Project Title : To provide emergency protection and GBV programming & strengthen community □ based protection mechanisms through integrated protection services in Magwi Eastern Equatoria with emergency population displacements.

Allocation Type Category : Frontline services

OPS Details

Project Code :	SSD-17/P-HR-RL/103060	Fund Project Code :	SSD-17/HSS10/SA2/P/INGO/6598
Cluster :	Protection	Project Budget in US\$:	100,000.00
Planned project duration :	6 months	Priority:	
Planned Start Date :	01/08/2017	Planned End Date :	31/01/2018
Actual Start Date:	01/08/2017	Actual End Date:	31/01/2018

Project Summary:

The goal of this project is to provide emergency protection and GBV programming & strengthen community based protection mechanisms through integrated protection services in Eastern Equatoria, with emergency population displacements. The project aims at enhancing comprehensive response to the survivors of gender-based violence by improving access to protection and GBV services for IDPs and Host communities' women and children, girls and boys through activation of Community Protection Mechanisms, PFA, mapping and updating referral pathways in locations with available services to enable a functional referral system and for case workers and social workers to provide quality case management and psycho-social support including PSS and case management dedicated for children; girls and boys in extremely vulnerable situations and those facing multiple protection risks which will include skills building, and referral services. It further provides dignity kits as one of the minimum standards for prevention and response to GBV in emergencies to vulnerable women and girls of reproductive age. The project also aims to increase awareness on GBV prevention, protection and GBV services through Mass Media education (IEC materials, Radio spots) and conduct community outreach and engagement activities; catalyzing local activism to disseminate key information on GBV, including information on the availability of services, and promote positive social norms to improve the safety and well-being of women and girls.

Direct beneficiaries :

Men	Women	Boys	Girls	Total
650	2,600	1,300	1,950	6,500

Other Beneficiaries:

Beneficiary name	Men	Women	Boys	Girls	Total
Internally Displaced People	150	1,300	650	975	3,075
People in Host Communities	400	1,300	650	975	3,325
Pregnant and Lactating Women	0	0	0	0	0

Indirect Beneficiaries:

These are community members composed of Men, Women, Boys and Girls who received key awareness GBV prevention messages through mass media outside the targeted locations (Payams and Bomas) of Magwi.

Catchment Population:

Based on the 2008 Sudan Population and Housing Census Magwi have an estimated population of 169,826 with 89,878 men and 79,948 women with a total of 27,989 households but due to ongoing conflict in the region this figure might have decreased or increased again as result of population movement.

Link with allocation strategy:

The project will contribute to the allocation strategy by improving the quality of the protection response focusing on GBV. The project will carry out service mapping to strengthen the availability of capacities of services and respective partners providers who are to delivering effective services for GBV survivors including CMR and appropriate referrals of survivors will be done to access such services during case management processes.

Sub-Grants to Implementing Partners:

Partner Name	Partner Type	Budget in US\$

BACKGROUND

1. Humanitarian context analysis

Since the conflict broke out in South Sudan in December 2013, the situation of the civilian population has been characterized by masscdisplacement, ubiquitous presence of armed actors, high levels of insecurity, and a struggle to meet basic survival needs. Violence, humancrights violations and abuses continue in multiple counties due to active hostilities in the main conflict areas greater Jonglei and Eastern Equatoria with Magwi becoming a hotspot. The reported displacement of tens of thousands of people in South Sudan's Greater Equatoria region reflects notable deterioration in security throughout July and August 2016. More than two and a half years since the beginning of the current conflict in South Sudan, 2.6 million people remain displaced, including 1.6 million internally displaced people, and 1 million that have crossed into neighbouring countries, more than 200,000 of these since July 2016. Children are estimated to represent more than 60% of South Sudanese refugees and internally displaced persons (IDPs) within the region. While humanitarian agencies are without access to accurate casualty figures, it is reasonable to estimate the civilian death toll from recent fighting in the Equatorias to have reached several hundred. Protection in and around Juba remains compromised as civil conflict and crime exacerbate food insecurity and serve to prevent safe movement of people and commodities. Human rights monitors cite an increasing incidence of sexual violence, beatings, and lootings.

Mass population displacement in this region follows a recent Integrated Food Security Phase Classification (IPC) update assessing seven of Eastern Equatoria's eight counties to be at the crisis level of food insecurity, and projecting a move into the 'alert' phase in the coming quarter. As of 20 September, a total of 2,143 cholera cases had been reported, including 31 deaths7, with the outbreak now spreading to the Nimule area of Imatong State; compounding the risks to and needs of 4.4 million people estimated to be in need of medical assistance in South Sudan.

