

## THE GLOBAL DISABILTY FUND (GDF) END OF PROGRAMME REPORT – NATIONAL PROGRAMMES

### Programme information -Summary

<b>Programme title:</b>	Promoting the realization of the exercise of legal capacity of PwD in Argentina.
<b>Countries</b>	Argentina – Region or provinces: National/Federal, Northwestern Region, by also leveraging on existing Programmes within the UNSDCF 2021-2025 (Humanitarian Response Plan to the socio-sanitary emergency in Salta; Spotlight Initiative; Gran Chaco Initiative)
<b>Overall programme duration:</b>	40 months (apr 2022 - jul 2025)
<b>Budget:</b>	Total budget: 300.000 USD Co-funding: 90.000 USD
<b>Overall programme focal persons:</b>	Valeria Guerra Human Rights Advisor - RCO <a href="mailto:valeria.guerra@un.org">valeria.guerra@un.org</a>
<b>All PUNOs focal points:</b>	<p><b>UNDP</b> Daniela Mazzoni Democratic Governance Analyst <a href="mailto:daniela.mazzoni@undp.org">daniela.mazzoni@undp.org</a></p> <p><b>UNFPA</b> Celeste Leonardi Sexual and Reproductive Rights Officer <a href="mailto:leonardi@unfpa.org">leonardi@unfpa.org</a></p> <p><b>PAHO/WHO</b> Cecilia Marzoa Especialista en Gestión de programas y Alianzas OPS/OMS Argentina <a href="mailto:marzoamar@paho.org">marzoamar@paho.org</a></p> <p><b>UNICEF</b> Malena Acuna Social Policy Officer <a href="mailto:macuna@unicef.org">macuna@unicef.org</a></p> <p><b>OHCHR/RCO</b> Valeria Guerra Human Rights Advisor <a href="mailto:valeria.guerra@un.org">valeria.guerra@un.org</a></p>

<p><b>OPDs and Gov focal points</b></p>	<p><b>OPDs:</b>  REDI  Marcelo Betti  President  <a href="mailto:marcelobetti@yahoo.com.ar">marcelobetti@yahoo.com.ar</a>  ASOCIACIÓN AZUL  Elena del Bo  President  <a href="mailto:elenadalbo@hotmail.com">elenadalbo@hotmail.com</a></p> <p><b>Government</b></p> <ul style="list-style-type: none"> <li>● National Secretariat of Disability (ANDIS) - National Ministry of Health No focal point appointed</li> <li>● National Ministry of Justice. Human Rights Secretariat (SDH) No focal point appointed</li> <li>● Ministry of Health: National Directorate of Sexual Reproductive Health (DNSSR) No focal point appointed</li> <li>● Presidency: National Council on Social Policies Coordination (CNCPS) No focal point appointed</li> </ul>
<p><b>Reporting period (please include start and end date of the implementation phase):</b></p>	<p>april 2023 - july 2025</p>
<p><b>Short description of the programme:</b></p>	<p>The Argentina UNPRPD Programme seeks to support the State and OPDs in advancing the CRPD through enhancing Equality and Non-discrimination, overcoming Service Delivery barriers, and ensuring PwD participation.</p> <p>The problems that will be addressed by the program are barriers to the exercise of an independent life and gaps in capacity and knowledge of duty bearers in implementing and coordinating disability policy; participation of PwD and OPDs in decision-making process; mainstreaming disability in SDGs and UNSDCF will also be addressed.</p> <p>The strategy will be based on supporting the implementation of national and specific regulations and adaptation of specific procedures and laws regulating legal capacity by the CRPD; the production of evidence for decision-making and knowledge products and the development of trainers’ programs to bring about attitudinal changes in procedures and service lines aiming at the independent life. The program will also address intersectional stigma and discrimination, especially against women and girls with disabilities and indigenous with disabilities, regarding their access to sexual and reproductive health and rights. It will also focus on persons with psychosocial and intellectual disabilities, in the exercise of their legal capacity.</p> <p>Three priority focus areas are:</p> <ol style="list-style-type: none"> <li>1. Support the State in the enhancement of autonomy, the exercise of the legal capacity, and the independent life of PwD, encouraging their participation in policy reforms and public policy implementation.</li> <li>2. Support the UNS to ensure strengthened disability inclusion and monitoring in the UNSDCF implementation.</li> <li>3. Mainstream disability in SDG planning, monitoring, and coordination mechanism.</li> </ol>
<p><b>Target groups<sup>1</sup></b></p>	<p>All persons with disabilities, with a primary focus on women and girls with disabilities, and on underrepresented groups of persons with disabilities, persons with intellectual and/or psychosocial disabilities and indigenous people with disabilities.</p>

<b>Thematic focus2 :</b>	Legal Capacity; Access to Justice, GBV & sexual and reproductive health; Access to Information and ICTs, OPDs capacity building.
--------------------------	--

---

## Introduction

The purpose of this report – which is consistent with the UNDG Standard Progress Report format – is to provide information on the achievements of the project towards the realization of its stated objectives. In keeping with the UN system on-going efforts to strengthen result-orientation, the report should focus on systemic, structural transformation rather than process, highlighting how the different elements of the result chain described in the approved project document contributed to advance the rights of persons with disabilities in keeping with the Convention on the Rights of Persons with Disabilities.<sup>1</sup>

Reporting teams are encouraged to attach annexes containing additional relevant information (including assessments, evaluations and studies undertaken or published) and share videos, photographs (high resolution image files) or other multi-media materials illustrating the work and impact of the project. It is recommended, however, that all annexes be clearly referenced, using footnotes or endnotes within the body of the narrative.

Please note the report should be accessible.<sup>2</sup>

## 1. Progress towards impact and specific outcomes

Using the table format provided below, please provide information on the contribution towards impact and outcome indicators. Please make sure to capture, in your description, relevant shifts in addressing gaps in preconditions to CRPD implementation, capacity development as well as in the wider disability inclusion agenda and implementation of the SDGs in the country. Where it has not been possible to collect data on indicators, additional narrative information should be provided detailing why that was the case and what plans have been put in place to ensure that the relevant data will be provided.

---

<sup>1</sup> The following definitions, which are based on the UN Development Group Harmonized RBM Terminology, were used in the “Template for Programme Proposals”, utilized by UN Country teams to develop the approved project documents:

- **Impact:** Positive and negative long-term effects on identifiable population groups produced by a development intervention, directly or indirectly, intended or unintended. These effects can be economic, socio-cultural, institutional, environmental, technological or of other types.
- **Outcome:** The intended or achieved short-term and medium-term effects of an intervention’s outputs, usually requiring the collective effort of partners. Outcomes represent changes in development conditions which occur between the completion of outputs and the achievement of impact.
- **Outputs:** The products and services which result from the completion of activities within a development intervention.

<sup>2</sup> **Prior to the submission of this report, please check that the document is accessible to persons using screen readers.** In a window system it is possible to do this by going to the File Menu, clicking Check for Issues and then Check Accessibility. If errors, warnings and tips show up in the report of the accessibility checker, please follow the instructions in the checker to make the necessary corrections. On a Mac, click on review and select check accessibility. When the document is accessible the checker will display a report stating “No accessibility issues found. People with disabilities should not have difficulty reading this document.” Please see [Windows Accessibility Checker](#) ; [Apple Mac Accessibility Checker](#) for more information.

### Expected Impact of the programme/ Impact statement

The expected impact of the programme is to contribute to a sustained transformation of national policies, systems, and practices towards disability inclusion in Argentina. By equipping public institutions, OPDs, and other key stakeholders with knowledge, tools, and platforms for participation, the programme aims to strengthen the enabling conditions for CRPD implementation, ensure equitable access to rights and services—including sexual and reproductive health—and promote inclusive justice and governance systems.

In the long term, these efforts are expected to reduce structural barriers, foster active participation of persons with disabilities in decision-making, and embed the principles of the 2030 Agenda—particularly the commitment to “leave no one behind”—across national development and humanitarian actions.

### Please provide narrative description on the contribution towards the stated impact

The programme contributed to the stated impact by strengthening capacities and creating tools to advance disability inclusion in policies, services, and participatory mechanisms. Through coordinated actions in the justice, health, and governance sectors, it developed training processes, policy guidelines, and knowledge products that were co-created with organizations of persons with disabilities (OPDs). These initiatives promoted rights-based approaches, addressed barriers in areas such as legal capacity and sexual and reproductive health, and supported inclusive governance practices. The programme also fostered spaces for dialogue and advocacy, enabling OPDs to engage more effectively in decision-making and monitoring processes.

Although national-level institutional changes faced limitations, the programme helped consolidate advances and capacities at subnational levels, laying the groundwork for sustained progress towards the realization of the CRPD and sustainable development.

### Reporting on the contribution to GDF impact (please see annex 1 for indicators)

GDF Impact Indicator (please refer to approved proposal section 5 for relevant indicators selected by the programme)	Country baseline (Beginning of the project reporting period)	Country Endline (End of the project reporting period)	Means of Verification
Coverage of essential health services/Universal Health Coverage disaggregated as a proportion of the population, by sex, age and disability (SDG indicator 3.8.1)	Argentina’s health system has historically been split into three distinct regimes: i) the contributory social security sector (covering 57 % of the population); ii) the contributory private health insurance sector (5.1 % of the population); and (iii) the public sector, providing free health care services to all but	The Single Disability Certificate (CUD) is key to reducing inequalities, as it guarantees access to essential services. However, access to it remains limited. Of the estimated 4.3 million people with disabilities in Argentina, only 1.680.723 had a	“Estudio personas con discapacidad” INDEC, 2018 <a href="https://www.indec.gob.ar/ftp/cuadros/poblacion/estudio_discapacidad_12_18.pdf">https://www.indec.gob.ar/ftp/cuadros/poblacion/estudio_discapacidad_12_18.pdf</a>  SITAN, UNICEF 2025 <a href="https://www.unicef.org/argentina/media/27206/file/Resumen%20Ejecutivo%20UNICEF%2015_12.pdf.pdf">https://www.unicef.org/argentina/media/27206/file/Resumen%20Ejecutivo%20UNICEF%2015_12.pdf.pdf</a>  SRH guidelines and toolkits adapted to the realities of

<p>mostly used by the uninsured (37.9 % of the population). Those not insured by contributory sector, which consist mostly of the poor and vulnerable, have access to free, non-contributory (tax-financed) health care at health facilities in the public sector. However, services received from these health facilities are often of uneven quality. In addition, the uninsured are underserved in terms of preventive care.</p> <p>According to the 2021 UNICEF’s National Survey on Children and Adolescents, 6,8% of persons who needed medical assistance or medication did not access due to lack of money or transportation. In Northwest region, it reaches up to 11%.</p> <p>When analyzing by wealth quintiles, it is observed that in the lowest quintile the deficit amounts to 12%.</p> <p>There is no updated disaggregated data on disability.</p>	<p>CUD in November 2023 (ANDIS, 2023).</p> <p>The health system faces significant challenges in providing comprehensive care to persons with disabilities. A medical-assistance approach still predominates, hindering early detection and access to appropriate treatments. Although medical coverage is similar between children and adolescents with and without disabilities, inequalities persist, reflected in a higher incidence of illness and lower rates of seeking medical attention among the population with disabilities. ## **Outcome 1**

### **National Stakeholders have the knowledge and practical tools to effectively contribute the development and implementation of disability inclusive policies and systems**

Throughout the 2022–2024 implementation period, significant progress was made under Outcome 1 in strengthening the capacities of key national actors—particularly in the areas of health, justice, and governance—toward the effective development and implementation of disability-inclusive policies aligned with the CRPD.

