## 1. INTRODUCTION

This Inception Report is prepared by the evaluation team following the outline provided in the Terms of Reference (ToR) for the final evaluation of the Peacebuilding Fund (PBF) funded Project "*Empowering women and girls affected by migration for inclusive and peaceful community development and peacebuilding*" implemented jointly by three Recipient United Nations Organizations (RUNOs): IOM, UN Women (UNW) and ILO.

Project number from MPTF-O Gateway: 00118849.1

The initial project **duration**: November 2019 - May 2021. Non-cost extended till November 2021 (six months). Total project **budget**: USD 1,450,000.

The report is prepared based on a review of the documents related to the Project, including: project document, logical framework, baseline and endline assessment reports, progress reports, monitoring reports, annual work plans, indicator matrixes, and other related reports and materials<sup>2</sup> provided by the project team. The Inception Report provides the background to the evaluation, defines the overall approach and methodology of the final external evaluation, potential risks and mitigations and the manner in which this will be conducted in one northern and three southern regions of Kyrgyzstan where the Project is operational. The report also contains: lead evaluation questions, work plan with key deliverables, evaluation matrix and tentative sampling. The process of preparing the Inception Report involved consultations and email exchanges between the evaluation team and country level IOM/UNW/ILO.

## 2. BACKGROUND

According to the Conflict and Peace Analysis (2019) about 59.6% of all labour migrants from Kyrgyzstan are women, mostly originating from southern regions of the country, where traditional patriarchal views of women's role dominate as well as conflict tensions lead to gender-based violence<sup>3</sup>. For instance, the UN-led nationwide Gender in Society Perception Study (GSPS) on Women and Labor Migration<sup>4</sup> found that respondents, "in packaging their migration aspirations as familial duties and forced choices, de-accentuated any hopes for personal gain, liberation and individual development." The role of women and girls both at the community and family levels, in particular in southern regions of Kyrgyzstan because of stronger influence of religion, is often limited to obedient wife, housemaker or caring mother, women are considered the property of male family members – with young women and girls at risk of kidnapping for the purpose of marriage or being burdened with disproportionate chores in their households.

The GSPS also revealed that the main drivers of migration among women and men are the same: poverty, unemployment and community tensions over resources and power, favorable labour market conditions in destination countries, and environmental considerations. The significant impact of women's leadership and participation in ensuring sustainable peacebuilding and conflict prevention and resolution has been proven by the review of the National Action Plan (NAP) on United Nations Security Council Resolution (UNSCR) 1325 implementation conducted in 2018.<sup>5</sup>

Empowering women and girls affected by migration for inclusive and peaceful community development and peacebuilding Project |Inception Report| 4

<sup>&</sup>lt;sup>1</sup> Link to project in the MPTF-O Gateway: https://mptf.undp.org/factsheet/project/00118849

<sup>&</sup>lt;sup>2</sup> The full list of the reference documents will be attached to the final evaluation report.

<sup>&</sup>lt;sup>3</sup> Gender in Society Perception Study on Women and Labour Migration, 2016, UN Women/IOM/UNFPA, available at: https://eca.unwomen.org/en/digital-library/publications/2020/04/gender-in-society-perception-study-kyrgyz-republic

<sup>&</sup>lt;sup>4</sup> Gender in Society Perception Study on Women and Labour Migration, 2016, UN Women/IOM/UNFPA, available at: https://eca.unwomen.org/en/digital-library/publications/2020/04/gender-in-society-perception-study-kyrgyz-republic

<sup>&</sup>lt;sup>5</sup> Terms of References, Final External Evaluation of the Joint IOM / UN Women/ ILO project Empowering Women and Girls affected by Migration for Inclusive Community Development and Peacebuilding, page 3.

However, women's opinions on public matters are generally valued less, with men taking responsibility for decision-making and community leadership roles. Women are not allowed to decide how to spend their remittances, which means that women migrants do not gain ownership over their earning. Communities with increased return migration became more prone to conflicts due to social disbalance, non-representative power structures and increased incidents of discriminatory practices. This can raise community tensions and inter-community conflicts in Osh and Jalal-Abad or cross-border communities in Batken, where women peacekeepers were not allowed to participate in mediation process. <sup>6</sup>

Given the country's multiple political challenges (political turbulence leading to political instability including constant change in the Government structures, failure to comply with government programs and policies) and economic challenges (high rates of unemployment leading to increasing migration outflows, dependence of remittances, which account for almost 33% of country's GDP).<sup>7</sup>

## **3. PROJECT DESCRIPTION**

The overall **development goal** is to make a *tangible contribution to peacebuilding in target provinces of Kyrgyz Republic by promoting the full recognition of the role of women and girl migrants in inclusive community development and peacebuilding.* 

The project has a Theory of Change<sup>8</sup> with a *if... then.. because...* chain and assumptions linked to the three levels of the logic of the action (community, policy and individual). The ToC is based on the consideration, based on GSPS results, that migration of women and girls constitutes a destabilizing factor for social cohesion and creates visible barriers to women's engagement in peacebuilding in the country. The ToC is also deriving from the GSPS recommendations.<sup>9</sup>

The project is designed around the following three outcomes and eight outputs:

#### <u>Outcome 1: Target communities recognize and support women and girls' role and contribution to</u> <u>peacebuilding and community development.</u>

Output 1.1: Target communities have access to accurate information and knowledge on the role of women and girls in peacebuilding; Output 1.2: Target communities increase awareness on harmful attitudes and practices of gender

norms towards women and girls in migrant communities.

<sup>&</sup>lt;sup>6</sup> Ibidem

<sup>&</sup>lt;sup>7</sup> World Bank data on Migration and Remittances by country, available at:

https://www.worldbank.org/en/topic/migrationremittances diasporaissues/brief/migration-remittances-data and the second second

<sup>&</sup>lt;sup>8</sup> The project's ToC: *IF* communities affected by migration and risks of violence positively perceive the role of women and girls to participate in community development and peacebuilding; *IF* women and girls living in communities affected by migration are empowered and equipped with knowledge and skills to protect their political, economic and civic rights, and provided with access to resources, decent work and sustainable livelihood opportunities and *IF* women and girls returning to their home communities are provided with opportunities for better inclusion and livelihoods; *IF* national and local authorities are equipped to apply socially inclusive approaches in policymaking and implement gender-responsive peacebuilding at the local level in target communities; *THEN* women and girls in communities that are affected by migration and risk of violence can meaningfully be included in the political, economic and social life of their societies, take part in in inclusive community development and peacebuilding, which will help mitigate the challenges for women and girls at highest risk *BECAUSE* community members will break down/change existing harmful gender norms and recognize girls and women's role in community development and peacebuilding; *BECAUSE* national and local authorities will better understand challenges that migrant women and girls face and the role and contributions that migrant women and girls can have in the peacebuilding process; *BECAUSE* national and local authorities will be economically and socially empowered and have agency/be enabled to make informed decisions and participate in decision-making at community evel.

<sup>&</sup>lt;sup>9</sup> 1) Provision of greater state support and advice to potential migrant workers and returnees to ensure they know their rights and can access services including health care, social insurance, civil documentation (such as birth registration) and legal aid; 2) Awareness-raising campaigns on the feminization of migration and the positive contributions that migration can make to the development-rights nexus to address popular negative perceptions of women working abroad; and 3) Support for mentoring schemes and networks between successful women migrants and women who are considering working abroad; support women's self-help groups to be able to claim their rights and improve their access to empowerment opportunities. For additional information: https://eca.unwomen.org/en/digital-library/publications/2020/04/gender-in-society-perception-study-kyrgyz-republic

<u>Outcome 2</u>: Women and girls in communities affected by migration are empowered economically and socially to protect their rights and participate in peaceful community development;

Output 2.1: Women and girls in target communities are equipped with knowledge and skills to effectively advocate for their rights;

<u>Output 2.2: Women and girls in migrant communities have an improved access to economic</u> (employment and self-employment) opportunities;

<u>Output 2.3: Women and girls affected by migration have strengthened their financial capabilities</u> <u>and have access to gender-sensitive financial products;</u>

Output 2.4: Skills development scheme for women designed and implemented.

<u>Outcome 3</u>: National and local authorities apply socially inclusive approaches in policy making and implement gender-responsive peacebuilding at the local level in communities affected by migration.

Output 3.1: A draft gender-responsive state migration policy is produced; Output 3.2: Local authorities in pilot communities affected by migration and prone to conflict are able to develop and implement Local Action Plans (LAPs) on gender-responsive peacebuilding in line with NAP 1325.

The project uses a three - level **intervention**:

- 1. *Community level* by working with community members to change public perception and to build community environment conducive to women migrants' engagement in peacebuilding;
- 2. *Policy level* to introduce gender-responsive policies to recognize the role of women migrants and their contributions; and
- 3. *Individual level,* i.e. empowerment of women and girls migrants to participate in community development, decision making and local peacebuilding initiatives.

The **beneficiaries** of the project are: 1) girls and women vulnerable to forced migration or willing/plan to migrate (unemployed, girls and divorced women vulnerable to forced migration/potential future migrants); 2) returning migrant women and girls (who may be potentially forced to re-migrate).

The project also targeted:

- Men and boys in targeted communities which were engaged in awareness-raising activities;
- Community population engaged in community development and peacebuilding activities;
- LSGs engaged in organization of the activities, such as: facilitating selection of the initiatives, funding mechanisms etc.
- National stakeholders engaged when developing draft of the concept of State Migration Policy with gender-sensitive approaches;

The project is implemented in Jalal-Abad, Osh, Batken and Talas provinces of Kyrgyzstan.

The project **collaborates** with State Migration Service to promote gender-sensitive state migration policy, social inclusive policy, the forum of women Members of Parliament (MP), responsible ministries, and agencies for implementation of NAP on Gender Equality and the UNSR 1325, local self-governments (LSGs), National Bank of Kyrgyz Republic (NBKR), Civil Society Organisations (CSOs) and community leaders and women and girls affected by migration.

The Joint Steering Committee (JSC) oversees overall project implementation and provide guidance. The JSC is co-chaired by the Head of the Department for Monitoring Humanitarian Development and Interaction with Civil Society Institutions and the UN Resident Coordinator.

# 4. EVALUATION PURPOSE AND EXPECTED USERS

#### **Evaluation Purpose**

The purpose of the evaluation of the Joint IOM/UNW/ILO Project will be twofold to: 1) assess the programmatic progress and final project performance based on the OECD DAC evaluation criteria: Relevance, Coherence, Effectiveness, Efficiency, Impact and Sustainability and 2) develop recommendations for similar initiatives funded by PBF.

Targeted users of the evaluation are the IOM, ILO and UN Women staff in Kyrgyzstan, former UN PBF Secretariat in Kyrgyzstan, and the government counterparts at local and national levels, CSOs, and other UN agencies, development and peacebuilding partners present in Kyrgyzstan. The information generated by the evaluation team will furthermore be used to engage policy makers and other stakeholders at local, national and regional levels in evidence-based dialogues and to advocate for gender-responsive strategies to sustain peace and conflict-prevention with a particular focus on engaging women and girls affected by migration in dialogues on gender equality, human rights, and peace and security.

#### **Evaluation Objectives**

The evaluation will target all three levels (individual, policy and community) of the interventions of the project.

The key objectives of the final project evaluation are to:

- Assess relevance of the project objectives, strategy and approach at the community, individual and policy levels for empowerment of girls and women affected by migration towards achieving project results;
- Assess *coherence* with international agreements and conventions as well as synergies and coordination with other initiatives;
- Assess *effectiveness* of the project in achieving its expected results at community, individual and policy levels;
- Assess *efficiency* of use of resources and coordination mechanisms;
- o Assess sustainability prospects of the results and
- Assess *impact* of the intervention in advancing GEWE and participation in community development and higher level peacebuilding initiatives.
- *Identify key factors* (incl. Covid-19), which influenced achievements as well as the good practices and key lessons to be learned.
- *Develop* actionable, tailored and forward-looking recommendations for future projects focused on peacebuilding and empowerment of women and girls affected by migration.

#### **Evaluation Scope**

The final evaluation of the "Empowering women and girls affected by migration for inclusive and peaceful community development" Project will be conducted at the end of project implementation and will cover the entire duration of the project from 2019- 2021. The final evaluation is scheduled between August 2021 - January 2022.

The evaluation includes a data collection mission in Bishkek and a mission to all four regions covered by the project, particularly: Batken, Osh, Djalalabad and Talas regions (Table 1).

| Regions/Oblast   | Municipalities  |
|------------------|---|
| Osh region       | Toolos LSG, Bel LSG Nookat district, Osh oblast                 |
| Batken region    | Ak-Turpak LSG, Orozbekovo LSG, Kadamjai district, Batken oblast |
| Talas region     | Kara-Buura LSG, Kara-Buura district, Talas oblast               |
| Jalalabad region | Kyzyl Tuu, Suzak district, Jalal-Abad oblast                    |

Table 1. Target municipalities (geographical scope of evaluation).

# Stakeholder`s List

The evaluation team identified a range of direct and indirect stakeholders listed below. Table 2. *Stakeholder map.*

## 5. EVALUATION METHODOLOGY

#### Evaluation approach

The evaluation will adopt a participatory approach, engaging a wide and diverse range of stakeholders from Kyrgyzstan. Participation of the main partners is a necessary condition to ensure accountability, stimulate learning, promote ownership, facilitate future buy-in and arrive at comprehensive recommendations for RUNOs and key project stakeholders.

The evaluation process will be based on a *Human Rights Based Approach (HRBA)*, Leave No One Behind (LNOB), including disability inclusion aspects<sup>12</sup> and two disability inclusion indicators reflected in the UN Disability Inclusion Strategy, particularly: Indicator 5 – *Consultations with Persons with Disabilities*<sup>13</sup> and Indicator 10 – *Evaluation*.<sup>14</sup>

https://www.un.org/en/content/disabilitystrategy/assets/documentation/UN Disability Inclusion Strategy english.pdf

https://www.un.org/en/content/disabilitystrategy/assets/documentation/UN Disability Inclusion Strategy english.pdf

<sup>&</sup>lt;sup>10</sup> Since July 2021, there is no active PBF Secretariat in Kyrgyzstan anymore.

<sup>&</sup>lt;sup>11</sup> <u>"Communities resilient to Violent Extremism</u>, Project implemented by UN Women, UNFPA and led by UNICEF and <u>"Inclusive Governance and Justice system for Preventing Violent Extremism</u>" Project implemented by UN Women, OHCHR and led by UNDP.

<sup>&</sup>lt;sup>12</sup> According to the UN Disability Inclusion Strategy the term "disability inclusion" refers to the meaningful participation of persons with disabilities in all their diversity, the promotion and mainstreaming of their rights, the development of disability-specific programmes and the consideration of disability-related perspectives, in compliance with the Convention on the Rights of Persons with Disabilities.

<sup>&</sup>lt;sup>13</sup> Systematic close consultation with and active involvement of, organizations of persons with disabilities on all disability-specific issues and broader issues. For additional information see UN Disability Inclusion Strategy:

<sup>&</sup>lt;sup>14</sup> Disability inclusion is mainstreamed effectively throughout the evaluation process and reflected in the terms of reference, inception and evaluation report(s). For additional information see UN Disability Inclusion Strategy:

The evaluation team will use UN SWAP Evaluation Performance Indicator<sup>15</sup> and the final evaluation will be gender-responsive<sup>16</sup>, which includes two essential elements: what the evaluation examines and how it is undertaken. Thus, the evaluation team will assess the degree to which gender and power relationships including structural, social and economic causes that give rise to inequities and unfair power relations in the targeted sites of Kyrgyzstan, change as result of the project using the process which is inclusive, participatory and respectful of all stakeholders (*rights holders* and *duty bearers*). <sup>17</sup> The evaluation team will assess how the project affected men/boys and women/girls differently.<sup>18</sup>

The evaluation team will use the utilization-focused evaluation approach (UFE)<sup>19</sup>, which is based on the principle that an evaluation should be judged according to how useful it is. The UFEs are planned and implemented in a way that increases the likelihood of the findings being used. This means identifying the primary users of an evaluation and ensuring that they are engaged in decision-making throughout the process. Therefore, evaluation team identified the expected users of the final evaluation, which are engaged through the evaluation cycle as ERG members. It is expected that the evaluation will contribute to overall accountability and learning processes of main users: IOM, ILO and UN Women from Kyrgyzstan, UN Peacebuilding Fund, local and national public authorities, CSOs, beneficiaries, donor community and other peacebuilding and development partners and the project beneficiaries.<sup>20</sup>

#### Data type and sources

The data to be collected and collection methods are being determined by the evidence needed to address the evaluation questions reflected in the TOR. The evaluation team will use a *mixed method design* with both quantitative and qualitative data sought for evidence-based findings, and to provide a comprehensive and meaningful understanding of project progress.