According to an inter-agency assessment conducted by CARE in September 2016, the population of Magwi County had decreased as a result of protection concerns and security issues, with many people deciding to move either within the country or to neighbouring countries. As of then, the RRC and local authority of Magwi County have registered 34,018 internally displaced people (IPDs) (604 households) in Magwi town. This is because Magwi town is a main transport route and crossing point for roads leading to Torit, Uganda, Nimule, and Juba. Communities have moved from neighboring payams and bomas in Magwi County in order to have better access to routes to Uganda in case fighting intensifies.

2. Needs assessment

Page No : 2 of 12

According to an inter-agency assessment conducted by CARE in September 2016, interviews with key informants suggested large population movements from within Magwi to other areas within South Sudan and to neighbouring countries. Respondents cited protection risks following the July 2016 violence including looting, robbery and killings as evident in the periphery areas of the county with a presence of armed group. The assessment team was not able, however, to establish an exact figure for those killed as a result of the conflict. The weight of need and expectations among populations necessitates a cautious approach to registration, though the assessment found the county authorities to have conducted informal registration of those displaced and continue to monitor the changing dynamics closely. Although there were no reports of rape found by the assessment team, individuals noted that the number of domestic abuse cases occurring at household level had increased, often as a result of socioeconomic stress. The team was unable, however, to find corroborating data to justify the claim from the relevant authorities on the ground.

Respondents further detailed psychological distress within the communities of Magwi as a result of July 2016 violence, mentioning community networks as the only means of support to the victims. Some respondents indicated that the significant psychological distress was leading to increased levels of domestic violence, family disputes and other offensive behaviors within the community.

As a result of the degradation of community protection systems in Magwi affected by the ongoing conflict or with a high influx of IDP's, Women and girls have an increased exposure to various forms of violence including rape and sexual violence, physical violence as well as early and forced marriage. In addition with livelihood options increasingly limited as a result of the ongoing conflict adolescent girls and young women are particularly at risk of resorting into harmful coping mechanisms that include early marriage, survival sex and sexual exploitation.

Communities have no access to GBV services, there is no existing women and girls' friendly space (WGFS), and no information Volunteers to mobilize communities about availability of services. There is no referral pathway in place to help survivors access medical and psychosocial support due to service unavailability. There is need for trained case workers to provide case management, referrals to available services and follow- up with survivors as well as need for social workers to provide psychosocial support services. There are CARE's FSL teams and other partners's teams for different sectors; AVSI (Education), CARITAS (FSL), PLAN International (NFIs and women empowerment), Health net with health services, Community Development Initiative (CDI) and WASI (WASH). CARE's Protection staff together with FLS team and other Organizations providing other services; AVSI (Education), CARITAS (FSL), PLAN International (NFIs and women empowerment), Save the Children and Healthnet with health services in Nimule, Community Development Initiative (CDI) and WASI (WASH) will jointly conduct a safety audit and share the report jointly to ensure they are able to collectively take part in addressing some of the risks. There are community mobilizers / volunteers for FSL sector who will be mobilized, trained as Information Volunteers (IVs) to refer GBV cases to case workers and social workers, but also to ensure their sectors minimize risks to GBV.

3. Description Of Beneficiaries

The primary beneficiaries of this project are women, girls, boys and men affected by the ongoing conflict in Eastern Equatoria. Often all are cut off from basic services and support while seeking refuge and they lack basic items which can meet the specific hygiene needs especially for women and girls. The project will provide GBV actors with dignity kits that can be distributed to the most vulnerable women and girls from the displaced communities. Beneficiaries of dignity kits will be selected among the most vulnerable women and girls, including lactating women, pregnant women, and women with disabilities. The project also aims at reinforcing the capacity of GBV service providers in delivering qualitative service through the capacity building mostly related to Clinical Management of Rape and GBV case management and GBV Minimum Standards.

4. Grant Request Justification

CARE is currently implementing a large multi-year Food Security and Livelihoods program in Eastern Equatoria and in light of the dire situation compounded by a lack of partners in the area, a gap needs to be filled and CARE is also keen to intergrate GBV programming into its existing intervention.