In 2022, the project focused on establishing strategic alliances and engaging multiple government sectors through the design and implementation of training programs and seminars aimed at public officials across Argentina’s 24 jurisdictions. These capacity-building efforts were complemented by knowledge production on disability inclusion, particularly in the justice sector. Key milestones included the definition of a people-centered justice strategy for persons with disabilities, the identification of stakeholders in the civil and administrative justice systems, and the promotion of inclusive justice through pilot models aligned with CRPD principles. OPDs were also supported through connections with the Pro Bono Network and law clinics. In parallel, policy and practice guidelines were developed for sexual and reproductive health (SRH) services for persons with disabilities, in collaboration with OPDs and health authorities.

In 2023, the project deepened its work with national institutions through capacity-building activities in both health and justice sectors, emphasizing sexual and reproductive rights and legal capacity. OPDs played a central role in co-developing protocols and tools to support persons with disabilities in navigating judicial processes. Technical materials and guides were produced to promote inclusive SRH services, with specific tools addressing the needs of women and diverse gender identities with disabilities. A roundtable with OPDs from across the country was organized to define joint advocacy strategies during the electoral cycle, and OPDs were supported in analyzing Argentina’s Third Voluntary Review of the 2030 Agenda. At the same time, the UN Country Team received targeted training on mainstreaming disability in programming, while exploratory work with judicial informatics teams advanced strategies for digital accessibility in justice services.

In 2024, capacity-building initiatives continued with a strong territorial component. Workshops were delivered to health professionals in Jujuy and to judiciary and public prosecutor personnel nationwide, emphasizing rights-based approaches to legal capacity determination. Information materials were produced to improve SRH access and digital accessibility, including graphic guides and easy-to-read formats. Legal system assessments were carried out, resulting in workshops and consultations aimed at legal reform and aligned with SDG indicator 16.3.3. A toolbox for inclusive local governance was also created, along with a mapping of good practices at the provincial and municipal levels. Across all actions, OPDs and persons with disabilities were meaningfully engaged, ensuring alignment with CRPD standards and reinforcing a participatory approach.

**Please provide narrative description on the progress made to achieve outcome 1**

The joint program strategically combined training, technical assistance, and collaborative development of tools to improve the inclusion of persons with disabilities—particularly in the justice and health sectors.

One of the central achievements was the development and institutionalization of training programs for justice and health personnel, incorporating a human rights-based approach aligned with the Convention on the Rights of Persons with Disabilities (CRPD). These training initiatives, delivered in both virtual and in-person formats, contributed to increasing awareness and skills among public officials, enabling them to address legal capacity, accessibility, and inclusive sexual and reproductive health (SRH) services.

The program actively engaged organizations of persons with disabilities (OPDs) in the co-creation of protocols, practical guides, and strategic advocacy tools. This participatory methodology ensured that the knowledge products and policy recommendations reflected the lived experiences and needs of the disability community. Notable outputs include:

- SRH guidelines and toolkits adapted to the realities of women with disabilities and diverse gender identities
- Methodological guides for judicial actors in legal capacity proceedings
- A toolbox to support inclusive governance at the local level
- Digital accessibility materials aimed at justice sector portals and information systems
- The methodology and measurement instrument were designed to measure to access to justice (SDG 16.3.3) based on the specific needs and perspectives of persons with disabilities

In terms of policy dialogue and governance, the program successfully promoted national discussions through roundtables, consultations, and participation in monitoring frameworks such as the Voluntary National Reviews of the 2030 Agenda. Legal reform needs were identified through diagnostic studies and workshops, laying the groundwork for future legislative adjustments to better protect the rights of persons with disabilities.

Furthermore, by fostering cross-sectoral engagement—particularly among justice, health, and local government actors—the program cultivated long-term institutional relationships and generated political will to sustain disability-inclusive practices. A strong emphasis was placed on sustainability, with replication mechanisms built into the training strategies and the creation of user-friendly support materials.

Ultimately, Outcome 1 has strengthened the enabling environment for the realization of rights enshrined in the CRPD and reinforced national and local capacities to ensure that persons with disabilities are not left behind in public policy formulation and implementation.

## **Outcome 2**

**Gaps in achievement of essential building blocks or preconditions to CPRD implementation in development and humanitarian programs are addressed.**

Across its three years of implementation, Outcome 2 focused on strengthening the legal and institutional ecosystem to ensure the full exercise of legal capacity and political participation of persons with disabilities.

In 2022, the groundwork was laid for high-impact legal reforms through alliances with key national stakeholders, including ANDIS, and strategic engagement in federal-level dialogue. The project-initiated diagnoses of the national and provincial legal frameworks—particularly the Civil and Commercial Code—and facilitated interinstitutional coordination to design participatory legal reform proposals. Complementary actions, including cooperation with the Legal Aid Providers Network of Buenos Aires and the co-design of a virtual access-to-justice guide, expanded innovation and collaboration in this area.

In 2023, the programme expanded on this groundwork by codeveloping regulatory proposals with OPDs and with teams from the health and justice sectors to strengthen the implementation of Resolution 65/2015 on SRH accessibility, and to advance the application of reasonable accommodations, support systems, and safeguards. Furthermore, training was delivered to public officials to ensure alignment with the CRPD and national legislation. Experimental workshops were held to empower OPDs and support their formalization, political participation, and access to institutional funding.

In 2024, Outcome 2 emphasized regulatory proposals and community-centered solutions. It delivered a validated public policy recommendation for the legal capacity determination process under Article 37 of the Civil and Commercial Code and further developed practical tools such as the Federal Replicability Manual and an Access to Justice Guide for persons with disabilities. A special focus was given to Indigenous communities in the Gran Chaco region, through participatory diagnostics, stakeholder mapping, awareness campaigns, and community workshops, with particular attention to women and children with disabilities.

Additionally, the project produced a Guide on Assistive Technologies and Universal Design for the justice system to improve digital equity and foster accessible political participation.

These achievements demonstrate a solid progression in the implementation of inclusive legal norms and the promotion of the rights of persons with disabilities, particularly those from historically excluded groups, such as people with psychosocial and intellectual disabilities and Indigenous communities.

**Please provide narrative description on the progress made to achieve outcome 2**

Throughout the three years of implementation, the project made significant progress in achieving Outcome 2, which focused on promoting inclusive legal and policy reforms aligned with the CRPD, and strengthening the participation and legal empowerment of persons with disabilities, including those from Indigenous communities and individuals with intellectual and psychosocial disabilities.

In the first year, the groundwork was laid by initiating a strategic dialogue with key stakeholders such as ANDIS and legal institutions, opening pathways to influence national legal reforms. Diagnostic assessments of the Civil and Commercial Code and provincial regulations were conducted collaboratively with OPDs and state actors, setting the stage for the co-creation of regulatory proposals. These efforts aimed to strengthen guarantees for the exercise of legal capacity and the design of inclusive justice systems.

Building on this foundation, 2023 focused on advancing concrete proposals. Working groups and roundtables were established to revise existing regulations—such as Resolution 65/2015 of the Ministry of Health—and to address the application of CRPD principles in healthcare and justice systems. These included recommendations for accessibility measures, reasonable accommodations, and safeguards. The project also delivered a six-session training series on the social model of disability for health and justice personnel, enhancing their understanding of inclusive legal frameworks. In parallel, workshops with OPDs focused on promoting political participation, organizational strengthening, and access to institutional financing.

In 2024, these efforts matured into actionable tools and public policy proposals. A comprehensive document was produced and validated by stakeholders to reform the legal capacity determination process, aligning it with Article 37 of the Civil and Commercial Code and CRPD standards. The project developed and disseminated a Federal Replicability Manual and an Access to Justice Guide for persons with disabilities, aimed at institutionalizing inclusive practices within the judiciary. These instruments were designed to be adopted at different government levels and replicated in diverse jurisdictions.

Particularly noteworthy were the initiatives carried out in Indigenous territories. Workshops and mapping missions were conducted in the Gran Chaco region, promoting dialogue on the unique challenges faced by Indigenous persons with disabilities.

Additionally, a technical Guide on Assistive Technologies and Universal Design was developed for the justice system, offering sector-specific recommendations to advance digital inclusion for persons with visual, auditory, intellectual, and psychosocial disabilities.

Overall, the project's strategy combined national-level legal advocacy with territorial interventions and participatory processes. This approach ensured the creation of regulatory tools, guidelines, and campaigns that are context-sensitive, rights-based, and co-designed with persons with disabilities, reinforcing the sustainability and ownership of the outcomes achieved.

