collect feedback on the organizations they trust in resolving controversial issues at local level; 3) What's up groups of community residents uniting various groups were also used for information sharing and feedback collection on the project activities conducted.

» Evaluation

Is the project on track to conduct its evaluation?

☒ Yes

☐ No

☐ Not Applicable

Evaluation budget (in USD) included in the project budget:

Response required

30000

If project will end in next six months, and the overall project budget is above USD 1.5 million, is your upcoming evaluation on track?

- ☒ Yes
- ☐ No
- ☐ Not Applicable

Please describe the preparations

Please limit your response to 3000 characters.

Yes, the project is on track to conduct its evaluation closer to the project completion. The UN Women Regional Evaluation Specialists is planning to visit Kyrgyzstan and deliver a workshop for all project partners on the standards of the conduct of joint evaluations on 22-24th of July 2024. Following this workshop, a TOR for joint evaluation will be finalized and recruitment process of the International and National consultants will start.

Catalytic Effect (non-financial): Has the project enabled or created a larger or longer-term peacebuilding change to occur, in addition to the direct project changes?	
<input checked="" type="radio"/> Yes <input type="radio"/> No	
If yes, please select the relevant option below:	
<input checked="" type="radio"/> Some catalytic effect <input type="radio"/> Significant catalytic effect	
If relevant, please describe how the project has had a (non-financial) catalytic effect, i.e. removed barriers to unblock stalled political, institutional or other peacebuilding processes at different levels in a country, and/or created the conditions to establish new processes to do so <i>Please limit your response to 3000 characters.</i> Many of implemented initiatives of the project serve as an example and a guide for local communities and LSGs. Local authorities jointly with women's groups also conduct trust-building activities (e.g. joint sport events, cultural events, advocacy campaign on the eve of 8th of march). Some of active women became mentors and trainers on GALS (transformative Gender Action Learning System) and providing psychosocial counselling for community members. In addition, in the district level, systematic organization of various contests among the youth conveying CPS agenda has been decided upon, further embedding these important themes into the community consciousness.	

Sustainability

Does the project have an explicit exit strategy?

Please describe any steps that have been taken to ensure the sustainability of peacebuilding gains, including any mechanisms, platforms, networks and socio-economic initiatives supported, beyond the duration of the project

Please limit your response to 3000 characters.

Sustainability of the project is ensured both through embedding approaches and results in operation of state institutions (e.g. local women committees), as well as working with WCSOs to change approaches, new ways of thinking about solving local issues around the climate security. These new approaches include Speed-Dating, Desing Thinking, Do-no-harm approaches and considering the conflict sensitivities by authorities themselves. The LSG authorities in 9 target cross-border municipalities strengthened their capacity on using gender equality and social inclusivity with a focus on CPS approach in local development planning, resulted in development of their LSEDPs for 2024. The LSGs shall be able to repeat this exercise for 2025 focusing on CPS nexus.

Are there any other issues concerning project implementation that you want to share, including any capacity needs of the recipient organizations?

Please limit your response to 3000 characters.

Capacity building trainings on the linkages CPS and WPS is required for the recipient organizations and responsible partners.

Monitoring and Oversight Activities

Please describe any key event related to monitoring and oversight. Please click next if no activities have yet taken place.
Events include Steering Committee meetings, Monitoring visits, Third party monitoring, Community based monitoring, any data collection, Perception or other survey findings, evaluation reports, audit or investigations.

Monitoring and oversight activities	Name of the Event	Summary	Key Findings

Event 1	Joint monitoring mission in March 2024	To review results of the project activities conducted within the UK-funded portion of the project targeting 3 out of 9 localities of Batken province, 2 member of National Parliament, representatives of the President Administration and local administrations took part in the project reflections workshop to review the progress and provide recommendations for the project team.	To continue implementing psychosocial support to duty bearers (border guards service representatives, LSG staff, security sector representative, including the branches of ministry of Emergency, Interior). To continue institutionalization of the component through the partnership with educational institutions to promote in-service psychosocial trainings for security related agencies staff.
Event 2	A joint monitoring mission in June 2024 to conduct the mid-term review of the project progress jointly with the local government and women activists engaged into the project	Having completed a series of co-creation and learning sessions for the LSGs and WSCO on how to improve interaction to address climate-related security risks around gender, climate, peace and security, representatives of the 9 target localities LSGs and women activists gathered to conduct reflection session on what has worked well and what is still need to be worked out until the end of the project.	To strengthen the linkages of triple nexus with LSG and grant mechanism components To follow up with working groups of the consultants on the gap between the national level policies and programs and their localization To continue the organization of trainings on climate adaptation measures. To raise awareness among local population of target municipalities on CPS