*Quantitative data* will be used to assess progress of the project based on concrete numerical results and performance indicators. Quantitative data among other will include, for instance:

- % increase in the proportion of women participating in local dialogue, peacebuilding processes and community development;
- % knowledge (on targeted topics) increase among beneficiaries;
- Number of communication products on community development and peacebuilding disseminated by mass and social media;
- Number of community members applying GALS tools to re-negotiate power relations within families and address harmful gender norms and attitudes, disaggregated by sex and age;
- o % of women participating in peacebuilding initiatives and demanding social services to protect their rights;
- o % increase in women accessing economic and community development opportunities;
- Number of LAPs developed on gender sensitive peacebuilding and the implementation roadmaps.
- Number of positive deviants who substantially contributed in development and peacebuilding.

Quantitative data by itself does not always capture a complete picture of project performance, or information about changes generated with the project contribution, for instance how capacity development interventions contributed to mainstreaming the gender related aspects in the national and local policy making and implementation.

<sup>&</sup>lt;sup>15</sup> The UN-SWAP Evaluation Performance Indicator assesses the extent to which the evaluation reports of an entity meet the gender-related UNEG Norms and Standards and demonstrate effective use of the UNEG Guidance on integrating human rights and gender equality during all phases of the evaluation. For additional information: https://www.unwomen.org/-

<sup>/</sup>media/headquarters/attachments/sections/how %20 we %20 work/unsystem coordination/un-swap/un-swap-2-tn-pi04-evaluation-en.pdf?la=en & vs=2403

<sup>&</sup>lt;sup>16</sup> For additional information: *How to manage gender responsive evaluation*. UN Women Independent Evaluation Office.

 $<sup>^{17}</sup>$  See the GEWE and HRBA aspects intergrated in the Evaluation Matrix.

<sup>&</sup>lt;sup>18</sup> Ibidem

<sup>&</sup>lt;sup>19</sup> For additional information: https://www.betterevaluation.org/en/plan/approach/utilization\_focused\_evaluation

<sup>&</sup>lt;sup>20</sup> Girls and women vulnerable to forced migration or willing/plan to migrate (unemployed, girls and divorced women vulnerable to forced migration/potential future migrants); 2) returning migrant women and girls (who may be potentially forced to re-migrate).

#### Hence, quantitative data will be supplemented with *qualitative* data to ascertain for example:

- How the project contributed to integration of the GE provisions in the policy and regulatory framework;
- How local authorities are applying gender-responsive peacebuilding principles in supporting women's participation in community development;
- Extent to which the policy environment is conducive to participation of women and girls in peacebuilding activities on community level;
- Functionality of the informal network of women migrants and diaspora leaders.

Evaluation will also assess the consistency of the performance and change planning approaches and tools, such as: Theory of Change<sup>21</sup> and results-based approach, particularly the linkages (impact-outcomes, outputs, baselines, indicators, targets) reflected in the Results Framework. At the inception phase of the field mission evaluators will use a participatory approach and together with the RUNOs will review and refine the ToC in the form of the validation exercise.

#### Data collection approaches

The methodology of data collection will include both primary and secondary information.

*Primary data* will be collected during the field mission (01-12 November) in Kyrgyzstan (Bishkek and three southern and one northern regions) from the various stakeholders reflected in the sampling framework (See Table 3). Due to a tight timeline evaluation team will be able to allocate only one day per site.

The field visit will include:

- Semi-structured interviews
- Focus group discussions
- Observations

<u>Individual semi-structured interviews</u> facilitate <u>in-depth</u> data collection to ensure consistency among the data collected from the project stakeholders, limits potential bias, and gives flexibility to ask additional questions that could emerge. Evaluators will be guided by the research questions outlined in Annex 7, but will probe and follow up with interviewees in a fluid manner in response to answers and information offered. Suggested participants (please see Table 3):

- RUNOs
- National Government Representatives
- Implementing partners (responsible party)
- Local authorities
- Some of the end-beneficiaries
- PBF Project Officer (donor)
- Other UN entities

The <u>focus group discussions</u> (FGD) with pre-determined sets of questions will be used, because: facilitate community-level discussions, share of the opinions/anecdotal evidence/examples and generate insights that might be helpful in understanding communities' perspectives regarding the local context and identification of the changes and factors that have contributed or impeded the occurrence of changes.

The Annex 7 provides an overview of the questions that will guide the FGDs, however the questions serve only as a guide. FGDs will be conducted as loosely structured conversations, allowing space for facilitators to probe responses and explore unexpected insights.

Suggested Participants (please see table 3):

- SHGs members
- GALS participants
- Direct beneficiaries
- Migrant women, who are outside the country
- LSG representatives

<sup>&</sup>lt;sup>21</sup> According to the PBF's Theory of Change Guidance Note.

- Local council members

Both individual meetings and FGDs will be tailored to the best professional judgment of the evaluation team according to the background of the respondents, their role and involvement in the project.

Are envisaged 8 FGDs with the end beneficiaries for encouraging sharing their experience and learning from each other's stories and about 22 individual interviews. It is estimated to be involved about 80 persons (including about 70-75% women and girls) representing different type of project stakeholders as presented below:

| Туре   | Institution/Organization  | Approach              |
|--|---|-----------------------|
|  | IOM   | Individual meeting    |
| UN Agencies  | UN Women  | Individual meeting    |
|  | ILO   | Individual meeting    |
|  | UNRCO   | Individual meeting    |
|  | UNFPA   | Individual meeting    |
|  | OHCHR   | Individual meeting    |
|  | UNICEF  | Individual meeting    |
|  | UNDP  | Individual meeting    |
|  | State Agency on Local Self-Government and<br>Interethnic Relations                              | Individual meeting    |
| Public authorities                                   | Department of External Migration of the Ministry of Foreign Affairs                             | Individual meeting    |
|  | Ministry of Health and Social Development   | Individual meeting    |
|  | National Bank of Kyrgyz Republic  | Individual meeting    |
|  | Public Fund "Rosa Otunbaeva's Initiative"   | Individual meeting    |
| Implementing partners                                | Community Development Alliance  | Individual meeting    |
|  | Alliance of Trainers and Consultants  | Individual meeting    |
|  | Association of Microfinance Institutions  | Individual meeting    |
| Local authorities from                               | Local Self-Governments members  | FGD                   |
| districts & villages: Osh,<br>Batken, Jalal-Abad and | Local Council members, including women deputies   | FGD                   |
| Talas oblasts  | Head of villages/municipality representatives   | Individual meeting    |
|  | Specialists of social affairs   | Individual meeting    |
| End-beneficiaries and other stakeholders from        | Women and men beneficiaries: activists of villages, coordinator –mobilizers                     | FGD                   |
| districts & villages: Osh,                           | Women, who started their family businesses  | Individual meeting    |
| Batken, Jalal-Abad and<br>Talas oblasts              | Woman contracted by whole sales buyer/Future<br>participant of the Global Village Fair in Dubai | Individual meeting    |
|  | GALS champions  | FGD                   |
|  | Education institution/School  | Individual meeting    |
|  | Leaders and members of the SHG  | Individual meeting    |
|  | Migrant Women   | Zoom/Viber/WhatsApp   |
|  | Women beneficiaries   | 5 Individual meetings |
| Donor  | United Nations Peacebuilding Fund   | Individual meeting    |

 Table 3: Tentative sampling framework

The tentative agenda with the project sites to be visited is presented in the Annex 3 of the report.

The evaluation will also use field <u>observation</u> as a data collection technique for watching, listening and understanding the behaviors, on-going processes and achievements (for instance: how community members are applying GALS tools; how women are participating in local dialogue, peacebuilding processes and community development; what are the benefits of the economic empowerment actions via ILO training tools as GET Ahead, Financial Education and Start & Improve Your Business (SIYB), SHGs operations, LSG functions).

Secondary data will be gathered through the <u>desk review</u> of written project documents, logframe, baseline and endline assessment reports, progress reports, and other project documents. The evaluation, among other aspects will use the findings of both assessments for analyzing and drawing own conclusions on the main changes generated with the project contributions, key lessons learnt, factors influencing performance. The quantitative and qualitative performance gender disaggregated data will be collected by the evaluation team from the informational sources reflected in the means for verification stipulated in the project logframe. The list of consulted documents will be attached to the evaluation report.

#### **Evaluation Criteria and Key Evaluation Questions**

The evaluation will be guided by the OECD/DAC Evaluation Criteria (*Relevance, Coherence, Effectiveness, Efficiency*, early signs of *Impact* and *Sustainability*)<sup>22</sup>.

The evaluation will be based on gender and human rights principles, including the *Do-No-Harm* approach and adhere to the UNEG Norms and Standards and Ethical Code of Conduct and IOM, ILO and UN Women Evaluation Policy and Guidelines<sup>23</sup> and following safety protocols of WHO COVID-19 transmission measures<sup>24</sup>.

The evaluation questions are reflected in the Annex 6: *Evaluation Matrix*. The evaluation team will further develop for their own use interview guides for consultations with stakeholders. The evaluation questions will be tailored according to the role and involvement of the stakeholders and will be orally administered in English and/or Russian. In remote areas the evaluation team might collect data in Kyrgyz language, depending on the preferences of the stakeholders. The evaluation team will be accompanied by a professional interpreter. In order to increase the validity through the triangulation process, the primary data will be compared to the secondary data and some of the evaluation questions will be similar and repeated to more than one type of stakeholders.

#### Data analysis and quality assurance

Following the data collection, the last phase of the evaluation will focus on analysis of the in-depth desk review and information collected from interviews and Focus Group Discussions. Data collected will be analysed for each of the key aspects of the evaluation. The following methods will be used:

- **Responsibility assignment mapping** As a result of the joint approach of the project, involvement of three RUNOs, implementing partners and multiple stakeholders, the evaluation will systematise the collected data on key responsibilities, practical implementation arrangements and expressed need for cooperation. Ultimately, this would help reaching conclusions on effectiveness and efficiency of the multi-dimensional partnerships generated by the project and added value of different type of partners.
- Change analysis Collected data will be systematised and compared against the results based matrix
  and expected changes defined by the relevant project documents provided by IOM. This would help
  reaching conclusions on progress of the Project towards the targets and most effective approaches and
  recommendations for future similar actions. The evaluation will also analyse and, eventually, validate or
  reconstruct the ToC, assessing to what extent the initial assumptions were valid and the changes were
  generated as predicted in the ToC.

<sup>&</sup>lt;sup>22</sup> DAC Criteria for Evaluating Development Assistance. For additional information: https://www.oecd.org/dac/evaluation/daccriteriaforevaluatingdevelopmentassistance.htm

<sup>&</sup>lt;sup>23</sup> Please see the Annex 4: *References* 

<sup>&</sup>lt;sup>24</sup> For additional information about COVID-19 transmission protective measures, WHO, 2021: <u>https://www.who.int/westernpacific/emergencies/covid-19/information/transmission-protective-measures</u>

- Contribution analysis Due to the number of stakeholders involved (both national, regional/local and international) and most likely synergetic effect of their actions, contribution analysis seems to be the most appropriate method to be used in understanding the causes of achieved results, results chains, roles of each of the stakeholder involved and other internal and external factors, including both enablers and barriers. This is also important in the fragile contexts of political instability in Kyrgyzstan, where in addition to positive influences, those potentially negative (e.g. political turbulences, elections, conflicts) have to be considered. This would enable identification of the main contributors, including the level of contribution of the project stakeholders to the achieved results, including early signs of transformational changes (if any).
- Attribution analysis although it might be challenging and considering all the wide range of stakeholders involved, the evaluation team will analyse the data trying to identify unique interventions and their effects that might be solely or largely attributed to the evaluated project.

The evaluation team is committed to provide quality deliverables and services. Triangulation of data, stakeholders' (respondents) estimate, analysis of enablers and barriers and trend changes (if possible to determine) may be used to support the data analysis methodologies and systematization of conclusions and recommendations.

Evaluation will have at least four *"check points"*, which will increase the quality of the assignment and deliverables:

- 1. Review of the Inception Report to ensure that the requirements of the TOR are met.
- 2. Presentation and discussion with EMG and ERG the preliminary findings and conclusions at the end of the field mission in Kyrgyzstan.
- 3. Review of the draft evaluation report (two rounds).
- 4. Approval of the completed final evaluation report.

Adjustments will be made to reflect feedback at each of these points. More interaction will contribute to the quality of the key deliverables. This ensures that multiple opportunities are provided to resolve potential issues and challenges throughout the project evaluation.

# 6. **RISKS AND MITIGATION**

The following risks or constrains and related mitigation approaches were identified by the evaluation team at the inception phase.

Table 5: Evaluation Risks and Mitigation

| Risks  | Mitigation Approach   |
|--|---|
| Some stakeholders, including because of the<br>pandemic reasons, may not be available for<br>interviews during the field mission.                            | <ul> <li>Consultations with the stakeholders will be planned<br/>with enough flexibility to account for their<br/>schedules.</li> <li>Some interviews may be conducted via Zoom</li> <li>/phone depending on the preferences of the<br/>stakeholders.</li> </ul>  |
| Some stakeholders, especially at the local<br>level might be hesitant for openly speaking<br>their minds about the project actions they<br>were involved in. | <ul> <li>Inform about the key principles of evaluation,<br/>underlining the confidentiality and voluntary<br/>participation of the stakeholders.</li> <li>Evaluation team will secure necessary conditions<br/>for confidentiality for open discussions, storing and<br/>anonymizing quotes.</li> </ul> |
| Field mission time limitation affects<br>comprehensive evaluation across all<br>dimensions of the project.   | <ul> <li>Representative sampling to ensure that all<br/>stakeholder groups of the project are covered.</li> <li>Present and discuss preliminary evaluation findings<br/>and conclusions.</li> </ul>   |

## 7. MANAGEMENT OF EVALUATION

To ensure effectiveness, learning and quality of the final evaluation as well as inclusive and participatory approach, the evaluation management structure will consist of the Evaluation Management Group and Evaluation Reference Group.

*Evaluation Management Group* (EMG) is an IOM-led body, which includes representatives of all three RUNOs and the donor. The EMG will oversee the evaluation process, make key decisions and quality assure of the deliverables. The EMG also includes IOM's Regional Monitoring and Evaluation Officer and the UN Women Europe and Central Asia Regional Evaluation Specialist who is a staff member of the UN Women Independent Evaluation Office, both of whom are members of the United Nations Evaluation Group (UNEG). The IOM's Regional Monitoring and Evaluation Officer is the Evaluation Task Manager, responsible for the day-to-day management of the evaluation and ensures that the evaluation is conducted in accordance with the Evaluation Policy of the different implementing UN entities.

*Evaluation Reference Group* (ERG) is a representative body, part of the evaluation management body, consisting of all relevant stakeholders' groups, including: key national and local public authorities, beneficiaries, project partners, CSOs. ERG was established to promote a highly participatory review and to ensure that the evaluation approach is an accountable, learning and relevant exercise for stakeholders. Thus, the purpose of the ERG will be to facilitate the participation of relevant stakeholders in the design and scope of the evaluation, raising awareness of the different information needs, quality assurance throughout the process and in disseminating the evaluation results.

The ERG will be consulted on key aspects of the evaluation process and will provide input at key stages of the evaluation: inception report; draft and final reports. The composition of the ERG is presented in the Annex 5 of the Inception Report.

The PBF HQ provides quality assurance of the deliverables (inception report, draft report, final report) and approves them.

The Evaluation Expert Team is gender balanced and includes an international evaluator that will act as the evaluation team leader (*Gheorghe Caraseni - man*) and the national evaluator (*Elmira Brown - woman*).

# 8. EVALUATION NORMS AND STANDARDS

The final evaluation will be carried out according to norms and standards for evaluation established by the UNEG.<sup>25</sup>

- Independence and Impartiality. Independence of evaluation is necessary for credibility, it influences the ways in which an evaluation is planned, used and allows evaluators to be impartial and free from undue pressure throughout the entire evaluation process. The evaluation team will remain independent from RUNOs, donor and other stakeholders at all times. Clear reasons for evaluative judgments, and the acceptance or rejection of comments on the deliverables will be given. The final evaluation report will make clear that it is the view of the evaluation consultants, and not necessarily that of RUNOs, donor or other stakeholders, which may articulate their voice through a Management Response and/or ERG.
- Anonymity and confidentiality. The evaluation must respect the rights of individuals who provide information, ensuring their anonymity and confidentiality. The evaluation team will inform the stakeholders about the principles of the evaluation at the beginning of the consultations and will ask orally the permission for recording or notes taking.
- *Responsibility.* The report must mention any dispute or difference of opinion that may have arisen between the evaluators and project management in connection with the evaluation process,

<sup>&</sup>lt;sup>25</sup> UNEG Ethical Code of Conduct to Evaluations in the UN system: <u>http://www.unevaluation.org/document/detail/100</u>

sampling, findings and/or recommendations. The evaluators should corroborate all assertions, or disagreement with them noted.