<b>Outcome 3</b>
<b>National development and humanitarian plans, budgets, programs and monitoring processes are disability inclusive</b>
<p>Continuous collaboration with public institutions and the UN Country Team has resulted in the mainstreaming of disability in strategic planning instruments, monitoring mechanisms, and interagency communications. Persons with disabilities and their representative organizations have been meaningfully involved in consultations, contributing to inclusive public policy planning, capacity-building efforts, and the development of accessible information and tools. These actions have fostered sustained institutional change and positioned disability inclusion as a cross-cutting priority in sustainable development frameworks.</p>
<b>Please provide narrative description on the progress made to achieve outcome 3</b>
<p>In 2022, the project laid the groundwork for a stronger interagency strategy, enhancing the United Nations System’s ability to influence national development agendas in line with disability inclusion. The project supported the sensitization of the UN Country Team (UNCT), promoting the incorporation of disability in the implementation of the United Nations Sustainable Development Cooperation Framework (UNSDCF 2021–2025). This year served as a key period to engage system actors and set a common foundation for action.</p> <p>In 2023, the focus shifted toward strengthening the participation of Organizations of Persons with Disabilities (OPDs) in national and international monitoring mechanisms. A national consultation roundtable was held, prioritizing the inclusion of underrepresented groups such as Indigenous women, children, and adolescents with disabilities in SDG follow-up. Two in-person training sessions were conducted for the staff of UN agencies in Argentina, introducing the social model of disability and human rights-based approaches. These sessions also provided a space for agencies to share best practices and identify challenges in mainstreaming disability in their respective mandates. Additionally, the project supported dialogue with the National Council for the Coordination of Social Policies (CNCPS) and the SDG Technical Commission, advocating for the harmonization of disability indicators in national monitoring frameworks.</p> <p>In 2024, the project deepened these efforts through specific actions aimed at ensuring the inclusion of persons with disabilities in strategic joint development planning and information systems. A virtual consultation workshop with the disability community was organized as part of the Common Country Analysis (CCA) process, generating inputs for the diagnosis of the situation of persons with disabilities’ rights in Argentina that informed a practical document with tools and guidelines for integrating disability into the UN strategic programming. In parallel, lessons learned from a health-related workshop in Jujuy were systematized, highlighting key barriers and suggesting intersectoral strategies for inclusive service delivery.</p> <p>Moreover, a specialized training was delivered to communication teams of all UN agencies in Argentina to improve document and content accessibility. This initiative, led in partnership with the OPD Libertate, resulted in a guideline with practical recommendations for ensuring inclusive communication practices. The materials produced allow for continued internal capacity building and institutional work in relation to disability inclusion.</p> <p>Together, these efforts demonstrate a coherent and consistent approach to positioning disability as a cross-cutting issue in strategic development planning, by reinforcing institutional capacities and promoting participatory mechanisms aligned with international human rights standards.</p>

**2. Achievement of specific outputs**

Please complete by indicating what was achieved on each output and report against the output indicators. In the narrative, please describe any challenges during the output delivery. The narrative could include any qualitative results from the output activities that were completed, contextual specifics e.g. who are the beneficiaries? What are the intervention types? Any unexpected / unplanned results?

Please complete one table per output and the relevant output indicators. Add as many tables as required.

<b>Output 1.1.A</b>
Governmental stakeholders strengthened their capacities to ensure the implementation of disability-sensitive regulatory frameworks, mainly Civil and Commercial Code and norms focused on sexual and reproductive rights, policies on service delivery and monitoring systems to assure the exercise of legal capacity with an intersectional approach in accordance with the implementation of the CRPD and SDG.
<b>Brief narrative description on completion of output</b>
<p>Throughout the implementation period, the programme fostered strong alliances with key national institutions, notably the Ministry of Health, the National Directorate of Sexual and Reproductive Health, Human rights Secretariat and the national disability authority (ANDIS), and various justice sector bodies. These collaborations were instrumental in advancing disability-inclusive regulatory frameworks and service delivery practices, particularly in the areas of legal capacity and sexual and reproductive rights.</p> <p>In the health sector, technical documents, guidelines, and policy notes were developed in a participatory manner through roundtable discussions involving experts, OPDs, and national authorities and workshops. These resources strengthened the conditions for public healthcare providers across the country to guarantee the sexual and reproductive rights of persons with disabilities, especially women, girls, adolescents, and individuals with gestational capacity—using a gender, disability, and human rights-based approach.</p> <p>In parallel, targeted training initiatives for health professionals in the province of Jujuy improved capacities to deliver accessible and inclusive healthcare services. Training materials, methodologies, and systematized documentation were produced to ensure replicability and institutional sustainability.</p> <p>Within the justice sector, agreements were reached with multiple national and federal stakeholders to assess and improve procedures for determining legal capacity. Workshops for judicial officials and public defenders were conducted to align their practices with the CRPD, emphasizing the social model of disability and a rights-based approach. These sessions contributed to the development of a qualitative-quantitative study on legal capacity rulings nationwide, identifying challenges and good practices across jurisdictions.</p> <p>Additionally, joint capacity-building initiatives between health and justice actors were implemented, creating a replicable experience that can serve as a model for future multi sectoral training efforts. Methodological frameworks and support materials were developed to facilitate the continued rollout of these sessions in different regions and institutions.</p> <p>By incorporating intersectional perspectives, including gender and geographical diversity, the programme ensured that inclusive practices are integrated into both national policy development and local service delivery. These coordinated actions represent significant progress in institutionalizing disability-sensitive governance, promoting the exercise of legal capacity, and strengthening accountability mechanisms in line with CRPD commitments.</p>

			and intercultural perspective, prioritizing both women and girls with disabilities and indigenous people with disabilities as groups of special vulnerability in Argentina. In particular, activities related to sexual and reproductive health have focused on the rights of girls and women with disabilities. As well as activities developed in the Gran Chaco region, particularly in Jujuy province for indigenous women with disabilities rights.	

Please add new tables if the programme has more outputs under 1.1

<b>Output 1.2:</b>
Capacity of OPD's is strengthened to ensure their meaningful participation and to undertake advocacy strategies.
<b>Brief narrative description on completion of output</b>
<p>The participation of persons with disabilities and their representative organizations (OPDs) was a central pillar of the project across its different lines of work. Activities were developed in close collaboration with OPDs and experts with disabilities, who contributed in diverse roles to the design and implementation of initiatives. Particular attention was given to amplifying the voices of historically underrepresented groups within the disability movement, such as women, girls, adolescents, young persons with disabilities, and persons with intellectual and psychosocial disabilities.</p> <p>The project implemented activities aimed at strengthening OPDs' capacity to advocate for their rights and engage meaningfully in public policy processes. This included support for formalization processes and the creation of partnerships with other organizations, enabling them to access funding and participate in national and international human rights monitoring mechanisms. Training and support also focused on enabling OPDs to draft and submit reports and engage with follow-up mechanisms tied to the implementation of human rights instruments.</p> <p>One significant milestone was the coordination of a nationwide OPD consultation ahead of the 2023 presidential elections in Argentina. The project contributed to the process led to the development of a consensus document outlining urgent demands and priority actions for the disability movement. The document was presented to presidential candidates and emphasized key issues such as the protection of sexual and reproductive rights and the rights of persons with intellectual and psychosocial disabilities, serving as a strategic tool for national advocacy.</p> <p>During the reporting period, the project also sought to pilot a program to support OPDs in regularizing their legal status. However, implementation challenges emerged as OPDs indicated that the primary barrier was not legal formalization itself, but rather the lack of material and financial resources necessary to sustain an organizational structure. This evidence informed an adjustment in strategy, with greater emphasis placed on understanding systemic barriers and identifying alternative, more context-sensitive mechanisms to support OPD engagement in decision-making spaces.</p>

<b>Output 1.3:</b>
Capacities of UNCT Argentina strengthened the mainstream disability perspective in all UNS activities.
<b>Brief narrative description on completion of output</b>
<p>Training sessions were attended by UN staff from different areas—including communications, administration, procurement, programmes and technical teams, external consultants, and agency leadership—allowing for the identification of institutional good practices, as well as challenges in applying inclusive principles in day-to-day work. The participatory structure of these sessions encouraged cross-agency dialogue and solution-building, fostering a collaborative environment for addressing operational and strategic barriers to inclusion.</p> <p>One of the key achievements was the design and delivery of specialized training for communication teams across all UNS agencies, focusing on accessible and inclusive communication practices for publications, digital content, and in-person and virtual events. These sessions laid the foundation for improved internal capacity and were structured to enable replication and dissemination within each agency, thereby expanding the reach and sustainability of the intervention.</p> <p>Complementing the training, a practical accessibility guide was developed to support the implementation of inclusive communication practices throughout the system. The guide offers standardized criteria and concrete tools to ensure accessibility in documents, events, and outreach strategies. Its application reinforces the alignment of UNS Argentina with the principles of the CRPD and the Sustainable Development Goals (SDGs), promoting more equitable engagement with persons with disabilities.</p> <p>By embedding accessibility into communication workflows and institutional culture, the initiative not only strengthened technical knowledge but also encouraged a structural shift towards inclusion. This approach enhances the ability of the UN system in Argentina to ensure that persons with disabilities are meaningfully included and represented in its activities, thereby contributing to more inclusive policy and programming outcomes.</p>

<b>Output 1.4:</b>
Development and testing of knowledge products to address gaps in achieving autonomy for independent living for people with disabilities.
<b>Brief narrative description on completion of output</b>
<p>The project addressed significant knowledge gaps that hinder the effective implementation of the Convention on the Rights of Persons with Disabilities (CRPD) by developing and disseminating accessible information products tailored to the needs of persons with disabilities, their families, and allies. These efforts aimed to promote awareness of rights, provide guidance on available enforcement mechanisms, and offer clear pathways for filing complaints in cases of rights violations.</p> <p>Key areas of focus included access to and meaningful participation in legal capacity determination processes, redefined as procedures for the co-design of support systems, reasonable accommodations, and safeguards for autonomous decision-making. Additionally, efforts were directed at facilitating informed and independent access to quality sexual and reproductive health services, ensuring access to legal services for participation in diverse judicial proceedings, and incorporating an intersectional and intercultural approach to rights enforcement, particularly relevant in northern Argentina.</p> <p>Knowledge products were developed in multiple accessible formats and inclusive language, enabling direct engagement by persons with disabilities. These resources supported both awareness-raising and the institutionalization of inclusive practices within key public services.</p> <p>In the health sector, policy documents, training materials, and models of inclusive care, such as those developed in Jujuy and the City of Buenos Aires, provided actionable tools to improve service accessibility and uphold the sexual and reproductive rights of persons with disabilities. These models have laid the foundation for broader institutional adoption and replication.</p> <p>In the justice sector, the project produced empirical evidence and policy recommendations to guide reforms related to legal capacity. The analysis of judicial rulings and structural barriers to access to justice informed legislative discussions and fostered dialogue with institutional stakeholders. This ensured that policy development and implementation are grounded in human rights standards and the lived experiences of persons with disabilities.</p> <p>The project also created innovative communication tools, such as a video toolbox for deaf persons addressing gender-based violence, demonstrating a commitment to tailoring resources for underrepresented groups. This intersectional approach reinforced the importance of adapting strategies to diverse forms of disability and social identity.</p>