5. Complementarity

CARE is currently the implementing a large multi-year Food Security and Livelihoods program in Eastern Equatoria; Magwi, Torit and Ikwotos n and in light of the dire situation compounded by a lack of partners in the area, a gap needs to be filled and CARE is also keen to intergrate GBV programming into its existing intervention. Communities have no access to GBV services, there is no existing women and girls' friendly space (WGFS), and no information Volunteers to mobilize communities about availability of services. There is no referral pathway in place to help survivors access medical and psychosocial support due to service unavailability. CARE will train and work with a case worker to provide case management, referrals to available services and follow- up with survives. CARE will also work with social workers to provide psychosocial support services. CARE's Protection staff together with FLS team and other Organizations providing other services; AVSI (Education), CARITAS (FSL), PLAN International (NFIs and women empowerment), Healthnet with health services in Nimule, Community Development Initiative (CDI) and WASI (WASH) will jointly conduct a safety audit and share the report jointly to ensure they are able to collectively take part in addressing some of the risks. There are community mobilizers / volunteers for FSL sector who will be mobilized, trained as Information Volunteers (IVs) to refer GBV cases to case workers and social workers, but also to ensure their sectors minimize risks to GBV.

LOGICAL FRAMEWORK

Overall project objective

The overall objective of this project is to provide emergency protection and GBV programming & strengthen community based protection mechanisms in Eastern Equatoria, with emergency population displacements.

Page No : 3 of 12

PROTECTION		
Cluster objectives	Strategic Response Plan (SRP) objectives	Percentage of activities
Individuals' right to freedom of movement and to live in safety and dignity is enhanced.	SO3: Support at-risk communities to sustain their capacity to cope with significant threats	30
Protection response services are available in all counties that are heavily affected by conflict or displacement.	SO2: Protect the rights and uphold the dignity of the most vulnerable	40
Prevention-oriented programming is implemented in counties that are heavily affected by conflict or displacement, and communities are assisted to maintain their coping capacities	SO3: Support at-risk communities to sustain their capacity to cope with significant threats	30

<u>Contribution to Cluster/Sector Objectives</u>: The project will contribute to the cluster strategy by improving the quality of the protection response services related GBV response. The project will contribute to improve the capacities of service providers to deliver quality services for GBV survivors including CMR. With the distribution of dignity kits to women and girls in reproductive age in the targeted area, the project will contribute to restore the dignity of affected populations and alleviate further suffering.

Outcome 1

Improved access to Emergency protection and GBV services for IDPs and Host communities' women and children, girls and boys.

Output 1.1

Description

GBV mitigation is mainstreamed into other sectors' programming in conflict□affected communities

Assumptions & Risks

Risk: access constraints due to conflict or security issues;

Assumption: the security situation allows for safe access to communities

Indicators

			End	End cycle beneficiaries			End cycle
Code	Cluster	Indicator	Men	Women	Boys	Girls	Target
Indicator 1.1.1	PROTECTION	Number of non-GBV frontline humanitarian workers trained on GBV Guiding Principles and Mainstreaming Guidelines	10	10			20
Means of Verif	ication : Project reports						
Indicator 1.1.2	PROTECTION	Number of dignity kits distributed (inside and outside of PoCs)					1,000

Means of Verification: Project reports

Activities

Activity 1.1.1

Integrate GBV across FSL sector to mitigate risks of girls and women through training and on-site technical support in adherence to IASC GBV guidelines

Activity 1.1.2

Distribution of dignity kits while ensuring distribution is conducted discretely in safe spaces and also coupled with NFI risk mitigation kits including torches, whistle, and padlocks. Outreach Volunteers (OVs) support to ensure most vulnerable W&Gs and those with access issues receive distributions.

Output 1.2

Description

Community Protection Mechanisms are activated to respond to immediate protection and GBV emergencies

Assumptions & Risks

Risk: access constraints due to conflict or security issues;

Assumption: the security situation allows for safe access to communities

Indicators

			End	End cycle beneficiaries		End cycle	
Code	Cluster	Indicator	Men	Women	Boys	Girls	Target
Indicator 1.2.1	PROTECTION	Number of safety audits conducted (inside and outside of PoCs)					2
Means of Verif	Means of Verification : Project reports						
Indicator 1.2.2	PROTECTION	Number of frontline actors trained on GBV guiding principles and safe referrals					20
Means of Verif	Means of Verification : Project reports						
Indicator 1.2.3	PROTECTION	Number of frontline response actors trained on GBV/PFA counseling					20

Indicator 1.2.4	PROTECTION	Number of frontline psycho -social service providers trained on GBV response in crisis settings		20
Means of Verif	ication : Project reprots			
Indicator 1.2.5	PROTECTION	Number of functional women and girls safe spaces (inside and outside PoCs)		2
Means of Verif	ication : Project reports			
Indicator 1.2.6	PROTECTION	Number of women accessing women and girl safe spaces per month		2,880

Means of Verification: Project reports

Activities

Activity 1.2.1

Conduct regular safety audits in areas of population displacements, with IDP site to better understand population movements and intentions and inform prevention and response plans.