- *Integrity.* The evaluators will be responsible for highlighting issues not specifically mentioned in the TOR, if this is needed to obtain a more complete analysis of the intervention.
- *Independence.* The evaluators should ensure their independence from the intervention under review, and they must not be associated with its management or any element thereof.
- *Incidents.* If problems arise during the field work, or at any other stage of the evaluation, they will be reported immediately to IOM as lead agency.
- *Validation of information*. The evaluation team will be responsible for ensuring the accuracy of the information collected while preparing the reports and will be responsible for the information presented in the evaluation report.
- *Intellectual property.* In handling information sources, the evaluation team shall respect the intellectual property rights of RUNOs.

## 9. WORK PLAN

#### Table 6. Work plan, deliverables and timeline

| Task and deliverables  | Timeframe                 | Responsibility  |  |  |
|--|---------------------------|---|--|--|
| I. Inception Phase   |                           |   |  |  |
| Desk review of background documentation  | August –<br>September, 06 | Evaluation team   |  |  |
| Inception meeting with EMG and ERG   | August, 27                | EMG   |  |  |
| 1 <sup>st</sup> Draft of the inception report  | September, 04             | Evaluation team   |  |  |
| Feedback from PBF, EMG   | September, 24             | EMG, PBF  |  |  |
| 2 <sup>nd</sup> draft of the inception report  | October, 04               | Evaluation team   |  |  |
| Feedback from EMG  | October, 11               | EMG   |  |  |
| Revised (if needed) 3 <sup>rd</sup> draft inception report   | October, 14               | Evaluation team   |  |  |
| Feedback from PBF/ERG  | October, 22               | PBF and ERG   |  |  |
| Inception report final   | October 26,               | EMG, ERG, Evaluation team   |  |  |
| II. Field mission Phase  |                           |   |  |  |
| Visit to project sites and in-country data collection –<br>detailed field visit itinerary developed and include visits<br>to 6 municipalities of Kyrgyzstan. | November, 01<br>- 12      | EMG - organizing sessions;<br>evaluation team - conducting<br>KII and FGD |  |  |
| III. Analysis and Reporting Phase  |                           |   |  |  |
| Drafting and power point presentation of the preliminary findings to EMG and ERG   | November, 16              | Evaluation team   |  |  |
| 1 <sup>st</sup> draft report   | December, 12              | Evaluation team   |  |  |
| Feedback from EMG  | December, 20              | EMG   |  |  |
| 2 <sup>nd</sup> Draft report   | January, 06               | Evaluation team   |  |  |
| Feedback from PBF and ERG  | January, 17               | PBF, ERG  |  |  |
| Final report<br>Evaluation communication products (brief<br>PPT, two-pager)  | January, 25               | Evaluation team   |  |  |
| Submission of the translated version (in Russian) of the final evaluation report   | January, 31               | Evaluation team   |  |  |

#### Annex 3: Tentative Agenda

## Field mission: 01 – 12 November 2021, Kyrgyzstan

| Time          | Stakeholder & Contact person  | Location  |  |  |
|---------------|---|---|--|--|
|               | Day 1, Monday, 01 November  |   |  |  |
| 10:00 - 11:00 | Former PBF Secretariat Manager/Peace & Development Advisor - Kurtmolla<br>Abdulganiyev                                | Bishkek, Former PBF Secretariat/RC Office         |  |  |
| 11:30 - 12:30 | IOM, Project Manager – Aijan Boronbaeva   | Bishkek, IOM office,                              |  |  |
|               | Lunch   |   |  |  |
| 14:00 - 15:00 | UN Women, Programme Analyst - Iina Pyykkö   | Bishkek, UN Women Kyrgyzstan Country Office,      |  |  |
| 15:30 - 16:30 | ILO, National Project Coordinator – Aisuluu Meimankanova  | Bishkek, ILO office,                              |  |  |
| 17:00 - 18:00 | Public Fund "Rosa Otunbaeva's Initiative" Project coordinator – Abdraimakunova  | Bishkek, IP's office,                             |  |  |
|               | Chynara   |   |  |  |
|               | Day 2, Tuesday, 02 November   |   |  |  |
| 09:30 - 10:30 | State Agency on Local Self-Government and Interethnic Relations, Leading Specialist -<br>Achikeeva Cholpon Chekirovna | Bishkek   |  |  |
| 11:00 - 12:30 | Department of External Migration of the Ministry of Foreign Affairs, Head of  | Bishkek   |  |  |
|               | Department for Migration Policy – Asanov Almaz Ashirkulovich  |   |  |  |
| 11:30 - 12:30 |   | ТВС   |  |  |
|               | Lunch   |   |  |  |
| 14:00 - 15:00 | Community Development Alliance, Project manager - Asel Kuttubaeva   | Bishkek, IP's office,                             |  |  |
| 15:30 - 16:30 | Alliance of Trainers and Consultants, Project manager - Aziz Kirgizbaev   | Bishkek. Meetimg room Park hotel                  |  |  |
|               | Day 3, Wednesday, 03 November   |   |  |  |
| 08:00 - 12:00 | Trip from Bishkek city to Kara-Buura LSG (Talas region)   | Transport is TBC                                  |  |  |
|               | Lunch   |   |  |  |
| 13:00 - 14:00 | Focus Group Discussion with the representatives of LSG (Contact - Tolebaeva Zagida Rakhmanbekovna)                    | Kara-Buura LSG, Kara-Buura district, Talas region |  |  |
| 14:30 - 16:30 | Focus Group Discussion (Contact - Karbozova Salkyn)   | Kara-Buura village, Talas region                  |  |  |
|               | Accommodation in Talas town   | TBD & TBC   |  |  |
|               | Day 4, Thursday, 04 November  |   |  |  |
| 09:00 - 11:00 | Focus Group Discussion (Contact - Meerim Aytnazarova)   | Kara-Buura village, Talas region                  |  |  |
|               | Lunch   |   |  |  |
| 13:00 - 17:00 | Trip back to Bishkek city   |   |  |  |

| Day 5, Friday, 05 November |   |   |  |  |
|----------------------------|---|---|--|--|
| 9:30-10:30                 | National Bank of the Kyrgyz Republic  | TBD/TBC   |  |  |
| 11:00-12:00                | Association of Microfinance Institutions  | TBD/TBC   |  |  |
|                            | Lunch   |   |  |  |
| 13.30-14.30                | Ministry of Health and Social Development – TBC   | TBD/TBC   |  |  |
| 15.00-16:00                | UNICEF/UNFPA/OHCHR/UNDP   | TBD/TBC   |  |  |
| 16.30-17.30                | Online meeting with women migrant   |   |  |  |
|                            | Day 6, Monday, 08 November  |   |  |  |
| 08:00 - 08:40              | Flight Bishkek-Osh  | TBC   |  |  |
| 09:00 - 10:30              | Trip from Osh city to Bel LSG (Nookat district)   | Transport is TBC                                      |  |  |

What to learn from<br>experiences for the future?   | Quantitative<br>Qualitative | Extension of the partnerships,<br>replicability and sustainability of<br>the project.  | Key stakeholders   | KII with IOM, ILO, UNW,<br>FGD with the<br>stakeholders. |

## **Annex 7: Evaluation Tools**

The individual semi-structured interview guide reflected in the table will be used by the evaluation team during the data collection. Evaluators will be guided by the guiding questions outlined below, but will probe and follow up with interviewees in a fluid manner in response to answers and information offered.

The following logic of consultations will be used:

|                        | Explain:   |
|------------------------|--|
| Introduction/ Informed | Purpose of the evaluation  |
| consent                | Condition for cooperation with evaluation team: anonymity, free to reject      |
|                        | any answer, welcome to ask questions to evaluators.                            |
|                        | Clarification if there any time limitations that should be observed.           |
| Scope clarification    | In what ways have a person engaged with the project?                           |
|                        | Pay attention to components/activities.  |
| Recollection/          | Ask respondent to share the story of her/his engagement with the project.      |
| Actualization of       | Allow a person to talk. When necessary – support with questions to ensure that |
| experience             | he/she covers all areas identified in the scope clarification phase.           |
| Guided reflection      | Solicit reflections related to evaluation questions.                           |
| Wrap up                | Acknowledge value of respondent's contribution to evaluation                   |
|                        | Remind when and how information about evaluation results will be made          |
|                        | available.   |
|                        | Ask if respondent has any questions to the evaluation team.                    |

## Annex 7.1: Semi-structured interview guide for RUNOs (IOM, ILO, UNW)

## Relevance

- To what extent is the project consistent with relevant government priorities and national development strategies of Kyrgyzstan?
- To what extent is the design of the project relevant to the needs and priorities of the women migrants, youth and other beneficiaries?
- To what extent is the project strategy focused on enabling the *duty bearers* (public authorities) and empowerment of the *rights holders* (beneficiaries)?
- How innovative is the design of the project in addressing the root causes of tensions influencing peacebuilding and gender sensitive community development processes?
- To what extent have gender and human rights principles and strategies been integrated into the project design and implementation?
- $\circ$   $\;$  What mechanisms were embedded into the project to promote gender equality?
- To what extent were the cross cutting issues (youth, ethnic minorities and persons with disabilities) included in the project planning and benefitted of the project actions? /To what extent is the project using LNOB Principle?
- $\circ$  To what extent are the needs and priorities addressed by the project still relevant?

## Coherence

- To what extent is the project aligned with international agreements and conventions on GEWE in the context of inclusive community development and PB?
- $\circ$  To what extent is the project coherent with other similar actions funded by PBF in Kyrgyzstan?
- $\circ$  Is there a synergy/ coordination with the government and other key partners?
- What is the comparative advantage in the project's area of the RUNOs in comparison with other actors?

#### Effectiveness

- $\circ$  To what extent have the expected results been achieved on both outcome and output levels?
  - To what extent the capacities of the *rights-holders* (women & girls affected by migration and community members) and *duty-bearers* (LSG) were consolidated as the result of the project actions?
  - To what extent the communities recognize and support women & girls' contribution to PB and ICD?
  - To what extent women & girls in communities affected by migration were empowered to protect their rights and participate in ICD?
  - To what extent local authorities apply inclusive approaches in policy making and implement gender-responsive PB in communities affected by migration?
- To what extent youth (including migrant girls and boys) were involved through the PMC and benefited from project results?
- What are the positive or negative, intended or unintended, effects brought about by the Project's interventions?
- What are the major internal and external factors influencing the achievements / non-achievements?
- To what extent is the project approach innovative for achieving GEWE affected by migration?
- $\circ$  How financial tracking, following results-based budgeting was efficient to achieve greater GEWE results?
- $\circ$   $\;$  What are the key recommendations for increasing the project performance?

## Efficiency

- Have the outputs been delivered in a timely manner? How, if at all, has the joint nature of the project affected efficiency of delivery?
- How appropriate were the project budget and human resources to achieve project objectives?
- How efficient were the project actions and the project's response mechanisms in case of pandemic crisis?
- To what extent was the project delivered in accordance with agreed terms and reports fairly and accurately described the delivery and performance?
- To what extent the project management/leadership was efficient?
- To what extent M&E actions facilitated timely tracking of the progress, identification of the risks and opportunities and well-informed decisions? Do established mechanism of "jointness" lead to better GEWE results?"
- To what extent did the project's M&E system was consistent and efficient (monitoring types, responsible entities, frequency). To what extent was the monitoring data used for management action and decision making?
- To what extent has the project's baseline and end line surveys been well planned? Have the surveys' results delivered in a timely manner?
- How satisfied are you with the relationship with PBF/PBFSO, implementing partners and public authorities during project implementation?

## Impact

- What has been changed as the result of the project?
- To what extent the changes happened as predicted in the Toc?
- What contribution are RUNOs making to implementing global norms and standards on GEWE regarding migration, ICD and PB?

## Sustainability

- $\circ$  To what extent the benefits from the project will be maintained after project completion?
- What are the sustainability prospects at the: 1) *Policy sustainability*, i.e. viability of the local policy and regulatory level achievements); 2) *Institutional and individual sustainability* viability of the increased individual and institutional capacities of rights-holders and duty-bearers) and 3) *Financial sustainability* e.g., financial sustainability of the economically empowered women, financial commitments of the other donors, duty bearers?

- How has the project generated national and local ownership of the results achieved? What commitment has authorities demonstrated to institutionalize and replicate the good practices/project?
- o To what extent has the project been able to promote or upscale the best practices?
- What is the exit strategy and how it was implemented?

#### Partnership

- How innovative were the chosen strategy of partnership with respect of other PBF projects? What are the advantages?
- What were the partnership arrangements and how did they work? Please provide examples.
- How effective was coordination between Implementing Partners during project implementation?
- What can be learned and adjusted from the partnership experience?

## Annex 7.2: Semi-structured interview guide

for implementing partners

#### Relevance

- o How your organization became the implementing partner of the project?
- What was your key responsibilities within the project?
- What is your general impression about the project in terms of design, approach, performance and other aspects?
- To what extent its design meets the needs and priorities of the women migrants, youth, ethnic minorities, people with disabilities and community as such? Please provide some examples,

#### Coherence

- To what extent is the project in synergy with other similar projects in Kyrgyzstan?
- What is the comparative advantage in the project's area of the RUNOs in comparison with other actors?

#### Effectiveness

- $\circ$  To what extent have the expected results been achieved?
  - To what extent the capacities of the beneficieries/rights-holders (women & girls affected by migration and community members) and public authorities/duty-bearers (LSG) were consolidated as the result of the project actions?
  - To what extent the communities recognize and support women & girls' contribution to PB and ICD? Please provide examples.
  - To what extent women & girls in communities affected by migration were empowered to protect their rights and participate in ICD?
  - To what extent local authorities apply inclusive approaches in policy making and implement gender-responsive PB in communities affected by migration?
- What are the major internal and external factors influencing your work and achievements / non-achievements?
- To what extent is the project approach innovative for achieving GEWE affected by migration?

## Efficiency

- To what extent your actions were delivered according to the initial working plan?
- How did the pandemic situation influenced the project implementation and its results?
- How the project adopted to the pandemic and other factors?
- Have administrative delays or problems if any (e.g. financial transfers, timely provision of information, procurement, etc.) affected project implementation and results?
- How appropriate were the project budget and human resources to achieve project objectives?
- How would you describe the project management and communication with the UN entities?
- Who and how (often) monitored the project implementation? What aspects were monitored?
- On a scale of 1-5 (1 not satisfied 5 fully satisfied), how satisfied are you with the relationship with UN entities, public authorities and beneficiaries during project implementation? Please illustrate by examples.

#### Impact

- What are the most significant changes generated as the results of your work?
- Why do you consider them as the most significant?
- $\circ$   $\,$   $\,$  To what extent the changes happened as you expected?

#### Sustainability

- What is the likelihood that those achievements/changes will be sustainable after the project completion?
- Will the women and other key actor be able to continue to work to achieve positive changes without project support?
- To what extent the economic benefits of the women will be sustainable?
- Are there commitments of the pubic authorities or other donors to support similar/follow up initiatives?
- To what extent has the project been able to promote replication and/or up-scaling of successful practices?
- What would you recommend to UN entities for future similar actions? Why?

## Annex 7.3: Semi-structured interview / FGD guide

for national and local government authorities

#### Relevance

- What is your general impression about the project?
- What was the role of your institution within the project?
- To what extent GEWE for inclusive community development and peacebuilding are important for Kyrgyzstan? Why?
- o Is the project aligned to the government priorities/national development strategies?
- To what extent the project reflects the needs and priorities of the women/girls affected by migration, youth, community members?
- How and why women are affected by migration?

#### Coherence

• What is the comparative advantage (uniqueness) in this project in comparison with other projects, in terms of target groups, approach, implementing partners, etc?

#### Effectiveness

- To what extent the capacities of your entity (LSG) were consolidated as the result of the project actions?
- What did you learn from the project activities?
- Did you manage to apply those knowledge? If *yes*, please provide some examples. If not what were the impediments?
- To what extent the project contributed to implementation of the WPS agenda, National Action Plan 1325?
- Do you think this project somehow empowered women and girls to get more actively involved in the development of your community?
- To what extent your institution/entity applies inclusive approaches in policy making and peacebuilding?

## Efficiency

- Do you consider the planned time and resources adequate for reaching the expected results of the project?
- To what extent is your institution/local authority providing support to project implementers (technical, monetary, administrative)?
- Is there any practice within your institution/authority of cost sharing? Please provide examples.
- On a scale of 1-5 (1 not satisfied 5 fully satisfied) how satisfied are you with the relationship with UN entities/implementing partners?

#### Impact

• What has been changed as the result of this project?