<b>Output 1.5:</b>
Model platform for the participation of OPDs in monitoring of international human rights recommendations and access to justice developed.
<b>Brief narrative description on completion of output</b>
<p>Throughout the project, efforts were made to strengthen the role of organizations of persons with disabilities (OPDs) in monitoring international human rights recommendations and improving access to justice. Initial challenges included difficulties in reaching agreements among government enforcement authorities regarding the installation of monitoring systems. Despite these early setbacks, the project progressed towards more sustainable strategies to reinforce the participation of OPDs in governance and decision-making processes.</p> <p>One of the key achievements was the co-creation of a virtual training program aimed at promoting disability inclusion and awareness. This program, supported by accessible materials such as systematization documents and presentations, serves as a scalable and replicable tool that empowers public officials and stakeholders to incorporate inclusive practices in their work. Its participatory design ensures alignment with the lived experiences and demands of persons with disabilities.</p> <p>In parallel, a guidance note documenting good practices implemented by local governments was developed. This note provides a framework to assist regional and municipal authorities in institutionalizing inclusive policies and strengthening the engagement of OPDs in policy design and implementation. These efforts support the decentralization of inclusive governance and reinforce the role of OPDs at all levels of government.</p> <p>Additionally, a comprehensive systematization and evaluation of OPD participation mechanisms was carried out to identify effective models and facilitate their replication in other local contexts. A regulatory note complemented this analysis by linking participation mechanisms to national and international disability rights frameworks.</p> <p>These actions have contributed to enhancing the advocacy capacity of OPDs and increasing their visibility in human rights monitoring and justice reform initiatives. While further work is needed to broaden the reach and impact of these mechanisms, the progress achieved establishes a solid foundation for inclusive and participatory governance structures that are more responsive to the rights and priorities of persons with disabilities.</p>

<b>Output 2.1:</b>
Review of national laws and policies for effective exercise of legal capacity focused on the Civil and Commercial Code, National Electoral Code, administrative resolutions and internal regulations.
<b>Brief narrative description on completion of output</b>
<p>This process has focused on identifying legal gaps, proposing reforms, and developing tools to strengthen existing programs and regulations, with particular emphasis on the alignment with the Convention on the Rights of Persons with Disabilities (CRPD).</p> <p>A key milestone was the development of a detailed report on the scope, challenges, and implementation of Resolution 65/2015 of the National Ministry of Health. This resolution is central to interpreting the Civil and Commercial Code regarding legal capacity and the autonomy of individuals to make decisions about their own bodies. The analysis informed the development of several regulatory documents, including:</p> <ul style="list-style-type: none"> <li>• Guidelines for institutional intervention procedures addressing sexual and reproductive health, incorporating support systems, safeguards, and reasonable accommodations,</li> <li>• Implementation standards for Law 27,655 (2023), which amended Law 26,130 to prohibit forced sterilizations and strengthen reproductive autonomy for persons with disabilities,</li> <li>• Guidelines on inclusive sexual and reproductive health counseling,</li> <li>• Regulatory interpretations on access to voluntary and legal termination of pregnancy (IVE/ILE) under Law 27,610.</li> </ul> <p>These documents, developed in collaboration with the National Directorate of Sexual and Reproductive Health (DNSSR), hold regulatory status and guide healthcare providers in ensuring rights-based approaches to sexual and reproductive health.</p> <p>In the justice sector, a policy proposal was formulated based on findings from a national diagnosis on legal capacity restriction proceedings. Validated through consultation with OPDs and key stakeholders, this proposal targets improvements in procedures governed by Article 37 of the Civil and Commercial Code. The recommendations aim to reinforce due process guarantees and align legal frameworks with CRPD standards.</p> <p>Efforts also extended to enhancing the political and social participation of persons with disabilities. A mapping of national norms revealed barriers and gaps in current regulations. Based on this, recommendations were developed to improve digital inclusion, accessibility, and participation mechanisms, with the support of multi-stakeholder roundtables. This participatory approach not only fostered collaboration among public and civil society actors but also informed regulatory proposals aimed at ensuring the inclusion of persons with disabilities in civic life.</p> <p>Moreover, practical tools were created to support health professionals in designing accessible information on healthcare rights for persons with disabilities. These tools facilitate the implementation of inclusive service delivery practices and contribute to reducing barriers in access to health services.</p> <p>By integrating evidence-based analysis, inclusive consultations, and regulatory development, the initiatives under this output have laid a solid foundation for legislative and policy reforms that uphold the rights of persons with disabilities and foster institutional change across health and justice systems.</p>

Please add new tables if the programme has more outputs under 2.1

<b>Output 2.2</b>
Proposal for developing multi-stakeholder accessible platforms with a people-centered approach for ensuring effective and meaningful participation of OPDs, service delivery and data collection for the design, reform, and implementation of disability inclusive laws policies elaborated.
<b>Brief narrative description on completion of output</b>
<p>Initial work involved the participatory development and validation of accessibility proposals with OPDs and legal professionals with disabilities. These proposals led to the creation of general guidelines for improving digital platforms. A pilot implementation process was initiated in collaboration with the Council of the Judiciary of the City of Buenos Aires, involving direct coordination with the IT department. This process resulted in the first set of accessibility improvements, with a commitment to expand efforts in subsequent stages.</p> <p>In parallel, multi-stakeholder coordination mechanisms were established to enhance inclusive policymaking, data collection, and monitoring. One of the key achievements was the mapping of legal capacity solutions and the identification of structural barriers to justice, particularly for persons with intellectual and psychosocial disabilities. This mapping served as a baseline for future reforms and included the compilation of best practices and innovative approaches.</p> <p>The program also focused on advancing the inclusion of Indigenous persons with disabilities through targeted initiatives in the Gran Chaco region. A legal workshop engaged Indigenous women and children with disabilities, uncovering legal and social barriers while promoting their participation in community decision-making. These findings informed a preliminary mapping of advocacy actors and contributed to localized awareness strategies.</p> <p>In Rivadavia Banda Norte, a focused awareness-raising strategy was deployed, incorporating community diagnostics, social media, community radio, and accessible outreach materials. These actions helped ensure that persons with disabilities, particularly in rural and Indigenous communities, received information about their rights and legal resources in culturally and linguistically appropriate formats.</p> <p>To foster digital equity, a co-designed Guide on Assistive Technologies and Universal Design was developed through consultations with experts with disabilities. This guide offers technical recommendations to enhance accessibility in visual, auditory, intellectual, and psychosocial dimensions, promoting inclusive access to digital services and political participation.</p> <p>Finally, the creation of a Federal Replicability Manual and a Guide to Access to Justice for Persons with Disabilities consolidated lessons learned and good practices into scalable tools. These resources are designed to inform future initiatives and support institutional replication across diverse regions and government levels.</p> <p>Together, these advancements have strengthened the foundations for inclusive governance, expanded the role of OPDs in shaping public policies, and improved access to justice and political participation for persons with disabilities. The sustained engagement of stakeholders and the development of adaptable tools contribute to long-term systemic transformation towards equity and inclusion.</p>

*Please add new tables if the programme has more outputs under 2.2*

<b>Output 3.1:</b>
The inclusion of disability in the planning, implementation and monitoring of United Nations development activities is strengthened.
<b>Brief narrative description on completion of output</b>
<p>UN agencies contributed to the update of the Common Country Analysis (CCA) and drafting for the new UN development framework by providing key information on the situation of persons with disabilities and the challenges they face in exercising their rights and how UN cooperation could address them in a new programming cycle. This marked an important step in aligning UN strategies with the principles of the Convention on the Rights of Persons with Disabilities (CRPD) and the Sustainable Development Goals (SDGs).</p> <p>A virtual workshop was held within the framework of the CCA process to engage directly with the persons with disabilities community. This consultation enabled the collection of first-hand experiences and insights, ensuring that persons with disabilities were meaningfully involved in shaping strategic cooperation frameworks and sustainable development policies. The initiative promoted participatory decision-making and reinforced the commitment to inclusive and human rights-based development strategic planning.</p> <p>Building on these inputs, a policy document was developed to provide technical recommendations and practical tools for mainstreaming the disability perspective throughout the UN's strategic actions in Argentina. This document offers a reference framework for incorporating accessibility measures and rights-based approaches in policy design, implementation, and evaluation across the UN system.</p> <p>However, challenges remain in achieving consistent cross-sectoral engagement. For instance, planned technical support for integrating disability perspective in Argentina's participation in the 2024 Future Summit could not be provided due to the government's decision not to engage in the platform. This underscores the ongoing need for sustained advocacy and dialogue to secure broader commitment to disability-inclusive development.</p> <p>Despite these limitations, the groundwork laid under this output has advanced the institutionalization of disability inclusion within the UN Country Team's actions and UNDIS implementation. Through participatory consultations, knowledge production, and alignment with human rights standards, these efforts have enhanced policy coherence and stakeholder engagement in the pursuit of more inclusive governance frameworks.</p>

**Output 3.2:**

Monitoring and follow-up mechanisms for the SDGs and the recommendations of treaty bodies and other universal human rights procedures, especially the CRPD, are supported to promote disability inclusion and the participation of persons with disabilities and their organizations.

**Brief narrative description on completion of output**

The UN System in Argentina submitted key reports and inputs to various international human rights mechanisms, including the Universal Periodic Review (UPR), the CEDAW Committee, the CRPD and CRC Committees. These included both public and confidential contributions, focusing on the status of the rights of persons with disabilities in the country. Constructive engagement was also maintained with UN Special Procedures, including the Special Rapporteurs on debt and on extrajudicial, summary, or arbitrary executions, addressing the implications of their mandates on persons with disabilities.