Activity 1.2.2

Build capacity of community based protection mechanisms; women's groups on GBV Guiding principles, PFA, referral pathways in locations with available services to enable a functional referral system and for case workers and social to partners (national NGOs, CBOs, FBOs to provide community based quality case management and, psychosocialand psychosocial support including PSS and case management dedicated for children; girls and boys in extremely vulnerable situations and those facing multiple protection risks which will include skills building, and referral services.

Activity 1.2.3

Support community based psychosocial support and PFA and/or establishing and equipping women and girl friendly spaces (WGFS) with PSS materials like beads, threads, knitting and weaving materials.

Activity 1.2.4

Map referral pathways & train stakeholders to adhere to standard operating procedures (SOPs) □ Comprehensive service mapping exercise completed. 2 days' workshop delivered in each location with legal, health, PSS & security actors, to review GBV SOP, agree on referral pathway & SOP endorsement. This activity in particular, is aimed at enhancing GBV coordination. This activity will be conducted in close collaboration with Ministry of Gender, Child and Social Welfare, Health Link South Sudan, Plan International, CDI, WASI, INTERSOS and other partners in Eastern Equatoria. Materials to be shared with National and State GBVSC.

Outcome 2

Outcome 2: Increased awareness on protection and GBV services through Mass Media education (IEC materials, Radio spots)

Output 2.1

Description

WMBGs reached through repeated, targeted protection and GBV prevention activities in IDP & host communities

Assumptions & Risks

Risk: access constraints due to conflict or security issues;

Assumption: the security situation allows for safe access to communities

Indicators

			End cycle beneficiaries			End cycle	
Code	Cluster	Indicator	Men	Women	Boys	Girls	Target
Indicator 2.1.1	PROTECTION	Number of individuals reached with messages on GBV prevention and services	650	2,600	1,30 0	1,95 0	6,500

Means of Verification:

Activities

Activity 2.1.1

Conduct community outreach and engagement activities; local activism to disseminate key information on GBV, including information on the availability of services, and promote positive social norms to improve the safety and well-being of women and girls. Awareness sessions for IDPs & host community WMBGs through Outreach Volunteers (OVs). Community Activists will be provided with training, monthly supervision sessions

Activity 2.1.2

WMBGs are reached through media and advocacy; monthly radio broadcasts. Each month, OVs & a CARE staff and partner's staff members will perform a radio drama followed by a phone in radio show.

Additional Targets:

M & R

Monitoring & Reporting plan

Page No : 5 of 12

A monitoring and reporting plan will be developed to track and report on outputs during livelihood input distributions. Outputs/data will be disaggregated by gender and captured on narrative reports as per donor templates and reporting requirements. At the field level, the Project Manager and the M&E Officer will lead the monitoring and reporting of outputs and share reports with the Protection technical lead in Juba for review and submission to donor as per reporting timelines. To increase accountability to beneficiaries in line with the core humanitarian standards, the project team will set up a beneficiary feedback mechanisms in the form of help desks and suggestion boxes. CARE will also report to the Protection Cluster and GBV Sub-Cluster both at the State and at National level. CARE will also work in partnership with State Ministry of Education, Child and Social Welfare, Health Link South Sudan, Plan International, INTERSOS, CDI, WASI field teams and other agencies to monitor the Intervention through conducting post distribution and post planting monitoring.

OTHER INFO

Accountability to Affected Populations

In line with the core humanitarian standards, CARE will incorporate its accountability framework through the establishment of beneficiary feedback mechanisms (helpdesks during distributions and suggestion boxes for use beneficiaries) to enable feedback during and/or after distributions. As part of the feedback mechanisms, complaints lodged by the community or beneficiaries are discussed and resolved at the community level, field office level or at Juba level depending on the complexity of the complaint. As a way of ensuring accountability to beneficiaries, CARE will seek participation of the targeted communities throughout the project cycle. They will be involved in developing criteria for beneficiary selection, assist in selecting beneficiaries and endorse the beneficiary list on the basis of the vulnerability criteria agreed upon. The inclusion of women in distribution committees will be a priority, as a means to promote their participation.

Implementation Plan

This project's implementation will leverage on the ongoing livelihoods projects in Magwi County, Eastern Equatoria. CARE will also network and collaborate with other stakeholders, such as the government and Protection C cluster, to ensure there is no duplication of effort in the area. CARE understands that conflict and displacement affect men, women, girls and boys differently. As such, CARE will mainstream gender considerations into the intervention and ensure that the voices and concerns of women are heard. Periodic project reviews will be conducted during project implementation. This will draw lessons learned from the intervention to inform programming. CARE will also document best practices for scaling up in similar interventions.