- What is the most important change and why you consider it as the most important?
- How your institution contributed to those achievements/changes? Are you satisfied with that contribution? Please explain.

#### Sustainability

- o Are you going to continue the initiatives on GEWE, inclusive community development and peacebuilding?
- o If yes, do you have some working/actions plans developed or are you going to develop them?
- o How you plan to continue engaging specifically with women returnees?
- What khowledge\skills\ experiences gained through the project will be used in your practice?
- Is there evidence that the capacity received by beneficiaries of the project is being used? Please explain.
- Are there other communities\LSGs (non partcipants) aware of your benefits from the project? Are they untersted in upscaling good practices and learnings?
- What mechanisms can/should be in place in your locality to allow women and girls to participate in peacebuilding efforts?
- What project approaches and good practices might be replicated?

#### Recommendations

• What are the key areas for improvement? What should be changed, reinforced or dropped?

## Annex 7.4: FGD and semi-structured interview / FGD guide for

end-beneficiaries (women affected by migration, girls, youth, persons with disabilities, community

members)

#### Relevance

- $\circ$  What led you to participate in this project? When and how did you learn about it?
- What is your general impression about the project?
- Do you find it useful for your development needs? Why? Please explain.
- To what extent are you/your family affected by migration?
- To what extent did you participate in the planning before project started?
- Who consulted you about this? What ideas did you provide? To what extent were those ideas included in the project?

## Effectiveness

- Have you participated in some informational/awareness raising campaigns on women and girls and/or
  peacebuilding and community development actions in your community? Which activities do you consider
  most useful and why? Please provide some examples.
- What did you learn from the project activities? Did you have a chance to apply those learnings and skills? Please explain.
- How do you understand the *peacebuilding and women empowerment* expression?
- To what extent the attitude of the local authorities and community as such changed regarding GEWE and women's role in comunity development and peacebuilding?
- Did you manage to use the economic opportunities provided by the project, for instance to run a business? If *yes*, do you still own it? (Sustainability) To what extent the project was helpful in this regard? (Relevance) If *not*, what prevented you to do so? (Factors, which affected achievements)

#### Efficiency

- How pandemic (and other factors) affected your participation in the project activities?
- On a scale of 1-5 (1 not satisfied 5 fully satisfied) how satisfied are you with the benefits gained from the project? Please illustrate by examples.
- What do you recommend for the WEE programme to make it stronger?

# Impact

- $\circ$   $\;$  What has been changed as the result of the support provided by the project?
- $\circ$   $\,$  Do you consider those changes as  $\,$  significant for you and for your community? Please explain.

#### Sustainability

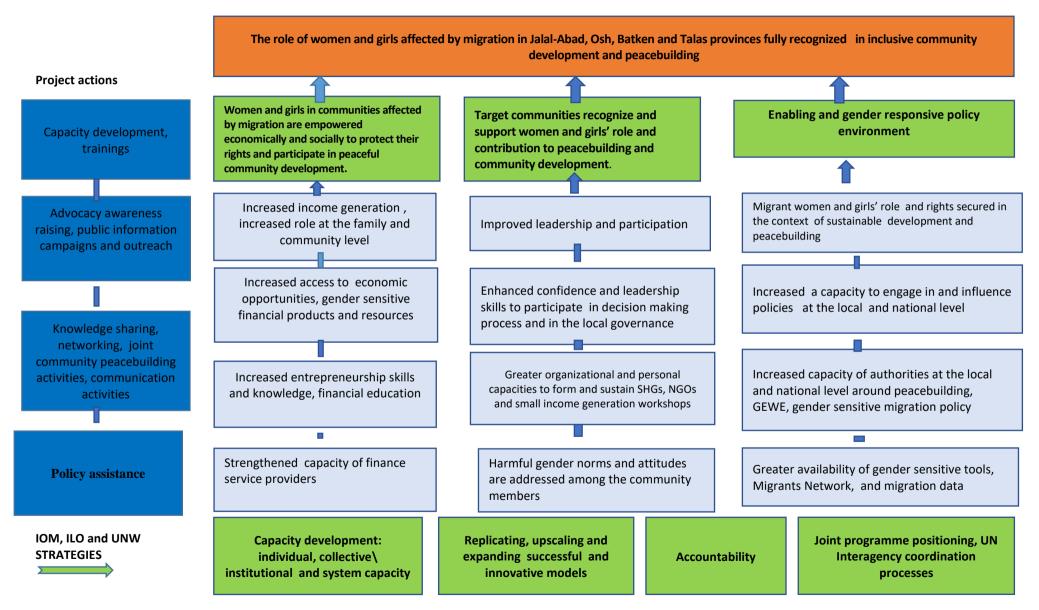

- What knowledge and skills have you acquired that you would continue to use if the project is closed?
- $\circ~$  Is there evidence that migrant women use knowledge/ capacities ~ received within the project? Please ~ provide examples

#### Recommendations

- What would you suggest for future similar projects to make them stronger and more tailored to your needs?
- What you would have liked to be done differently? Why?

## Annex 8 Theory of Change

#### JOINT PROGRAMME ON EMPOWERING WOMEN AND GIRLS AFFECTED BY MIGRATION FOR INCLUSIVE COMMUNITY DEVELOPMENT AND PEACEBUILDING

Empowering women and girls affected by migration for inclusive and peaceful community development and peacebuilding Project |Inception Report|

# ANNEX II. REPORT ON CLOSING EVENT OF THE GPI PROJECT (RLA AND AFTER ACTION REVIEW EXCERCISES)

# Agenda and methodology for Final conference/After Action Review (Reflection, Learning and Adaptation session) GPI – Final Conference June 2021

## I. About AAR

An After Action Review is a structured discussion of an intervention that enables a team to consider and reflect on what happened, why it happened, and how to sustain strengths and improve weaknesses. It is commonly a facilitated process involving key actors, who are identified as the focus of learning in a workshop setting. An AAR involves the following steps:

- Participants brainstorm their understanding of the objective or intent of the action (what was expected to happen?)
- Participants then develop a timeline of what actually happened, reconstructing timelines of key events and changes over time (what actually happened?)
- Participants then identify what went well and why, and what could have gone better and why (what went well and why?)
- At the end conclusions of what could be done better next time are summarized into lessons learned. Participants are then asked to vote for what they regard as the three most important lessons (what can be improved and how?)

## II. Agenda

09:00 - 09:15 Welcome, introduction, context for this review

09:15 – 09:45 Session I: What was expected to happen (by Outcomes, by IPs)

09:45 – 11:00 Session II: What actually happened? What kind of significant change achieved? (by

groups, by participants) (50 min reflection and visualization, 25 min presentation)

11:00 – 11:15 Break

11:15 – 12:00 Session III: What went well and why (30 min reflection and visualization, 15 min presentation)

12:00 – 12:45 Session IV: What can be improved, and how? (30 min reflection and visualization, 15 min presentation)

12:45 – 13:00 Q&A, overall reflection, and closure

13:00 – 14:00 Lunch

# III. Methodology

Conduct After Action Review / Reflection, Learning and Adaptation session using **Journey Map** / Visualization Tool. Journey Map is a tool used to understand the experience of the beneficiary in the project, helping to systematically define a map of change (from start to finish - time frame) in relation to him/her, what he/she does at each stage of the project, what he/she thinks, how he/she feels. It is a storytelling with empathetic approach where the person is in the center. It is about visualization of that story about the process of achieving change. Participants are expected to use pictures to visualize the story – preferably without text/writing.

## Step-by-step guidance:

## 1. Divide the participants into groups

3 groups for offline participants, 2 groups for online participants. Each group will work across all three Outcomes of the project. Each group should have a facilitator (from IPs and RUNOs) and a notetaker/timekeeper.

Average number of people from each municipality coming to the workshop - offline: around 40 participants

- 4 women (target group women/girls affected by migration, including vulnerable)
- 2 women activists (school's director, deputies)
- 1 LSG

Estimated number of people - online: around 30 participants

## Offline participants: 3 groups

- Facilitator Asel (CDA), Chinara (ROF), Dildora (UNW) [3 people] [Aijana (IOM) between all groups]
- Note taker/timekeeper: Mobilizers from CDA [3 people]

## Online participants: 2 groups

- Facilitator: Aisuluu (ILO), Iina (UNW) [2 people]
- Note taker/timekeeper: ROF/CDA [2 people]

## 2. Conduct Session I

Present "What was expected to happen":

- IPs to prepare *inter alia* PPT slides and/or visualized flip chart to present planned results of the project by Outcomes (ROF, CDA, ATIK?); this should be presented by Outcomes => only key activities/components of the project (like GALS, informational campaigns, initiatives, etc.) and expected results (please use very simple words/images to present this to the participants, without jargon language)
- IPs to present and collect any reflections from participants on whether this was expected to happen from their understanding

## 3. Conduct Session II

Reflect, visualize and present – through drawing the Journey Map:

- Key activities and results "what actually happened?": participants reflect and draw
  - Key activities of the project the participants took part in and
    - Results achieved as per each of the key activity
- Most significant change "what kind of significant change achieved?": participants
  - Reflect and draw overall result from the project (this should be a concrete real example of changes)
  - Write about MSC (to be later used as direct quotes) achieved as a result of the project (distribute color cards/stickers)

Sub-questions:

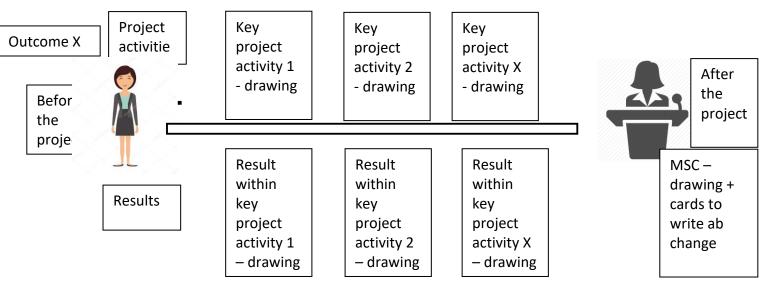

1) What kind of project activities did you participate in – in chronological order preferably? What was this activity about and what did you do? Please draw your reflection.

2) What was the result or outcome of your participation in X project activity? Did it change anything for you? What exactly? Please describe/reflect on the results for you per each project activity and/or for relevant ones. Please draw your reflection.

3) What is the most significant change/the biggest change you were able to achieve as a result of the project/your participation? Please reflect on the overall change from the project – bigger impact result. Please provide concrete example of the most significant change. Tell us your story of change. Then draw it and write about it on a distributed color card/sticker.

# Guide for drawing a Journey Map:

- Each group with participants should make one joint Journey Map a collective image of a woman affected by migration (the story is drawn from 'her' perspective)
- "Woman hero" before the project during the project after the project (visualized through a timeline, see below example of the Journey Map)
- Participants tell the storyline/draw their experience by Outcomes:
  - Discuss/reflect key project activities
  - Discuss/reflect key results per each key project activity
  - o Discuss overall most significant change (MSC) based on all key results

## Journey Map – by Outcomes – example

\*Note: for online participants – IP/RUNO facilitator will open a Word document and share the screen with online participants. On that document IP/RUNO facilitator will document discussions/reflections and where possible insert images/draw using Google images, for example.

# 4. Conduct Session III

Brainstorm/reflect and write about "what went well and why" – based on the drawing of the key activities and results achieved. Participants should use cards/color stickers to put down a) what went well and b) why it worked.

# Sub-questions:

1) What do you think went well and worked successfully in the project? What did you like? What did you think was useful for women affected by migration? If this project was to be conducted again for a different community/municipality – which project activities you would advice to conduct.

2) Please explain why you think X worked well, why it was useful, why you would recommend conducting similar activities in a different community/municipality?

\*Note: for online participants – IP/RUNO facilitator will open a Word document (for example) and share the screen with online participants. On that document IP/RUNO facilitator will document discussions/reflections

## 5. Conduct Session IV

Brainstorm/reflect and write about "what can be improved, and how" – based on the drawing of the key activities and results achieved. Participants should use cards/color stickers to put down a) what can be improved and b) how.

## Sub-questions:

What do you think did not work as well for the project? What would you change in the activity/project? What do you think can be improved? What would you do differently? If this project was to be conducted again in a different community/municipality what would you change?
 How this project can be improved? How to make it more successful and more effective? What and how would you do concretely differently in X activity/project – please provide examples

\*Note: for online participants – IP/RUNO facilitator will open a Word document (for example) and share the screen with online participants. On that document IP/RUNO facilitator will document discussions/reflections.

## 6. Conclude AAR/RLA session

Summarize key learnings and conclude the 'overall' journey map for the project. Collect any outstanding reflections from the participants.

Summary document/report – put together based on reflections, presentations, and visualized journey maps and direct quotes by all participants [this ultimately will inform the donor report]

\*Note: for online participants – IP/RUNO facilitator will open a Word document (for example) and share the screen with online participants. On that document IP/RUNO facilitator will document discussions/reflections

# REPORT ON FINAL CONFERENCE/CLOSE OUT EVENT (AFTER ACTION REVIEW: REFLECTION, LEARNING, ADAPTATION WORKSHOP)

| Project name           | Empowering women and girls affected by migration for inclusive community development and peacebuilding                    |
|------------------------|---|
| Organizers             | UN Women, ILO, IOM, with implementing partners: ROI, CDA, ATIC  |
| Trainers, facilitators | Aijan Boronbaeva, Ulziisuren Jamsran , Dildora Khamidova, Aisulu<br>Meimankanova, Asel Kuttubaeva, Chynara Abdraimakunova |
| Location (venue)       | Jannat Resort Osh   |
| Dates                  | June 26-27, 2021  |

## INTRODUCTION

The Final Conference of the GPI project was held on June 26-27 in Jannat Resort, Osh with the objective to bring together project beneficiaries and partners to have face-to-face overall discussion of the project results, to do reflections and identify learnings and develop Vision for further development on AO levels.

The Final conference was held in hybrid format simultaneously both offline and on-line. Because of the worsened situation with COVID-19, it was decided to have up to 39 participants offline with ensuring all COVID-19 safety measures: letting in participants only who have negative PCR<sup>1</sup> tests, doubled masks (to be changed every 2 hours), well aired big conference hall (200 seats) to arrange seats with 1-1,5 m distance, personal sanitizers, physical distances. Additionally hired professional technical assistance to arrange hybrid conference enabled to have participants joined online from 6 AOs and partners in Bishkek via ZOOM and offline participants to see each other, communicate and interacted virtually.

Participants:

<sup>&</sup>lt;sup>1</sup> Each offline participant went through the PCR test. Logistics were done by CDA to arrange testing procedures in 4 pilot provinces and in Bishkek and costs were paid from CDA budget.

- Day 1: 39 off-line participants (27 beneficiaries of the Project and 10 IP organizations' staff, UN Women and ILO) 59 on-line participants
- Day 2: 39 off-line participants and 45 on-line participants

Offline participants: Heads of AOs, vice-heads of AOs, Local Kengesh Chairmen, Activists, coordinators-mobilizators, SHG members, IP organizations members, UN Women and ILO representatives.

Online participants: SHG members, UN Women, IOM, ATiK representatives.

The list of participants is provided in the Annex 1.

## II. GOAL and EXPECTED RESULTS

Final Conference Objectives:

- Presentation and analysis of the Project results
- Discussing challenges and lessons learnt
- Project beneficiaries' capacity building
- Creation of conditions for networking between pilot AOs and beneficiaries
- Summarizing project results

The main expected outcomes of the Conference were the following:

-beneficiaries shared experience, lessons learned,

-conditions for networking were built

- -the project results were summarized
- -project sustainabiity was discussed

## III. Workshop process

The event was started with welcome and opening speech by Aijan Boronbaeva, IOM and Dildora Khamidova, UN Women, Asel Kuttubaeva (CDA) and Chinara Abdraimakunova (ROI).

The program of the conference contained of following key sections:

- 1) Reflection and Learning of the project against 3 project Outcomes;
- 2) Sharing, learning and fertilizing best practices of women;
- 3) Capacity building of project beneficiaries;
- 4) Developing Vision of the pilot AO development in further;
- 1) Reflection and Learning of the project against 3 Outcomes. This section was contained of:
  - *a) presentation of expected & achieved results* per each Outcome by IPs (CDA, ROI, ATiK) to help participant overall picture of the project. Expected results of the project were presented in an interactive format by using drawings there were 3 flipchart sheets with drawings that capture expected results per each Outcome. First, expected outcomes were presented, then achieved results were indicated including quantitative data on the drawings. This session was interactive: presenters first asked participants to comment on

achievements, then the presenters added with information if needed (achievement indicators);

- *b) Reflection on the achievements*. Offline participants worked in 3 groups and online participants in 2 groups all had same task to do a *Journey Map* of the woman from beginning till the end of the project considering following questions:
  - 1. What are the changes in woman before and after the project? Participants drew a picture of a woman before and after the project. There was an empty place left between the 2 drawings to put the information developed during the next steps.
  - 2. What activities took place during the project that resulted to the changes identified in the previous step? Project beneficiaries were requested to tell all activities they participated in. Facilitators could not tell project activities that were implemented, only those activities told by participants were considered. Responses of the participants were written

in the white papers hanged on the walls in the space between the picture of a woman before and after the project.