Recognizing the need to strengthen national monitoring systems, the project prioritized building the capacities of organizations of persons with disabilities (OPDs) to engage meaningfully in these mechanisms. Training activities enabled OPDs to better understand existing human rights and SDG follow-up procedures, while also fostering the exchange of tools and strategies among organizations to support increased participation. These initiatives addressed existing gaps in participation and underscored the importance of involving persons with disabilities in monitoring and accountability frameworks.

In parallel, the programme contributed to improving national monitoring tools by proposing adaptations to SDG indicators and reporting mechanisms. These recommendations emphasized the integration of a social model of disability and the development of inclusive indicators, disaggregated data, and participatory evaluation processes. Technical proposals were submitted to the National Council for the Coordination of Social Policies (CNCPS) and the SDG Technical Commission, providing inputs to harmonize disability inclusion in national frameworks.

By advancing these strategies, the project helped position disability as a cross-cutting dimension in the monitoring of human rights obligations and development commitments. These efforts contribute to ensuring that national reporting processes reflect the lived experiences of persons with disabilities and support evidence-based, inclusive policymaking.

### 3. Equality between men and women

Please describe how the programme ensured equality between men and women by responding to the questions below.

<b>How did the programme consider differences in the barriers faced by men and women with disabilities?</b>
<p>The programme was conceived and implemented from an intersectional perspective, acknowledging that women and girls with disabilities, as well as other gender identities, experience deeper and more complex barriers than men with disabilities. This understanding informed all stages of the intervention and guided efforts to address the most persistent challenges they face, particularly in accessing sexual and reproductive health services, exercising legal capacity, and participating in justice, political, and social systems.</p> <p>A central focus was placed on the barriers encountered in medical and institutional settings, where physical inaccessibility and communication obstacles frequently limit the ability of women with disabilities to exercise autonomy and secure their rights. Police stations, hospitals, and legal institutions often fail to provide appropriate accommodation, reinforcing exclusion. Moreover, the lack of training among staff and the prevalence of discriminatory attitudes further exacerbate the marginalization of these groups. Attitudinal bias and institutional obstacles limit the recognition of women with disabilities as rights holders and obstruct mechanisms for filing and processing complaints.</p> <p>To address these barriers, the programme developed informational resources in accessible formats, conducted training with a gender-sensitive approach for health providers and justice actors, and created tools for legal empowerment. These initiatives were supported by participatory processes, ensuring the inclusion of voices from women with intellectual, psychosocial, and Indigenous backgrounds, particularly in underserved regions like Gran Chaco and Jujuy. Strategies such as community workshops, social media outreach, and radio campaigns promoted awareness and fostered engagement.</p> <p>Simultaneously, efforts to improve access to justice and civic participation were strengthened by identifying legal and procedural shortcomings and proposing reforms. The programme emphasized the need for safeguards and reasonable accommodations in judicial processes to enable women with disabilities to participate fully and autonomously. Across all components, gender considerations were integrated to ensure that interventions addressed not only functional limitations but also the compounded effects of social, cultural, and institutional discrimination.</p> <p>Through this comprehensive approach, the programme aimed to dismantle the systemic inequalities that uniquely impact women with disabilities, ensuring their inclusion as central actors in the design, implementation, and evaluation of policies and services.</p>
<b>In what way did the programme advance gender equality?</b>

The programme advanced gender equality by consistently applying a gender-sensitive and disability-inclusive lens across all stages of design, implementation and evaluation. Acknowledging the compounded discrimination experienced by women, girls and persons with gestational capacity with disabilities, the initiative prioritized actions that addressed structural, attitudinal and institutional barriers across multiple sectors.

In the health sector, it developed and distributed policy documents, training resources and accessible materials specifically designed to address the needs of women with disabilities. These included guidelines to prevent coercive reproductive practices, improve counseling services and ensure access to voluntary and legal abortion. Training was delivered to healthcare teams in various regions, focusing on inclusive and rights-based approaches that respond to gender-specific challenges.

In the justice system, the programme identified and documented the legal and institutional obstacles faced by women with intellectual and psychosocial disabilities. Through participatory workshops and community engagement activities, especially in Indigenous regions such as Gran Chaco, it promoted legal empowerment and increased awareness of rights.

Digital equity was strengthened through the creation of a guide on assistive technologies and universal design, offering practical tools to enhance access to information, services and political participation for women with disabilities. This contributed to reducing the digital divide and expanding opportunities for civic engagement.

Internally, the initiative promoted gender balance within its operational structure by encouraging the recruitment of women with disabilities, addressing historical labor inequalities and ensuring representation in decision-making and technical roles.

By embedding gender equality throughout its core strategies, the programme contributed to dismantling discriminatory systems, promoting autonomy and reinforcing the development of policies and services that reflect the diverse realities of women with disabilities.

**How have the specific actions undertaken by the programme contributed directly to the empowerment of women and girls with disabilities? Please include here baseline and end line data on how women with disabilities were included and impacted while implementing the project. Kindly note that in the expenditure section below projects are requested to state the overall funding spent on these activities.**

The programme advanced the empowerment of women and girls with disabilities by strengthening their autonomy, access to rights, and active participation in decision-making spaces. Through policy development, training, and awareness-raising initiatives, the project equipped women and girls with disabilities with tools and knowledge needed to exercise their rights freely and independently, in line with CRPD and CEDAW obligations and other international human rights obligations.

One of the most significant contributions was the development of policy documents and training materials aimed at ensuring that sexual and reproductive health services are accessible, respectful, and human rights-based. The training of health professionals in the Gran Chaco region, along with the creation of easy-to-read educational materials on sexual and reproductive rights, provided concrete resources for women and adolescent girls with disabilities to make informed decisions about their bodies and reproductive health. By ensuring the availability of accessible information and services, the programme directly contributed to reducing barriers to healthcare autonomy.

In the area of justice and legal capacity, the programme strengthened the legal empowerment of women with disabilities, particularly those with intellectual and psychosocial disabilities. The participatory development of legal tools and the analysis of barriers in legal capacity determination procedures highlighted the systemic inequalities faced by women with disabilities in accessing justice. Additionally, the legal workshop for Indigenous women with disabilities in Gran Chaco provided a space to discuss rights, identify barriers, and develop community-based strategies for advocacy, reinforcing their agency in legal and social matters.

Furthermore, the programme promoted inclusive narratives by ensuring that knowledge products and awareness campaigns were developed with a feminist and intersectional approach. The involvement of women experts with disabilities in the creation of these materials not only centered their voices in the discourse but also contributed to shifting public and institutional perspectives on gender and disability.

By amplifying the voices of women and girls with disabilities, fostering knowledge-sharing, and promoting structural changes in health and justice systems, the programme strengthened their ability to claim their rights, challenge discriminatory practices, and actively participate in shaping inclusive policies.

**How did women with disabilities and women led OPD groups (informal/formal) participate in the implementation?**

Women with disabilities and women-led OPD groups actively participated throughout the programme's implementation. They were involved in consultation processes, co-design of activities, and validation of knowledge products, ensuring that their perspectives informed the development of guidelines, training materials, and advocacy tools. Their engagement was particularly relevant in initiatives addressing access to justice and sexual and reproductive health, where they contributed lived experiences and expertise to shape inclusive approaches. Women-led OPDs also played a key role in outreach and mobilization at subnational levels, facilitating participation from diverse territories and strengthening peer-to-peer learning within the disability movement.

#### 4. Full and effective participation of persons with disabilities

Please describe how the programme ensured the full and effective participation of persons with disabilities and their representative organizations by responding to the questions below.

**How did the programme consider the barriers faced by persons with disabilities for effective participation?**

The programme addressed the barriers faced by persons with disabilities for effective participation by incorporating accessibility and inclusion measures across its activities. This included providing hybrid and virtual participation options to reach all provinces, ensuring accessible formats for materials, and using clear and inclusive language. Activities were co-designed with OPDs to reflect diverse needs and experiences, particularly those of women with disabilities, and to adapt content and methodologies accordingly. The programme also fostered safe and participatory spaces where persons with disabilities could engage on equal terms with other stakeholders, helping to overcome geographic, communication, and institutional barriers.

**How were persons with disabilities involved in the programme's governance as well as in the planning, implementation, monitoring and evaluation phases?**

Persons with disabilities, through their representative OPDs, were engaged in the programme's governance and throughout its cycle. They participated in advisory and decision-making spaces, contributing to the definition of priorities and the design of activities.

During planning and implementation, OPDs co-developed training content, policy guidelines, and advocacy strategies, ensuring alignment with the lived experiences and needs of persons with disabilities and CRPD principles

Reasonable accommodations were ensured in all activities, including Argentine Sign Language (LSA) interpretation, captioning, plain language, adaptations for neurodivergent participants, and careful consideration of the number and type of participations to enable meaningful involvement. They also played an active role in monitoring progress, providing feedback on outputs, and validating knowledge products. In the evaluation phase, their perspectives were gathered to assess relevance, effectiveness, and sustainability, reinforcing a participatory and rights-based approach.

**How have the specific actions undertaken by the programme contributed directly to the full and effective participation of persons with disabilities?**

The programme's actions directly supported the full and effective participation of persons with disabilities by creating accessible, inclusive, and co-designed spaces for engagement. Training processes, policy guidelines, and advocacy tools were developed in collaboration with OPDs and persons with disabilities, ensuring that content reflected their priorities and realities. Activities were implemented with reasonable accommodations —including Argentine Sign Language (LSA) interpretation, captioning, plain language, and adaptations for neurodivergent participants— to remove communication and participation barriers. The programme also ensured diverse and balanced representation in all activities, engaged OPDs in governance and decision-making processes, and facilitated their involvement in planning, implementation, monitoring, and evaluation. These measures strengthened the capacity of persons with disabilities and their representative organizations to influence policy, service delivery, and inclusive governance practices.

Please use the table below to summarize the details of OPDs the programme has engaged with.

Type of OPD (Umbrella, regional, national, specific disability type)	Contact details (Email address of contact person of the organization and website where available)	Overall OPD leadership (disaggregated according to sex and type of disability)	OPD representatives engaged in the programme (disaggregated according to sex and type of disability)

#### 4. Ensuring the inclusion of marginalized and underrepresented groups of persons with disabilities

Please describe how the project ensured inclusion of marginalized and underrepresented groups of persons with disabilities by responding to the questions below.