Coordination with other Organizations in project area

Name of the organization

Areas/activities of collaboration and rationale

Environment Marker Of The Project

Gender Marker Of The Project

2a-The project is designed to contribute significantly to gender equality

Justify Chosen Gender Marker Code

The project is designed to contribute significantly to gender equality. 2b-The project is designed to contribute significantly to gender equality. Distributions will be provided to vulnerable women, men, boys and girls (prioritizing assistance according to context specific vulnerability criteria (female & child headed households, elderly people, pregnant and lactating women and other people with specific protection concerns) with lifesaving support and protection in Magwi county.

Protection Mainstreaming

As the proposed project will be implemented in an emergency context, CARE mainstreams protection principles into project activities. The Do no Harm principle will be maintained to ensure that project activities do not expose communities and the most vulnerable groups such as women and girls receive to harm and they are provided with protection when receiving vegetable and seeds kits. Information provided by survivors or beneficiaries are safeguarded not to be used to expose them to harm. Our actions addresses both basic needs including NFIs that improve protection of those at risk of violations. We also pay special attention to people living with disabilities, children, child-headed and female-headed households.communities to further harm.

Country Specific Information

Safety and Security

CARE maintains a Security team at country office whose responsibility is to conduct security risk assessments before project roll out and during implementation. CARE will obtain security clearance before traveling to the proposed project locations since they are opposition controlled. At the same time, CARE transport important project records for archiving in Juba on a regular basis as a risk mitigation measure. This project will be Implemented in collaboration with government ministry of Ministry of Food Security and Agriculture so with full consent of commissioner of each of the counties will implement the project. In case of any impending insecurity we shall keep our beneficiaries informed in any programming changes

Access

Access to Magwi working areas is likely not going to be interrupted during implementation period since CARE has met with the government authorities of Eastern Equatoria State (state Governor and RRC Acting Director). The authorities assured CARE that access will be not be hindered and measures will be put in place for CARE to work in such hard to reach areas. In cases where road transport will not be possible due to insecurity, UNMISS and partners' convoy will be used to access the beneficiaries instead. CARE is also currently implementing a large FSL program in Magwi.

Eastern Equatoria -> Magwi	100	650	2,600	1,300	1,950	6,500	Activity 1.1.1: Integrate GBV across FSL sector to mitigate risks of girls and women through training and on-site technical support in adherence to IASC GBV guidelines Activity 1.1.2: Distribution of dignity kits while ensuring distribution is conducted discretely in safe spaces and also coupled with NFI risk mitigation kits including torches, whistle, and padlocks. Outreach Volunteers (OVs) support to ensure most vulnerable W&Gs and those with access issues receive distributions. Activity 1.2.1: Conduct regular safety audits in areas of population displacements, with IDP site to better understand population movements and intentions and inform prevention and response plans.
							Activity 1.2.2: Build capacity of community based protection mechanisms; women's groups on GBV Guiding principles, PFA, referral pathways in locations with available services to enable a functional referral system and for case workers and social to partners (national NGOs, CBOs, FBOs to provide community based quality case management and, psychosocialand psychosocial support including PSS and case management dedicated for children; girls and boys in extremely vulnerable situations and those facing multiple protection risks which will include skills building, and referral services. Activity 1.2.3: Support community based psychosocial support and PFA and/or establishing and equipping women and girl friendly spaces (WGFS) with PSS materials like beads, threads, knitting and weaving materials.
							Activity 1.2.4: Map referral pathways & train stakeholders to adhere to standard operating procedures (SOPs) - Comprehensive service mapping exercise completed. 2 days' workshop delivered in each location with legal, health, PSS & security actors, to review GBV SOP, agree on referral pathway & SOP endorsement. This activity in particular, is aimed at enhancing GBV coordination. This activity will be conducted in close collaboration with Ministry of Gender, Child and Social Welfare, Health Link South Sudan, Plan International, CDI, WASI, INTERSOS and other partners in Eastern Equatoria. Materials to be shared with National and State GBVSC. Activity 2.1.1: Conduct community outreach and engagement activities; local activism to disseminate key information on GBV, including information on the availability of services, and promote positive social norms to improve the safety and well-being of women and girls. Awareness sessions for IDPs & host community WMBGs through Outreach Volunteers (OVs).Community Activists will be provided with training, monthly supervision sessions
							Activity 2.1.2: WMBGs are reached through media and advocacy; monthly radio broadcasts. Each month, OVs & a CARE staff and partner's staff members will perform a radio drama followed by a phone in radio show.