3. What were the results of the activities (Outputs)? These were written in the green cards and hanged under activities.

4. What were the most significant results, changes (Outcome)? These were written in pink and hanged under outputs.

5. What worked and why? These were written in yellow and hanged under outputs.

6. What didn't work and why? These were written in blue and hanged under outputs.

Participants were divided into the groups so that they were representative. All 5 groups worked simultaneously. 3 offline groups were facilitated by: Dildora Khamidova (UN Women), Asel Kuttubaeva (CDA), Chinara Abdraimakunova (ROI) and 2 online groups were facilitated by: Aisuluu Meimankanova (ILO) and Almaz Atambiev (IOM). After work in groups there was a plenary sharing and discussion.

Here is the summary of the results of the work of 5 groups:

## 1. Changes in woman before and after the project

| Woman before the project                   | Woman after the project               |  |
|--|---------------------------------------|--|
| Looks unhappy, sad, depressed, suppressed; | Has a smile on her face, smiles more; |  |

| Does not smile;                                  | Looks happy;                                     |
|--|--|
| Does not have self-confidence;                   | Has developed emotional intelligence and         |
| Vulnerable;                                      | communication skills;                            |
| Does not have goals in life;                     | Confident in herself;                            |
| Can not do Visioning (dreaming) or have limited  | Successful;                                      |
| Vision/Dream;                                    | Has goals in life;                               |
| Cannot express her mind freely;                  | Can do Visioning and has concrete Vision about   |
| Cannot develop and keep up relations with        | her life and whatever issues she needs to have a |
| people;  | Vision about;                                    |
| Has no cooperation with family members;          | Her Vision/Dreams started to get achieved;       |
| Women and men (at the family level) do not       | Can express her mind freely;                     |
| value and respect each other (as individuals;    | Can develop and support relations with people    |
| contribution to the household and community)     | Has assistance from family members to carry out  |
| Have often conflicts in the family and victim of | her household duties, business and even social   |
| domestic violence;                               | activism;  |
| Has many children (has more responsibility for   | Women and men (at the family level) have         |
| their development comparing to her husband);     | started to value and respect each other;         |
| Needs assistance and support;                    | Conflicts and violence at the family has         |
| Does not make a decision (at the household and   | decreased;                                       |
| community level);                                | Has assistance and support at the household and  |
| Not aware about own rights;                      | community life;                                  |
| Narrow outlook;                                  | Takes decision on personal issues and engaged    |
| Exhausted and dispirited;                        | in decision-making at the household and          |
| Does not pay attention to own health;            | community levels;                                |
| Lost/hopeless/desperate;                         | Aware about her own (human) rights and can       |
| Has no money;                                    | protect them;                                    |
| Does not think of earning money;                 | Has wider outlook and more                       |
| Financially illiterate (wastes money);           | informed/knowledgeable;                          |
| Poor time management skills;                     | Feels less load with household duties and        |
| A housewife;                                     | responsibilities;                                |
| Unemployed;                                      | Pays more attention to own health;               |
| Socially passive (both on the household and      | More financially independent/has work place      |
| community levels);                               | and earns money;                                 |
| Indifferent to the community life;               | Started thinking of starting a business/earning  |
| Does not have communication skills and           | money;   |
| cooperation skills;                              | Business lady;                                   |
| Has no communication and interaction with the    | Women which can contribute to peacebuilding      |
| local authorities;                               | processes at their communities;                  |
| Cares only about physiological development of a  | Developed financial literacy (improved financial |
| child;   | efficiency by decreasing unnecessary costs);     |
| Has no IT skills (computer/laptop, Zoom,         | Improved time management skills and ability to   |
| WhatsApp, Telegram);                             | cope with more productivity;                     |
| Has no peers, alone;                             | More socially and economically active at the     |
| There are no associations for women, always at   | household and community levels and               |
| home;  | contributes to the household sustainability and  |
|  | community development,                           |
|  | peacebuilding/peacekeeping at the community;     |
|  | More developed citizenship;                      |

| <br>  |
|---|
| Knows how to behave in the community so that      |
| she is heard, supported and respected;            |
| Has wider understanding and plans regarding       |
| child development;                                |
| Has IT skills (can use computer/laptop, Zoom and  |
| other social media apps);                         |
| Not alone – she has peers and SHG that have       |
| common interests, needs and Vision in life and    |
| common citizenship plans and business;            |
| A leader at the community level (member of the    |
| Local Parliament);                                |
| Has positively changed herself and promotes       |
| positive changes among others;                    |
| Her position at the household and community       |
| has changed – she has outlined her role in the    |
| community and is more valued (her                 |
| contribution), respected and supported;           |
| She is more initiative, brave and initiates       |
| community development actions with a              |
| confidence;                                       |
| Has more opportunities for exchange of            |
| experience;                                       |
| Has started contributing to the community         |
| development and peacebuilding;                    |
| Has project design skills and implementation      |
| experience;                                       |
| She has skills to develop cooperation with local  |
| authorities and to interact with them;            |
| She has advocacy and lobbying skills and utilizes |
| them to solve women's and community needs;        |
| Aims to improve quality of own life;              |

# 1) Reflection on woman's journey and achievements;

| Activities – journey of a woman<br>(white cards) | Results (green cards)           | Significant results (pink cards) |

|--|---|
| Information campaign about the project   | Not enough amount of the qualified and          |
| (public meetings, brochures and other    | professional staff at AO office;                |
| materials on raising awareness about the | Weak trust of the community members to the      |
| project;                                 | project (in the beginning of the project before |
|  | getting the fruits);                            |

2. Sharing, learning and fertilizing best practices of women. This was conducted in the format of the world café - there were 5 groups on such topics as participation in the development of the local development plans, implementation of the local initiatives, participation in the community development, participation in the peacebuilding, mitigating negative impact of migration towards women and girls. Each group had per one women Positive Deviant who shared own best practices first, then other participants of the group could ask questions to learn more or clarify and/or share own experience. People have spent per 20-30 minutes in each group and moved to new groups till everyone has visited each of the 5 groups. After sharing, each of the 5 groups have identified a list of success factors of the particular topic and shared in a plenary.

Here is the summary of the success factors shared by each of the 5 groups:

- Expanding opportuntities for vulnerable women;
- Established good cooperation between women and local authorities;

- Promoting peaceful interaction between different ethnicities and enhansing inclusive communities (LI "Smart park", resolving issues with Kurd diasporas, public spaces for the youth of different ethnicities);
- Building cooperation and networks with diasporas;
- Promoting healthy life style (creating workout places and sport yards; healthy nutrition);
- Enganing local communities and women into the process of development of local development plans (through public hearings);
- Contribution of AOs into LI of women (in-kind mainly and some in cash);
- Quality selection of candidates for Village Animators;
- Household methodology GALS enhanced social transformation at the household level that spilled over the community (improved gender relations, support to women by their husbands and other family members, etc);
- Facilitation exchange of experience between AO;
- Savings Fund of SHGs contributed to the economic activism and access to financial resources of women;
- Raising funds for the LIs;
- Engagin children and youth from families affected by migration;
- Conducting public meetings, community gatherings;
- Engaging men (husbands of the SHG members) into the project;
- Capacity building of women on social mobiliation, human rights, safe migration, peacebuilding, community development, financial literacy, enterprenuership, gender eqaulity, others.

This session also contained sharing **session with Ulzisuren Zhamsran, the head of the UN Women CO in KR**. She received feedback of the **project participants on how Positive Deviance approach has contributed to the project**. Participants shared cases of Positive Deviants and outlined adding value of this approach to the project.

# 3. Capacity building of project beneficiaries: master classes on financial literacy, fact checking was conducted.

# 4. Developing Vision of the pilot AO

**development in further**. Participants from 6 AOs were divided into 6 small groups – one AO into one group to develop a Vision of the AO development in future. Participants have used GALS tool *Visioning*.

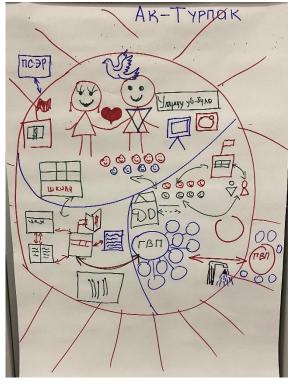

# Here are the results of Visioning:

| AO         | Vision                                       |
|------------|--|
| Kyzyl-Adyr | 2021-2024:                                   |
|            | On household and community level:            |
|            | <ul> <li>Happy families movement;</li> </ul> |

|              | <ul> <li>Non-violent and peaceful co-existence between community members;</li> <li>Existing women's SHGs continue activism and development;</li> <li>Women's participation in the community development and social cohesion;</li> <li>Inlcusive community: community dialogues within inhabitants and local authorities;</li> <li>On AO level (as the authority unit);</li> <li>Continued capacity building of the community members, especially of the women and girls;</li> <li>Small and medium business developed;</li> <li>Open interaction with different donors and development institutions;</li> </ul>   |
|--------------|---|
|              | <ul> <li>Developed agriculture and cattle breeding;</li> <li>Women's political leadership developed;</li> <li>Community based tourism;</li> </ul>   |
| Ak-Turpak AO | <ul> <li>Happy families as Model Families as Positive Deviants via outreach activities;</li> <li>Continue household methodologies;</li> <li>Women, youth and community members actively engage in the elaboration of local development plans;</li> <li>Value chain is developed and sustainable livelihoods, diversification of income exists;</li> <li>Preschools/kindergartens are available and provide quality service;</li> <li>Access to drinking water;</li> <li>Inclusive community with women in the community development and local decision-making processes;</li> <li>Existing SHGs are active supporters of the local development and partners of LSGB. More women are mobilized into SHGs;</li> </ul> |
|              | Key point: SHGs are the entry points and a real power in the implementation of the above mentioned tasks;   |
| Orozbekov AO | <ul> <li>Happy families;</li> <li>Job places are available (producing, branding local products and marketing);</li> <li>Sustainable internet connection in the AO;</li> <li>Strong collaboration and cooperation between inhabitants (though SHGs), local authorities, local business and donors;</li> <li>Youth is well educated and developed (capacity building, quality education, developing talents);</li> <li>Women, youth and community members are active in local development processes (including on the policy level);</li> <li>Many storied houses (AO has small flat territory while the population is growing);</li> </ul>   |
| Bel AO       | <ul> <li>Access to drinking water;</li> <li>Chicken farm;</li> <li>Social café (LI object) serves people;</li> <li>Resolved pasture management issues;</li> </ul>   |

|              | <ul> <li>Developed farming and agriculture;</li> <li>Happy Families;</li> <li>Women's SHGs are supported to run business (to invest/contribute as much as possible);</li> <li>Eco-friendly behavior and resolve issues with trash</li> <li>Improved local market (access of local inhabitants to quality products and foods);</li> <li>Improved household/living conditions of the people;</li> </ul>   |
|--------------|---|
| Kyzyl-Tuu AO | <ul> <li>There is a mobile group on AO level that consists of local authorities, activists and SHG members. Mobile group is responsible for the coordination and facilitation of following activities between the villages that are under jurisdiction of the AO: <ul> <li>Developing Value Chain where each village is responsible for the certain production: honey, sewing, vegetables and plants, farming, gardening, cattle breeding (depending on the opportunities and strengths of each village);</li> <li>Close communication and cooperation between community and the local authorities – SHGs act as linking/bridging point;</li> <li>Training and development center for women, youth and entrepreneurs;</li> <li>Community members (especially women and youth) contribute in local development and peacebuilding in all levels (needs assessment, policy level and taking actions);</li> </ul> </li> </ul> |
| Toolos AO    | <ul> <li>Happy families and happy, equal members of the community (representing different ethnicities);</li> <li>Local community trusts on and supports LSGB;</li> <li>Children, youth get quality education and development in the kindergartens and schools;</li> <li>Preventing migration by creating workplaces;</li> <li>Supporting families that have migrants;</li> <li>Community is rich and financially literate;</li> <li>Developed social infrastructure;</li> <li>SHGs are driving power of the social and economic development (create job places and initiative community development projects);</li> <li>Improving transportation issues;</li> <li>Access to clear water;</li> <li>Developing agriculture;</li> </ul>  |

The conference had following activities as well:

• At the end of the 1<sup>st</sup> day, participants were requested to do a home work for the next day – to develop a personal story of success. 13 stories were collected (*Annex 4: Personal stories of final conference participants*);

• Awarding Letters of Appreciation for the project beneficiaries (AO, Local Parliament and active women)

The conference was very interactive and has utilized following methods:

- Travel map
- Quick dates or World Cafe
- Work in groups
- Drawings
- GALS diagrams
- Brain storming
- Questions and answers
- Presentations
- Plenary sharing and discussions
- Looping video materials on success stories on the screen during break times (videos produced by CDA and ROI)
- Exhibition of the project visibility products, knowledge management products, information and education materials was organized (GALS manuals, SHG working books, GALS diaries, brochures, books and publications by ROI, calendar, etc).

Sessions were facilitated by Aijan Boronbaeva – IOM Project Manager Asel Kuttubaeva – CDA Project Manager, Chynara Abdyraimakunova - RIO Project Coordinator, Dildora Khamidova – UN Women, Head of Osh UN Women sub-office. On-line facilitators of working in groups were Almazbek Atambiev – IOM, Aisuluu Meimankanova – ILO, Znanybek Kaparov – RIO Project Assistant.

## **IV.** ACHIEVED RESULTS

Project participants have shared with achievements, best practices and challenges, reflected on the experience and elaborated learnings. The key result of the event was project participants' evaluation of the project with their own eyes and from their own perspectives. Also participants have improved capacity on community development, gender equality, sustainable development and women's empowerment. Participants have developed Visioning of own AO development – thus framing next development strategies and tactics.

We were delighted to see open and friendly relations between women and LSGBs during the conference and that they envision:

- ✓ SHGs as the real power that can bring positive contribution to the local development and as partners of the LSGBs;
- ✓ All participants understand that key of the sustainable development and peaceful community is the Happy Family;
- ✓ Have clear understanding of the community needs;

In general, we think, the event was successful. Sessions were very interactive and energetic. The objectives that we put before planning the Conference were achieved, because of the well-coordinated work on preparation of the Conference. The only main obstacle was Covid and restrictions on the number of participants. A lot of our other beneficiaries were willing to participate in the Conference, and wanted their voices to be heard and show their passion about the Project.

## V. ADDITIONAL OBSERVATIONS IN THE COURSE OF THE EVENT

Almost all participants shared their opinion about the Conference and Project overall and stated the importance of off-line meeting with the beneficiaries and Donor and Implementing organizations.

Despite Covid it was very significant for them to come together, share experience, ideas, build networking among them, work for the future projects.

ANNEX III. REPORT ON GEWE FINANCING TRACKING EXERCISE FOR THE GPI PROJECT (FINAL)

# **Tracking financing for GEWE – GPI project – actual expenditure** RUNOs: UN Women, IOM, ILO (27 October 2021)

|   |   |   | Planned   |  | Actual   |                          |                            |

# Reflection on piloting the methodology on tracking financing for GEWE Calculation of actual financial allocations in support of GEWE considerations

in the framework of GPI project "Empowering women and girls affected by migration for inclusive and peaceful community development"

IOM - UN Women - ILO

27 October 2021

## Participants

A total of three programme colleagues participated in the piloting exercise from IOM, UN Women and ILO. Below is the list of participants:

- 1. Aijan Boronbaeva, Senior Programme Assistant, IOM
- 2. Aisulu Meimankanova, National Project Coordinator, ILO
- 3. Dildora Khamidova, Head of Osh Office, UN Women

### Facilitator

Diana Mamatova, Consultant on DM&E

### Background on the methodology on tracking financing for GEWE in UN programming

UN Women developed the methodology on tracking financing for GEWE in UN programming in response to a UNCT request and the thresholds set by the UN PBF to account programme spending in support of GEWE. More recently during the first quarter of 2020, the methodology was revised to adopt UN INFO GEM processes, with a case example of applying the methodology on PBF supported joint programming and slight adaptations based on PBF GEM Guidance Note. The methodology provides step-by-step guidelines on how to track financing for GEWE throughout the project implementation:

- a) at the planning state when planned GEWE results are discussed and planned financial allocations are estimated;
- b) during the implementation period when progress towards GEWE results is tracked and progress financial resources already spent to achieve those results are estimated; and
- c) at the closure of the project when actual GEWE results are assessed and final and actual financing resources are calculated and confirmed.