**How did the programme consider and identify marginalized and underrepresented groups of persons with disabilities? For example by considering type of disability, gender, age, location, minority status or other contextually appropriate demographic factors.**

The programme considered and identified marginalized and underrepresented groups of persons with disabilities through a situational analysis conducted during the inception phase. This analysis, carried out in partnership with the Disability Observatory of the National University of Quilmes —a public university committed to inclusion for over a decade— used a participatory methodology to identify both the groups and the approaches needed to reach them. It highlighted the need to prioritize persons with psychosocial and intellectual disabilities, women with disabilities, and Indigenous persons with disabilities, particularly those living in northern Argentina. The process also took into account factors such as age, geographic location, and minority status, ensuring that intersectional considerations informed programme design and outreach strategies.

Additionally, the programme considered other UN interagency efforts and lessons-learned to establish synergies for a more effective cooperation and build on what has been done. For instance, Spotlight initiative that has addressed violence against women, particularly women with disabilities and Gran Chaco Initiative that has focused on indigenous peoples rights.

**In what way did the programme advance equity regarding rights and needs of most marginalized groups?**

The programme advanced equity for the most marginalized groups by generating participatory knowledge products that provided data and visibility on their situation, addressing critical information gaps. It supported the creation of alliances between civil society organizations from different territories and OPDs, helping to mainstream disability perspectives in regions where OPDs are scarce and often weak, particularly in northern Argentina. Efforts were made to ensure the participation of persons with psychosocial and intellectual disabilities in all activities and to consider their needs in the design of products and interventions. For girls, adolescents, and women with disabilities, the programme integrated a gender perspective throughout its actions and implemented activities in sexual and reproductive health that particularly benefited this group.

**How have the specific actions undertaken by the programme contributed directly to the inclusion of marginalized and underrepresented groups of persons with disabilities?**

The programme contributed to the inclusion of marginalized and underrepresented groups of persons with disabilities by implementing actions that addressed both visibility and participation barriers. Participatory knowledge products were developed to generate data on groups whose situations had not been previously documented, including persons with psychosocial and intellectual disabilities, women with disabilities, and Indigenous persons with disabilities in northern Argentina. The programme supported alliances between local civil society organizations and OPDs to strengthen disability perspectives in regions with limited organizational presence. Reasonable accommodation was ensured in all activities, and targeted efforts were made to include these groups in consultations, training, and advocacy initiatives. The integration of a gender perspective and the implementation of sexual and reproductive health activities further contributed to the meaningful participation and representation of girls, adolescents, and women with disabilities.

**How did marginalized and vulnerable persons with disabilities and these groups led by marginalized and vulnerable persons with disabilities (informal/formal) participate in the implementation?**

Marginalized and vulnerable persons with disabilities, along with groups led by them, participated actively in the programme's implementation through consultations, co-design processes, and validation of activities and outputs. Their involvement was ensured in training sessions, policy discussions, and advocacy initiatives, with reasonable accommodations such as Argentine Sign Language (LSA) interpretation, captioning, plain language, and adaptations for neurodivergent participants. Particular efforts were made to include persons with psychosocial and intellectual disabilities, women with disabilities, and Indigenous persons with disabilities from northern Argentina, ensuring their perspectives informed the development of knowledge products, guidelines, and outreach strategies. These groups also played a role in mobilizing participation at the subnational level and strengthening alliances between local civil society organizations and OPDs to amplify the voice and representation of marginalized communities.

**Please use the table below to list the type of marginalized and underrepresented groups of persons with disabilities who were included so far in programme implementation.**

## 6. Partnership-Building

***Please provide a narrative on how the programme has contributed to greater UN inter-agency collaboration to advance the rights of persons with disabilities in the country.***

The programme contributed to greater UN inter-agency collaboration in advancing human rights of persons with disabilities by engaging all UN agencies in Argentina, both through information-sharing and participation in activities specifically designed for them. Effective coordination among UNFPA, UNDP, PAHO/WHO, OHCHR, and UNICEF enabled efficient use of resources, maximizing each agency's mandate to carry out joint actions and mainstream disability perspectives. This collaboration facilitated the identification of joint action lines and synergies, the development of shared and agency-specific materials to promote human rights of persons with disabilities, and the integration of disability inclusion across other projects and sectors. The programme has set the foundations for UNDIS implementation. By providing technical expertise, fostering inclusive

consultation processes, and promoting unified action across UN agencies, the initiative has helped integrate a disability-inclusive approach into UN programming. This coordinated effort has enhanced the UN's capacity to support government institutions and organizations of persons with disabilities, contributing to more coherent and impactful progress toward the full realization of human rights of persons with disabilities in Argentina.

It has also fostered successful inter-agency working strategies that can be replicated in future initiatives beyond the disability agenda, strengthening the UN system's collective capacity to advance inclusion.

***Please describe the different stakeholders (for example Government departments, UN entities, OPDs and Civil Society) involved and how they worked together.***

The programme involved a broad range of stakeholders, including government institutions at national and subnational levels, UN entities, organizations of persons with disabilities (OPDs), and other civil society organizations. Key government counterparts and authorities from justice, health, and disability have been engaged in dialogue, co-designed of activities, and validation of policy and practice guidelines. For instance, the Ministry of Health through the Sexual Reproductive health directorate, Human Rights Secretariat and the National Disability agency coordinated different activities throughout the programme and established work alliances and partnerships to ensure disability inclusion in public policies drafting.

UN agencies —UNFPA, UNDP, PAHO/WHO, OHCHR, and UNICEF— collaborated closely, through shared planning, technical exchanges, and coordinated implementation aligning mandates and resources to implement joint actions to mainstream disability perspectives. OPDs played a central role in representing the voices of persons with disabilities, contributing their expertise and experience to planning, implementation, and monitoring. Civil society organizations, particularly those from underrepresented regions, partnered with OPDs to strengthen outreach and inclusion of marginalized groups.

Additionally, the programme also produced policy and practice guidelines on legal capacity and sexual and reproductive health for persons with disabilities, co-created with OPDs and executive and judicial authorities from different sectors, which can serve as models for inclusive service provision.

This multi-stakeholder approach ensured that activities were informed from diverse perspectives and that responsibilities were shared to maximize impact.

***How has the programme contributed to generating new knowledge on how best to promote the rights of persons with disabilities to support policy and system changes?***

The programme generated new knowledge to promote the rights of persons with disabilities through pioneering research in Argentina on legal capacity and the conditions for independent living. Notably, the analysis of judicial cases concerning determination or restriction of legal capacity provided critical evidence to inform strategies for improving the implementation of laws protecting the rights of persons with disabilities. Similarly, the study on barriers and challenges to accessing sexual and reproductive health services informed the joint development —with the national government under the previous administration ending in 2023— of protocols and technical notes to safeguard these rights. These and other research initiatives produced by the programme created an evidence base to support policy and system changes aimed at advancing disability inclusion.

***Please also describe in this section any unique expertise and products developed by the programme that could be used to support other countries within a south-south cooperation framework***

The programme developed unique expertise and knowledge products that could be adapted and applied in other countries through south-south cooperation. These include innovative methodologies for participatory research on legal capacity and independent living, as well as tools for analyzing judicial cases to inform human rights-based legal reforms. The programme also produced policy and practice guidelines on sexual and reproductive health for persons with disabilities, co-created with OPDs and health authorities, which can serve as models for inclusive service provision. Furthermore, the SDG 16.3.3 indicator methodology for measuring access to justice was adapted to incorporate and document the perspectives of persons with disabilities. In addition, it developed guidelines for accessible communication and for improving the digital accessibility of justice portals. In a global context where judicial procedures are increasingly shifting to digital platforms, ensuring accessibility for both lawyers with disabilities and users of justice services with disabilities is essential. Given the similarities in technology used across countries, these guidelines can be transferred to other contexts with the necessary adjustments and adaptations. The inter-agency strategies, capacity-building materials, and participatory approaches used to strengthen the role of OPDs and integrate disability perspectives into justice, health, and governance systems also provide transferable practices for similar initiatives elsewhere.

## 7. Creation of knowledge products

### ***How has the programme contributed to generating new knowledge on how best to promote the rights of persons with disabilities to support national level policy and system changes?***

The programme contributed to generating new knowledge to promote the rights of persons with disabilities and inform national policy and system changes through pioneering research and evidence-based tools. Studies on legal capacity and independent living—including the first analysis in Argentina of judicial cases on the determination or restriction of legal capacity— provided critical insights to strengthen the implementation of laws protecting these rights. Research on barriers to accessing sexual and reproductive health services informed the joint development, with the previous national administration ending in 2023, of protocols and technical notes to ensure inclusive service provision. The programme also developed guidelines for accessible communication and for improving the digital accessibility of justice portals, addressing a growing need as judicial procedures migrate to online platforms.

These knowledge products, co-created with OPDs and relevant authorities, filled key information gaps and offered practical models to guide rights-based reforms and strengthen inclusive governance at the national level.

### ***Please also describe in this section any unique expertise and products developed by the programme that could be used to support other countries within a south-south cooperation framework***

The programme developed unique expertise and knowledge products with strong potential for adaptation and use in other countries through south-south cooperation. These include innovative participatory research methodologies on legal capacity and independent living, as well as analytical tools for reviewing judicial cases to inform rights-based legal reforms. The programme also produced a comprehensive set of policy and practice guidelines on sexual and reproductive health for persons with disabilities, co-created with OPDs and health authorities, along with technical notes and protocols that provide a practical framework for inclusive service delivery in this area. In addition, it developed guidelines for accessible communication and for enhancing the digital accessibility of justice portals—an increasingly critical area as judicial procedures move online globally. These guidelines aim to ensure that both legal professionals with disabilities and justice service users with disabilities can access and navigate digital platforms on equal terms and it could be implemented in other contexts with appropriate adjustments.

Additionally, the programme has created trainings for UN staff on accessible communication and disability mainstreamed on UN strategic analysis and strategic programming such as CCA and UNSDF that could be considered as a best practice for other UN Systems.

The inter-agency strategies, capacity-building materials, and participatory approaches used to integrate disability perspectives into justice, health, and governance systems also provide replicable practices that can strengthen disability inclusion efforts in other countries.