### Summary of piloting exercise and its' results

GPI project "Empowering women and girls affected by migration for inclusive and peaceful community development" is the first project to pilot the methodology on tracking financing for GEWE in UN programming. The following documents were used to conduct this piloting exercise on the example of the GPI project:

- Methodology on tracking financing for GEWE in UN programming (Annex 1)
- GPI reports with information on Outcomes/Outputs/indicators/Activities (Annex 2)
- Blank table template for filling out data on GPI to apply GEM and calculate the actual expenditure in support of GEWE for the project with information on previously planned GEM codes/GEWE results and financial allocation (Annex 3)

• Financial report for the project: with details on programmatic (for implementing direct project activities) and support/operational expenses (HR and other related costs) (Annex 4)

RUNOs conducted a joint exercise on discussing GEWE results and calculating **actual expenditure** on GEWE. The piloting exercise was conducted in one session, with an estimated 2-3 hours overall. RUNOs jointly reflected on actual project results at the outcome and output levels, taking into consideration related target indicators. The dialogue entailed a comparative approach - between what was planned and what was the result. While discussing this or the other GEM/GEWE result, RUNOs documented justification in support of GEWE considerations. Then RUNOs estimated actual expenditure to achieve GEWE results. The outcomes of the dialogue and exercise were documented in the table on the calculation of the budget in support of GEWE.

## **Reflections from the piloting exercise**

**Usefulness:** GEM application and tracking financing in support of GEWE was a useful exercise for the project. It enabled RUNOs to jointly reflect on and unpack GEWE results and to estimate the budget that goes toward achieving these GEWE results right from the onset of the project. This, in turn, sets out a baseline towards expected GEWE outcomes as well as 'justification' for defining what would be considered as effective funds spent on GEWE. Although the GPI project is in principle focused on GEWE outcomes, it was still relevant to discuss the extent the project was gender-transformative and/or gender-responsive. Participants noted that GEM application and tracking financing would especially be useful for other projects where GEWE is not a central objective. The exercise indicated that the planned GEWE results for the project was able to achieve. RUNOs noted the usefulness of this exercise not only for UN entities but recommended to potentially use it as a capacity building on GEWE for Implementing Partners of the project.

**Potential challenges:** As feedback from one of the participants, GEM application and tracking for financing in support of GEWE seemed to be easier for projects like GPI where GEWE is a primary objective along with peacebuilding focus and other. It was relatively easy to identify GEWE results for the project, such as specific outputs and outcomes. However, it might be a bit more challenging to apply GEM and calculate the budget that goes in support of GEWE for projects whose primary goal is not related to GEWE.

**Comparative element between planned and actual results and budget:** during the exercise it was useful to compare the results on GEWE and estimate actual expenditure in support of GEWE vis-a-vis planned GEWE results and financial allocation. The table that was used to facilitate and document the discussion had both sets of data - planned and actual. While discussing the project's results, it was also critical to look at the target indicators and whether the project achieved those.

**Frequency and duration of the exercise:** joint exercise was conducted at the beginning of the project at the planning stage, during the implementation to monitor progress, and at the end of the project at the closure stage. While GEM application and tracking financing in support of GEWE is necessary at the planning and closure stages, UN entities highlighted the usefulness of conducting this exercise also during mid-implementation period to track progress made and reflect on any potential adaptations to strengthen GEWE results for the project. In terms of duration for the exercise, it took around 3 hours to conduct it, including time for brief reflections as well.

**Level of results**: it was evident during the exercise that discussing the results at both levels - outcome and output - was necessary. Output level results provide details and more in depth understanding of the changes and contribution at the outcome level.

**Participants**: RUNOs highlighted the importance and usefulness of keeping GEM application and tracking financing as participatory as possible. The exercise could engage various project stakeholders, such as relevant state authorities, Implementing Partners, and programme personnel - such as operations/finance units, M&E focal points, gender focal points.

### Individual reflections from participants

"GEWE financing is an important tool, and this exercise allowed us to keep pace with commitments to gender equality and women's empowerment within the project. However, it was difficult to use the gender equality markers to assess the quality of results achieved and whether the completed activities contributed to the planned outcomes"

-Dildora Khamidova, Head of sub office in Osh, UN Women

"The exercise was very useful in terms of identifying the actual percentage of financial GEWE within GPI project. I remember the first session we conducted and in comparison to the first one, the last one is more informative as by this time we know exact project results and exact level of expenditures allocated for achieving GEM3".

-Aijan Boronbaeva, Senior Programme Assistant, IOM

### Recommendations, opportunities, and future follow up

- Promote usage of the methodology on tracking financing in support of GEWE among Implementing Partners to allow them to monitor GEWE results and track GEWE financing within the intervention from the very beginning and throughout the implementation period.
- Harmonize existing GEM systems and GEM codes: Gender equality markers should be internalized to the specific project management systems and mandates of UN entities. Various UN agencies have adopted GEM systems based on common elements. Yet there are dissimilarities in how the GEM is applied, what kind of GEM codes are used, and each agency interprets the scores differently. This makes it challenging to compare GEWE considerations across agencies. There is a need for a unified GEM system with similar GEM codes across UN entities at the UNCT level.
- There is a need for joint discussions and capacity building on GEM application and tracking financing in support of GEWE. Agencies who do not use GEM coding may encounter difficulties in coding and can benefit from practices, experiences, tools and materials of those agencies who already apply GEM. Capacity building on gender equality issues is an important prerequisite for the successful implementation of gender equality marker system. There could be cases of misinterpretation when it comes to deciding on GEM code, especially among those who do not specialize on GEWE. Capacity building efforts should aim at providing clear instructions and examples on GEM application per each GEM code.

ANNEX IV. REPORT ON PRE AND POST SURVEY CONDUCTED TO ASSESS THE IMPACT OF AWARENESS RAISING CAMPAIGNS WITHIN PBF GPI PROJECT

## Report on the results of the pre- and post-survey among community members of the project "Empowering women and girls affected by migration for inclusive and peaceful community development and peacebuilding"

## **1. General information**

Within the framework of the project Implementing Partner "Rosa Otunbayeva's Initiative" conducted pre- and post- survey of target communities residents to determine the progress in achieving two indicators:

## 1. Additional indicator 1b of Outcome 1

% of community members, who believe that women affected by migration play positive role and contribute to peacebuilding and community development (as part of the indicator 1.1.)

Baseline: based on the baseline study

Target: increase by 10%

## 2. Indicator of short term result 1.1

% of community members who report increased awareness of the role of women and girls in community development and peacebuilding (with additional questions to support additional long-term outcome 1b from ROI).

Baseline indicator: requires definition

Final indicator: increase for 20%

The surveys were conducted in the online Google Forms format. The baseline survey was conducted in January-February 2021. It was attended by 658 people, among them 514 women (78.1%) and 144 men (21.9%) (Table 1).

| Age and sex data of respondents (baseline survey) |       |       |     |       |  |  |  |  |
|---|-------|-------|-----|-------|--|--|--|--|
|   | 15-24 | 25-54 | 55+ | Total |  |  |  |  |
| Women   | 203   | 239   | 72  | 514   |  |  |  |  |
| Men   | 60    | 46    | 38  | 144   |  |  |  |  |
|   |       |       |     | 658   |  |  |  |  |

Table 1. Age and sex data of respondents (baseline survey)

The final survey was conducted in July 2021. It was attended by 323 people, among them 283 women (87.6%) and 40 men (12.4%) (Table 2).

| Age and sex data of respondents (final survey) |       |       |     |       |  |  |  |
|--|-------|-------|-----|-------|--|--|--|
|  | 15-24 | 25-54 | 55+ | Total |  |  |  |
| Women  | 64    | 186   | 33  | 283   |  |  |  |
| Men  | 4     | 27    | 9   | 40    |  |  |  |
|  |       |       |     | 323   |  |  |  |

 Table 2. Age and sex data of respondents (final survey)

The difference in the number of people who took part in the baseline and final surveys is due to the fact that a large part of the population of the target communities, especially men, was engaged in summer field work in July and could not actively participate in the final survey.

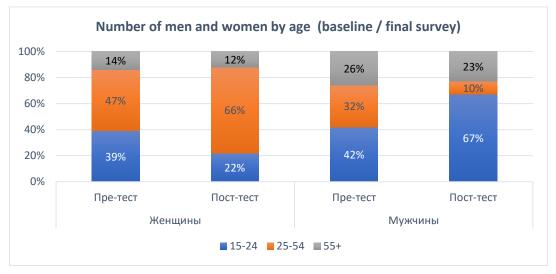

Chart 1. Age and sex data of respondents in the context of baseline and final surveys

Geographically, residents of the Batken region took an active part in the polls. The share of residents of the Ak-Turpak village was 20% in the baseline survey and 26% in the final survey, and the share of residents of the Orozbekov village was 19% and 31%, respectively. The residents of the Kyzyl-Tuu village showed low activity in the polls - 14% in the baseline survey and 8% in the final survey, and the respondents from the Kara-Buura village - 11% and 4%, respectively. (Table 3)

|                                  | Baseline survey |     | Final su | urvey |
|----------------------------------|-----------------|-----|----------|-------|
| Communities                      | Quantity        | %   | Quantity | %     |
| Akturpak AA, Batken province     | 133             | 20% | 84       | 26%   |
| Orozbekov AA, Batken province    | 128             | 19% | 100      | 31%   |
| Bell AA, Osh province            | 112             | 17% | 37       | 12%   |
| Tolos AA, Osh province           | 122             | 19% | 61       | 19%   |
| Kyzyl-Tuu AA, Jalalabad province | 93              | 14% | 27       | 8%    |
| Ak-Buura AA, Talas province      | 71              | 11% | 14       | 4%    |

Table 3. Number of respondents by community

## 2. Attitude of residents of target communities towards women and girls prone to migration

The survey identified the baseline and endpoints of the IPF Additional Long-Term Result Indicator 1b -% of community members who believe that women subject to migration play a positive role and contribute to peacebuilding and community development.

The survey results show that the proportion of respondents who believe that women subject to migration play a positive role and contribute to peacebuilding and community development was **64%** in the baseline survey and **86%** in the final survey.

These indicators demonstrate that due to project activities, the share of community members who believe that women subject to migration play a positive role and contribute to peacebuilding and community development has increased **by 22%**. (Chart 2)

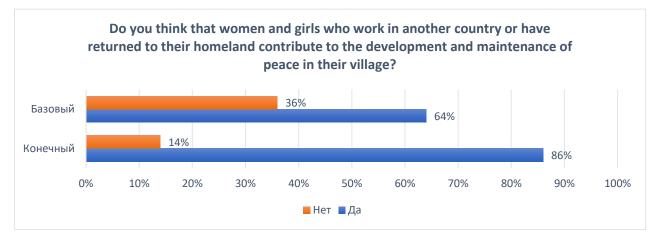

Chart 2. Indicators of additional indicator of long-term result from OIF 1b

It should be noted that in terms of gender, an increase in the number of respondents who believe that women subject to migration play a positive role and contribute to peacebuilding and community development is observed among women respondents - 63% in the baseline survey, 86% in the final survey, **an increase by 23%**. The response rates of male respondents in the baseline and final polls remained the same - 70% - believe, 30% - do not. (Chart 3)

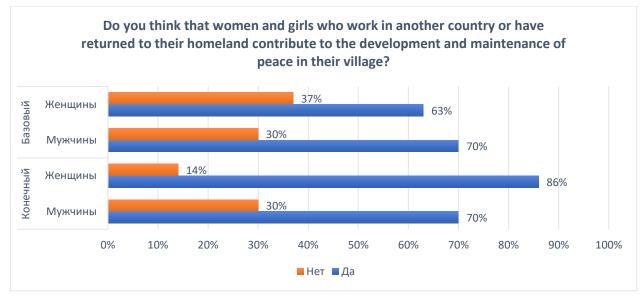

Chart 3. Indicators of add. long-term outcome result from IPF 1b by gender

The surveys also identified some indicators that reinforce the value of progress in Additional Long-Term Result Indicator from IPF 1b. Thus, the proportion of the population of target communities who believe that women and girls who have returned or are planning to go into labor migration play a positive role in the development of communities and in maintaining peace in the community has increased by 14%. (Baseline 75%, Final Score 89%) (Chart 4)

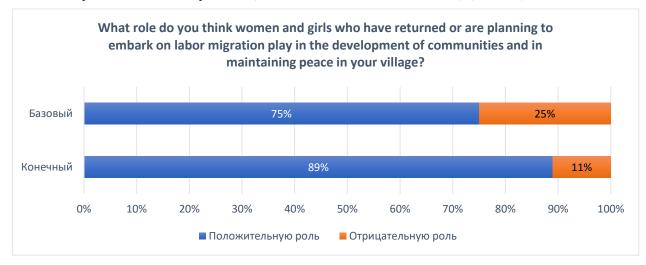

Chart 4. Proportion of the population of the target communities who believe that women and girls subject to migration play a positive role

Survey results also indicate that there has been an increase in the proportion of the population of the target communities who are more likely to agree with statements supporting the strengthening of the role of women in development and peacebuilding.

Thus, the percentage of respondents who rather agree that women should actively participate in local meetings and take part in decision-making on local issues increased by 10% (Baseline survey - 30%, final survey - 40%) (Chart 5).

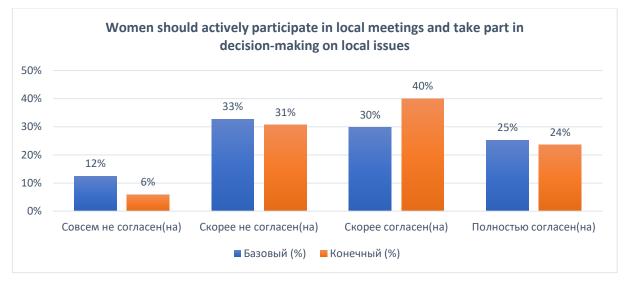

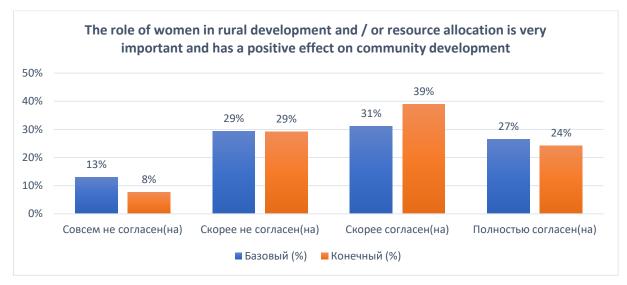

Chart 5. Attitude of respondents to the idea that women should actively participate in local meetings and take part in decisionmaking on issues of local importance

The percentage of respondents who rather agree that the role of women in rural development and / or resource allocation is very important and has a positive effect on community development **increased by 8%** (Baseline survey - 31%, final survey - 39%) (Chart 6).

*Chart 6. Attitude of respondents to the fact that the role of women in rural development and / or resource allocation is very important and positively affects the development of the community* 

The percentage of respondents who rather agree that the role of women in resolving conflicts and maintaining peace in the community is very important and has a positive effect on peacebuilding **increased by 10%** (Baseline survey - 29%, final survey - 39%) (Chart 7).

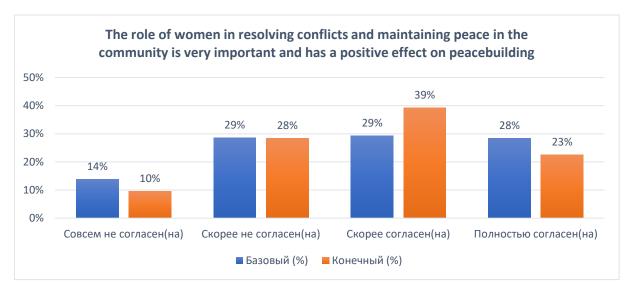

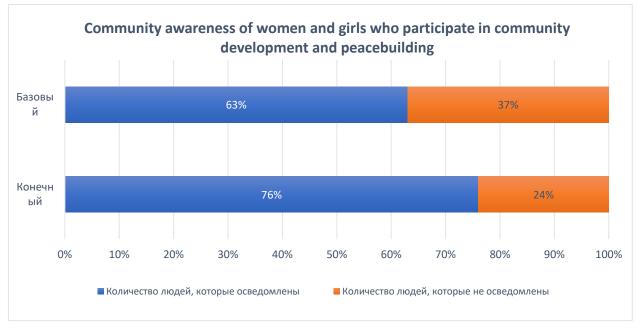

Chart 7. The attitude of respondents to the fact that the role of women in resolving conflicts and maintaining peace in the community is very important and has a positive effect on peacebuilding

## **3.** Awareness level of residents of target communities about the role of women and girls in community development and peacebuilding.

The survey also identified baseline and outcome indicators for short-term result indicator 1.1 -% of community members who report increased awareness of the role of women and girls in community development and peacebuilding.

The survey results show that the proportion of respondents who are aware of women and girls who are involved in community development and peacebuilding was **63%** in the baseline survey and **76%** in the final survey.

These indicators show that due to project activities, the level of awareness raising among the population about the role of women and girls in community development and peacebuilding **has** increased by 13%. (Chart 8)

In terms of gender, an increase in the number of respondents who are aware of women and girls who participate in community development and peacebuilding is observed both among women respondents - 63% in the baseline survey, 75% in the final survey (an increase of 12%), and among men - respondents - 70% in the baseline survey, 82% in the final survey (an increase of 12%). (Chart 9)

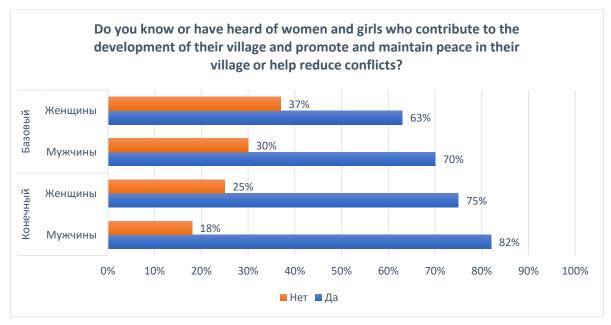

Chart 9. Indicators of short-term result indicator 1.1 by gender

The results of the survey also showed an increase in the awareness of the population of the target communities about women and girls affected by migration and their positive roles in some areas (Chart 10 and 11).

- For example, the share of the population who heard about women and girls in the village who, having returned from migration, created women's / youth organizations and are actively involved in rural development, in the baseline survey was 34%, in the final survey 61%, an increase of 29 %.
- The share of the population that heard about women and girls in the village who, having returned to their native village from another country, where they were able to accumulate money and gain experience, opened their own business or workshop and provided jobs for local residents in the baseline survey was 33%, in the end survey 58%, an increase of 25%.
- The share of the population that heard about women and girls in the village *who*, *having returned from migration, actively participated or contributed to the resolution* **of any local conflicts or in promoting peace in their village** in the baseline survey was 24%, in the final survey 64%, <u>an increase of 40%</u>.
- The share of the population that heard about women and girls in the village who, having returned from migration, began to work in local government structures or became members of the local kenesh, in the baseline survey was 20%, in the final survey 76%, an increase of 56%.

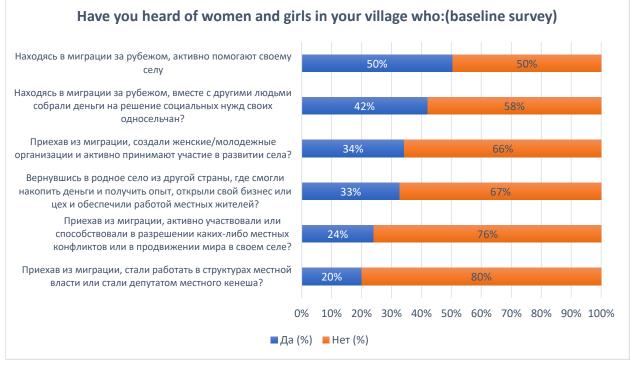

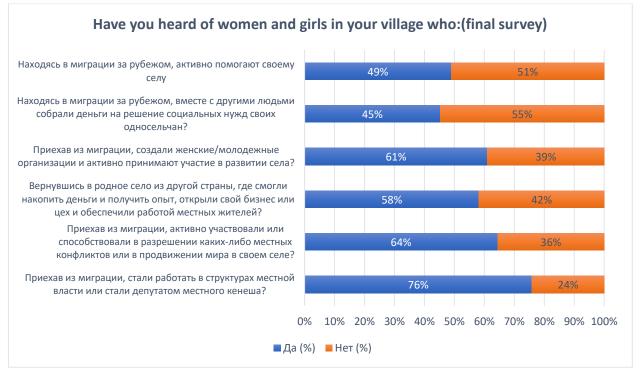

Chart 10. Awareness level of the population in the baseline survey

The survey results suggest that project activities in target communities have become a major catalyst for raising public awareness of the positive role of women and girls affected by migration in peacebuilding processes (40% growth) and their participation in local government (56% growth). These indicators also suggest that, as part of the project, women and girls affected by migration have themselves become more actively involved in peacebuilding and decision-making processes at the local government level. For example, this activity had the opportunity to be channeled into the elections of deputies to local councils in April 2021, where many activists of the project took part.

Thus, the baseline and final survey made it possible to identify two indicators:

#### 1. Additional Long-Term Outcome Indicator from IPF 1b

% of community members who believe that women prone to migration play a positive role and contribute to peacebuilding and community development (as part of short-term outcome indicator 1.1.)

Baseline indicator: 64%

Final indicator: 86% (an increase of 22%)

#### 2. Short Term Result Indicator 1.1

% членов сообщества, которые сообщают о повышении осведомленности о роли женщин и девушек в развитии сообщества и миростроительстве (с дополнительными вопросами в поддержку дополнительного долгосрочного результата 1b от МОФ).

% of community members who report increased awareness of the role of women and girls in community development and peacebuilding (with additional questions to support additional long-term outcome 1b from IPF).

Baseline indicator: 63%

Final indicator: 76% (an increase of 13%).

ANNEX V. SURVEY ASSESSMENT IN SUPPORT OF OUTCOME INDICATOR 1B

## Survey report "Impact of PR campaigns to promote local initiatives on community members"

This survey was conducted online to identify the number of targeted community members who believe that women subject to migration play a positive role and contribute to peacebuilding and community development - as a result of PR campaigns to promote women's initiatives (6 local initiatives / initiatives on peacebuilding, campaigns target a total of 6,000 community members, targeting 1,200 community members). The survey involved 369 (80% of the planned general population) respondents from 6 AOs in four pilot oblasts out of an estimated 460 respondents.

To identify the number of targeted community members who believe that women subject to migration play a positive role and contribute to peacebuilding and community development, as a result of PR campaigns to promote women's initiatives, the questionnaire included the following questions:

- 1. Have you heard about local community development initiatives in your village / aiyl okmotu?
- 2. Have you heard about local peacebuilding initiatives in your village / aiyl okmotu? \*
- 3. Have you heard about any successful women's initiatives in your village / aiyl okmotu toward community development? \*
- 4. Leave your comments on the following posts. 1 I do not agree at all, 2 Probably, 3
   I agree, 4 I completely agree \*
- 5. Have you changed your mind about the role of women in peacebuilding and community development?
- 6. To what extent is information available on local initiatives and projects available?
- 7. From what sources did you learn about women's initiatives?

As a result of the report, the respondents' answers to these questions are taken into account when confirming the number of target members of the community, who believe that women, subjected to migration, play a positive role and have a positive role to play.

Period of the survey June 28 - July 12, 2021

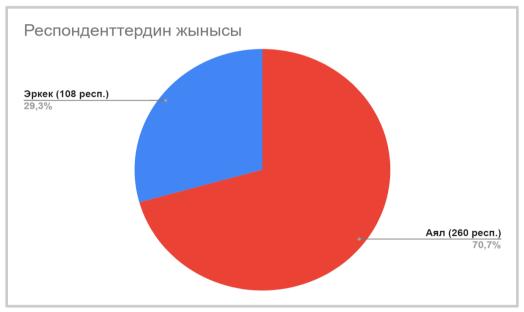

The survey was conducted on the basis of Google and to obtain quality credible information, the next selection was determined, where the trustworthiness is 90%, and the allowable error is 10%. The size of the selection in the section of the AO is determined in accordance with the number of residents in each AO and gender ratio in each of the AO. For the general co-purchase, the number of residents in each AO, and for the definition of gender relations of respondents in each AO, the actual relationship between men and women in each AO. Considering the volume of general purchases in each AO, the level of trust was set at 90%, and the allowable failure was set at 10%. With the calculation of all data, the selection was calculated for each AO using the selection calculator and rounded up to the whole (n-r, in Bel selection 68, rounded up to 70). The result of the above data was determined by the general co-purchase in 6 AO 420 respondents, which is sufficient to determine the number of target members of the community - who believe that women are subject to forced

migration; campaigns to promote women's initiatives. Out of the estimated 420 respondents, 368 respondents passed the survey, which is 80% of the respondents. The remaining 20% did not pass the survey presumably on the basis of Internet connections, in the target AO in the summer many residents of Jailoo, where there is a connection, etc. Below is a table with the volume of selections in each AO:

| N⁰ | AO        | General population | Μ         | F         |
|----|-----------|--------------------|-----------|-----------|
| 1  | Bel       | 13 371/70          | 6529/35   | 6215/35   |
| 2  | Toolos    | 22 586/80          | 11 361/40 | 11 225/40 |
| 3  | Ak-Turpak | 17 108/70          | 8513/35   | 8595/35   |
| 4  | Orozbekov | 13 422/70          | 6672/35   | 6750/35   |
| 5  | Kyzyl-Tuu | 29 294/100         | 14636/50  | 14658/50  |
| 6  | Kara-Bura | 18 830/70          | 8930/35   | 9900/35   |

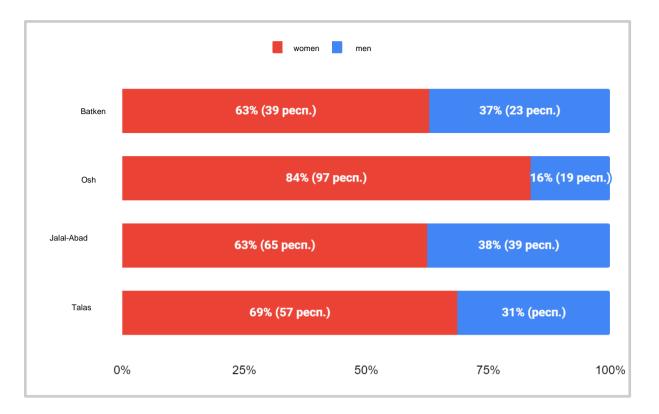

Response data:

|-----------|-------------------|
| Jalalabad | 30,93% (104 респ) |
| Talas     | 16,64% (83 респ)  |

Gender ratio of respondents by region:

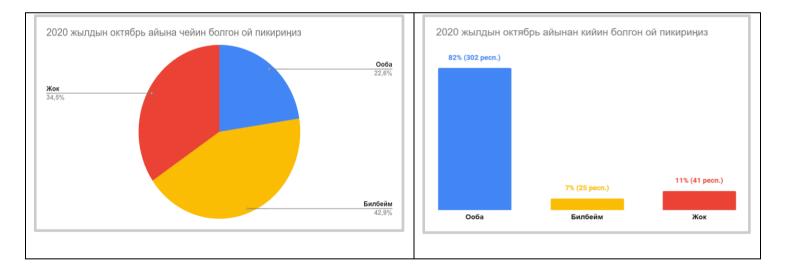

Respondents' answers to questions about the survey topic:

1. In your village / Aiyl Okmotu, have you heard about local initiatives for women's community development?

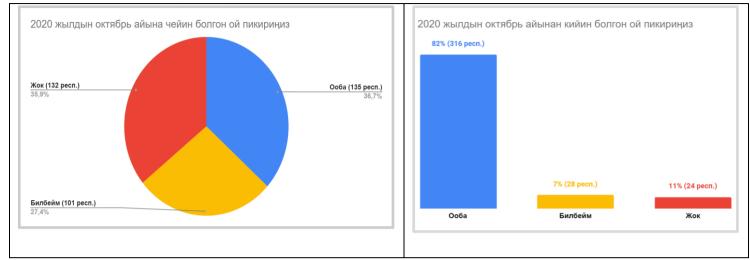

| Respondents' answers | Till October 2020     | After October 2020    |
|----------------------|-----------------------|-----------------------|
| Yes                  | 38% (140 respondents) | 84% (309 respondents) |
| Do not know          | 23% (85 respondents)  | 7% (26 respondents)   |
| No                   | 39% (143 respondents) | 9% (33 respondents)   |

# 2. Have you heard about local women's peace initiatives in your village / aiyl okmotu? \*

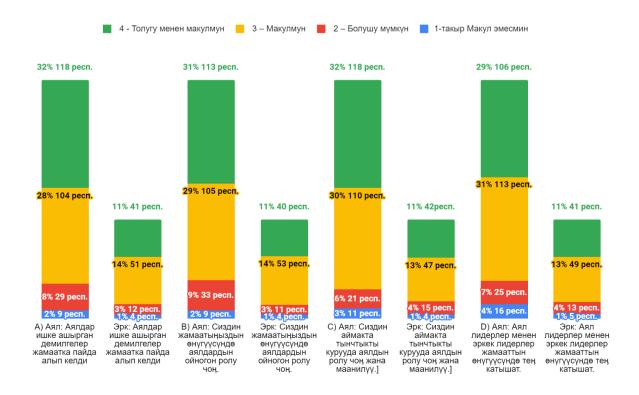

| Respondents' answers | Till October 2020       | After October 2020    |
|----------------------|-------------------------|-----------------------|
| Yes                  | 22,6% (83 respondents)  | 82% (302 respondents) |
| Do not know          | 42,9% (158 respondents) | 7% (25 respondents)   |
| No                   | 34,5% (127 respondents) | 11% (41 respondents)  |

# **3.** Have you heard about any successful women's initiatives in your village / aiyl okmotu toward community development? \*

| Respondents' answers | Till October 2020       | After October 2020    |
|----------------------|-------------------------|-----------------------|
| Yes                  | 38,7% (135 respondents) | 82% (316 respondents) |
| Do not know          | 27,4% (101 respondents) | 7% (28 respondents)   |
| No                   | 35,9% (132 respondents) | 11% (24 respondents)  |

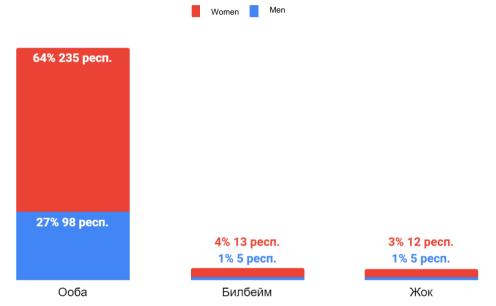

# 4. Leave your comments on the following posts. Blue (1) - I do not agree at all, - (2) Red -Probably, Yellow (3) - I agree, Green (4) - I completely agree \*

**5.** Have you changed your mind about the role of women in peacebuilding and community development?

| Yes         | 90% (333 respondents) |
|-------------|-----------------------|
| Do not know | 5% (17 respondents)   |
| No          | 5% (18 respondents)   |

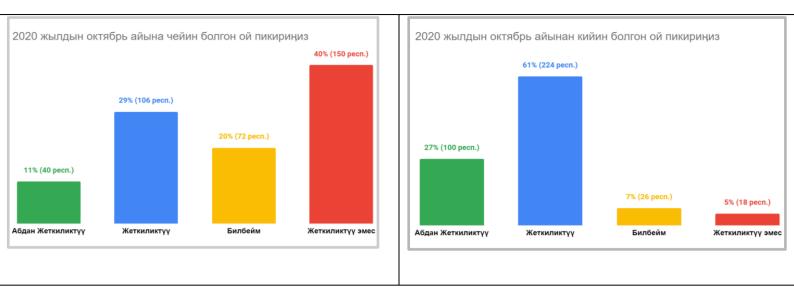

#### Responses of respondents in gender relations:

5.1. Why do you change your mind or not? Discuss your answer. (below are the most common categories of respondents' answers)

| A lot of useful work has been done   |
|--|
| The success of education and participation in various peace-building activities has led to a     |
| change   |
| It turns out that women can be just as successful as men   |
| On the basis of a pilot project in our village, various competitions, events, lessons learned, a |
| positive change in attitudes   |
| My wife's attitude has changed for the better,   |
| The work done by rural women is based on economic growth   |
| Economic growth in our village, women becoming deputies, becoming entrepreneurs                  |
| Mutual aid groups were formed, and economic growth was observed                                  |
| Women deputies came out, women attracted grants to the village, self aid groups are working      |
| I changed my mind because of the great success of the women in the village                       |
| I do not participate in events   |
| My wife's success changed my mind  |
| The village is developing, developing and supporting medicine                                    |
| I totally agree that hasn't changed  |
| Do not know  |
| No   |

6. To what extent is information available on local initiatives and projects available?\*

| Respondents' answers | Before October 2020   | After October 2020    |
|----------------------|-----------------------|-----------------------|
| Very available       | 11% (40 respondents)  | 27% (100 respondents) |
| Available            | 29% (106 respondents) | 61% (224 respondents) |
| Do not know          | 20% (72 respondents)  | 7% (26 respondents)   |
| Not available        | 40% (150 respondents) | 5% (18 respondents)   |

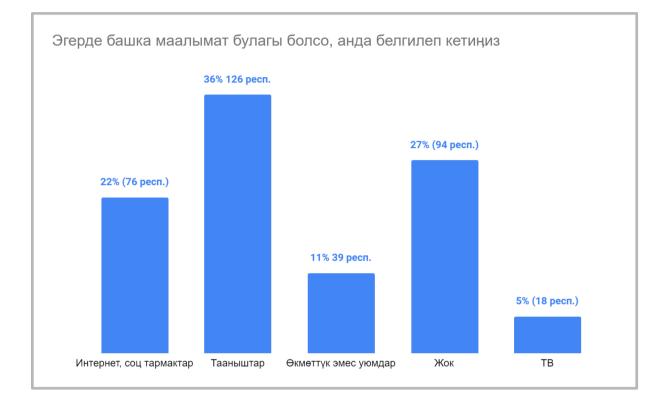

#### 6.1. From what sources did you learn about women's initiatives? \*

| Respondents' answers  | Results               |
|-----------------------|-----------------------|
| Friends, neighbors,   | 61% (228 respondents) |
| relatives, colleagues |                       |
| Internet and social   | 31% (114 respondents) |
| media                 |                       |

| TV                        | 6% (21 respondents) |
|---------------------------|---------------------|
| Local                     | 2% (7 respondents)  |
| authorities/organizations |                     |
| Newspapers                | 1% (2 respondents)  |

#### 6.2. Please indicate, if there is another source

| Respondents' answers | Results               |
|----------------------|-----------------------|
| Friends              | 36% (126 respondents) |
| No other sources     | 27% (94 respondents)  |
| Internet             | 22% (76 respondents)  |
| Non-governmental     | 11% (39 respondents)  |
| organizations        |                       |
| TV                   | 5% (18 respondents)   |

### 1. General Information

International Labour Organization with partners UN Agencies IOM and UN Women as Recipient UN Organizations (RUNOs) are jointly implementing a national project funded by the United Nations Peacebuilding Fund (PBF), on "empowering women and girls affected by migration for inclusive and peaceful community development" in the Kyrgyz Republic.