*Please list type of knowledge products the programme has developed using the table below .*

<b>Name of product and type of product</b> (report, guidelines, assessments etc)	<b>Purpose</b> Describe what was the purpose of the product	<b>Process</b> Describe who participated in the development of product (OPDs, NGOs, Academia etc.) and the different stages of development	<b>Link/attachment</b>	<b>Accessible formats</b>	<b>Validation</b> Has the product been validated by national actors. If yes by whom?
Promoting Sexual and Reproductive Health for Persons with Disabilities in Argentina	Systematize the UNFPA Argentina initiative within the framework of the United Nations Partnership on the Rights of Persons with Disabilities Project.	The systematization of the UNPRPD initiative in Argentina was authored by disability specialist Cecilia González Bellande. The development followed a two-stage strategy (2021–2024), starting with a situational diagnosis by the University of Quilmes (UNQ) and followed by a	<a href="https://argentina.unfpa.org/sites/default/files/publications/2025-04/FINAL%20Documento%20-%20UNPRPD.%20Versi%C3%B3n%20accesible.pdf">https://argentina.unfpa.org/sites/default/files/publications/2025-04/FINAL%20Documento%20-%20UNPRPD.%20Versi%C3%B3n%20accesible.pdf</a>		

		<p>participatory implementation phase.</p> <p>The process involved close collaboration between UNFPA, other UN agencies (UNDP, PAHO/WHO, UNICEF, OHCHR), and key OPDs such as REDI and Enlaces Territoriales para la Equidad de Género (<i>Sordas sin Violencia</i>). Program for trainers of trainers on legal capacity	Design training of trainers' programs on the exercise of legal capacity focused on intellectual and psychosocial disabilities with human rights and gender approach to (1) judicial officials at the federal level to comply with art. 12 of the CRPD and (2) health effectors.	The Training of Trainers Programme on Legal Capacity was developed by legal and disability rights expert Malena Correa, with validation and conceptual contributions from REDI. The process included review of legal standards, curriculum design, accessibility strategies, and coordination with public institutions such as the Ministry of Health, Ministry of Justice, and UN agencies. OPDs were involved in reviewing the materials and identifying training needs.	<a href="#">Program for trainers of trainers on legal capacity. ## 8. Communications materials

<b>Branding: Were there any visual assets developed? (For example, banners, notebooks, social media cards).</b>
Visual assets were developed for the different campaigns. Additionally, a landing page with all the materials produced by the programme is online and its design was considered following accessible communication guidelines. <a href="https://inclusionydiscapacidad.ar/">https://inclusionydiscapacidad.ar/</a>
<b>Dissemination: What tools work best for communication and dissemination, and what don't? (For example, dissemination across social media platforms, which platforms have worked best from your experience and why do you think that is the case) Have you collaborated with any 'influencers' or organizations in the country for cross-promotion of the project, civil society or partner organizations? If yes, could you share their handles? Is there a dedicated webpage section or Flickr album.</b>

During 2022 and 2023, social media campaigns were carried out in Argentina around the commemoration of the International Day of Persons with Disabilities (3 December) and the International Human Rights Day (10 December). All SNU agencies and Organizations of Persons with Disabilities (OPDs) participated actively, replicating the messages and communication products that had been jointly developed for both dates. All communication and visibility materials produced during the period were fully accessible.

In addition, comprehensive training sessions were provided to all communications teams within the SNU, and a jointly-developed manual was created to harmonize and strengthen the system-wide approach to disability-inclusive communication in Argentina.

The project also developed a dedicated landing page integrated into the UN Argentina website. This platform is designed to centralize all project-related products and activities, ensuring accessibility, visibility, and long-term availability with minimal maintenance needs. Importantly, this platform not only preserves the institutional memory of the project but also functions as an open repository that could be used to scale good practices and foster inter-institutional cooperation. The landing page is aimed to serve as a key resource for all stakeholders, including agencies across the UN Argentina system, facilitating synergies with their initiatives and other projects, while promoting the effective mainstreaming of disability inclusion. This digital platform not only preserves the institutional memory of the project but also functions as an open repository that enables the scaling of good practices and promotes inter-institutional cooperation.

**Media: Has there been any media coverage? If yes, what were the main obstacles when liaising with the media? Has there been any media request for interviews?**

No, there wasn't any media coverage.

*Please also list the type of communications material using the table below.*

## 9. Challenges

**Please describe any major challenges that arose during the programme implementation and how this affected the programme implementation.**

During the years of GDF programme implementation in Argentina, the initiative faced several challenges that tested the adaptability and resilience of all parties involved. The programme had to address challenges related to changes in government management at the national and subnational levels. These changes required additional efforts from the UN agencies to meet intervention deadlines and also posed additional challenges regarding strategies to ensure the sustainability of support lines. Some of these efforts involved the need for continuous monitoring, rescheduling of dates, and so on. Indeed, the programme's role in supporting management changes was highlighted in an external evaluation last year. Similarly, it is worth noting the inherent advantages for agencies to be able to implement the program directly, thereby ensuring the continuity of processes in the context of constant institutional change. The UNRPD team, government and OPDs and civil society actors, maintain a constructive approach in all instances of dialogue, sharing needs and concerns to move forward and replan when the situation required it. A key challenge during programme implementation was government authorities' changes, especially in the National Disability Agency (ANDIS). Additionally, one of the biggest challenges was the new administration priorities, which

brought significant shifts in the institutional approach to inclusion and persons with disability rights and tackled some of the sustainability policies that were supported during the programme. The transition period extended for more than six months before new authorities were appointed, and disability policies were subsequently placed under the health portfolio, limiting the comprehensive, cross-sectoral perspective developed in previous years. This restructuring, combined with the absence of formally designated focal points for the project in both the justice and health sectors until the programme's conclusion, hindered consistent institutional engagement. In parallel, macroeconomic instability, marked by high inflation and currency devaluations, reduced the real value of available resources and required adjustments to planned activities, affecting the pace and scope of implementation.

**Please could you share what action you took to address identified challenges?**

To address these challenges, the programme strengthened its subnational work, with particular emphasis on northern Argentina and the provinces comprising the Gran Chaco region, which had been identified as a priority area. Efforts were also directed towards enhancing outreach and collaboration with civil society, in order to build on the programme's earlier achievements and sustain impact. This included promoting the implementation of existing, still-valid guidelines on sexual and reproductive health for persons with disabilities, as well as leveraging the findings from the analysis of access to justice to inform ongoing advocacy and capacity-building initiatives.

Moreover, partnerships and alliances with judiciary were essential to continue and give sustainability to the work on legal capacity.

Open dialogue and flexibility in planning made it possible to overcome the obstacles imposed by the context and achieve the necessary coordination both within and outside the UN System. In this regard, the RCO played a key leadership role for action coordination, political and institutional assessment and reconduct actions if needed.

Additionally, the Joint Programme demonstrated strong inter-agency coordination, grounded in close collaboration among UN agencies. This inter-agency cooperation was a key strength that supported programme coherence and implementation throughout its duration. Importantly, this inter-agency coordination enabled a comprehensive and holistic vision of the programme, as well as detailed follow-up of activities, which in turn facilitated timely collaboration to address the challenges identified and ensured consistent progress despite institutional and contextual constraints.

It should be mentioned that throughout the programme, we have worked very diligently with all the partners involved to ensure the sustainability of the actions. The focus on strengthening governmental and non-governmental institutional capacities has been key and will continue to be so in ensuring progress on human rights of persons with disabilities.

## 10. Project Sustainability

**Please provide an overview of initiatives planned by various stakeholders in order to follow up on activities initiated by the programme.**

The programme has been working from the outset to ensure the sustainability of the actions once the programme closes. Despite current political challenges that may threaten the sustainability we have sought, we believe that much of the supported work will remain relevant in the country. On the one hand, we have made a significant investment in strengthening the capacities of officials at the national and subnational levels. These capacities have been consolidated and are part of the country's human capital, which will contribute to advancing disability agenda, regardless of changes in administration or political affiliation.

At the subnational level, several governments have expressed their commitment to continue the training of health teams for the provision of sexual and reproductive health care to persons with disabilities. This includes, for example, the province of Jujuy, where there is strong interest in sustaining these initiatives, subject to the availability of financial resources.

In the area of access to justice, the Council of the Judiciary of the Autonomous City of Buenos Aires has implemented an initial set of accessibility adjustments to its online justice portal and has developed guidelines for a second phase, to be implemented according to available resources. Building on this progress, the Public Defender's Office adopted the Council's experience as a reference and subsequently redesigned its own institutional portal to make it accessible for persons with low vision and persons with visual disabilities. This replication of good practices demonstrated

increasing institutional commitment to accessibility standards and contributed to strengthening long-term sustainability.

Moreover, strengthening the capacities and work of OPDs, especially those belonging to unrepresentative vulnerable groups, has enhanced its organizational and advocacy skills. The programme has fostered collaboration and support between OPDs that will continue

The programme has supported OPDs skills in human rights advocacy, public policy analysis and monitoring of the Convention on the Rights of Persons with Disabilities (CRPD), in order to be engaged meaningfully with decision-makers.

Additionally, the programme has worked to build the capacity at the UN System to ensure OPDs are meaningfully consulted and represented in cooperation processes, inter-agency coordination spaces, and development programs, with reasonable accommodations and accessible formats that are now part of UN guidelines.

these actions empower OPDs to act as strong, autonomous actors and key partners in advancing the rights of persons with disabilities.

The programme has also fostered collaboration among OPDs, civil society, government institutions, and UN agencies to share knowledge, amplify voices, and promote coordinated action that remains as an asset for cooperation on disability projects or initiatives.

These are illustrative examples of a broader range of follow-up initiatives by various stakeholders, which aim to build on the programme's achievements and ensure the continued advancement of disability inclusion.