This joint project proposes a comprehensive approach to promote an enabling community and policy environment that is conducive to women and girls' empowerment. A key goal is to encourage women and girls to actively engage in peacebuilding and community development in regions that are affected by migration and prone to conflict, particularly in the South of Kyrgyzstan.

The project will contribute to the empowerment of women and girls most vulnerable to migration by, improving their participation in peacebuilding and inclusive community development, enhancing their access to socio-economic opportunities, and building capacities of life and business skills of women and girls.

To achieve the expected results within the framework of Outcomes 2, the ILO signed implementation agreement with Alliance of Trainers and Consultants (ATiC). Within the period of February – April 2021 ATiC has performed the following activities and tasks in the pilot regions of the project in the target regions/oblasts of Osh, Batken, Jalal-Abad and Talas

|                         | Project activities  | Clarify   |
|-------------------------|---|---|
| Activity<br>2.2.3b :and | <ul> <li>Number of women self-employed/operators of income generation activities who access VCD opportunities in a specific sector (for instance in agribusinesses)</li> <li>a) To establish data base of potential 200 applicants for Mentorship program with detailed business concept plan</li> <li>b) Organize technical skills courses for 30-40 women and girls;</li> <li>c) Organize and conduct VCD networking meetings for 60-70 women and girls;</li> <li>d) Organize and conduct master –classes for 20-30 women and girls;</li> <li>e) Conduct individual consultations for : 150 women and girls;</li> </ul> | All stimulation access<br>to economic opportu-<br>nities activities to the<br>extent possible should<br>be organized and con-<br>ducted online consid-<br>ering of COVID-19 situ-<br>ation<br>VCD activities should<br>be organized with in-<br>volvement of employ-<br>ers association (JIA) |

### 2. Financial Literacy training in 6 municipalities

Date of trainings: June 8-25, 2021 Target group/participants: Target Aiyl Okmotus – Akturpak, Orozbekov, Bel, Toolos, Kara-Buura, Kyzyl-Tuu Duration of each training: 3 days long

Training goal: Improvement of knowledge and skills on financial literacy among women and girls affected by migration attended zoom or online courses on financial education.

Access to finance is a fundamental condition for poverty reduction, job creation, income generation and social protection. However, access to finance alone does not automatically yield social and economic benefits. For this purposes women and girls affected by migration must be able to make informed choices about when and when not contract debt, how best to save and what to look out for in other financial services and products.

These activities directly contributed to achieve **Output Indicator 2.3.3 an increased knowledge and skills on financial literacy among trained women (zoom and online course)**.

As a result of the current work 308 project beneficiaries attended GET Ahead training and in average knowledge increase was about 39,4 % though target was 20 %.

#### Preparation of online training

Preparation stage included mobilization of target groups to the trainings. First, participants had to fill out and send online application (via google link) to the training.

Within the previous contract, ATiC has developed applications database comprised of 570 women from project target areas there is a high interest in project activities.

Some of them were engaged in GET AHEAD training, and the database was used to select participants for Financial Literacy trainings and technical skills development courses.

Out of database 308 participants were enrolled in Financial Literacy trainings. All participants were mobilized in groups comprising, around 15 participants. For each training group were created WhatsApp groups that are administered by trainers with the aim to provide information and discuss time, duration, training program, etc. with participants.

Also, created WhatsApp groups are used for sending zoom link to the training, homework check, question and answers and providing consultations on financial issues.

Before the start of trainings, the participants were provided with handouts (Financial Plan / workbook, that were delivered to target areas and distributed to participants.

Also, trainers prepared online application forms as pre-test of the training, post-test of the training, training evaluation form.

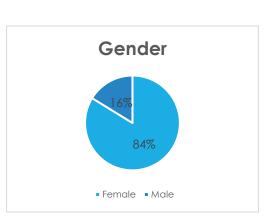

Besides, participants were instructed about the ZOOM application that should be used for online trainings.

The lists of participants were prepared to each training to cover communication costs of participants (internet for zoom) by the project.

#### Conducting of online training

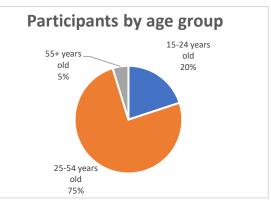

Prior to the start of trainings, participants were requested to fill out and send online pre-test of the training (via google forms) in order to fix participants initial knowledge level.

Online trainings were conducted in the evening as participants - rural women had a lot of housework during the day time or some of them had their main job or had to care after their children. Therefore, only evening time was convenient to take part at the training.

As shown in the chart 2.1 age of the majority of training participants is in the bracket of 25-54 and therefore domestic work and family duties influenced a lot on training dynamic and involvement in the training exercises.

The most interesting sessions were on the savings, loans and developing the financial plan. Participants liked the combination and online and zoom training.

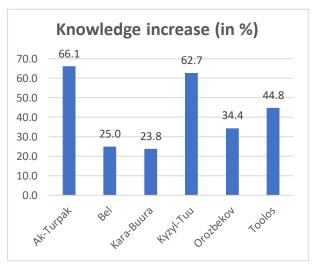

Many of participants were actively involved in training for three days, but unfortunately the Internet connection was weak, sometimes they visited other participants home/joined other participants (at neighbourhood) with better internet connection.

| Municipalities | # of women in da- | # of trainings | # of training | # of         |
|----------------|-------------------|----------------|---------------|--------------|

|                |                   |                |               |              |

Table 2.1 Information on Financial Literacy training conducted during June 8-25, 2021

#### Key results based on pre/post-tests:

Overall, 308 people participated both in the pre and post training tests. The prepost test results report that the participants increased their knowledge by 39,4 % in average. All the target locations exceeded expected target of at least 20% knowledge increase after the training. Among the six locations, Ak-Turpak and Kyzyl-Tuu participants demonstrated over 60% increase knowledge. These results demonstrate that women participants demonstrated knowledge increase much higher than men (it can also be noted that only 7 out of 296 participants were men). Similarly, young people be-

tween 14-24 years old demonstrated higher % increase in knowledge than older age participants.

#### Main challenges and conclusions

Weak internet connection in target villages: some participants were not able to participate all days of the training due to weak Internet connection; some participants were disconnected during trainings;

Zoom application:

Many participants was new how to use Zoom at the beginning of trainings;

Online forms:

There were cases when some women filled out and sent online application several times, the same situation was with the pre/post-tests;

Activity of participants:

The activity of women was high from the first days;

Equipment:

There were some difficulties with mathematical calculations in topics related to loans and saving.

# 3. Additional support activities to increase access to economic opportunities.

For identification of the additional support measures to increase access to economic opportunities ATiC identified and contracted 6 local consultants whose responsibilities are:

- 1) Review GET AHEAD action plans and identify at least 200 women with high potential to grow and include them in database:
- 2) Out of them select 30-40 participants for technical training
- 3) Organize process of engagement of women and girls in various technical training
- 4) Organize and conduct VCD network meetings for 60-70 women
- 5) Conduct individual and group business consultations for 150 women and girls;
- 6) Organize and conduct master classes and exchange visits

These activities were performed within the period of June – August 2021 and ultimate purpose was to assist women and girls affected by migration in increasing access to employment and self-employment opportunities. As shown in the table below within the reported period local consultants reviewed 579 business concepts and developed excel database of 269 women with high potential to grow. Out of them consultants selected women for various types of additional support measures, which were organized in reported period.

### 3.1. Technical training

As the result of the initial stage 74 project beneficiaries passed through 13 various technical training sessions. Pre-post tests organized during this process showed 130 % increase of knowledge in average. More detailed info is provided in the table below.

| #  | Technical trainings       | Pre-test | Post-test | % knowledge increase |
|----|---------------------------|----------|-----------|----------------------|
| 1  | IT / computer programming | 85%      | 100%      | 18%                  |
| 2  | SMM                       | 61%      | 85%       | 40%                  |
| 3  | Computer literacy         | 55%      | 86%       | 58%                  |
| 4  | Massage                   | 50%      | 95%       | 90%                  |
| 5  | Barbershop/haircut        | 47%      | 90%       | 91%                  |
| 6  | Garment/sewing            | 46%      | 90%       | 95%                  |
| 7  | Biogumus                  | 49%      | 100%      | 103%                 |
| 8  | Production of cookies     | 35%      | 90%       | 157%                 |
| 9  | Haircutting               | 33%      | 85%       | 162%                 |
| 10 | Culinary                  | 35%      | 95%       | 171%                 |
| 11 | Beekeeping                | 34%      | 100%      | 191%                 |
| 12 | Welding                   | 30%      | 95%       | 217%                 |
| 13 | Fast reading              | 25%      | 100%      | 300%                 |
|    |                           |          |           | 130%                 |

Technical training sessions took Fast reading place in large cities and regional Svarshik centers. Once selected each training Bee participant received financial support from the project to cover training fees. Funds were transferred to e-wallets and banking accounts Garmet/sewing of participants with obligation to pay only for courses. Thus we are supporting women and girls in increasing technical skills and Programming knowledge and at the same time provided opportunity to increase finan-

cial literacy and start using non-cash channels and financial services.

As a result technical training activities to the great extent contributed to expanding opportunities of women and girls affected by migration to employment opportunities. Majority of graduates reported that after the training the either received employment offer or applied obtained skills in income generating activities.

All detailed information on technical training sessions, including list of participants, prepost test, certificates and others is downloaded on the shared drive and links are provided in Annexes.

### 3.2. VCD meetings

Within the reported period 6 VCD meetings were conducted by local consultants with the support of ATiC team.

One was combined with master class in agricultural sector and 112 project beneficiaries attended the meeting. Meeting was conducted with participation of technical experts and potential suppliers of raw materials and buyers of production. As a result of the meeting participants received knowledge on modern agricultural technologies and at the same time strengthened market linkages with other players of various agro VCDs.

The other one due to COVID-19 limitations was conducted online via zoom. In total 65 participants attended the meeting. It was conducted in the format of speaker event and co-organized with JIA (employer's association). The purpose of the meeting was to extend business and market linkages for women and girls affected by migration engaged in agriculture, garment production and services.

#### 3.2 Master classes and exchange visits.

In total 129 project participants attended master classes and exchange visits organized by the project. Master classes were conducted offline in village municipalities and main topics were:

- 1) Production of cookies
- 2) Design of handicrafts
- 3) Production of bio-humus
- 4) Poultry keeping
- 5) Milk processing
- 6) Production of wood arts
- 7) Fitness instructor

All master classes were conducted by experienced entrepreneurs and experts in the corresponding spheres.

Exchange visits were conducted for the following sub-sectors:

- 1) Flowers planting
- 2) Production of milk products
- 3) Beekeeping
- 4) Branding and marketing
- 5) Production of handicrafts

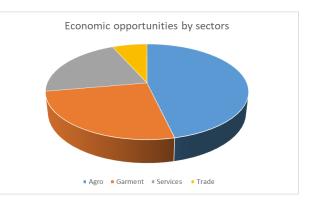

Exchange visits took place in province centers and large cities. Project paid for organization costs only, all other costs including travel were contributed by beneficiaries themselves.

In general, as per feedbacks from participants master classes and exchange visits contributed a lot to increasing of self-employment and business opportunities of women and girls affected by migration.

# 3.3. Individual consultations and increased access to economic opportunities

Individual consultations were conducted by local consultants for those participants who are interested in starting/expanding income generating activities. Major group comprised from so called GALS champions who received support from CDA (UN WOMEN) implementation partner to start/expand family business. About 10 participants from each village municipality received this type of support and local consultants assisted them in developing business plans and conduced consultation in other entrepreneurship areas like marketing, sales, bookkeeping, management etc. Other participants for individual consultations were selected from GET Ahead and Financial Literacy training participants, those who expressed interest in starting/expanding their businesses.

In total local consultants reported that 151 project beneficiaries have increased access to economic opportunities as a results of all project interventions, including entrepreneurship training and financial education and additional type of support measures. Division women by sectors confirmed results of VCD survey conducted at the beginning of the project. 46 % from agro

VCDs, 26 % from garments. 21 % -services and 7 % trade. At the same time there is a need to conduct additional entrepreneurship training support so we can sustain the progress achieved within the implementation of the project. The most suitable tool for this from our perspective is Start Your Business Program.

### 4. Project visibility

As part of the project to support the implementation of the project "Empowering women and girls subject to migration for inclusive and peaceful development of communities", ATiC attracts a media expert to develop non-commercial videos (video blogs, posts, broadcasts) of an educational nature with the aim of making it accessible and simple talk about the ILO's "Financial Literacy" Programs, "Get Ahead", "Start and Improve Your Business" in organizing and conducting trainings for beneficiaries.

The media expert continued the implementation of the list of tasks and activities required to obtain the following results: coverage of the implementation of activities within the framework of the project:

- Distribution of training materials and promotion on social networks like Facebook, Instagram, broadcasts, posts, blogs, podcasts using hashtags for social pages, -Organization of live broadcasts.

https://www.instagram.com/getahead\_kg/

https://www.facebook.com/wlsme.kyrgyzstan/?ref=page\_internal

Additionally National Bank of the Kyrgyz Republic launched online course on financial literacy with the support of the project and ATiC was also recongnized as national insitution supporting the online course.

More information is provided on the link below

### 5. Monitoring, Evaluation, Learning

#### 5.1. Monitoring, evaluation, learning activities

During the reporting period, ATIK closely monitored its activities against its' indicators and targets. Below are key highlights on how ATIK monitored and tracked progress against indicator targets:

- Access to economic opportunities. Outcome 2 indicator: Developed tools to measure Outcome Indicator 2 on access to economic opportunities. The tool has been reviewed and approved by GPI coordination. In addition, ATIK drafted a definition on how ATIK will be measuring this indicator. In mid-August, ATIK launched to administer the survey. The data collection is in process and expected to be completed during the first 2 weeks of September 2021.
- Access to financial services and products. Output Indicator 2.3.3 b. on accessing to financial products and services. ATIK designed a tool to measure access to financial products and services. The tool has been reviewed and approved by GPI coordination. ATIK drafted a definition on how ATIK will be measuring this indicator. The data collection is in process and expected to be completed during the first 2 weeks of September 2021.
- Mentorship or technical support training: Developed tools to track mentorship or additional technical support of the participants (application form to get registered for the technical support activities, technical support quality assessment). Uploaded at google forms (Please see the Indicator Tracking Matrix below).
- Financial Literacy training. ATIK collected, processed, and analysed data on applications collected, pre training and post training tests, and training satisfaction assessment by the participants (Please see the Indicator Tracking Matrix below);
- Online Financial Literacy training. ATIK collected, processed, and analysed data on pre and post training tests to measure knowledge increase and online

training quality assessment by the participants (the results and annexes are in the Matrix table below);