**Please outline how the medium-to-long term sustainability of the work initiated by the project will be ensured after the end of the Project.**

The medium-to-long term sustainability of the work initiated by the project is supported by the institutionalization of key outputs and the strengthened capacities of participating stakeholders. Guidelines, protocols, and technical notes developed during the programme —including those on sexual and reproductive health for persons with disabilities, accessible communication, and digital accessibility of justice portals— remain in force and can be applied independently by relevant institutions. The active engagement of subnational governments, particularly in priority regions such as the Gran Chaco, and the strengthened alliances between OPDs, civil society organizations, and public sector actors provide a foundation for continued implementation. Furthermore, the participatory methodologies, inter-agency strategies, and knowledge products generated by the project are designed for easy adaptation and replication, enabling their use in future initiatives and ensuring that the progress made can be sustained and expanded over time.

## 11. Risk Reporting

*Please describe any risks experienced during the programme's implementation and how these were managed.*

Type of risk* (Contextual, programmatic, institutional)	Risk	Occurrence (Y/N)	Impact on result	Mitigation strategies	Risk treatment owners
Contextual	Change of government leading to policy shifts and delays in appointing authorities, limiting cross-sectoral disability policies	Y	High – hindered institutional coordination and slowed planned activities	Strengthened subnational engagement, especially in priority regions; enhanced collaboration with civil society to sustain impact	UN agencies, subnational governments, OPDs
Contextual / Programmatic	Macroeconomic instability (inflation, currency)	Y	Medium – required adjustments to planned activities and timelines	Reprioritization of activities, efficiency measures, and resource reallocation	UN agencies, implementing partners

	devaluation) reducing real value of resources				
Institutional	Lack of formally appointed focal points in justice and health sectors	Y	High – reduced direct coordination for specific outputs	Worked with existing technical teams and alternative institutional counterparts; leveraged inter-agency collaboration	UN agencies, technical teams in ministries
Programmatic	Limited OPD presence and capacity in certain regions (e.g., northern Argentina)	Y	Medium – required additional efforts to ensure participation and representation	Capacity-building activities, strengthening alliances between OPDs and civil society in target regions	UN agencies, OPDs, civil society partners

\* Please specify here the type of risk and refer to the following definitions:

Contextual: risk of state failure, return to conflict, development failure, humanitarian crisis; factors over which external actors have limited control.

Programmatic: risk of failure to achieve the aims and objectives; risk of causing harm through engagements.

Institutional: risk to the donor agency, security, fiduciary failure, reputational loss, domestic political damage etc.

## Annex 1

<b>GDF IMPACT INDICATORS</b>
<i>Proportion of population living below the national poverty line by sex and age (SDG indicator 1.2.1) and disability.</i>
<i>Proportion of men, women and children of all ages living in poverty in all its dimensions according to national definitions (SDG indicator 1.2.2) disaggregated by disability, before and after social transfers.</i>
<i>Rates of children with disabilities out of school, rate of enrolment, attendance, promotion by grade, completion, and drop out in mainstream primary, secondary, tertiary educational institutions, vocational training, lifelong learning courses, as compared to others, disaggregated by sex, age, disability.</i>
<i>Proportion of children and young people: (a) in grades 2/3; (b) at the end of primary; and (c) at the end of lower secondary achieving at least a minimum proficiency level in (i) reading and (ii) mathematics, by sex (SDG indicator 4.1.1), age and disability.</i>
<i>Coverage of essential health services/Universal Health Coverage disaggregated as a proportion of the population, by sex, age and disability (SDG indicator 3.8.1)</i>
<i>Percentage of persons with disabilities employed as compared to other persons and to overall employment rate, disaggregated by type of employment (public, private, self-employed), age, sex and disability</i>
<i>Average hourly earnings of female and male employees, by occupation, age and persons with disabilities (SDG indicator 8.5.1).</i>
<i>SDG indicator 11.2.1 Proportion of population that has convenient access to public transport, by sex, age and persons with disabilities.</i>

<i>#Number of persons with disabilities who have undergone a CRPD aligned disability assessment and are in possession of disability certification compared to statistical estimations of the number persons with disabilities.</i>
<i>Percentage of public spending on disability rights and inclusion, as a proportion of the GDP/sector budgets, disaggregated by disability specific budget allocations and allocations within mainstream budget.</i>
<i>Increase of disability data/disaggregation (including by sex) within standard data and CRPD compliant collection processes.</i>
<i>SDG indicator 16.7.2 Proportion of population who believe decision-making is inclusive and responsive, by sex, age and population group.</i>

**Annex 2**

*GDF Outputs and outputs indicators*

**Output 1.1 - Capacity of national stakeholders, especially of key duty bearers and rights holders, is enhanced, to ensure more effective contributions towards disability inclusive policies, systems and - for the implementation of the CRPD and SDGs.**

1.1.1 # of trainings (disaggregation by type of capacity building<sup>1</sup>) developed and delivered in the GDF programme. (Disaggregated by topics<sup>2</sup>)

1.1.2 # of participants (disaggregated by type of stakeholder<sup>3</sup>) disaggregated by sex, disability, rural/urban participating in capacity building activities funded or provided by GDF programmes

1.1.3 # and % of participants reporting increased knowledge or capacity to design or revise policies or systems to be more disability inclusive.

1.1.4 # of OPDs (disaggregated by type umbrella- disability specific- women- underrepresented other) that benefitted from capacity building activities (type of activities<sup>4</sup>) funded by GDF programmes to strengthen the capacity of organizations of persons with disabilities.

1.1.5 # of capacity building activities funded by GDF programmes, directed at women and girls with disabilities on their rights and requirements and/or directed at underrepresented groups of persons with disabilities on their rights and requirements. (disaggregated by target group)

**Output 1.2 - Knowledge products (e.g., tools and guidelines) are developed and piloted, particularly to address gaps in achieving the preconditions for disability inclusion**

1.2.1 # of knowledge products(disaggregated by type of product<sup>5</sup>/thematic focus<sup>6</sup>) developed, piloted and disseminated to the relevant stakeholders to inform inclusive practices

1.2.2 # of knowledge products developed that address gaps related to inclusion of women and girls with disabilities and/or underrepresented groups of persons with disabilities (disaggregated by thematic focus)

1.2.3 # actors involved in developing and testing of knowledge products (disaggregated by actor (GOV/NGOs/OPDs/Other)

1.2.4 # of stakeholders reporting increased or strengthened policies and systems as a result of GDF funded KM tools (disaggregated by stakeholder)

**Output 1.3 Models of good practice, learning and exchange mechanisms are developed to share country level experiences, to increase understanding, and to inform innovative practices.**

1.3.1 # of GDF Situational Analysis through multistakeholder approach

1.3.2 # of planning and processes related to GDF-funded programs and/or beyond GDF-funded programs influenced by GDF Situational Analyses findings (disaggregation by GDF -funded programmes and beyond)

1.3.3 # of mechanisms<sup>7</sup> to share and exchange learning and evidence to inform inclusive policies and systems. (disaggregated by national/ regional/global mechanism)

1.3.4 # actors involved in mechanisms to share learning and evidence to inform inclusive policies and systems disaggregated (UN/ GOV/OPDs, other)

1.3.5 # of models of good practice, learning and exchange mechanisms addressing the situation of women with disabilities and/or underrepresented groups of persons with disabilities (disaggregation women or underrepresented groups) (disaggregated by disability specific or mainstream)

**Output 2.1 – Legal frameworks and systems (i.e., laws, policies, plans, programs, services and administrative systems) addressing the preconditions for disability inclusion are newly developed, reviewed, or reformed, to be in line with CRPD standards.**

2.1.1 # of national regulatory frameworks and systems changes targeted by the GDF program disaggregated by 1) legislation/regulation, 2) policies/plans/strategies, 3) capacity building programs, 4) operational guidance/standards, 5) direct services/service overhaul/service modelling, 6) audits/reviews/assessments, 7) governmental programs, 8) administrative procedures, 9) formal monitoring and accountability mechanisms or bodies, 10) regulatory/oversite/monitoring systems, 11) financing and budgeting or 12) other (please explain)

2.1.2 # type of change (development/review/reform) in legal frameworks and systems

**Output 2.2 – Multi stakeholder participation and contribution to the design, reform, and implementation of disability inclusive laws policies and systems is enhanced**

2.2.1 # of multi-stakeholder coordination mechanisms (disaggregated formal/informal) to support legislative policy and systems changes developed or strengthened

2.2.2 # of stakeholders within each mechanism (disaggregated by type of stakeholder Gov/ UN/OPDs/other).

2.2.3 # stakeholders involved in consultation and validation processes (disaggregation by stakeholder(GOV/UN/OPDs/other)

**Output 3.1 Disability inclusion is strengthened in planning, implementation and monitoring of UN development activities at the country level including in humanitarian settings.**

3.1.1 # of Common Country Analysis (CCA) including disaggregated data and analysis of the situation of persons with disabilities.

3.1.2 # UNSDCF where disability inclusion has been mainstreamed and/or targeted.

3.1.3 # of joint programmes funded through MPTFs where the rights of persons with disabilities have been addressed (disaggregation by disability group) through collaboration with GDF programmes.

3.1.4 # Humanitarian Response Plans (HRPs) and Humanitarian Needs Overviews (HNOs) addressing persons with disability needs and rights.

**Output 3.2 – National development assessments, plans, budgets, programs and monitoring mechanisms supported under the SDG processes are designed to advance disability inclusion.**

3.2.1 # of national and subnational SDGs implementation plans integrating and mainstreaming actions towards persons with disabilities.

3.2.2 # of adopted/ implemented COVID 19 inclusive response and recovery plans and frameworks containing systematic mainstreaming of persons with disabilities including the most marginalised

3.2.3 # SDGs implementation data collection, monitoring and accountability processes assessing progress against specific disability-inclusion targets

3.2.4 # SDGs budgets/financial planning with explicit allocations to disability inclusion

**Output 3.3 – OPDs are supported to systematically engaged in the national development coordination mechanisms and accountability frameworks, (gov/UN/Independent) around SDGs and in humanitarian coordination mechanisms.**

3.3.1 # UN led national and/or regional coordination mechanisms with established consultation processes undertaken to ensure the active involvement of persons with disabilities, including through their representative organizations, in the design, implementation and monitoring of instruments for planning and implementation of UN development activities at the country level

3.3.2 # of governmental coordination mechanisms with established consultation processes undertaken to ensure the active involvement of persons with disabilities, including through their representative organizations, in the planning, implementation and monitoring of SDGs

3.3.3 # of identified persons with disabilities including through their representative organizations participating in the State's formulation/implementation of COVID-19 policy responses
